(o) The Commission can not subscribe to the contention that the state of relativity between commodities which features the classification as the real foundation of its structure must necessarily extend to commodity rates. As a matter of fact the reason why a commodity rate is established is that conditions require a departure as to the particular article from this very plan of grouping together certain articles. Those exceptional conditions do not necessarily apply to all commodities; otherwise the class rates would give way entirely to the commodity rate. Nor is the idea of classification relationship necessarily to be followed as between carload and less-than-carload commodity rates on the same article. Conditions may demand a departure from the classification basis as to carload and not as to less-than-carload traffic. Macaroni & Noodle Mfrs. v. A. G. S. R. R., 50 I. C. C. 289, 292.

(p) Whether or not commodity rates are constructed with definite relation to class rates for the classes to which commodities are assigned, a commodity rate adjustment as a whole should have due regard for the corresponding class rate adjustment. That is to say the same basic principles should be observed. Natchez Chamber of Commerce v. L. & A. Ry., 52 I. C. C. 105, 121.

(q) If a commodity rate is established between certain points on a particular article which ordinarily moves under class rates in the territory in which such points of origin and destination are located, it is presumed to be the result of special circumstances attending the transportation of that article between such points. Porter Mirror & Glass Co., v. Director General, 59 I. C. C. 308, 311.

(r) In the last analysis the presump-

tion that a commodity rate higher than the class rate which would otherwise apply is unreasonable is predicated on the antecedent presumption that the class rate is fixed at the highest reasonable figure. Rath Packing Co. v. Director General, 59 I. C. C. 427, 428.

(s) In the absence of other evidence that a commodity rate is unreasonable or unduly prejudicial the fact that it is a moderately greater or less percentage of a corresponding class rate is not sufficient ground for condemning it. Greater Des Moines Committee v. Director General, 60 I. C. C. 403, 404.

(t) So many elements enter into the determination of a commodity rate that it cannot be said that a commodity rate must always bear a fixed relation to the corresponding class rate, even as between competing points. Macon Chamber of Commerce v. N. Y. N. H. & H. 63 I. C. C. 327, 332.

(u) In case of conflict the commodity tariff takes precedence over the classification. Queen City Iron & Metal Co. v. Director General, as Agent, 73 I. C. C. 618, 619.

(v) Carriers contend that their commodity rates on rails are on an improper basis, pointing to the fact that most iron and steel articles generally move on class rates. Comparisons were submitted of the rates on steel rails with rates on steel billets and pig iron, which take class rates, but in the absence of a showing as to the relative movement, such comparisons are not convincing. Rails and Crossties from Eastern Points to Canada, 74 I. C. C. 3, 5, 6.

(w) Commodity rates are not unreasonable merely because they exceed the corresponding class rates. Lustig-Burgerhoff v. Director General, as Agent, 74 I. C. C. 395.

(x) If it is true that the use of the class rate structure as a basis for commodity rates would remove some of the flexibility which is generally understood to be a peculiar part of every commodity rate, as much may be said of any distance scale of commodity rates whether constructed with or without regard to corresponding class rates. Memphis-Southwestern Investigation-Commodity rates, 77 I. C. C. 473, 497.

(y) So many elements enter into the determination of a commodity rate that it can not be said that a commodity rate must always bear a fixed relation to the corresponding class rate, even as between competing points. Fairmont Creamery Co. v. Director General, 68 I. C. C. 507, 513.

(z) So many elements enter into the determination of a commodity rate that it can not be said that a commodity rate must always bear a fixed relation to the corresponding class rate, even as between competing points. Kerr & Co. v. Director General, 68 I. C. C. 653, 655.

(aa) In case of conflict the commodity tariff takes precedence over the classification. Queen City Iron & Metal Co. v. Director General, as Agent, 73 I. C. C. 618, 619.

(bb) Commodity rates charged on petroleum and its products from Findlay, Ohio, to Indianapolis, Ind., found unreasonable to extent they exceeded 90 per cent of sixth class, which is the general basis of rates on this traffic throughout central territory. Reparation awarded. National Refining Co. v. Director General, as Agent, 73 I. C. C. 668.

(cc) Commodity rates in excess of the class rates are not unreasonable. Lustig-Burgerhoff Co. v. Director General, 74 I. C. C. 395.

(dd) Rails, steel: Carrier contend that their commodity rates on rails are on an improper basis, pointing to the fact that most iron and steel articles generally move on class rates. Comparisons were submitted of the rates on steel rails with rates on steel billets and pig iron, which take class rates, but in the absence of a showing as to the relative movement, such comparisons are not convincing. Rails and Crossties from Eastern Points to Canada, 74 I. C. C. 3, 5, 6.

(ee) Commodity rates are not unreasonable merely because they exceed the corresponding class rates. Lustig-Burgerhoff v. Director General, as Agent, 74 I. C. C. 395.

(ff) Tariff provided that commodity rates on bulk shipments should be computed not to exceed the applicable class rates, and to that extent shipments of apples, in bulk, from Mosier, Oreg., to Louisville, Ky., found overcharged and reparation awarded. Holmes v. Director General, as Agent, 74 I. C. C. 668.

(gg) If it is true that the use of the class rate structure as a basis for commodity rates would remove some of the flexibility which is generally understood to be a peculiar part of every commodity rate, as much may be said of any dis-

tance scale of commodity rates whether constructed with or without regard to corresponding class rates. Memphis-Southwestern Investigation-Commodity rates, 77 I. C. C. 473, 497.

(hh) While the substitution of commodity rates based on mileage for a group adjustment must necessarily result in many instances in different rates to points formerly grouped together and accorded the same rates, there is no sound reason why, as a general rule, commodity rates constructed on a distance basis should not be graded according to distance in substantially the same manner as class rates. Memphis-Southwestern Investigation, 77 I. C. C. 473, 497

(ii) It does not necessarily follow that because the percentage relationship between proposed commodity rates and the commodity rates applicable in other territories is less than the percentage relation which the class rates in the territory under consideration bear to the class rates in other territories, the proposed commodity rates are reasonable. Memphis-Southwestern Investigation, 77 I. C. C. 501.

(jj) Unusual for a commodity rate to exceed applicable class rate. Grain from Memphis, 80 I. C. C. 141.

(kk) The classification generally imposes the highest rate which a particular commodity should bear under normal conditions. A commodity rate which is higher than the class rate is an abnormality which on its face requires special justification. John Morrell Co. v. C. B. & Q. R. Co., 81 I. C. C. 200, 201.

(ll) Peculiar conditions surrounding commodity rates negative the presumption of a necessarily close percentage relationship between classes and commodities. Carnation Milk Products Co. v. A. & W. Ry., 81 I. C. C. 699, 701.

(mm) There is no well-defined basis of relating commodity rates on steel articles to class rates in trunk-line territory. Iron and Steel to Virginia Cities, 83 I. C. C. 82, 86.

(nn) So many elements enter into determination of a commodity rate that it can not be said that a commodity rate must bear a fixed relation to corresponding class rate, even as between competing points. Wood Iron & Steel Co. v. P. R. R. Co., 83 I. C. C. 503, 505.

II. APPLICATION AND CONSTRUCTION.

See Application of Rates; Tariffs §7.

§2½. In general.

CASES 1887-1908

(a) It is often impracticable to establish different rates on the same commodity from practically the same locality to the same market, although the distances vary. Coxe v. Lehigh Valley R. Co. (Com.) 3 I. C. R. 460.

IMPORTANT CASES SINCE 1908

(b) Publication of specific commodity rates to cover all possible combinations lower than through class rates is a matter which can not be accomplished at once, nor would it seem practicable. Memphis Freight Bureau v. St. L. I. M. & S. Ry. Co., 39 I. C. C. 224, 240.

(c) Rate on any commodity to or from any intermediate point shall not exceed the rate on the same commodity to or from the next more distant point to or from which a lower rate is charged by a greater amount than the rate to or from the intermediate point on the class to which the commodity belongs exceeds the rate on the corresponding class to or from the more distant point. Rates between C. F. A. Territory and Points on the C. & O. Ry., 47 I. C. C. 576, 580.

(d) While volume of movement is not the only consideration in the establishment of commodity rates, it is an important element which, other considerations being equal, may and not infrequently does become determinative. E. I. DuPont de Nemours & Co. v. Director General, 58 I. C. C. 427, 428.

(e) In southwestern territory a great many commodity rates, substantially lower than the class rates, apply on most traffic moving in carloads, which has the effect of making the class rates largely paper rates. Certain-Teed Products Corp. v. A., T. & S. F. Ry. Co., 73 I. C. C. 82, 91.

(f) It is a well settled doctrine that commodity rates may not be applied by analogy. Cutler Hammer Mfg. Co. v. Director General, 88 I. C. C. 600, 602.

C. 26; Chevrolet Motor Co. of Calif., v. Director General, 78 I. C. C. 297; Keith Co. v. Director General, as Agent, 83 I. C. C. 167.

§3. Specific commodity rating.

IMPORTANT CASES SINCE 1908

(a) A shipment moving under a commodity tariff is not subject to any regulation not contained in that specific tariff. Wheeler Lumber Bridge & Supply Co. v. Astoria & Columbia River R. R. Co., 20 I. C. C. 10.

(b) The Commission's tariff regulations have continuously contained a rule that the naming of a commodity rate on any article takes that article out of the class rates between the same points. This rule, however, does not prevent the alternative offering and use of class and commodity rates contained in the same tariff. Wheeler & Motter Mercantile Co. v. C. B. & Q. R. R. Co., 20 I. C. C. 141, 145.

(c) Where a specific rate is established on wax paper, such rate must be applied to all grades and qualities of wax paper regardless of the use to which it is put. Pacific Coast Biscuit Co. v. O. R. R. & N. Co., 20 I. C. C. 178, 180.

(d) A commodity rate legally established remains in effect and is the only legal rate until canceled, notwithstanding a subsequently published conflicting rate. Jewel Tea Co. v. P. Co., 46 I. C. C. 314, 316.

ALL OTHER CITATIONS

W. 267, 272; Dewey Bros. Co. v. P. C. C. & St. L. Ry. Co., Unrep. Op. 2117; Worden-Allen Co. v. C., M. & St. P. Ry. Co., 42 I. C. C. 362, 363; Boardman Co. v. A. T. & S. F. Ry., 46 I. C. C. 352, 354; Carrollton Excelsior & Fuel Co., Ltd., v. N. O. & N. E. R. R., 49 I. C. C. 6; George C. Holt v. Hines, 55 I. C. C. 170; Jacob E. Decker & Sons v. Director General, 55 I. C. C. 433; Gimbel Bros. v. Barrett, 218 Fed. 880, 886; Galveston, H. & S. A. Ry. Co. v. Lykes Bros., 294 Fed. 968.

§4. Creation subsequent to shipment.

Important Cases Since 1908

(a) Complainant attacked as unreasonable and in violation of the fourth section rate of 54.5 cents per 100 lbs., on wet nitro cellulose from Norfolk, Va., to Carneys Point, N. J. Contemporaneously there was in effect from Hopewell thru Norfolk to Carneys Point, by the route of movement from Norfolk, an all rail commodity rate on this commodity in carloads, of 38.9 cents per 100 lbs. The tariff containing this rate provided, in accordance with Rule 77 of Tariff Circular 18-A, that upon application therefor rates would be established from or to intermediate points not exceeding those from or to more distant points on one day's notice. The complainant did not make application prior to the shipments, and it had not been published. HELD, rate charged was unreasonable to the extent it exceeded 38.9 cents per 100 lbs. Reparation with interest awarded. Du Pont de Nemours & Co. v. Director General, 55 I. C. C. 247.

(b) Commodity rates charged on petroleum and its products from Findlay,

Ohio, to Indianapolis, Ind., found unreasonable to extent they exceeded 90 per cent of sixth class, subsequently established, which is the general basis of rates on this traffic throughout central territory. Reparation awarded. National Refining Co. v. Director General, as Agent, 73 I. C. C. 668.

ALL OTHER CITATIONS

C. 147; Mississippi Valley Iron Co. v. C., B.& Q. R. R., 64 I. C. C. 441; Armour & Co. v. C. & N. W. Ry., 64 I. C. C. 641; Empire Refineries, Inc. v. Director General, 68 I. C. C. 648; Winslow & Co. v. Director General, 77 I. C. C. 387.

III. REASONABLENESS AND DISCRIMINATION.

§5. In general.

See Advanced Rates §5 (3); Discrimination; Distance Rates; Reasonableness of Rates.

CASES 1887-1908

(a) The commodity tariff applying on traffic from the Middle West to Pacific Coast territory names rates upon over 400 commodities in carloads only, leaving the movement of these commodities in less than carloads to be governed by the greatly higher class rate provided for such shipments and producing a differential as between carload and less than carolad quantities which, even under the peculiar circumstances of this traffic, is in many cases excessive where there is any general movement in less than carloads or other commercial reason for a corresponding less than carload rate; and the tariff is also to some extent unlawful in that it specifies a number of varied commodity rates, especially for the hardware schedule, and unduly prevents in some instances the shipment of articles of the same class in mixed carloads at carload rates. Business Men's League v. A., T. & S. F. Ry. Co. et al, 9 I. C. C. 318.

(b) The commodity tariff applying on traffic from the Middle West to the Pacific Coast territory is, to some extent, unlawful, in that it specifies a number of varied commodity rates,—especially for the hardware schedule, and unduly prevents, in some instances, the shipment of articles of the same class in mixed carloads at carload rates. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(c) The present wheat rate of 30½ cents from Wichita to Galveston is excessive to the extent of 2 cents per 100 pounds. Mayor and City Council of Wichita v. Atchison, T. & S. F. R. Co., 9 I. C. C. 534.

(d) The rate of 28½ cents per 100 pounds charged by the different lines running to Wichita for the transportation of lumber from Camden, Ark., and Trinity, Tex., to Wichita, is excessive. Mayor and City Council of Wichita, Kansas v. Chicago, Rock Island & Pacific R. Co., 9 I. C. C. 569.

(e) The Texas & Pacific Railway Company's rate on beef cattle in carloads from Ft. Worth, Tex., to New Orleans, La., is 42½ cents per 100 lbs., and $15 per car additional when shipment is made in lots of less than ten carloads. Upon complaint against the imposition of the additional $15 per car,—HELD, that the charge of $15 per car in addition to the rate of 42½ cents per 100 lbs. is unreasonable when applied to single carload shipments. New Orleans Live Stock Exchange v. Texas & P. R. Co., 10 I. C. C. 327.

(f) A wheat rate of 75 cents per 100 pounds from Nebraska common points to California terminals via the C., B. & Q. Ry., through Denver and thence via the Union Pacific and Southern Pacific railroads to destination is unreasonable and excessive. It is manifestly so as compared with the through rate of 55 cents on corn over that route, and a through rate of 55 cents on both corn and wheat from Nebraska points via the Union Pacific and Southern Pacific to those destinations. Any rate on wheat over the route in question from these points of origin to California terminals in excess of 65 cents per 100 is unreasonable, and complainant is entitled to reparation on his shipments on that basis, but is not entitled to an order of reparation on his shipment to Reno, Nev. A. J. Poor Grain Co. v. C. B. & Q. Ry. Co. et al, 12 I. C. C. 418.

(g) Complainant attacked the commodity rate, charged on wheat from Nebraska points through Denver via the

C. B. & Q., U. P., and S. P., to California, as unreasonable. The shipment moved from Marquette and Phillips, Nebr., to Reno, Nev., and California terminals. Rate charged 75c, the rate on corn being 55c via this route as well as via the U. P., and S. P. HELD, rate attacked unreasonable to extent it exceeded 65c, reparation awarded. A. J. Poor Grain Company v. C. B. & Q. Ry., 12 I. C. C. 418.

(h) Upon full hearing of this complaint and consideration of the matter submitted, it is the opinion of the Commission that the rate of 22 cents per 100 pounds applying on shipments of salt in carloads from New Orleans, La., to Cullman, Ala., is unduly excessive, unreasonable and unjust, and that a rate of 20 cents per 100 pounds for such transportation would be reasonable and just. The Farmers Warehouse Co. v. Louisville & N. R. R. Co., 12 I. C. C. 457.

(i) Rates on alcohol, all kinds, from Chicago and from Missouri River common points to north Pacific coast terminals and to certain points in Oregon, are 85 cents per 100 pounds in carload lots and $1.25 per 100 pounds in less than carload lots. These rates are less than the rates from same points of origin on petroleum products, whisky, or paint. Complainant asks for reduction in the rates on denatured alcohol. The record shows that denatured alcohol is manufactured in California and is sold in the north Pacific coast cities at a price which could be met by the eastern product only by reducing the transportation charges to nothing. An effort to place denatured alcohol upon a parity with proof spirits would lead either to a large increase in the charges on the proof spirits or a practical wiping out of the charges on the denatured article. Such increase in the charges on the proof spirits would probably render futile all effort to compete with the California product. Rates complained of are not shown to be unreasonable per se, unduly discriminatory, or unjustly prejudicial. Complaint dismissed. R. R. Commission of Oregon v. Chicago & Alton R. R. Co. et al, 12 I. C. C. 541.

IMPORTANT CASES SINCE 1908

(j) The fact that there is a commodity rate on the articles in question lower than rates on other iron articles rated fifth class is not of itself convincing that the rate in question is unduly low and should be increased. Iron and Steel from Pacific Coast Points, 38 I. C. C. 545, 548.

(k) Commodity rates, however, are made with greater regard for the actual volume of movement than class rates, and relative commodity rate adjustments can only be reviewed satisfactorily when the relative volume of movement of the various commodities involved is known. Commercial Club of Mitchell, So. Dak. v. A. & W. Ry., 46 I. C. C. 1, 14.

(l) Commodity rates are not necessarily unreasonable merely because higher than class rates which have been depressed by water competition. Aetna Explosives Co. v. S. A. L. Ry., 51 I. C. C. 675, 676.

(m) And the reasonableness of commodity rates is not dependent solely upon regularity of movement. Swift & Co. v. Director General, as Agent, 62 I. C. C. 618, 623.

(n) Proposed restricted application of commodity rates on grain and grain products from points in Kansas, Nebraska and eastern Colorado to north Pacific coast and California terminals and to intermediate points, the effect of which would be to cancel the joint rates now applicable from points in the origin territory when reshipped from Missouri River or Interior markets over lines other than the carrier originating the traffic, leaving in effect over such routes higher combinations of rates to and from the markets, found not justified. Routing on Transcontinental Grain and Grain Products, 73 I. C. C. 116.

(o) Testimony to the effect that commodity rates are not ordinarily maintained on the traffic and in the territory here involved and that the class rates charged represent the normal basis. HELD, such evidence falls short of a satisfactory rebuttal of the presumption of unreasonableness inhering in joint rates which exceed the aggregate of intermediates. Pittsburgh Steel Co. v. Director General, as Agent, 73 I. C. C. 555, 556.

(p) Carriers contend that their commodity rates on rails are on an improper basis, pointing to the fact that most iron and steel articles generally move on class rates. Comparisons were submitted of the rates on steel rails with rates on steel billets and pig iron, which take class rates, but in the absence of a showing as to the relative movement, such comparisons are not convincing. Rails and Crossties from Eastern Points to Canada, 74 I. C. C. 3, 5, 6.

(q) While the substitution of commodity rates based on mileage for a group adjustment must necessarily result in many instances in different rates to points formerly grouped together and accorded the same rates, there is no sound reason why, as a general rule, commodity rates constructed on a distance basis should not be graded according to distance substantially the same manner as class rates. Memphis-Southwestern Investigation, 77 I. C. C. 497.

(r) It does not necessarily follow that because the percentage relationship between proposed commodity rates and the commodity rates applicable in other territories is less than the percentage relation which the class rates in the territory under consideration bear to the class rates in other territories, the proposed commodity rates are reasonable. Memphis-Southwestern Investigation, 77 I. C. C. 501.

I. TEST OF STATUS.

§½. In general.

See Hours of Service Law.

IMPORTANT CASES SINCE 1908

(a) The principal test of common carriage is whether there is a bona fide holding out coupled with the ability to carry for hire. Atchison, Topeka & Santa Fe Ry. Co. v. Kansas City Stock Yards Co., 33 I. C. C. 92, 100.

(b) Complainant, a switching road in the Chicago district, owning 1.68 miles of main track and 3.50 miles of yard track and sidings, all standard gauge, having equipment of 6 engines and 54 freight cars, connecting directly or having trackage rights, with common carriers in said district, holding itself out as a common carrier and complying with federal laws and state requirements, issuing bills of lading and waybills on through shipments, requests the Commission to reconsider its status as a common carrier so it might participate in through rates and receive a proportion thereof either under absorption tariffs of other carriers or as divisions of thru rate. The complainant was owned and controlled by one large industry located on its tracks. HELD, complainant is a common carrier and entitled to just compensation for its service. Chicago & Calumet River R. R. v. Director General, 55 I. C. C. 194.

(c) The inherent character of the traffic and the facts in each case are determinative of the intrastate status of a common carrier rather than the mere billing, place of passing of title, or other incidents of commerce. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 162.

(d) Fact that portions of a line were formerly mere plant facilities can not justify different treatment to the plant or its owners, since said portions of the lines were properly acquired by a common carrier duly organized, treated, and regulated as such, and are no longer plant facilities, but part of the public institution. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 189.

(e) It does not necessarily follow that all roads complying with the laws and regulations governing common carriers become common carriers by virtue of such compliance alone. Wyandotte Terminal R. R. Co., 62 I. C. C. 1, 5.

(f) The size of a road does not determine its character. Beaver Land Co. v. Director General, 66 I. C. C. 285, 287.

(g) The extent to which, and the time during which, a switching road acts as an agency and the extent and the time as to which it acts as a common carrier can not depend on its mere say-so. It can not for years acquiesce in the role of agent and directly disclaim the responsibilities attaching to an independent common carrier, and immediately, upon its mere asseveration as to its status, or upon allegation or proof that it is not fully compensated by its principals for the service it has been claiming to perform, as agent only, acquire the status of a common carrier and exert the latter's rights against connecting railroads. Switching Charges at Peoria, 77 I. C. C. 43, 49.

(h) The normal use of a steam tug in New York Harbor is a use in interstate commerce. Rivara v. James Stewart & Co., 195 N. Y. S. 841.

(i) Fact that stock of a short line is not owned directly by industry served by it affords no ground for exempting it from application of such rules as may be reasonable in case of other industrial railways. Possibility of undue prejudice is just as great where there is common ownership of stock of the railway and industry, and commission has made no

distinction in this class of cases because of different manner in which stock was held where there was in fact an identity of interest. L. E. & Ft. W. R. R. Co., 78 I. C. C. 475, 480.

(j) In determining whether a utility is a common carrier or public utility, whether it is operated by a foreign or domestic corporation, or whether the corporation is authorized to perform a public service by its articles, is not controlling, but the important thing is what it does. Pacific Spruce Corporation v. McCoy, 294 Fed. 711.

§1. Incorporation.

IMPORTANT CASES SINCE 1908

(a) Mere fact that the Lake Terminal Railroad Company is incorporated under the general railroad law of Ohio, without regard to its real purpose and actual relation to the tube company, seems to be no substantial basis for its claim to the status of a common carrier. HELD, to be a plant facility. National Tube Co. v. B. & O. R. R., 50 I. C. C. 489, 495.

(b) Whether or not a corporation is a common carrier does not depend upon whether its charter declares it to be a common carrier, nor upon whether the state of incorporation considers it such, but upon what it does. Empress Coal Co. v. O. W. R. R. & N., 59 I. C. C. 738, 742.

(c) Incorporation is not a necessary incident to a common carrier status under the Interstate Commerce Act and, conversely, the mere fact of incorporation can not transform a plant facility into a common carrier. Wyandotte Terminal Ry., 62 I. C. C. 1, 5.

(d) Where a railroad originally created as a plant facility for an iron works is subsequently chartered as a railroad by the state in which located, and exercised the power of eminent domain and files tariffs with the Interstate Commerce Commission, it is a common carrier and thereby entitled to recover its public switching charge from a shipper along its line, irrespective of the fact that such shipper had a contract with the iron works to accept a less charge for the same. Crane R. Co. v. Central R. Co. of New Jersey, (Pa. 1915), 93 Atl. 1076.

ALL OTHER CITATIONS

The tap-line case, 23 I. C. C. 277, 291, 292; In Re Wharfage Charges at Galveston, 23 I. C. C. 535, 544; Gulf Coast Navigation Co. v. K. C. S. Ry. Co., 19 I. C. C. 544; Trucker"s Transfer Co. v. C. & W. C. Ry. Co., 27 I. C. C. 275, 277, 278; Laona & N. R. R. Co. v. M. St. P. & S. Ste. M. Ry., 24 I. C. C. 639; U. S. v. Brooklyn Eastern District Terminal, 249 U. S. 296; Wyandotte Terminal R. R. Co., 62 I. C. C. 1, 5; Inland Ry. Co. 78 I. C. C. 59, 64.

§2. Lease of Line.

CASES 1887-1908

(a) The Lehigh Valley Railroad Company, a common carrier subject to the provisions of the Act to Regulate Commerce, could not, by leasing its road, free itself from the liabilities for practices made illegal by that statute; nor, after resuming operation of its property, pending proceedings against it to enforce statutary provisions so violated, and to recover damages for injuries sustained under such violations, can it claim exemption from liability during

the time of the lease. Independent Refiner's Asso. v. Western N. Y. & P. R. Co., 6 I. C. C. 378.

IMPORTANT CASES SINCE 1908

(b) No evidence of device in complainant relinguishing part of its track to a common carrier, even though it be the owner of that carrier, thus setting up another link in transportation to and from its plant, and the intervening common carrier can not be deprived of its right to compensation for services performed nor excuse the trunk lines from according complainant the same treatment given others under substantially similar circumstances. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 189.

(c) Although a stock yards company by charter has the power to operate a railroad, and for a period of time does do so, it ceases to be a common carrier subject to the Act after it has leased its tracks to an independent railroad corporation, discontinues operating the same, and retains a mere reversionary interest in the railroad property, and this despite the fact that an investment company through stock ownership controls both the stock yards and the lessee railroad corporation. U. S. v. Union S. & T. Co., 192 Fed. 330, 341.

§3. Public Offer to Carry.

IMPORTANT CASES SINCE 1908

(a) The Manufacturers Railway Company of St. Louis, Mo., and a number of shippers located on its lines, asked that through routes be established to and from points on its lines of railway in St. Louis, Mo., from and to points on the lines of each of the defendant railway companies and points beyond; also for the fixing of reasonable divisions or absorptions out of the St. Louis rates to be paid to the Manufacturers Railway Company for terminal services rendered by it and for reparation. This company was incorporated in 1887 to furnish terminal facilities for the southern section of industrial St. Louis, which, owing to the physical conditions existing there, seem both reasonable and necessary. The terminal Railroad Association dominates entirely the terminal facilities of St. Louis and the stock of this company is owned equally by the fourteen carriers running into that city. The only terminal facilities in the southern section were furnished by the Manufacturers Railway and by the lines of the St. L. I. M. & S. R. R. The latter's tracks, however, follow the bank of the Mississippi river and reach such industries as are adjacent thereto. For a considerable distance along the river there is a steep grade to be overcome in reaching industries back from the river and it was to afford service to these that the Manufacturers Railway was constructed. The Manufacturers Railway leased its tracks to the St. L. I. M. & S. R. R. until 1908, since when it was operated independently. The majority of its stock is owned by the Anheuser-Busch Brewing Ass'n. For the year ending April 30, 1910, it handled 42,970 cars, of which 37,546 cars were handled for the brewing association, and 5,424 cars were handled for some 87 other industries or patrons, of which 35 shipped or received 10 cars or more. The traffic of the brewing association constitutes one-thirtieth of the total traffic of St. Louis. The complainant operates about 20 miles of track, of which 2¼ miles are classed as main track, and the remainder as side track, switches and yard track. Of this total six miles are leased from the brewing association, and are used in part both for the services of the brewery and the public. The only physical connection other than that with the St. L. I. M. & S. R. R. is with the St. Louis Transfer Co., one of the constitutent properties of the Terminal Railroad Association. Two-thirds of the tracks of the Manufacturers Railway have been constructed solely for the purpose of serving the public, while the remaining one-third is used in serving both the brewery and the public. Prior to March 1, 1910, there existed through routes and joint rates over the lines of defendant carriers and complainant carriers to and from points on the line of the complainant company. Since that date the defendants declined to absorb the charges for the services of the Manufacturers Railway. While the Manufacturers Railway was operated by the St. L. I. M. & S. R. R. during 23 years and also when operated under the tariffs which permitted an allowance to the Manufacturers Railway itself in 1909 until March 1, 1910, delivery was made to the public served by it at the St. Louis rates. HELD, in view of all the facts, circumstances and conditions bearing upon the question there is no doubt that the Manufacturers Railway Company is in fact a common carrier at common law, notwithstanding any modification thereof, and therefore within the provisions of the first section of the Act to Regulate Commerce, and that the payment to it

of a reasonable and just portion of the St. Louis rates for the terminal services rendered by it is not unlawful, and that it is not a mere plant facility. FURTHER HELD, that the action of defendants in cancelling the division and absorptions with the Manufacturers Railway which have been for many years included in the St. Louis rates, has subjected complainant shippers and a considerable portion of the public of south St. Louis to the payment of unjust and unreasonable transportation charges and to undue discriminations and disadvantage. Question of what are reasonable divisions and the reparation to be awarded reserved for further investigation, (Lane, Comm'r, filed a concurring opinion, Harlan, Comm'r, a dissenting one.) M'f'rs Ry. Co. v. St. L. I. M. & S. Ry. Co., 21 I. C. C. 304.

(b) The Act, limiting its application as it does to common carriers, was passed in full view and recognition of the common law under which the attitude and actions of the person whether natural or artificial determine whether or not he or it is in law a common carrier. Speaking in general terms, a carrier could become a common carrier by offering its services as such to the public upon first complying with the statutory or police requirement demanded of it by charter or otherwise. The test to be applied in determining whether a person is a common carrier, really is whether he holds out either expressly or by a course of conduct that he will as long as he has room to carry for hire the goods of every person indifferently who will bring goods to him to be carried. Mfrs. Ry. Co. v. St. L. I. M. & S. Ry. Co., 21 I. C. C. 304, 312.

(c) A railroad which holds itself out as a common carrier, files tariffs, makes reports and engages in interstate transportation, is a common carrier subject to the Act. Stonega Coke & Coal Co. v. L. & N. R. R. Co., 23 I. C. C. 17, 2..

(d) If there is a holding out as a common carrier for hire, and if there is an ostensible and actual movement of traffic for the public for hire, the status of a common carrier exists, whether the holding out is by a company or by an individual. But such a holding out and the existence of an actual traffic is not conclusive in all cases. Where the holding out is in furtherance of a plan to secure unlawful advantages and the alleged carrier is able to pick up some traffic that is incidental to that purpose, it must be regarded simply as a cloak or device to effect unlawful results. The Tap-Line Case, 23 I. C. C. 277, 292.

(e) A common carrier is one who holds himself out as ready to engage in transportation for hire as a public employment, and generally the liability of a common carrier does not attach to one who does not so hold himself out. Kansas City v. K. C. V. & T. Ry. Co., 24 I. C. C. 22, 25.

(f) So long as a connecting carrier holds itself out as a common carrier and other carriers make joint rates with it, innocent third parties have a right to assume that the road is what it purports to be and that the published tariffs are lawful. An innocent third party is not concerned as to the legality of the published charge or the legality of a common carrier or published billing station. Cresent Coal & Mining Co. v. C. & E. I. R. R. Co., 24 I. C. C. 149, 156.

(g) The Commission rejects the theory that a railroad is a common carrier only for those who have been accustomed to patronize it. In re Mine Ratings, 25 I. C. C. 286, 294.

(h) Every carrier owes a duty to the entire public, and each owes a particular duty to persons and communities which it directly serves and which are dependent upon it. Arkansas Pass Channel & Dock Co. v. G. H. & S. A. Ry. Co., 27 I. C. C. 403, 414.

(i) Butter, poultry and eggs do not fall within the class of articles which a common carrier may not be forced to receive for transportation. Lake-and-Rail Butter and Egg Rates, 29 I. C. C. 45, 51.

(j) It cannot be said that a transportation company is not a common carrier merely because a considerable portion of its business consists of freight carried for itself, or for the industry with which it is associated. Decatur Navigation Co. v. L. & N. R. R. Co., 31 I. C. C. 281, 285.

(k) Right of public to use road's facilities and to demand service of it is the real criterion determinative of its character. Decatur Navigation Co. v. L. & N. R. R. Co., 31 I. C. C. 281, 285.

(l) A road is held to be a common carrier when it meets the test of its organization for that purpose under competent legislation of the state; when it is so treated by the public authorities of the state: when it is engaged in car-

rying for hire the goods of those who see fit to employ it; when it is authorized to exercise the right of eminent domain by the state of its incorporation. It is also a circumstance to be noticed in determining the true character of the road, that it is treated and dealt with as a common carrier by connecting systems of other carriers. Industrial Railways Case, 32 I. C. C. 129, 131.

(m) If the service is public transportation a stockyard company may be compensated even though it be not a common carrier. Atchinson, Topeka & Santa Fe Ry. Co. v. Kansas City Stock Yards Co., 33 I. C. C., 92, 98.

(n) Express company's water line is a common carrier. Stone's Express v. B. & M. R. R., 33 I. C. C. 638, 641.

(o) In order to constitute a common carrier something more substantial is required than a desire for special rates which may be used at some future time should certain contingencies happen. C. & N. S. S. Co., 47 I. C. C. 365, 371.

(p) A railroad is none the less a common carrier because of the fact that most of its traffic is its own and that only a small part is carried for others. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 162.

(q) The right of the public to use a road's facilities and to demand service of it, rather than the extent of its business, is the real criterion determinative of its character. Tap-Line Cases, 243 U. S. v. Berlin Mills Ry., 63 I. C. C. 313, 318.

(r) The right of the public to use facilities of a railroad determines its status as a common carrier, rather than the extent of its business. Crane Co. v. Central R. Co. of New Jersey, (Pa. 1915), 93, Atl. 1076, 1077.

(s) A common carrier is one who undertakes for hire to carry all persons indifferently who may apply for passage, so long as there is room and there is no legal excuse for refusal. Rathbun v. Ocean Accident & Guarantee Corp., (Ill. 1921), 132 N. E. 754.

(t) It is not essential to constitute a "common carrier" that it carry both passengers and freight or all kinds of freight. Pacific Spruce Corporation v. McCoy, 294 Fed. 711.

ALL OTHER CITATIONS

U. S. v. Union S. & T. Co., 192 Fed. 330, 336, 340; Stonega Coke & Coal Co. v. L. & N. R. R. Co., 23 I. C. C. 17, 23; Hirsch v. New England Nav. Co., 129 App. Div. 178, 181, 113 N. Y. Supp. 395; Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 26 I. C. C. 53, 59; Chamber of Commerce of New York v. N. Y. C. & H. R. R. R. Co., 24 I. C. C. 55, 74, 75; Flour City S. S. Co. v. L. V. R. R., 24 I. C. C. 179, 185; Memphis Hay & Grain Asso. v. St. L. & S. F. R. R. Co., 24 I. C. C. 609, 615; Mfrs. Ry. Co. v. St. L. I. M. & S. Ry. Co., 28 I. C. C. 93, 105; Noel v. Westcott Express Co., 158 N. Y. S. 702; Foster Lumber Co. v. A. T. & S. F. Ry., (Mo. 1917), 194 S. W. 281; Sun Co. v. Director General, as Agent, 68 I. C. C. 11, 14; Divisions received by Brimstone R. R. & Canal Co., 68 I. C. C. 375, 386; Kanawha Black Band Coal Co. v. C. & O. Ry. Co., 78 I. C. C. 429; Pacific Spruce Corporation v. McCoy, Fed. 711.

§4. Refusal to Publish Tariffs.

See Tariffs §1.

IMPORTANT CASES SINCE 1908

(a) Commission cannot recognize as common carriers lines that do not publish tariffs in lawful form or concur property in lawful tariffs of other lines or that do not in all other respects comply with the law. Star Grain & Lumber Co. v. A. T. & S. F. Ry. Co., 17 I. C. C. 338, 343.

(b) The fact that a carrier has no tariffs on file here neither qualifies nor modifies its status as a common carrier of interstate commerce. Its failure to publish its rates and charges is simply a breach of law which must be corrected. California Canneries Co. v. S. P. Co., 51 I. C. C. 500, 503.

ALL OTHER CITATIONS

Mercer Valley R. R. Co. v. P. R. R. Co., 69 I. C. C. 253.

§5. Stock Ownership.

CASES 1887-1908

(a) The Illinois Terminal Railway Company receives an excessively large share in the division of the through rate on goods transported over it to the Illinois Glass Company, which concession is illegal, provided the glass company owns and operates the Illinois Terminal Railway, but a different question may be presented if it appears that the holders of the capital stock of the glass company own the railroad company. Re Division of Joint Rates, 10 I. C. C. 661.

IMPORTANT CASES SINCE 1908

(b) The mere fact that complainant's road is owned by a corporation which also owns the stock of the largest shipper over it, and that it was originally organized and built for the purpose of doing the work of that shipper, is not controlling against its being held a common carrier. Crane R. R. Co. v. P. & R. Ry. Co., 15 I. C. C. 248, 252.

(c) Generally speaking the mere fact of ownership should make no difference in the status of a common carrier as such. Joint Rates with Birmingham Southern R. R., 32 I. C. C. 110, 120.

(d) An investment company controlling through stock ownership a stockyards company not engaged in railroading except as a lessor and an independent railroad operating a junction line is not a common carrier within section 1 of the Interstate Commerce Act, or section 3 of the Elkins Act. U. S. v. Union S. & T. Co., 192 Fed. 330, 342.

§6. Transportation of Private Cars.

See Cars and Car Supply §1; §31; §32; Transportation §2.

IMPORTANT CASES SINCE 1908

(a) No railroad transporting private cars of theatrical companies has been held a private carrier since the Act took effect. Chappelle v. L. & N. R. R. Co., 19 I. C. C. 456.

(b) The Armour Car Lines is a New Jersey corporation that owns, manufactures and maintains refrigerator, tank and box cars, and leases these cars to the railroads or to shippers. It also owns and operates icing stations on various lines of railway, and from these ices and re-ices the cars, when set by the railroads at the icing plant, by filling the bunkers from the top, after which the railroads remove the cars. The railroads pay a certain rate per ton, and charge the shipper according to tariffs on file with the Commission. Finally it furnishes cars for the shipment of perishable fruits, etc., and keeps them iced, the railroads paying for the same. It has no control over motive power or over the movement of the cars that it furnishes. HELD, that it is not a common carrier subject to the Act. Ellis v. I. C. C., 35 Sup. Ct. 646, 237 U. S. 434; 59 L. ed. 1036.

II. DETERMINATION OF STATUS.

§6½. In General.

CASES 1887-1908

(a) The Northern Pacific Railroad Company, notwithstanding certain provisions in its charter, is subject, like all other interstate carriers, to the authority conferred by Congress in the Act. Merchants' Union of Spokane Falls v. N. P. R. Co., 4 I. C. C. 183, 197.

(b) Cabs, baggage wagons and drays may be common carriers. Re Right of R. R. & Tranfer Companies to Exchange Transportation, 12 I. C. C. 39.

(c) A common carrier engaged in the city of Chicago in transferring passengers and baggage between railroad stations and between such stations and hotels and private residences, though performing a service connected with interstate passenger traffic, is nevertheless not subject to the provisions of the Act to regulate commerce. Re Right of Railroad and Tranfer Companies to Exchange Transportation, 12 I. C. C. 39.

(d) While a common carrier engaged in transferring passengers and baggage between the railroad stations of a city and between such stations and hotels and private residences, not being subject to the Act to Regulate Commerce, may doubtless give free transportation to whomsoever it wishes, no common carrier subject to the provisions of that act can lawfully grant free transportation to the officers, agents or employees of the tranfer company. Specific exceptions noted in the act as to "baggage agents" entering trains near large terminals to arrange for baggage transfer. Re Right of Railroad and Transfer Companies to Exchange Transportation, 12 I. C. C. 39.

(e) Petitioner is a common carrier in the City of Chicago in transferring passengers and baggage between railroad stations and between such stations and hotels and private residences, and performs a service connected with interstate passenger traffic, but is nevertheless not a carrier subject to the provisions of the act to regulate commerce. Exchange of Free Transportation 12 I. C. C. 40.

IMPORTANT CASES SINCE 1908

(f) A railroad is none the less a common carrier because of the fact that most of its traffic is its own and that only a small part is carried for others. Empire Steel and Iron Co. v. Director General, 56 I. C. C. 158, 162.

(g) Finding that the Union Stock-

yard in Chicago, Ill., is a common carrier engaged in interstate commerce adhered to, and as the services of unloading and loading are part of the transportation of live stock the collection of separate charges from shippers for unloading or loading in addition to the rates to and from the stockyards found an unlawful and unreasonable practice. Reparation awarded. Live Stock Loading and Unloading Charges, 58 I. C. C. 164, 167.

(h) In the performance of a contract entered into by a railroad company with a circus for hauling its train from place to place, the railway company was not acting as a common carrier. Dierick v. Davis, (Ind. 1922), 137 N. E. 685.

ALL OTHER CITATIONS

Rates on Plaster and Gypsum Rock, 27 I. C. C. 67, 69; In Re Cancellation of Joint Rates on Coal on the C. Z. & G. R. R., 27 I. C. C. 353, 361, 362; In re Irregularities in Mine Ratings, 25 I. C. C. 286, 294; Kansas City, Mo., and Kansas City, Kan. v. K. C. V. & T. Co., 24 I. C. C. 22, 25; Aton Piano Co. v. C. M. & St. P. Ry. Co. (Wis. 1913), 139 N. W. 743, 745; Joint Rates with Birmingham Southern R. R. Co., 32 I. C. C. 110, 120; Curry & Whyte Co. v. D. & L. R. R. Co., 32 I. C. C. 162, 170, 171; Kenna v. Calumet, H. & S. R. R., (Ill. 1918), 120 N. E. 259; California Canneries Co. v. S. P. Co., 51 I. C. C. 500, 503; Owasco River Ry., 53 I. C. C. 104, 111; Diamond Alkali Co. v. F., P. & E. R. R. Co., 53 I. C. C. 548, 554; Jones & Laughlin Steel Co. v. P. & L. E. R. R. Co., 53 I. C. C. 556; Chicago & Calumet River R. R., 55 I. C. C. 194; American Steel & Wire Co. v. N. & S. S. Ry., 55 I. C. C. 353; National Tube Co. v. L. T. R. R., 55 I. C. C. 469, 476; Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 188, 190; Lackawanna Steel Co v. S. B. Ry., 56 I. C. C. 684; U. S. v. Brooklyn East. Dist. Terminal 39 Sup. Ct. Rep. 283; Culver & Port Clinton R. R. Co., 58 I. C. C. 402; Oakdale & Gulf Ry. Co., 58 I. C. C. 450; Lake Erie & Fort Wayne R. R. Co., 58 I. C. C. 558; Chicago Short Line Ry. Co., 58 I. C. C. 561; Manufacturers' Junction Ry. Co., 58 I. C. C. 666; Lakeside & Marblehead R. R. Co., 58 I. C. C. 671; Valley R. R. Co., 58 I. C. C. 677; Bay Terminal R. R. Co., 58 I. C. C. 680; State v. Public Service Commission, (Wash. 1921), 203 Pac. 3; Beaver Sand Co. v. Director General, 66 I. C. C. 285; Reduced rates, 1922, 77 I. C. C. 675; Divisions Received by Brimstone R. R. & Canal Co., 68 I. C. C. 375, 386, 387; Kanawha Black Band Coal Co. v. C. & O. Ry. Co., 78 I. C. C. 429.

§7. Question of Fact.

IMPORTANT CASES SINCE 1908

(a) Whether a company or person claiming to be a common carrier is a common carrier at all and for all purposes is a question of fact, and whether the service performed for a particular person is a service of transportation or an industrial service is also a question of fact. The Tap-line Case, 23 I. C. C. 277, 292.

(b) The status under the Act of a carrier by railroad is not determined by the length or width of its railroad. Rates in Chicago Switching District, 34 I. C. C. 234, 238.

§7½. Who Are Common Carriers.

IMPORTANT CASES SINCE 1908

(a) Complainant's railway, operating over an interlacing network of tracks between points within its plant, found to be a plant facility over which defendants can not be required to perform switching service. Whitaker-Glessner Co. v. B. & O. R. R. Co., 63 I. C. C. 47, 57.

(b) Ore Carrying Corporation, a water line operating under a common arrangement with a rail carrier for the continuous carriage of through interstate traffic, found to be a common carrier subject to the act, which may lawfully receive from its trunk-line connection reasonable divisions of joint interstate rates, under appropriate tariffs. Ore Carrying Corporation v. C. R. R. Co. of N. J., 66 I. C. C. 311.

(c) In connection with the transportation of coal from mines between Shinnston and Bingamon Junction, both in West Virginia, to points in other states, the Monongahela Power & Ry. Co., an electric line, held to be a common carrier subject to the act. Hood Coal Co. v. M. V. T. Co., 73 I. C. C. 54.

(d) Complainant, a corporation operating a grain elevator and performing a transportation service, not as an independent entity, but as an agent of a railroad, under contract, which service such railroad holds itself out to perform by the publication of charges in its tariffs, alleges that allowances made to it were unreasonably low. HELD, since complainant has no interest in traffic handled through the elevator, it can not be

considered a shipper or "owner of property transported." It stands in much the same position as an employee of the railroad and can not be considered a common carrier whose compensation is to be derived from divisions of joint rates. Keystone Elevator & Warehouse Co. v. Director General, as Agent, 73 I. C. C. 273.

(e) New York Dock Ry. found to be a common carrier engaged in interstate commerce. It furnishes an important service to the public and is efficiently operated. New York Dock Ry. v. B. & O. R. R. Co., 73 I. C. C. 656, 659.

(f) The interest that a dock company, as lessor and creditor, may have in the prosperity of a railroad, does not, and can not, interfere with the rights to which the railroad is entitled as a common carrier subject to the act. New York Dock Ry. v. B. & O. R. R. Co., 73 I. C. C. 656, 659.

(g) Applying the tests of common carriers announced in Kansas City Stock Yards case, 33 I. C. C., 92, and the Tap Line cases, 234 U. S., 1, the Craig Mountain Ry., found to be a common carrier, which may lawfully participate in joint rates with its trunk-line connections. Craig Mountain Lumber Co. v. G. N. Ry. Co., 77 I. C. C. 156, 158.

(h) Complainant attacked switching and spotting charges of the Pittsburgh & Ohio Valley Ry. at Neville Island, Pa., on shipments to and from its plant in addition to the rates of the trunk lines, and that trunk lines refused to extend the district rates to its plant, as unreasonable, unjustly discriminatory and unduly prejudicial. The Valley besides complainant has two team tracks accessible to the public; handles carload and less carload freight but does not carry passengers, mail or express. Average distance covered by the switching service is 0.66 mile. HELD, the Valley is a common carrier and is entitled to have its charges absorbed by the trunk lines or join in through rates. HELD, further, the demurrage rules applicable should be those of the Valley running from the time of placement at the industry rather than from the time cars are placed on the interchange track with the Valley. Defendants made no atttemnt to justify the increases in the line haul rates since Jan. 1, 1910, resulting from the refusal to absorb. HELD, rates attacked unreasonable to extent they exceeded the application of the Neville Island or Pittsburgh rates from and to plant of complainant, reparation awarded. Carnegie Steel Co. v. Director General, 80 I. C. C. 269.

Director General, as Agent, 60 I. C. C. 715, 718; Consolidation Coal Co. v. C. & O. Ry. Co., 60 I. C. C. 763, 768; Tionesta Valley Ry., 62 I. C. C. 473; Genesee & Wyoming R. R. 62 I. C. C. 680; Lake Erie & Fort Wayne R. R. Co., 63 I. C. C. 122, Berlin Mills Ry. Co., 63 I. C. C. 313; New Castle & Ohio River Ry. Co., 63 I. C. C. 305; American Hominy Co., 63 I. C. C. 319; Superior & Southeastern Ry. Co. v. Director General, as Agent, 63 I. C. C. 431; Ohio & Pennsylvania Rates, Fares and Charges, 64 I. C. C. 517, 519; Gulf Ports Terminal Ry. Loan, 65 I. C. C. 421, 423; Beaver Sand Co. v. Director General, as Agent, 66 I. C. C. 285, 287; Massachusetts Oil Refining Co. v. B. & A. R. R. Co., 66 I. C. C. 535, 543; Keokuk & Hamilton Bridge Co. v. W. Ry. Co., 66 I. C. C. 545, 548; Reduced Rates, 1922, 77 I. C. C. 675; Carriage Steel Co. v. Director General, as Agent 80 I. C. C. 269; Inland Ry. Co., 78 I. C. C. 59; Kanawha Black Band Coal Co. v. C. & O. Ry., Co., 78 I. C. C. 429; Hamill Coal & Coke Co. v. W. M. Ry. Co., 81 I. C. C. 72; Upper Merion & Plymouth R. R. Co. v. P. R. R. Co., 81 I. C. C. 191; American Mineral Production Co., 69 I. C. C. 53; Inland Empire Paper Co. v. S. . Ry. Co., 81 I. C. C. 603, 607, 608.

III. OBLIGATIONS.

See Pipe Lines §4; II.

§8. In General.

CASES 1887-1908

(a) Unless the contrary is imposed as conditions in the grant of its charter, the right to construct and operate a railroad is a franchise in its nature exclusive, not held in common with the public, though the grant of the franchise is for the public use; and the tracks of a railroad are not a common highway upon which anyone can enter and use his own cars for transportation purposes against the objection of the company owning the tracks. Worchester Excursion Car Co. v. Pennsylvania R. R. Co., 2 I. C. C. 792, 793.

(b) A carrier must not use its power and the means at its disposal as a carrier to avoid performance of its duty. It must not use them oppressively. It must, as far as possible, deal as between all shippers, including itself as a shipper, in such a way that all shall have proportional benefit wherever demanding its service. Haddock v. D. L. & W. R. Co., 3 I. C. C. 302, 310.

(c) The defendant, the New York, Susquehanna & Western Railroad Company, engaged in the transportation of milk and cream from points in the State of New York through the State of New Jersey to the City of New York, is subject to regulation under the Act to Regulate Commerce in respect of such transportation. Milk Producers' Protective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

(d) A railroad company engaged in transporting milk and cream from points in the state of New York, through the state of New Jersey, to the City of New York, is subject to regulation under the Interstate Commerce Act, in respect of such transportation. Milk Producers' Protective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

(e) A railroad which lives by virtue of a public grant and the exercise of quasi-public powers is primarily obligated to discharge its functions with an eye to the welfare of the public which it serves and to avoid any policy of operation which, no matter how profitable to the stockholder, may result injuriously to its dependent communities. Car shortage—Insufficient transportation facilities, 12 I. C. C. 561, 567.

IMPORTANT CASES SINCE 1908

(f) Having become a common carrier between certain points, a carrier must accept and perform its common-carrier duties with regard to transportation between other points. S. P. Co., Ownership of Oil Steamers, 34 I. C. C. 77, 79.

(g) Common carriers strictly speaking, not being insurers, but bailees for hire, have statutory as well as common-law obligations for the safety of property committed to their charge. Iowa Railroad Commissioners v. A. T. & S. F. Ry. Co., 36 I. C. C. 79, 84.

(h) A railroad may not render itself incapable of performing its duties to the public or absolve itself from those obligations without the consent of the state. Hocking Domestic Coal Co. v. K. & M. Ry., 44 I. C. C. 392, 400.

(i) The distinction beteween the right that the public has in the property of a railroad company, in connection with a transportation service to be performed, and the control a railroad company has over its property as private property, with respect to those who are not demanding a service of transportation, has not only frequently been pointed out by the courts but has been carefully sustained. The Car Peddling Case, 45 I. C. C. 494, 501.

(j) The necessities and limitations of the various means of transportation or communication must be recognized: and the greatest care must be exercised in applying to one kind of carrier by analogy rules found necessary in connection with a different kind of carrier. Private Wire Contracts, 50 I. C. C. 731, 760.

(k) Operation of common carriers should be regulated in a broad spirit with a view to the welfare of the entire country and not in such a way as to stifle progress. Private Wire Contracts, 50 I. C. C. 731, 761.

(l) Even prior to federal control it was well settled that a carrier was not justified in attempting to restrict its traffic to movement between points on its own line. Obviously under federal control that doctrine obtains new force. It must be extended to its logical and practical limits. Kaw River S. & M. Co. v. A. T. & S. F. Ry., 51 I. C. C. 350, 354.

(m) The business of the carrier is to furnish transportation. Its legal obligations are confined to transportation and the duties incident thereto. It is not obligated to assume risks for the convenience of the consignor which have no direct relationship to its service of transportation. Bills of Lading, 52 I. C. C. 671, 722.

(n) The Mineral Railroad is a common carrier and entitled to joint rates and divisions. It does not necessarily follow that such rates must be ordered established and maintained. Whether this shall be done depends upon such matters as public demand or necessity and whether or not the absence of joint rates is detrimental or obstructive to the public interest and the ends of justice between the parties. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 162.

(o) Where carrier is engaged in two

separate enterprises, the income derived from the operation of buildings should be considered separately from the railroad income. Local Fares on Hudson & Manhattan R. R. Co., 58 I. C. C. 270, 274

(p) The demands upon a carrier which lawfully may be made are limited by its duty. National Industrial Traffic League v. A. & R., 61 I. C. C. 120, 123.

(q) While the extent to which the public uses the facilities of a railroad is not controlling, there must be some appreciable use of the road by the public or else the holding out to carry for all is merely an empty form. Wyandotte Terminal Ry., 62 I. C. C. 1, 5.

(r) On a web of interlacing plant tracks, dominated by shipper, the carriers would not have that control over the instrumentalities of carriage which corresponds with common-carrier liability for loss of or damage to the thing carried. Whitaker-Glessner Co. v. B. & O. R. R. Co., 63 I. C. C. 47, 53.

(s) Common carriers have an affirmative duty to perform impartial service, and cannot lawfully discriminate against and subject a shipper to undue prejudice. Burgess Bros. Co. v. Stewart, 184 N. Y. S. 199.

(t) Common carriers are quasi public functionaries, to which the presumption of law that they have complied with their legal duty in the absence of any proof to the contrary applies. New River Lumber Co. v. Tennessee Ry. Co., (Tenn., 1922), 238 S. W. 867.

(u) The fact that a railroad is a common carrier corporation subject to the act generally does not operate as a bar to its engaging in lawful activities other than common carriage. Certain-Teed Products Corporation v. C. R. I. & P. Ry., 68 I. C. C. 260, 262.

E. & Ft. W. R. R. Co., 78 I. C. C. 475.

IV. ALLOWANCES.

§9. In general.

See Stock Yard Companies.

CASES 1887-1908

(a) A division of a freight rate with another railroad company constitutes a mere subterfuge to give a concession in the rate, and is unlawful, where the railroad company receiving the division of the rate, while owning four or five thousand feet of railway siding adjoining one of several plants belonging to the shipper, does not own any equipment or rolling stock, and is not in any way engaged as a common carrier, but is in fact controlled by the officers of the shipping company who control its earnings and receive the benefit of the division of the rate, thereby enabling it to sell its produce at prices which its competitors cannot meet. Re Transportation of Salt from Hutchinson, 10 I. C. C., 1.

(b) The Chicago, Lake Shore & Eastern R. Co., owned by the United States Steel Corporation, is a terminal road operated between the Illinois Steel Co.'s works, near Chicago, and connecting with roads leading East, West and South. It receives a division of 10 per cent of the rate to the seaboard; 15 per cent to Buffalo and Pittsburgh, and 20 per cent to the Missouri River and beyond, and in some cases obtains special divisions. These divisions are found to be grossly excessive for the service rendered and to afford unlawful preference to the United States Steel Corporation

which owns and controls the Illinois Steel Company. Re Divisions of Joint Rates 10 I. C. C. 385.

(c) The International Harvester Co. owns the capital stock of the Illinois Northern R. Co. and a controlling interest in the Chicago, West Pullman & Southern R. Co., operating as a terminal connecting roads in and about the City of Chicago between the plant of the International Harvester Co. and various other industries and connecting roads leading to the Missouri River and other sections of the country. Until recently, the charge received for services by these terminal roads was a switching charge amounting to from $1.00 to $3.50 per car for the Illinois Northern and $3.00 per car for the Chicago, West Pullman & Southern. These lines now receive in many instances a division of the rate, which on lines reaching the Missouri River is 20 per cent, with the Missouri River division as the maximum. This amounts, on farm machinery, to $12.00 per car of 20,000 pounds as against the former maximum of $3.50 per car. A charge of $3.50 per car by the Illinois Northern and of $3.00 per car by the Chicago, West Pullman & Southern would be reasonable for these switching services, and charges for such services in excess of those sums amount to unlawful preference in favor of the International Harvester Co. Re Division of Joint Rates 10 I. C. C. 385.

(d) The Act to Regulate Commerce prohibits a difference in charges as between shippers "by any special rate, rebate, drawback, or other device" and the granting of any undue preference to any individual or species of traffic "in any respect whatsoever," and the Elkins amendment, requiring the publication of tariffs in all cases, prohibits, under severe penalty, any practice on the part of the carrier "whereby any such property shall by any device whatever be transported at a less rate than that named in the tariffs . . . or whereby any other advantage is given or discrimination is practised." The manifest intention of the Act to Regulate Commerce, especially as expressed in the Elkins amendment, is to strike through all pretense, all ingenious device, to the substance of the transaction itself; and where excessive divisions of rates are granted by a carrier to another carrier owned and controlled by a shipper, for the purpose of obtaining the traffic of that shipper, they benefit the shipper and operate as a rebate or other device to cut the tariff charge in violation of the law. Re Divisions of Joint Rates 10 I. C. C. 385.

(e) While there may be great objections to allowing shippers to build and operate railroads over which their traffic moves, such action is not prohibited by the Act to regulate commerce; and the mere fact that the property of a common carrier is owned by the largest individual shipper over it, or that it was originally constructed for the purpose of doing the work of that shipper, furnishes no reason why it cannot make joint rates and agree upon joint divisions with other railroads. Re Division of Joint Rates 10 I. C. C., 385.

(f) An unlawful preference to the United States Steel Corporation, which owns and controls the Illinois Steel Company, is practised under a division of rates whereby the Chicago, Lake Shore and Eastern Railway Company, a terminal road owned by the United States Steel Corporation, and operated between the Illinois Steel Company's works, obtains a grossly excessive division for the service rendered. Re Division of Joint Rates, etc., 10 I. C. C. 385.

(g) An unlawful preference in favor of the International Harvester Company is practised by means of the division of the through rate under which division the Illinois Northern Railroad Company, owned by such Harvester Company, and the Chicago, West Pullman & Southern Railroad Company, controlled by it, receive a percentage of the rate, which amounts to about $12 per car, for services which were formerly performed by these terminal roads as a switching charge and which amounted to a maximum of $3.50 per car, which was reasonable for these services. Re Division of Joint Rates, etc., 10 I. C. C. 385.

(h) An unlawful preference to the United States Steel Corporation, which owns and controls the Illinois Steel Company, is practised under a division of rates whereby the Chicago, Lake Shore & Eastern Railway Company, a terminal road owned by the United States Steel Corporation, and operated between the Illinois Steel Company's works, obtains a grossly excessive division for the service rendered. Re Di-

vision of Joint Rates, etc., 10 I. C. C. 385.

(i) Where excessive divisions of rates are granted by the carrier to another carrier owned and controlled by a shipper, for the purpose of obtaining the traffic of that shipper, they benefit the shipper, and operate as a rebate or other device to cut the tariff charge, in violation of the Act to Regulate Commerce. Re Division of Joint Rates, etc., 10 I. C. C. 385.

(j) The International Harvester Company owns the capital stock of the Illinois Northern R. Co., and a controlling interest of the C. W. P. & S. R. Co., operating as terminal connecting roads in and about the City of Chicago between the plant of the Harvester Company and various other industries and connecting roads leading to the Missouri River and other sections of the country. Until recently, the charge received for services by those terminal roads was a switching charge amounting to from $1.00 to $3.50 per car for the I. N., and $3.00 per car for the C. W. P. & S. These lines now receive in many instances a division of the rate which on lines reaching the Missouri River is 20 per cent, with the Missouri River division as a maximum. This amounts, on farm machinery, to $12.00 per car as against the former maximum of $3.50 per car. HELD, a charge of $3.50 per car by the I. N., and of $3.00 per car by the C. W. P. & S. would be reasonable for these switching services, and charges for such service in excess of those sums amount to unlawful preference in favor of the International Harvester Company. The C. L. S. & E., owned by the United States Steel Corporation, is a terminal road operated between the Illinois Steel Company's works, near Chicago, and connecting with roads leading East, West and South. It receives a division of 10 per cent of the rate to the seaboard; 15 per cent to Buffalo and Pittsburgh, and 20 per cent to the Missouri River and beyond, and in some cases obtains special divisions. These divisions are grossly excessive and afford unlawful preference to the United States Steel Corporation, which owns and controls the Illinois Steel Company. Re Divisions of Joint Rates, etc., 10 I. C. C. 385.

(k) While there may be great objections to allowing shippers to build and operate railroads over which their traffic moves, such action is not prohibited by the Act, and the mere fact that the property of a common carrier is owned by the largest individual shipper over it, or that it was originally constructed for the purpose of doing the work of that shipper, furnishes no reason why it cannot make joint rates and agree upon joint divisions with other railroads. Re Divisions of Joint Rates, ets., 10 I. C. C. 385, 399.

(l) The manifest intention of the Act is to strike through all pretense, all ingenious device, to the substance of the transaction itself and where excessive divisions of rates are granted by a carrier to another carrier owned and controlled by a shipper, they benefit the shipper and operate as a rebate or other device to cut the tariff charge in violation of the law. Re Divisions of Joint Rates, etc., 10 I. C. C. 385, 402.

(m) The Illinois Terminal Railway receives an excessively large share in the division of the through rate on coal transported over it to the Illinois Glass Company, which concession is illegal, provided the glass company owns and operates the Illinois Terminal Railway; but a different question may be presented if it appears that the holders of the capital stock of the glass company own the railroad company. Re Division of Joint Rates, etc., 10 I. C. C. 661.

(n) The Granite City, Alton & Eastern Railroad Company was organized for the purpose of operating several thousand feet of railway used in the business of the St. Louis Syrup and Preserving Company and located on the latter's private grounds at Granite City, Ill. The Granite City company has constructed a short track outside the limits of the grounds of the preserving company, and uses, jointly with other companies, another track about 3,000 feet in length. By means of these tracks the Granite City company connects with other railroad companies, and is paid by the latter divisions of transportation charges on traffic shipped by the preserving company and hauled to such connections by the Granite City company. Assuming that the Granite City company and the Preserving Company are identical in ownership, concerning which a definite finding is not made. HELD, that the payments to the Granite City company constitute rebates

and are illegal. Re Division of Joint Rates, 10 I. C. C. 661.

(o) The Illinois Terminal Railway Company was organized in the interest of the Illinois Glass Company, and uses tracks constructed by the latter on its private grounds at Alton, Ill., for the purpose of connecting its plant with different lines of railway. Re Division of Joint Rates, 10 I. C. C. 661.

(p) The Illinois Terminal Railway Company was organized in the interest of the Illinois Glass Company and uses tracks constructed by the latter on its private grounds at Alton, Ill, for the purpose of connecting its plant with different lines of railway. Facts relating to the construction and operation of the terminal road are stated. HELD, that if the Glass Company owns and operates the Illinois Terminal Railroad, the case is in all respects identical with the facts developed at the Chicago hearing in this investigation (10 I. C. C. Rep. 385) and the conclusions there announced apply here; but if the holders of the capital stock of the Glass Company own the Railroad Company, a different question may be presented. Matter of Division of Joint Rates 10 I. C. C. 661.

(q) The words "common carriers," in the proviso in section 1 of the Act to Regulate Commerce as amended June 29, 1906, that its provision against the issuance of free passes "should not be construed to prohibit the interchange of passes for the officers, agents and employees of common carriers and their families," held to relate only to those subject to the act. Re Right of R. R. and Transfer Companies to Exchange Transportation, 12 I. C. C. 39.

Important Cases Since 1908

(r) Fact that industrial carriers have received low net earnings or operated at deficit is not convincing as bearing upon question of per diem arrangement, for deficiency in earnings may indicate, among other things, poor location, insufficient traffic, uneconomic management, high operating expenses, maladjusted divisions or absorptions, or necessity for track-storage charge such as may be in force upon other lines in district. L. E. & Ft. W. R. R. Co., 78 I. C. C., 475, 490.

I. CONTROL AND REGULATION.

CASES 1887-1908

(a) The question of compression of cotton in transit is not one with which a railroad may deal entirely as it sees fit and without respect to the effect which its practices have upon the transportation of cotton. Either the carrier must publish a rate upon uncompressed cotton and another rate upon compressed cotton and divorce itself entirely from the matter of compression, or else such compression as is given by the railroad becomes subject to the jurisdiction of this Commission. Muskogee Com. Club et al v. Mo., Kans. & Tex. Ry. Co., 12 I. C. C. 312.

(b) Whether the practice of considering compression of cotton in transit an incident of transportation, and therefore a matter wholly within the discretion and control of the carrier as to the instruments employed, neither the grower nor the consumer being directly interested, will not be decided without a general investigation covering the whole field of production and markets, and cannot be determined on an insufficient inquiry at a single point. C. & I. Asso. of Union Springs v. C. of Ga. Ry. Co., 12 I. C. C. 375.

IMPORTANT CASES SINCE 1908

(c) No violation of the statute results from a preference, though found to exist, to a corporation engaged solely in the compression of cotton in which it has no interest. Merchants Cotton Press & Storage Co. v. I. C. R. R. Co., 17 I. C. C. 98, 104.

(d) Compression is a serivce which the carrier procures for its own con-

venience, and when that service is performed in such manner as not to prejudice, or prefer, a particular shipper, or community, the Act does not limit the freedom of the carrier to make contracts in respect thereto. Merchants Cotton Press & Storage Co. v. I. C. R. R. Co., 17 I. C. C. 98, 104.

(e) Section 15 in regard to allowances is not applicable where an allowance is made to a compress company not the owner of the cotton. If a violation of the Act results from more favorable contracts with the warehouse company than to complainants, it must be because of discrimination under section 3. Merchants Cotton Press & Storage Co. v. I. C. R. R. Co., 17 I. C. C. 98, 105.

(f) Compress companies engaged in compressing cotton at a concentration point and compensated therefor by the carriers are amenable to control by the laws of the land. Anderson, Clayton & Co. v. C. R. I & P. Ry. Co., 18 I. C. C. 340, 350.

ALL OTHER CITATIONS

Colorado Alfalfa Meal & Mfg. Co. v. M. P. Ry. Co., 41 I. C. C. 540, 544; New England Plaster, 41 I. C. C. 687, 702.

II. REASONABLENESS OF CHARGES.

See Reasonable Rates.

CASES 1887-1908

(a) The method of compressing cotton for shipment from the southern states is one that is found to be absolutely necessary in the case of long through hauls by rail, or where the cotton is carried by coastwise steamers or by ocean vessels for export, and the difference in the rate of transportation of compressed and uncompressed cotton by rail carriers should be the actual and necessary cost of compressing. New Orleans Cotton Exchange v. I. C. R. R., 2 I. C. C. 777, 790.

(b) The Commission instituted an investigation on its own motion as to alleged unlawful rates and practices in the transportation of cotton by the K. C. M. & B. R. Co. Defendants rates on cotton from Memphis to Atlantic and Gulf ports and various eastern cities are lower than those from intermediate cotton shipping stations; but whether such rates violate the fourth section of the act is not determinable upon the practice of floating cotton, the essential transportation feature is carrying the cotton to a compress, receiving it again in the compressed state, and transporting it to destination at the through rate in force from the point of origin. The practice benefits both the railroad company and the producer, and tends to place noncompetitive points upon an equality with more distant competitive localities from which lower rates are in force. It does not unjustly discriminate against dealers in Memphis, who decline to take advantage of the privilege. The cotton is graded as well as compressed at the point of stoppage. The destination of the cotton is usually changed at the compress point; the identity of the cotton is usually not preserved at the point of grading and compression; and the ownership of the cotton may change at the compress station. The question is whether the shipment is to be considered through and entitled to a through rate, or as local and calling for application of charges in effect to and from the compress point. HELD, that the carrier may, as part of a contract for through shipment, allow the cotton to be stopped off for the purpose of grading and compression; but the privilege enters into and becomes part of the service covered by the rate, and should be specified in the published tariffs. That the determinative feature of a through shipment is the contract, and if the cotton starts and proceeds upon a contract for through shipment, as is shown to be the fact in this case, it may be considered as a through shipment and be given the benefit of a through rate. In the matter of alleged unlawful rates and practices in transportation of cotton by the K. C. M. & B. R. Co., 8 I. C. C. 121.

(c) That cotton is allowed a stop-off privilege for the purpose of grading and compressing forms part of the service covered by the rate, and should be specified in the published tariffs. Re Alleged Unlawful Rates, etc., 8 I. C. C. 121.

(d) In the practice of "floating cotton," the essential transportation feature is carrying the cotton to a compress, receiving it again in the compressed state, and transporting it to destination at the through rate in force from the point of origin. The practice benefits both the railroad company and the producer, and tends to place noncompetitive points upon an equality with more distant competitive localities from which lower rates are in force. It does

not unjustly discriminate against dealers in the city of Memphis, who decline to take advantage of the privilege. The cotton is graded as well as compressed at the point of stoppage. The destination of the cotton is usually changed at the compress point; the identity of a cotton shipment is not preserved at the point of grading and compression; and the ownership of the cotton may change at the compress station. The question is whether the shipment is to be considered through and entitled to a through rate, or as local and calling for application of charges in effect to and from the compress point. HELD, (1) that the carrier may, as part of a contract for through shipment, allow the cotton to be stopped off for the purpose of grading and compression; but the privilege enters into and becomes part of the service covered by the rate, and should be specified in the published tariffs. (2) That the determinative feature of a through shipment is the contract and if the cotton starts and proceeds upon a contract for through shipment, as is shown to be the fact in this case, it may be considered as a through shipment and be given the benefit of the through rate. In the Matter of Alleged Unlawful Rates and Practices in the Transportation of Grain and Grain Products by the Atchison, Topeka & Santa Fe Railway Company and Others, 7 I. C. C. Rep. 240,—cited and distinguished. Unlawful Rates in Trans. Cotton by K. C. M. & B. R. R. 8 I. C. C. 121.

(e) The fact that a compress company at South McAlester has another compress at Fort Smith and threatens, unless the foregoing preference is given to its company at South McAlester, to divert its cotton traffic to another railroad, does not justify discrimination in the rules or practices of defendant, as the competition described is not the character of competition that relieves from the operation of the statute. Muskogee Co. Club et al v. Mo., Kans. & Tex. Ry. Co., 12 I. C. C. 312.

(f) The question of compression of cotton in transit is not one with which a railroad may deal entirely as it sees fit and without respect to the effect which its practices have upon the transportation of cotton. Either the carrier must publish a rate upon uncompressed cotton and another rate upon compressed cotton and divorce itself entirely from the matter of compression or else such compression as is given by the railroad becomes subject to the jurisdiction of the Commission. Muskogee Commercial Club v. M. K. & T. Ry., 12 I. C. C. 312, 318.

(g) Where a railroad company declares a policy which allows compression of cotton in transit at the nearest point, it cannot vary that rule so as to give certain shippers the opportunity to avoid it and thereby receive an advantage which is not given to shippers generally. Muskogee Commercial Club v. M. K. & T. Ry. 12 I. C. C. 312, 318.

(h) Whether the practice of considering compression of cotton in transit an incident of transportation, and therefore a matter wholly within the discretion and control of the carrier as to the instruments employed, neither the grower nor the consumer being directly interested, will not be decided without a general investigation covering the whole field of production and markets, and cannot be determined on an insufficient inquiry at a single point. Commercial & Industrial Ass'n. of Union Springs v. Central of Ga. Ry. Co., 12 I. C. C. 375.

IMPORTANT CASES SINCE 1908

(i) It is manifestly economical from a transportation standpoint to have compression as near the origin of shipment as possible; but in determining the propriety of the practice, the railroad may not deal with it irrespective of its effect upon the transportation of cotton. Rates on Cotton and Cotton Linters, 30 I. C. C. 467, 469.

(j) An allowance for the compression of cotton at the port, authorized in the published tariffs and applied to all shipments alike, even though the compressing is done after the transportation is ended, is not a rebate. Inman, Akers & Inman v. A. C. L. R. R. Co., 32 I. C. C. 146, 147.

(k) Where cotton is compressed at the port, after the transportation is ended, the service is in no sense connected with the transportation or an instrumentality used therein, as provided for in section 15 of the Act; and any allowance made therefor by the carrier is therefore unlawful. Inman, Akers & Inman v. A. C. L. R. R. Co., 32 I. C. C. 146, 148.

(l) No warrant in law for an allowance for compression service rendered

by carrier at port. Inman, Akers & Inman v. A. C. L. R. R. Co., 32 I. C. C. 146, 148.

(m) Where the through rate to desired port includes compression by carrier, such compression should be performed by carrier receiving the cotton at compress point. Mobile Chamber of Commerce v. M. & O. R. R. Co., 32 I. C. C. 272, 276.

(n) Rate from point of origin to compress point should be no more than the reasonable local rate. Mobile Chamber of Commerce v. M. & O. R. R. Co. 32 I. C. C. 272, 276.

(o) It constitutes unjust discrimination, distance considered, to charge higher inbound rates on uncompressed cotton for concentration at Shreveport than to concentration points in eastern Texas. R. R. Comm., of Louisiana v. St. L. S. W. Ry. Co., 34 I. C. C. 472, 480.

(p) Cotton is an agricultural product which cannot be properly prepared for shipment by the grower, this being due to the fact that the machinery necessary for ginning and compression is costly. R. R. Comm. of Louisiana v. C. of G. Ry., 45 I. C. C. 516, 517.

(q) Under present conditions of growing and marketing cotton, concentration is a necessity to the shippers and it can readily be seen that it enables the carriers to transport the crop with the greatest conservation of its equipment, for the l. c. l. movement into the concentration and compression point is short and on the longer haul outbound full carloads are secured. R. R. Comm. of Ala. v. C. of G. Ry., 45 I. C. C. 516, 519.

(r) Charges applicable on shipments of cotton which shipper directed compression in transit at a point off the initial carrier's rails, because of an embargo, found unreasonable to extent they exceeded lower charges from more distant points of origin with carrier's privilege of compression at points on its own line. which lower charges were subsequently established from points of origin here involved. Reparation awarded. Tarver, Steele & Co. v. Director General, as Agent, 60 I. C. C. 666.

(s) Concentration is demanded by the commercial necessities incident to the marketing of cotton. If there is to be economical concentration, each compress point must draw cotton from all directions within a certain radius. Transit facilitates concentration and if limited so that cotton can be concentrated only from points lying in a certain direction from the compress point, the economical concentration of cotton is disturbed. When the through rate is protected against the combination on the concentrating or compress point, there is a concession in rates, and this concession controls the points from which the concentrating point can draw its cotton. Thomas Cotton Co. v. I. C. R. R. Co., 63 I. C. C. 89, 92.

(t) It there is to be transit on cotton at all, and transit has been in effect for so long and has become so much a part of the transportation of cotton as to be as inherently fixed as a part of the tariffs as the rates themselves, it must be unlimited as to points of destination to which shipments can be made from the concentration point, if there is to be economical concentration. Thomas Cotton Co. v. I. C. R. R. Co., 63 I. C. C. 89, 92.

(u) In connection with any restatement of transit rules on cotton, the territory from which any compress point may concentrate should be limited by prescribing a certain maximum distance from the concentration point beyond which transit would not apply on back-haul movements from the concentration point to destination. Within the radius so prescribed a scale of distance rates should then be applied for any back-haul movement involved. Thomas Cotton Co. v. I. C. R. R., 63 I. C. C. 89, 92.

(v) The mere fact that an originating carrier participates in joint rates in connection with which compression is allowed at other points off its line does not make it guilty of undue prejudice against plants on its own line. Compression of Cotton at Cushing, Okla., 77 I. C. C., 184, 188.

(w) Where the terms "compressed cotton, any quantity," and "uncompressed cotton, any quantity" are used in a tariff sheet without further amplifying words, the contemporaneous, practical construction placed on said terms by the railroad company, through its agents in charge and the shippers, as to baled cotton, delivered to the railroad company, in an uncompressed state with the understanding that it was to be compressed, and then from the place of initial delivery transported to the place

of original consignment when there was no other promulgated tariff rate between the designated points concerning cotton shipments, is competent for consideration in determining the meaning of such terms. C. R. I. & P. Ry. Co. v. Dodson & Williams, 25 Okla. 822, 829, 94 P. 673, 107 P. 921.

(x) If there is a recognized custom or usage with reference to the payment by a railway company of the charges for compressing cotton, such charges being covered or included in the rate for transporting by the carrier of the compressed cotton, there being a question as to the particular meaning of the words 'uncompressed cotton, any quantity," and "uncompressed cotton, any quantity," such custom is permissable to be proved as a matter of explanation of the meaning of these words as such in the tariff sheet. C. R. I. & P. Ry. Co. v. Dodson & Williams, 25 Okla. 822, 832, 94 P. 673, 107 P. 921.

(y) Complainant attacked defendants refusal during the period Nov. 1 1918, to Jan. 22, 1919, to absorb out of the through rates the full compress charge of compress companies on various shipments of cotton originating on the defendant carrier's lines and moving to interstate destinations, thereby compelling complainants to make payments to such compress companies in addition to the transportation charges. as unreasonable and unduly preferential, Damage under section 3 of the act is not established and the allegation of undue prejudice need not be considered. Defendant carriers are non federal controlled lines, and the cotton originating on their lines was compressed at Weleetka, and reshipped to interstate destinations. Defendant carriers tariffs authorized compression and concentration services at Weleetka. The tariffs carried a restriction that the compress charge shall not exceed 10c, while Leland's tariff further provided that when exceeding that sum the excess will be in addition to the through rates. In the spring of 1918 the compress companies notified the carriers and shippers that. effective Sept. 1, 1918, their compress charges would be increased to 15c, and in conjunction with the shippers made efforts to induce the carriers to amend their tariffs to provide for the absorption of that charge out of the through rate. On Nov. 1, 1918 the tariffs of all lines participating in the movement of cotton were amended to provide for the absorption of the entire 15c charge. Apparently, readjustments upon the approved basis were made on cotton traffic generally with the exception of the shipments here involved. Upon the facts shown it appears that the rates have generally included the entire compress charge. The conclusion is warranted that the rates are in reality based on the inclusion of a reasonable charge for that service. HELD, defendants failure to absorb the 15c compress charge unreasonable, reparation awarded. Anderson Clayton & Co. v. Fort Smith & Western Railroad, 68 I. C C. 299.

(z) Complainant attacked rates charged on 4,809 bales of cotton shipped between August 21, 1918, and Feb. 18, 1919, from various points in Louisiana to Opelousas, La., for concentration and compression, and reshipped to various interstate destinations on the Pacific and Gulf coasts, as unjust and unreasonable in that the inbound and outbound rates in effect June 24, 1918, were each increased 15c per 100 pounds resulting in a double increase not contemplated by G. O. 28. Complaint was amended to attack as unreasonable defendants failure, prior to April 1, 1919, to provide transit arrangements at Opelousas. Charged on inbound shipments the local intrastate rates. Transit arrangements were in effect at Opelousas when destination was New Orleans. Transit arrangements first became applicable on interstate traffic generally on April 1. 1919, on request of complainant. Similar transit arrangements were provided during the period of movement on shipments over the N. O. T. & M. from Louisiana points to Opelousas for compression and reshipment to interstate destinations. A joint domestic commodity rate of $4.40 was in effect from the points of origin of the uncompressed cotton to San Francisco, a joint export commodity rate of $1.40 to Tacoma and Seattle, and a joint export rate of 47c to Galveston and Houston. If the transit rules had been complied with these rates could have been used. G. O. 28 provided that there would be one increase of 15c per 100 pounds, but under the manner of handling by shipper this rule was not applied for the reason that defendant properly considered the shipments inbound and outbound as separate and distinct. There

was no local consumption of cotton at Opelousas and all cotton shipped into that point was for concentration, compression and reshipment. Complainants introduced no evidence which shows that the rates attacked were unreasonable per se. HELD charges attacked nor failure of defendant to provide transit arrangement not unreasonable, complaint dismissed. Armand L. Dejean v. Director General 68 I. C. C. 611.

(aa) Compression: Following Anderson, Clayton & Co., 68 I. C. C. 299, failure of carriers to absorb out of the applicable rates the entire compress charge on various shipments of cotton forwarded from points in Tennessee and Mississippi to interstate destinations, found unreasonable as compared with subsequent provision for such entire absorption. Memphis Freight Bureau v. Director General, as Agent, 74 I. C. C. 588.

(bb) Rates on cotton, uncompressed, any quantity, found not unreasonable or unduly prejudicial as compared with rates on cotton compressed in transit at expense of carrier. More cars are required to handle uncompressed than compressed cotton, and service rendered by carrier on the former costs more than on the latter. Reduction of rates on uncompressed cotton to level of those on cotton compressed in transit would result in increased movement of the uncompressed commodity, requiring additional cars and resulting in congestion at the ports during the cotton shipping season. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 388, 407, 410.

(cc) Rates on cotton, any quantity, compressed in transit or prior to shipment from group points in Oklahoma to Galveston, Houston and Texas City, Tex. for local delivery, found unreasonable to extent they exceed rates 5 cents lower than the corresponding export rates, but not unduly prejudicial as compared with substantially equal rates from the same points of origin to New Orleans, La. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 388, 393, 397.

(dd) Application for establishment of basis of rates which will permit shipper of uncompressed cotton to elect point in transit where such shipments may be compressed at expense of shipper, denied. If shipper were allowed to choose the point at which shipments should be compressed in transit there would be no certain limitation as to the distances carriers would be required to haul uncompressed cotton. Conservation of equipment and economy of transportation, the real purposes of compression in transit, might thus be defeated. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 406, 407.

(ee) Rate on cotton, compressed in transit, from Blytheville, Ark., to Galveston, Tex., found unreasonable as compared with rates from same origin territory in Arkansas to New Orleans, La., and to extent it exceeded rate via another route, which latter rate was subsequently established over routes of movement. Reparation awarded. Kempner v. Director General, as Agent, 80 I. C. C. 347.

(ff) Where, under rates filed with and approved by the Interstate Commerce Commission, shipments of cotton originating on the carrier's line were permitted to be forwarded to a concentration point and there unloaded, and later reshipped at a through rate, HELD, that shipments of cotton which in fact started at various points other than those on the carrier's line, but which had been shipped to those points and from there rebilled in the same cars, with seals unbroken, to the point of concentration, did not "originate" on the carrier's line within the meaning of the statute and were not entitled to the reshipment privileges and reduced charges. Davis v. Latham-Bradshaw Cotton Co., (N. C., 1923.), 117 S. E. 391.

III. RULES AND REGULATIONS.

See Rules and Regulations.

CASES 1887-1908

(a) That a compress company at South McAlester has another compress at Fort Smith and threatens, unless the foregoing preference is given to its compress at South McAlester, to divert its cotton traffic to another railroad, does not justify discrimination in the rules or practices of defendant, as the competition described is not the character of competition that relieves from the operation of the statute. Muskogee Commercial Club v. M. K. & T. Ry. Co., 12 I. C. C. 312.

(b) A rule for compression of cotton in transit, which allows uncompressed cotton, on demand of shippers, to be taken out of Muskogee, Ind. T., and points north, including the Tulsa division, for compression at South McAlester, Ind. T., but does not allow uncompressed cotton to be taken out of or through South McAlester for compression at Muskogee, which practice involves the hauling of a large portion of the cotton in the territory tributary to Mukogee to S. McAlester, where it is compressed, reloaded and hauled back through Muskogee to eastern terminus, involving an extra service of 124 miles for which the carrier receives no compensation,—held to result in undue prejudice against Muskogee. Muskogee Commercial Club v. M. K. & T. Ry. Co., 12 I. C. C. 312.

(c) It appears that defendant's rule for compression of cotton in transit allows uncompressed cotton, on demand of shippers, to be taken out of Muskogee, Ind. T., and points north, including the Tulsa division, for compression at South McAlester, Ind. T., but does not allow uncompressed cotton to be taken out of or through South McAlester for compression at Muskogee. A large portion of the cotton grown in the territory tributary to Muskogee is sold in the East, and is always compressed before being loaded for the long haul. Under the practice of compressing at South McAlester uncompressed cotton originating at Muskogee and points north is hauled by defendant to South McAlester, unloaded at the compress, compressed, reloaded and then hauled back over the same line of railroad, passing again through Muskogee to defendant's eastern terminus, involving an extra service of 124 miles for which defendant receives no compensation. HELD, upon the foregoing facts, that defendant's said rule for compression of cotton results in undue prejudice against Muskogee, and that defendant should grant all the privileges to one compression point herein considered that it grants to the other. Muskogee Com. Club, et al. v. Mo. Kan. & Tex Ry. Co., 12 I. C. C. 312.

(d) Where a railroad company declares a policy which allows compression of cotton in transit at the nearest point it cannot vary that rule so as to give certain shippers the opportunity to avoid it and thereby receive an advantage which is not given to shippers generally. Muskogee Com. Club, et al. v. Mo. Kan. & Tex. Ry. Co., 12 I. C. C. 312.

(e) Complainant attacked as unjustly discriminatory refusal of defendant to allow compression of cotton, shipped over its road, at compress of complainant at Union Springs, Ala., while permitting this practice at other points in contiguous territory. HELD, whether the practice of considering compression of cotton in transit an incident of transportation, and therefore a matter wholly within the discretion and control of the carrier as to the instruments employed, neither the grower nor consumer being directly interested, will not be decided without a general investigation covering the whole field of production and markets, and can not be determined on an insufficient inquiry at a single point, complaint dismissed. Commercial and Industrial Asso. v. C. of Ga. Ry., 12 I. C. C. 375.

(f) Complainant attacked practice of defendant of hauling flat or uncompressed cotton through and out of Muskogee, Okla., to South McAlester, for compression at that point, while refusing at the same time to haul flat cotton through and out of South McAlester for compression at Muskogee, was unduly discrimatory. It appears that defendant's rule for compression of cotton in transit allowed uncompressed cotton, on demand of shippers, to be taken out of Muskogee, and points north for compression at South McAlester but does not allow uncompressed cotton to be

taken out of or through South McAlester for compression at Muskogee. A large portion of the cotton grown in the territory tributary to Muskogee is sold in the east, and is always compressed before being loaded for the long haul. Under the practice of compressing at South McAlester uncompressed cotton originating at Muskogee and points north is hauled by defendant to South McAlester, unloaded at that compress, compressed, reloaded, and then hauled back over the same line of railroad, passing again through Muskogee to defendant's eastern terminus, involving an extra service of 124 miles for which defendant receives no compensation. HELD, defendant's rule for compression of cotton results in undue prejudice against Muskogee and defendant should grant all the privileges to one compression point herein considered that it grants to the other. Muskogee Commercial Club v. M. K. & T. Ry., 12 I. C. C. 312.

IMPORTANT CASES SINCE 1908

(g) Where cotton is not shipped from point of origin under a contract for through shipment to final destination, but where the transportation charges are assessed to the compress point, and from the compress point to final destination, and subsequently adjusted to the basis of the through rate from point of origin to final destination, with carriers' right of compression in transit, a rule which requires compression at the compress of one who is the owner of, or interested in, cotton grown in that district and compressed at the same point, is not free from unjust discrimination or undue preference. Concentration of Cotton, 26 I. C. C. 585, 592.

(h) The ownership of, or interest in, the cotton on the part of the one who is employed by the carrier to perform compression is a very important consideration, and one which may involve all the elements of unjust discrimination. Concentration of Cotton, 26 I. C. C. 585, 592.

(i) There can be no question that as a purely transportation question, it is economical to compress the cotton as near as possible to the point at which it is orignally delivered to the carrier. If the shipments moved on original contracts of carriage from points of origin to final destinations and the carrier performed itself all the compression on its line, there could be no objection to the location of its compresses at such points as it might select with a view to economize in transportation and conservation of equipment. It would then be a matter of little concern to the shipper whether the compression was performed at one point or another. Under similar conditions of shipment the situation would be much the same if all the compression were performed by commercial compresses owned and operated by those who had no interest whatever in the cotton. Concentration of Cotton, 26 I. C. C. 585, 592.

(j) Where rates provide carriers' right of compression in transit, the carrier pays for compression, and one who is employed to perform compression becomes agent of carrier and as such necessarily gains knowledge as to business of competitors, probably in contravention of section 15 of the Act. Concentration of Cotton, 26 I. C. C. 585, 592.

(k) Free from conditions or practices which transgress or trespass upon the provisions or prohibitions of the law, a carrier may employ as its agent, but such arrangement must also avoid, and be free from unjust discrimination and undue preference. The Commission will look with disfavor upon, and will scrutinize with extreme care, any arrangement established, or sought to be established by any carrier, which provides for compression at a compress that is owned or operated by one who has any interest in cotton handled by that compress. Concentration of Cotton, 26 I. C. C. 585, 594.

(l) The propriety of the rule requiring compression to 15 pounds per cubic foot established as to sheared wool; but rule is unreasonable to extent that it requires pulled wool to be compressed to more than 12 pounds per cubic foot; and rule which proposes to permit shipment of Utah and Nevada wool without compression to any definite density is unduly prejudicial to shippers in California.. Wool for California, 41 I. C. C. 314, 316.

(m) Practice of the M. P. and of the Cotton Belt, in imposing a greater charge for delivery of cotton at compresses located on the Union Ry. in Memphis, than the corresponding charge for delivery at East St. Louis, Ill., found to subject Memphis to undue disadvantage. Memphis Southwestern Investigation, 55 I. C. C. 515, 550, 575.

(n) Transit provisions on cotton in effect at other compress points on lines

of defendants, under which transit is available on shipments involving a back haul from the transit point, while at the same time confining transit applicable at points here involved to movements in line from point of original shipment, found to result in undue prejudice. Thomas Cotton Co. v. I. C. R. R. Co., 63 I. C. C. 89.

(o) In connection with any restatement of transit rules on cotton, the territory from which any compress point may concentrate should be limited by prescribing a certain maximum distance from the concentration point beyond which transit would not apply on back-haul movements from the concentration point of destination. Within a radius so prescribed a scale of distance rates should then be applied for any back-haul movement involved. Thomas Cotton Co. v. I. C. R. R. Co., 63 I. C. C. 89, 92.

(p) Respondents proposed to prohibit transit privileges on cotton, including recompression or high density compression, at the ports of Galveston, Houston, Texas City, and Velasco, Tex., and to limit the application of the export rates on cotton moving under through export bills of lading to traffic moving direct to ship sides at those ports. The domestic rates on cotton to Galveston and Texas City are somewhat lower than the export rates, but when the switching and other charges which are absorbed out of the export rates are added to the domestic rates the resulting charges are about equal. The charge for high compression is 75c per bale. The ocean rate on high density cotton, generally speaking is 15c per 100 pounds less than on standard compressed cotton. A greater tonnage of high density cotton can be loaded on the vessel in the space assigned to a shipper, thus conserving ocean equipment, and as the average bale weighs about 530 pounds the shipper makes a direct money saving of about 4.5c per bale. Under present conditions, when a carload of cotton arrives at Galveston or Texas City, it is held until the ship is ready for loading, whereupon it is delivered to a track at the wharf designated by the steamship company and unloaded by truck to a space on the wharf designated by him, which may be anywhere from 10 to 200 feet from the car. When it is compressed to high density at a ship side compress the space is simply designated as at the compress, and no additional service is performed by the rail carrier. It is not shown that under present conditions high density compression at the ports results in the failure of shipments to meet connections with sailings. The exercise of the privilege of high density compression under a through bill of lading clearly does not constitute conversion. HELD, suspended schedule not jusified. Elimination of transit privilege on export cotton at Texas Gulf ports, 73 I. C. C. 299.

(q) Proposal to prohibit recompression or high-density compression at Texas ports, and limit export rates on cotton moving under through bills of lading to traffic delivered direct to ship side, found not justified. Apprehension that carriers might be required to establish similar arrangements at interior points is not well founded; risk of loss while traffic is in possession of the compress is no reason for withdrawing the privilege; it is not shown that the privilege results in failure to meet connections with sailings; exercise thereof does not constitute conversion, as there is no difficulty in identifying shipments in and out of compress; and it seems improper of line-haul carrier's attempting to dictate what privileges should be given the traffic after they have completed their part of the transportation service by unloading the traffic on the wharf. Elimination of Transit Privileges on Export Cotton, 73 I. C. C. 299.

(r) Arrangements for concentration and compression of cotton are usually restricted to compresses on the line of the originating carrier. At least two compresses are made available for each point of origin and in case of emergency an additional compress may be designated by the carrier. Compression of Cotton, 77 I. C. C. 185.

(s) "Flat" cotton is cotton offered for transportation uncompressed, to be delivered at destination uncompressed. Galveston Commercial Asso. v. A. & V. Ry. Co., 77 I. C. C. 388, 391.

(t) Proposal to restrict joint rates on cotton, cotton linters, and regins from applying on shipments originating on the L. & N. destined to northern, eastern, or Carolina points, when accorded transit for account of lines other than the L. & N., and to restrict to routes over which the L. & N. obtains its long haul the application of joint rates to northern and eastern destinations, found not justified. Proposed restrictions would re-

suit in preventing L. & N. cotton from having access to Carolina markets and would force its sale in eastern markets, and would close many rail-and-water routes over which joint rates from L. & N. points now apply. Transit and Routing on Cotton and Cotton Linters, 77 I. C. C. 724.

(u) In 73 I. C. C. 299, the Commission found that the schedules which proposed to prohibit transit privileges, including recompression or high density compression, at Texas ports, and limiting the application of the export rates on cotton moving under through export bills of lading to traffic delivered direct to ship side, had not been justified. Rehearing had. It appears that certain parties have agreed that the process of compression at Galveston takes place under the instructions of the steamship agents and after the property passes from the possession of the wharf company, but the testimony with respect to this question does not warrant making any modifications in the original report. HELD, original findings affirmed. Elimination of transit privileges on export cotton at Texas Gulf ports, 80 I. C. C. 235.

(v) Where cotton was shipped in plantation bales at a published tariff rate, reduced because of the carrier's right to compress in transit, and such rate included in the compression charge, and the tariff made the shipment subject to the printed form of the uniform bill of lading, and did not confer on shipper the right to designate the plant to compress his cotton, the fact that the shipper wrote on the face of the bill of lading, "To be compressed at Cleveland Compress Company, Houston, Texas," was not such stopping or holding of the property in transit upon the request of the shipper "entitled to make such request" as to relieve the carrier from liability for destruction of the cotton at the designated compress plant. D'Utassy v. Southern Pacific Co., 161 N. Y. S. 222.

CONCENTRATING RATES AND PRIVILEGES

See Compress Companies and Charges; Facilities and Privileges §4; Penalty Charges; Through Routes and Joint Rates §18; Transit.

IMPORTANT CASES SINCE 1908

(a) "Concentrated" cotton moves to compress from designated points under local bill of lading. When ready for shipment, warehouse receipt is delivered to carrier, new bill of lading issued, and cotton is sent forward at through rate in effect from point of origin to new destination and refund made to shipper of local charge for original movement. Lesser-Goldman Co. v. St. L. I. M. & S. Ry. Co., 27 I. C. C. 496, 497.

(b) It constitutes unjust discrimination, distance considered to charge higher inbound rates on uncompressed cotton for concentrating at Shreveport than to concentration points in eastern Texas. R. R. Comm. of Lousianna v. St. L. S. W. Ry. Co., 34 I. C. C. 472, 480.

(c) While a rule permitting the concentration at the point of shipment of numerous small shipments belonging to different shippers into one large shipment for transportation to one consignee by a steamship line may or may not be proper, there appears to be no jusification for applying a special rate on small shipments which are aggregated at destination after the transportation service has been completed. In other words, if small shipments by different shippers move independently from New York to Galveston, then it seems clearly discriminatory to subsequently apply a rate to such shipments lower than the rate which other shippers of smaller packages are charged. The conclusion is that this aggregating rule is discriminatory and unlawful in so far as it conditions the application of the rate on the ownership of the constituent shipment, and that it is also discriminatory and unlawful in so far as it applies on shipments other than those aggregated prior to transportation. S. P. Co. Ownership of Atlantic S. S. Lines, 43 I. C. C. 168, 178.

(d) Uniformity is desirable wherever possible in cotton concentration rates and rules. Lousianna Cotton, 46 I. C. C. 451, 459.

(e) It appears that the general basis for fixing the transportation charges in connection with concentration services is the application of the through rate from point of origin to destination. This

is accomplished by payment of the local rate to the compress point and, when the cotton moves out, refund of all the inbound charge if the rate from the compress point is the same as from the point of origin, or of a portion where the rate from the compress point is lower. In instances where concentration at particular compress points involves out-of-line or back hauls, a charge in addition to the through rate from point of origin to final destination is made. Natchez Chamber of Commerce v. St. L. I. M. & St. Ry. Co., 58 I. C. C. 149, 150.

(f) The commission is not authorized under the Interstate Commerce Act to approve the maintenance of the existing consolidation and in connection therewith to prescribe terms as to the manner in which loss and damage claims shall be handled as a condition of the continuance of the consolidation. Nor is the Commission authorized to require the resumption of operation by the constituent companies. The Commission is merely empowered to approve and authorize the existing consolidation. Consolidation of express companies, 59 I. C. C. 459, 468.

(g) Respondents, S. P., and others proposed to cancel the privilege of second concentration at New Orleans, La., on cotton originating at stations on, or moving in connection with the G. C. & S. F., M. K. & T., I. & G. N., and T. & B. V. The proposed cancellation will result in substantial increases in rates on cotton from Oklahoma and Texas to various destinations and concentrated a second time at New Orleans. Rates to be charged after cancellation would be the New Orleans combination. Respondents concede that New Orleans ought to be accorded liberal concentration privileges similar to those permitted at Texas cities. HELD, proposed cancellations not justified. Concentration of Cotton at New Orleans, 83 I. C. C. 18.

(h) Privileges like concentration of cotton are purely local to the railroad on which the concentration or transit point is located. Concentration of cotton at New Orleeans, 83 I. C. C. 18, 20.

(i) S. A. L., respondent, proposed to restrict the transit arrangements now accorded cotton, cotton linters or regins at Atlanta, Athens, Elberton and Winder, Ga., so that they will not apply on shipments originating on the A. & V., L. & N., I. C., Y. & M. V., and Southern. Respondent, since 1903, has published in its cotton transit tariffs a rule which permits the concentration at Atlanta of cotton originating south and west of that place when destined to southeastern, Carolina, or eastern mill points. The proposed schedules will compel shippers from this territory who desire to avail themselves of transit at Atlanta to pay combination rates to and from Atlanta on shipments destined to mill points beyond. The only reason offered by respondent in justification of the proposed schedules is the fact that the L. & N., and other lines have served notice upon it that they will no longer participate in the joint rates if transit is allowed at Atlanta. They perform no greater service on shipments accorded transit than they do on those which move over the same routes to the same destinations and are not transited. The conclusion is inescapable that these carriers are attempting to force respondent to abandon transit arrangements at Atlanta and that they will, if successful, largely control the movement and market of cotton originating on their lines. HELD, present joint rate with transit not unreasonable; respondent has not justified cancellation of transit at points mentioned; L. & N., A. & V., I. C., Y. & M. V., and Southern are not justified in refusing to participate in such joint rates when shipments are stopped at Atlanta, Athens, Elberton and Winder for concentration. Transit privileges on cotton, 83 I. C. C. 60.

CONSOLIDATION OF CARRIERS

CASES 1887-1908

(a) State may prevent consolidation of competing railroads.—A provision of a State Constitution that no railroad shall consolidate its capital stock, franchises, or property, or pool its earnings in whole or in part, with any other railroad owning a parallel or competing line, or acquire by purchase, lease, or otherwise any parallel or competing line, or operate the same, is not in conflict with the power of Congress to regulate interstate commerce. Louisville & Nashville R. R. Co. v. Commonwealth of Kentucky, 7 I. C. C. App. L.

(b) Prohibition of railroad consolidation not unlawful.—The prohibition by a state of the consolidation of parallel and competing lines of railroad is not an interference with the power of Congress over interstate commerce. The court says: It has never been supposed that the dominant power of Congress over interstate commerce took from the States the power of legislation with respect to the instruments of such commerce so far as the legislation was within its ordinary police powers. Nearly all the railways in the country have been constructed under State authority and it cannot be supposed that they intended to abandon their power over them as soon as they were finished. The power to impose such regulations upon their operation as a sound regard for the interests of the public may seem to render desirable. In the division of authority with respect to interstate railways, Congress reserves to itself the superior right to control their commerce and forbid interference therewith, while with the States remains the power to create and regulate the instruments of such commerce so far as necessary to the conservation of the public interests. Louisville & Nashville R. R. Co. v. Commonwealth of Kentucky, et al., 7 I. C. C. App LVII.

(c) State may prohibit consolidation of competing railroad.—The prohibition by a State of the consolidation of parallel and competing lines of railroad is not an interference with the power of Congress over interstate commerce. The court says: All police regulation of interstate railways interferes in-

directly more or less with commerce between the States in the fact that they impose a burden upon the instruments of commerce and add something to the cost of transportation by the expense incurred in conforming to such regulations. These are, however, like the taxes imposed upon railways and their rolling stock, which are more or less, according to the policy of the State within which the roads are operated, but are still within the competency of the legislature to impose. There are certain intimations in some of our opinions which might perhaps lead to an inference that the police power cannot be exercised over a subject confined exclusively to Congress by the Federal Constitution. But while this is true with respect to the commerce itself, it is not true with respect to the instruments of such commerce. If it be assumed that the States have no right to forbid the consolidation of competing lines because the whole subject is within the control of Congress, it would necessarily follow that Congress would have the power to authorize such consolidation in defiance of State legislation,—a proposition which only needs to be stated to demonstrate its unsoundness. Louisville & Nashville Ry. Co. v. Commonwealth of Kentucky, 7 I. C. C. App. LXIX.

(ca) The absorption of a competing line of railway by another in alleged violation of the statutes of a state is a matter within the control of the courts and can be considered by the Commission only in its ultimate results of inducing unreasonable rates. Warren Mfg. Co. v. Southern Ry. 12 I. C. C. 381.

IMPORTANT CASES SINCE 1908

(d) The Commission was requested to approve and authorize the consolidation of the express transportation business and the property devoted to that business of the different separate express companies into the American Railway Express Company. At the beginning of the period of Federal Control there were seven express companies operating over the railroads of the United States, the Adams, American, Wells Fargo, Southern, Great Northern, Western and Northern Express Companies. After the government assumed control and operation of the railroads the Director General of Railroads declined to carry out the separate contracts between the railroads and express companies under which the express business had been conducted, but advised the express companies that if they would form a single corporation he would make a contract with that corporation to conduct the business as his agent. This corporation was formed and a contract entered into with the Director General by which it was provided that the express companies would cause to be organized to carry on the express transportation business for the Director General. Thereupon the American Railway Express Company was organized under the laws of Deleware and, under a contract with the Director General, took over the express business for the Director General and acted as his agent. From the time the Railway Express Company began doing business until the early part of 1919 it made settlement of claims which had accrued against all the predecessor companies, and it still continues the adjustment of the claims which accrued against the American and Wells Fargo Express Companies. In the early part of 1919, the Adams and Southern express companies withdrew from the former arrangement, and since have themselves conducted the adjustment of claims filed against them. The record indicates that not only have these two companies disregarded their moral obligation with respect to many claims but that apparently they have endeavored by a studied plan to avoid even their strict liability. The consolidation having been accomplished there is today no actual competition between express companies. Even prior to federal control and the existing consolidation, there was practically no competition so far as express transportation, rates and charges were concerned, express rates being made on the block system prescribed by the Commission and applying alike to all express companies. The economies and elimination of wasteful service resulting from the consolidation would appear to be more than sufficient to offset any advantages to the public growing out of the separate operation of the four companies, even if, on a denial of this application, they should resume operations as such, as to which there appears to be some doubt. As to the rates and practices of the consolidated company, the Commission may regulate and control them to the same extent as if there were separate operation. HELD, the public interest will be promoted by the consolidation. Consolidation of express companies, 59 I. C. C. 459.

(e) It is not necessary as a condition

precedent to approval and authorization that the Commission ascertain the value of the properties consolidated. Consoldation of express companies, 59 I. C. C. 459, 464.

(f) The provisions of the Interstate Commerce Act with respect to prospective consolidation of rail carriers contemplate that competition shall be preserved but do not require that competition shall be inaugurated or increased. Consolidation of express companies, 59 I. C. C. 459, 464.

(g) The Commission is not authorized under the Interstate Commerce Act to approve the maintenance of the existing consolidation and in connection therewith to prescribe terms as to the manner in which loss and damage claims shall be handled as a condition of the continuance of the consolidation. Nor is the Commission authorized to require the resumption of operation by the constituent companies. The Commission is merely empowered to approve and authorize the existing consolidation. Consolidation of express companies, 59 I. C. C. 459, 468.

(h) Commission not persuaded that the approval of the consolidation of the express companies into the American Ry. Express Co. should be conditioned so as to require the constituent companies to provide for handling of claims and service of legal process in the jurisdictions where they formerly operated and to revive claims which may have been barred by the two-year-and-one-day limitation with respect to filing suit. Consolidation of Express Companies, 59 I. C. C. 459, 468.

(i) The Commission may regulate and control the rates and practices of a consolidated company to the same extent as if the constituent companies were operated separately. Consolidation of Express Companies, 59 I. C. C. 459, 468.

(j) The Transportation Act of 1920 deals with the consolidation of railways into systems by the amendment of section 5 paragraph 4 of the Act to Regulate Commerce, of 1887. The new rules seek to fix rates, not for any single carrier, but for the carriers by natural groups. By far the larger proportion of the traffic of the United States is carried by so called strong or prosperous roads. But it is equally true that a large amount of mileage is in the hands of corporations which, in a financial sense, may be denominated chronically weak. Regardless of the sources of this disability, these weak lines are as essential to the welfare of the communities they serve as are the strong lines to their patrons. It is the theory of this legislation that the railways must be considered as a whole, group by group, fixing by means of the new statutory rule of rate making, a general level of return adequate to maintain them all at a proper pitch of efficiency. The Senate bill sought to reduce the carrier corporations to a common denominator of earning power in terms of valuation by compulsory consolidation. It was intended to compel the stronger roads to merge their identity with the weaker ones for the common good of the country as a whole. But the motive for consolidation should not be permitted to bring about indiscriminate mergers, regardless of natural relationships of the carriers either to one another, or to the needs of their respective territories. It was in order that there might be consonance between such mergers as took place and the public welfare, rather than mere immediate profit to those concerned might result, that the formal proceedings were enacted into law. As to procedure, the statute contains three requirements which must be observed. The first is that competition, presumably in service, shall be preserved; the second is that existing routes and channels of commerce shall not be disturbed; and the third, subject it will be noted, to the foregoing requirements, is that the financial aspects of such mergers shall be kept in view. The calendar year of 1917 has been chosen for the purpose, largely because the results for that period most closely approximate the statute of an operating income amounting to 5·5 per cent of the investment in road and equipment. The aggregate mileage of class 1 roads, those having an operating revenue of $1,000,000, herein consolidated in 1917 was 220,000 miles. There thus remains the not inconsiderable aggregate of 39,000 miles of lines, consisting of the so-called short lines, the remaining class 1 roads, and those within classes 11 and 111. No attempt has been made to trace the natural relationships of these minor properties, and probably it is not necessary at this time. But the fact of their existence and of, in many cases, their grave necessities may not be ignored. A comprehensive plan of railroad consolidation

would include their allocation in due course; but the data are not at present available. It is held to be more important to create self-sustaining systems as to earnings derived from as large a proportion as possible of the area of the several great subdivisions of the country, rather than to attempt to put these properties together in such an exact way that they shall all have approximately equal mileage or equal gross or net earnings within each group. Niether mileage nor volume of business is the real test of ability to exist under the statute. If quality can be conferred by means of better developed traffic relationships, and if natural alignment and relationships can be adhered to, it is believed that the situation so far as the act is concerned will be satisfactorily met. The dynamic aspect of consolidation must also be kept in mind. The purpose being to promote a more evenly balanced competition, especially by means of equalization of opportunity in originating traffic as well as in its interchange and delivery, it is conceivable that congestion may be in a measure relieved by this plan. The growth of business in future years must accrue largely to the existing stems. Sound public policy demands that this growth should be so distributed as to avoid blockades and embargoes on the strong roads, while the weak ones coincidentally are drifting towards starvation. To insure a larger proportion of the increment to the weaker roads, by rendering them more capable of efficient service, is the idea. The purpose of the legislation being not to guarantee an income but to afford an equality of opportunity to earn it, was intended to be promoted by this means. All of these considerations join in commending a division of the country for purposes of consolidation primarily into the great subdivisions of trunk line territory, southeastern territory, that is to say, south of the Potomac and Ohio Rivers and east of the Mississippi; and western territory lying beyond the Mississippi. Furthermore, local peculiarities and the marked individuality of certain areas seem to make it desirable to set off certain subdistricts within these great primary districts. Thus New England and Chesapeake Bay or Hampton Roads territory, and a sector between St. Louis-Kansas City and the Gulf are set out by themselves and separately discussed. Such a general division of the territory of the United States conforms practically to the widest range thus far covered by any existing railroads or systems. Viewing the matter broadly, it seems not unlikely that any system ranging far and wide beyond the natural territorial divisions above described will either be lacking in breadth and stability of location, or will exceed the ability of a single management efficiently to handle. The new statutory rule of rate making and first decision rendered thereunder by the Commission—Ex Parte 74—also render it imperative in planning for comprehensive consolidation not to transgress the boundaries of these traditional territorial subdivisions. The purpose of the law being to fix reasonable rates not for individual roads but for entire groups, renders it essential that grouping adopted for this purpose conform to that which is adopted in effecting the consolidations. Otherwise confusion in the administration of the new law would be bound to result. The desirability is obvious of disturbing or disrupting existing corporations and relationships as little as possible. Precision must at all times be tempered by practicability; and, as in the limitation of rate areas or classification territory, an occasional lapse from system is deemed preferable to corporate or traffic dismemberment. The preparation of a comprehensive consolidation plan necessarily upon occasion involves a disruption as well as putting together of relationships. Obviously, such dismemberment should be rigidly minimized; and no proposal for so doing is made unless the evidence in its favor is most convincing. This tentative plan for consolidation proceeds upon the assumption that the distinction between so-called weak and strong roads, financially, is at present highly uncertain; and that it will require a period of experience under the new rates and under the new division of through rates as well as under the slowly readjusted commercial and industrial conditions after the war, in order to establish the relative earning power and credit of each. A period of trial is often necessary, both to reveal elements of strength and of weakness. Substantial equilibrium seems unlikely to be attained for a considerable period of time. The assumption is made that the purpose of this act being to rehabilitate the carriers through a new definition of reasonable rates, these entire groups of roads may be expected to prosper, to a degree as yet not ascertained, but nonetheless to a substantial amount. Whether this re-

habilitation will ultimately warrant the grouping herein tentatively proposed the future alone can decide. But necessarily the first step must be to provide for proper grouping in order to promote the best operating and traffic results. The responsibility for the subsequent financial success of the undertakings must then rest upon the exercise of the new rate making powers, conferred upon the Commission by the act. A peculiar difficulty in effecting strong with weak roads and of reconciling such merger with existing operating and traffic relationships, arises from the tendency of the weak roads to link up in series and to form thereby through routes extending sometimes clear across the country. Such routes were peculiarly the offenders in the old days of rate cutting. Their present day bid for traffic is not infrequently based upon particular attention to dispatch or certainty of prompt delivery. This competition in service is naturally expensive and tends still further to attenuate their net earnings. Furthermore, these smaller subnormal properties oftentimes serve as the natural arms or extensions of the larger companies, which by reason of a paucity of feeders, are forced to rely upon such association. Several assumptions akin to the foregoing one are made in the following plan. The first is that for a number of roads a substantial readjustment of capitalization must occur as a prerequisite for consolidation. Roads once weak have become strong, not only capable of supporting themselves but of projecting their vigor into other properties with which they may be associated. It is likewise presupposed throughout this report that all of the new powers conferred upon the Commission by the Transportation Act, 1920, will be upheld constitutionally. Such a complete reversal of public policy must lead to protracted litigation; but regardless of the final outcome no course in connection with this report is possible save to hold that the will of Congress as expressed in the Transportation Act is governing and supreme. Not even judicial decisions under the Sherman act or the commodity clause of the Act to Regulate Commerce are held to constitute a bar to the free allocation of these properties to the new systems provided by this plan. All of the roads concerned in such proceedings are therefore treated with entire freedom, assuming that the final decision as to the propriety of such placement will rest in future not with the courts but with the Commission. Another far reaching assumption is vital to the success of this plan. This has to do with the operation of terminals at great centers. Whatever the cause for the existing situation, a practically universal demand of shippers is that they be able freely to exercise their routing rights by the provision of open terminals, both at the point of shipment and at destination. The right of route across country is impaired if only possible delivery is at an inconvenient point. To put together railway lines on the map without having a constant regard to the possibility of free delivery or receipt at either end would indeed be futile. As to the particular means of this accomplishment—free and untrammeled utilization of terminals—there may well be difference of opinion. But, whatever the means adopted to this end, it is submitted that a proper adjustment of the various terminal situations,always of course with due compensation, is an important adjunct to any comprehensive consolidation plan. No recommendation, therefore, as to particular terminal remedies is offered in this report. Consolidation can never be effectively brought about without the adoption of a comprehensive policy as to terminal ownership, operation, or both. It is herein assumed that free access will be somehow provided, either under the present emergency powers as contained in section 1, paragraph 15, or by the adoption under a consolidation plan of the permanent arrangements in all of the important centers. The important point, whatever the means adopted to this end, is that there should be unified operation and entirely free access to all participants alike. Another great principle constantly kept in mind in connection with consolidation and having substantial effect upon it is the encouragement of alternate routes and gateways, in order to relieve present or prospective congestion at the great railway meeting points. There is always a certain proportion of business which by careful attention to the matter might be consolidated and shipped by an alternate route which should avoid the great center. The preparation of such a plan of consolidation thus affords a unique opportunity for the evolution of a comprehensive plan for the development of national resources. Too often in the past purely temporary or personal considerations of advantage or profit have determined the location of

our American railways. The administrative control of the terms on which the carrier companies may be allowed to ally themselves in the future may, if wisely administered, contribute to diminish economic waste and to promote commercial development. But such wise administration demands a comprehensive plan adopted in advance, and it is evidently the purpose of the act to draw up this plan, not alone for attainment of the immediate rate-making but also with a view to the larger purpose of a right direction of our economic resources as a nation in the years to come. TRUNK LINE TERRITORY. The creation of independent self sufficient systems in trunk line territory which shall compete with one another on more nearly equal terms than at present is simplified by the fact that the traffic is predominantly east and west along parallel lines. But it is complicated by the disparity in size and competing strength of the various properties, as well as by the fact that a considerable number of the railroads consist of disjointed links lying east or west of the Niagara frontier or else divided at the head of Lake Erie. The rugged Allegheny territory, with its north and south valleys and ridges, in any event leaves but a few available east and west passageways which are capable of utilization. There are five east and west trunk line stems. First, the New York Central route by way of the Hudson and the Mohawk Valley, thence north and south of Lake Erie. The second, the Pennsylvania system. The third, the Erie. Fourth, B. & O. Fifth consisting of combination of lines east and west of Buffalo. West of Buffalo the Nickel Plate, east of Buffalo, the Lackawanna. There can be little doubt as to the justification for systems as separate combinations, based upon the first three, New York Central, Pennsylvania and B. & O. Nor can there be any doubt of the existence of the two other primary through routes. The prime division then as to trunk line consolidation has to do with the fate of the Erie stem and that of Lackawanna-Nickel Plate. They ought to constitute the trunks of independent self sufficient systems. It would contribute to stability were they to do so. It is next in order to consider the constitution of these five proposed groups in detail, having in mind size, financial strength and comprehensive possession of the trunk line territory. By all three of these tests, the New York Central and the Pennsylvania have substanially fulfilled their destiny within the confines of this region. It will be found that certain lines may be abstracted or, at all events, given joint usage by the other groups, without injury to them commensurate with the advantages which would accrue to the trunk line territory as a whole from equalization of competitive strength. The Pennsylvania system is at present richly represented by mileage throughout trunk line territory. But it is in volume of traffic handled that it stands forth pre-eminent among its neighbors, not excepting the New York Central. It is proposed that the line of the Norfolk & Western be extended independently from Columbus to Lake Erie. This is part of a definite policy to create a group of independent lake to tide properties, cutting in their courses all of the five trunk lines and thereby contributing to a greater freedom of movement. Next in order of importance is the Baltimore & Ohio. This property has less than one-half of the mileage of the Pennsylvania. It is attenuated both east and west. And in order to strengthen it financially and as a competitive factor throughout trunk line territory it needs upbuilding at each of its extremities. The last of these objects is met by the inclusion of the Cincinnati, Indianapolis & Western Railroad, and the Chicago, Indianapolis & Louisville, known as the Monon. On the east, interchange and tonnage substantiate the claim of the B. & O., that it should be merged with the Reading. But it is equally true that the public interest will be subserved only by the assurance of free utilization of the Reading and Central of New Jersey rails by the other surrounding railroads, especially the New York Central. The significant point is that both the New York Central and the B. & O., have an interest in the Central of New Jersey property; and, whichever one takes it, protection for the through route of the other should be afforded. Incidently, provision would have to be made for some joint use of the valuable terminals of the Jersey Central at Jersey City, although the New York Central's West Shore yards certainly give it already more elbow room than the other roads enjoy. The terminal situation constitutes the other claim of the B. & O., to the Reading and Jersey Central. The B. & O. has a substantial investment in terminals on Staten Island and a large and constantly growing vol-

ume of traffic into New York. Shall the Western Maryland be included in the B. & O.? The Western Maryland would appear more satisfactorily to serve the public interest as a western outlet for a through route from Lake Erie via Pittsburgh. The Western Maryland is primarily a soft coal road, with an eye to a trunk line future. And the New York Central with its heavy Pennsylvania coal investments is a direct competitor in the one respect as well as the other. The real question of the Western Maryland reduces itself to choice in disposition between the B. & O. and Nickle Plate. It fails entirely to fit in with the Erie. It is important that the Western Maryland be not pocketed at Baltimore against free movement to the northeast. The recommendation to exclude the Western Maryland from Baltimore & Ohio control is final. A natural extension of the B. &. O. would be the inclusion of the Pere Marquette. But after due consideration, it has appeared best to constitute an independent group of all Michigan properties rather than to tie them up one by one with the five trunk line systems, permitting each one a line to the northwest by itself. The B. & O. has no need of the Pere Marquette, if such action is taken. It does not seek preferred treatment in the peninsula, but should be protected against a closure of these ferry routes if the available lines are parceled to others. The Erie is the fourth stem upon which it is attempted to construct a reasonably comprehensive trunk line system. As an instrument for transportation it now possesses many admirable qualities. The problem for the Erie is two-fold; to readjust its capital to its physical investment; and to develop feeders and necessary entrances to new territory. To extend and round it out, and, particularily, to let it in steel and coal territory, is the important need. The following additions are proposed; On the east, the Delaware & Hudson affords an outlet to northern New England. N. Y. O. & W. is controlled by the New Haven but it has never been serviceable or profitable in any substantial way to its purchaser. A more satisfactory use of the O. & W. would seem to be its consolidation with the Erie-D. & H. system, for such merger would considerably amplify the Erie terminals at New York, under the contract for the use of the West Shore yards at Weehawken. The Erie is also strengthened by consolidation with the Lehigh Valley. This adds an important coal traffic; and the many ramifications through New York and Pennsylvania would materially contribute to a strong trunk line. Extension to St. Louis is afforded through merger with the eastern half of the Wabash. This gives access to western connections, the western half of the Wabash going to afford an entrance to the Union Pacific into St. Louis. It is proposed to strengthen the Erie finanically and to give it first class access to Pittsburgh by assignment of the Pittsburgh, Bessemer & Lake Erie to this system. This latter road is owned by the United States Steel Corporation. If the commodities clause excludes railroads from the conduct of industry the Congress ought logically and fairly to exclude manufacturing industry from participation in conducting railroads. If legislation be necessary to bring about this result, it should be had in the interest of stability and rehabilitation of the American railway net. The Erie system, obviously, should be admitted by means of trackage to the great railroad centers of Indianapolis and Columbus. No choice is made, however, as to the particular lines to be employed for this purpose. It is important that the Erie have more soft coal tonnage. It should be merged with the Pittsburgh, Shawmut & Northern and the Pittsburgh & Shawmut. The Erie's crying need for company fuel commends this disposition, despite the physical obstacles to be overcome, as well as the necessitous conditions of these little properties. They contribute coal even if they fail to add revenue. The main stem of the fifth trunk line is found in the New York, Chicago & St. Louis, which parallels the Lake Shore from Buffalo to Chicago. The Nickle Plate at present has neither a line of its own to St. Louis nor extension to the Atlantic Seaboard. The Lackawanna is absolutely a first class trunk line with every possible facility for safety and dispatch. Apparently the natural relationship between these two properties has induced consideration not infrequently of absorption of the Nickle Plate by the Lackawanna. There can be little question that with the growth of future years this low grade direct line through the heart of the trunk line territory will be needed in the public interest. The pre-eminent financial strength of the Lackawanna would appear naturally to be the most serviceably employed in the creation of a new system, just where it is most likely to be of advantage in the course of time.

The natural extension to St. Louis of the Nickle Plate stem, is the Toledo, St. Louis & Western, otherwise known as the Clover Leaf. Its strength arises in part because of the fact that it cuts across every east and west line of importance in central freight association territory. Adequate feeders at the western end are also provided by adding the Lake Erie & Western lines. Columbus is reached over the Toledo & Ohio Central and east thereof over trackage on same road to Zanesville & Western, to connection with Wheeling & Lake Erie. Northern Ohio and Akron, Canton & Youngstown will be connected Thus tied in at both ends to the proposed Nickel Plate-Lackawanna system, it appears that their inclusion therein is open to little objection. The Lackawanna-Nickle Plate must have access to soft coal territory and to the great iron and steel district around Pittsburgh. This is done by the inclusion of the Wheeling & Lake Erie, the Pittsburgh & West Virginia and the Western Maryland. The importance to the port of Baltimore of this new through route is obvious. The Buffalo, Rochester & Pittsburgh from the north by trackage rights over the B. & O. into Pittsburgh, would also materially contribute to strengthen the Lackawana system. In Michigan there remains the Pere Marquette, the Grand Trunk and the Ann Arbor. The plan is to treat these lines in Michigan as a unit putting them all together into a regional group, which shall offer its facilities freely on equal terms of neutrality to all comers and which shall specialize its services within itself. The ferry routes across Michigan to the northwest bear certain resemblances, potentially to the different Canadian routes from New England. Each is operated at a disadvantage against standard all rail lines and yet each is important, especially in times of congestion, and each exercises a certain check upon the rate situation as determined by the standard routes. It is recommended that all of these roads be consolidated in a single group under the leadership of the Pere Marquette. As to the Detroit & Mackinac, it is a natural supplement to the Pere Marquette. The Detroit & Toledo short line builds in very well with this proposed Michigan system. The need of an independent railroad for a soft coal fuel line is obvious. To this end it is recommended that the Detroit, Toledo & Ironton road be incorporated with the Pere Marquette. To little properties, the Lehigh & New England and the Lehigh & Hudson are mere bridges to connect New England with all of the trunk lines by an up river cross country route. The Pennsylvania might profitably use the L. & N. E., as a back entrance into New England, unless it were to be merged with the New England roads as a group for a fuel line to Harrisburg. Such is my recommendation. As for the L. & H., it is believed that it may safely remain as at present, as a joint bridge line for common use by all the trunk lines. It might perhaps be owned by some one of them, but its rails should be open to all alike on equal terms. THE NEW ENGLAND REGION. The transportation problem of New England as respects consolidation is unique. It is an economic unit on the outskirts of the central commercial territory of the United States. Its transportation problem is to foster its manufactures in three ways; First by provision for the cheapest inbound carriage of raw materials, coal, cotton, iron and steel; secondly, by insuring cheap transportation for foodstuffs and other necessities of common life from the remote centers of their production; and thirdly, to make certain that the freight rates on its finished products, outbound shall keep them in the various markets throughout the heart of the United States, in the face of constantly rising local competition thereabouts. Financially, of course, the results obtained from inbound and outbound tonnage are not as widely different, owing to the fact that most of the traffic into New England consists of bulky, low grade business, mostly raw materials. Whereas the traffic delivered is constituted mainly of high grade merchandise or manufactures, on which a relatively high freight rate is paid. It is this return current of high grade tonnage upon which the entire power of New England to trade with its western connections depends. It is a valuable business, much coveted in exchange; and the prime element in constituting a New England group of railroads, independent of trunk line affiliation is the maintenance of its ability as a distinctive group of carriers to distribute this tonnage among all western connections, in such a manner as to assure both preferred service and a fair proportion of the through rate. It is apparent that the Canadian routes are

important not as a main resource, but rather by reason of their potential usefullness ,either in time of congestion or as a check upon undue rate advances by the standard routes. Consolidation of the New Haven with the B. & O. amplified system as proposed in this report, deserves the most serious consideration. This is the most attractive one following out the principle of trunk line consolidation. What shall be done with the Boston & Maine, Maine Central and the Bangor & Aroostook? Under a proposed trunk line system the Boston & Maine would be consolidated with the Erie system; the Maine Central and Bangor & Aroostook consolidated with the New York Central. It is my own choice for northern New England if a trunk line plan is to be adopted at all. The alternative consolidation plan for New England proposes to create a single comprehensive system out of its existing carriers, preserving only such domestic competition among them as shall satisfy the demands of the statute. The underlying theory is that the New England carriers are closely interlocked with one another by historical, financial, and commercial considerations, based upon geography; and that their joint rehabilitation may be best brought about by concerted action, not only as respects relations with trunk lines or foreign railroad connections, but also as respects their relationship with the New England public. Certain advantages of a group treatment of New England are manifest. They may best be considered, first, as concerns foreign relations, that is to say, dealing with carriers outside New England, and secondly as to problem of domestic concern. As to the former, the outstanding advantage is the preservation of the existing freedom of interchange with connections with every part of the country. This entire freedom of routing is a boon, and the competition in service which attends upon it is of prime importance. Another advantage of the New England plan is that it affords a consolidated power in dealing with all trunk line connections as to divisions of through rates. Nothing would contribute more to bringing about a division of through rates on an equitable basis than a wholesome respect among the trunk lines for the consolidated power of a New England group, free to divert its immense and lucrative traffic through any of its numerous gateways. With a well balanced trunk line competition among the five systems, the advantage attendant upon consolidation is obvious. Another possible advantage of a regional New England consolidation has to do with the fuel conditions territorially. An outstanding disability of these railroads is their remoteness from a soft-coal fuel supply for company use. Normally, southern and western New England is almost entirely dependent for its company fuel upon all rail carriers. There appears to be a normal and economic tendency to substitute all rail for a broken rail and water service. The two most accessible sources of soft coal are the Clearfield region north and northeast of Pittsburgh and the Fairmount and Connellsville district mainly due south of Pittsburgh. The Clearfield region is tapped by the Pennsylvania, the New York Central or the B. R. & P. These roads could handle the coal direct or through the Lehigh & New England, and the Lehigh & Hudson. The latter road is to be owned by all carriers as a bridge line and the east end of the N. & N. E., should be owned by the New Haven. Domestic operation and traffic also merit consideration. It is important that there be a consistent administration of the different gateways. Congestion locally has been all too frequent. It is submitted that the location of New England in a transportation pocket with few outlets, requires a greater degree of unified administration than is possible under existing conditions. A closer correlation between the railroads and all other forms of local transportation is desirable. A consistent development of means for local interchange would seem to be favored by regarding all New England as, in a sense, a great terminal. A final advantage of the group plan is that it would promote a higher sense of local interest and of responsibility financial as well as commercial. One is forced to the conclusion that the rehabilitation of the New England railroads must take place through a mustering of all of the financial resources of the region, public as well as private. The industrial preservation of New England demands it. CHESAPEAKE REGION (Lake to Tide, soft coal.) Three railroads based upon Hampton Roads in the lower Chesapeake Bay, although in part in trunk line territory, and to some degree participating competitively in trunk line business, merit consideration by themselves. The three roads compre-

hended are the Chesapeake & Ohio, the Norfolk & Western and the Virginian. Although only about 38 per cent of the total common and preferred stock of the Norfolk & Western is held by the Pennsylvania, the road is to all intents and purposes a Pennsylvania property. It appears that as to comprehensiveness the three properties in this group differ from one another in degrees. The C. & O. has succeeded independently in constituting itself a lake to the tide soft coal property. The N. & W. has not progressed more than two thirds of the way to Lake Erie water front, and the Virginian is still entirely a tidewater affair. The technique of coal road operation especially sets off these properties from those of the trunk lines. The coal is produced from numerous mines in these limited areas and is gradually collected by an elaborated operation of trunk lines into through trains which move either to tidewater, to the great lakes at Toledo or to central distributing points, like Cincinnati, Chicago, or Columbus. From these centers the coal is transported to numerous destinations in the middle west and northwest. The gathering of this fuel from the mines, its transportation in solid trains to the central distributing points, and its subsequent delivery at these points—either to vessels for water transportation or, in relatively small quantities, to various connections—constitutes a complete transportation operation. To add a great volume of traffic would complicate the situation. No attempt should be made to create general trunk lines out of these roads; but they should be treated, nevertheless, as national assets, having in view their general usefullness to the entire country and to all of the other railroads. The surplus coal production above the needs for consumption east and west—for export, or for the central west—should be free to find its way more readily in every direction. This need is accenuated by the difference in quality and usage above mentioned. A greater need of movement in both directions, and a freer flow of coal to all possible markets seems desirable. Entire freedom of flow will be produced only by the utmost efficiency of the instruments of transportation. This efficiency calls for close coordination between barge or vessel movement and car movement. It presupposes the free movement in unbroken train units from the mine to tide or lake as the case may be. The docks should be owned and operated by the originating railroad. Movement is interrupted by any shift of operating control en route; and particularly is it important that every railroad serving these coal fields should have outlets over its own rails east and west to lake or tide. The prime purpose of the accompanying recommendations is to accomplish this end, although the acuteness of need varies as between the several properties. The Virginian Railway, serving only the smokeless fields, with a market exclusively at tide, most urgently needs extension to the great lakes. The plan most seriously considered, and herewith recommended, is of consolidation with the Toledo & Ohio Central and the Kanawha & Michigan. The completion of the Virginian line through to Toledo over the rails of the above named carriers is physicially a simple matter. The net result of such construction and trackage would be to render the Virginian Railway a lake to tide property, capable thereafter of offering its surplus smokeless coal as freely in western markets as in the east. The need of extension of the Norfolk & Western to the Lake Erie water front is somewhat less apparent than that of the Virginian. But the growing volume of westbound business and the desirability of independent operation, from dock to dock by one management lead to the recommendation that this railroad also should be given an outlet to the lakes independent of the Pennsylvania lines. The western division of the Toledo & Ohio Central, which passes through Columbus, offers an alternative for a lake line to the N. & W. It would unquestionably enable the N. & W. better to cope with the immense coal requirements of the northwest in future years. The grand strategy of the Hampton Roads properties, as above outlined, might still be attained by one modification as to detail. Were the Virginian and the N. & W. to be consolidated not only might a single outlet to Lake Erie be developed for both, but also a number of operating economies might be effected. Were these two to be combined, the two lines of the T. & O. C. might be worked for the joint benefit of them both as thus consolidated. By extending the two lines, which now fall short of completion, through to Lake Erie, every trunk line is afforded a direct connection and an opportunity to participate on more nearly equal terms than

at present in any movement east and west from these particular lines. To afford such direct connection with the main stem of every trunk line is the underlying principle of these recommendations. THE SOUTHEASTERN REGION. Southeastern territory, south of the Ohio and Potomac rivers and east of the Mississippi, contrasts sharply as respects transportation conditions both with trunk lines and with the west. Population is sparse, and traffic is both light and to a considerable degree, seasonal in character. There is relatively little local business. Much of the traffic is for a long haul, either of raw products —cotton, lumber or garden truck—northbound; or foodstuffs and manufactures in the opposite direction. Formerly there was widespread water competition; but, except for the extended coast line service, this has now become relatively insignificant. The numerous rivers and the encircling seaboard have, however, profoundly affected the historical development of its transportation system, from which there has resulted many of the existing corporate relationships. Most of the railways have been constructed not so much in, as into the interior of this region. A bird's eye view of southeastern territory shows that it is divided geographically down the middle from northeast to southwest, parallel with the coast, by the Allegheny mountain range. From Atlanta south, there is no discernable separation into east and west; but from Atlanta north, the railways of this territory have first gradually extended themselves more or less parallel with this mountain barrier. On the east there resulted three distinct systems; namely, the Southern Railway, the Atlantic Coast Line, and the Seaboard Air Line. In the west, transportation was provided primarily by the Illinois Central and the Louisville & Nashville. On the Mississippi side the preponderance of traffic is southbound, but along the eastern continental shelf both bulk and value of tonnage are greater toward the north. Twenty-five years ago one might consistently have divided the south into two sub-districts for purposes of railroad consolidation. But the events of the succeeding decades have profoundly modified these conditions. Through routes from New Orleans to the Potomac gateways trend northeasterly; and similar through routes, especially for the carriage of Florida products and lumber trend northwesterly from Jacksonville to St. Louis. Each half of the south, east and west, is therefore today much more closely bound to the other by the ties of trade than a generation ago. A complete identity of interest between the eastern and the western halves of the south is not quite so apparent with the next great existing combination, that of the Louisville and Nashville, and the Atlantic Coast Line. Since this time these two properties have evolved, not so much as allies, as integral parts of one and the same great system. It is clear that for this second great existing combination, as well as for the Southern Railway, it must be regarded as having established its fight to unity as it stands. The remaining large systems in the southeast are those of the Illinois Central and the Seaboard Air Line Railway. The eastern and the western halves of this region are indissolubly bound together by the diagonal route, which meet and cross one another at Atlanta. A great parallelogram is depicted with Richmond, St. Louis, New Orleans, and Jacksonville at the four corners—Cincinnati and Louisville being midway of the northern side. Three at least of the four southern systems pretty completely cross this territory completely, either from Richmond toward New Orleans or from Jacksonville to the northwest through Atlanta. Between almost all of the stragetic points there are two fairly evenly balanced systems except as against the Illinois Central main line from Chicago to New Orleans. The nearest direct competitor—the Mobile & Ohio to the rival port of Mobile, is hardly integral in the Southern Railway as an interior system. A matter of fundamental importance concerning not alone the southeastern states, but the entire middle west, is the future development of the seaports on the Atlantic and in the Gulf of Mexico. But a great and growing interest among manufacturers and in the Mississippi Valley is manifested in the possible movement of their products southward rather than due east to the sea. It is not abnormal for such manufactures to move out of Michgan by way of New York, but there ought to be substantial equality of opportunity to ship the product through New Orleans; and this is particularly the case from points farther south like Chattanooga, Tenn. Every encourage-

ment should be offered to fill these return southbound empties with exports thereby encouraging the development of the new routes and seaports in this entire southeastern territory. As long as the superior trunk line facilities and the lake competition obtain the southern ports are bound to operate under a handicap. But the growing importance of the Panama canal will doubtless lessen this in future. The Southern Railway system as at present constituted has so admirably restrained itself against overexpansion, so thoroughly consolidated its hold upon the field within which it is best fitted to serve, and has so far contributed to the upbuilding of the south, incidentally increasing its own revenues thereby, that it will be little disturbed by this general plan for railway consolidation. The Southern Railway, owning the Mobile & Ohio, would apparently welcome its transfer and utilization through other connections. But until postive advantages may be discovered, not as yet revealed by investigation, there seems no course open other than to recommend its continuance at present. The main line of the Georgia Southern & Florida from Macon to Jacksonville has been so improved physically that the policy has been pursued by the Southern Railway of gradually diverting all of its traffic to and from Jacksonville via this line. The New Orleans Great Northern Ry. operates an independent property almost 300 miles in length, extending up to Jackson, Miss. It links up with the Alabama & Vicksburg and both seem foreordained for inclusion in the Southern Ry. The Louisville & Nashville and Atlantic Coast Line constitute a second system throughout the south which admirably matches the Southern Ry. It differs from the Southern principally through its network of lines in southern Georgia and Florida. The Atlanta, Birmingham & Atlantic Ry. is the largest single property in the southern states which is still independent of the great systems. This railroad is an outgrowth of a terminal enterprise at Atlanta, and the only way to save the situation was to construct a railroad to serve the terminal. It is the location of the A. B. & A. as a direct line and bridge for the L. & N.-A. C. L. system which constitutes the principal source of its value. All of the fruits and vegetables from mine roads in Florida, destined for western points through the Atlanta gateway, are routed this way. The conclusion is that merger of the A. B. & A. with exception of the branch to Thomasville which is serviceable to the S. A. L., in the L. & N.-A. C. L., is desirable in the public interest. Another supplementation is by means of the line of the Georgia & Florida Ry. This little road from Augusta southwest to Madison, Fla., is one of the smaller properties which ought to be incorporated in the stronger systems. Its particular value is in connection with a through route between Florida and Cincinnati by the C. C. & O. gateway. The Norfolk Southern should be consolidated with one of the stronger systems. This runs through the middle of North Carolina with its base on Hampton Roads. It should be merged with the L. & N.-A. C. L. The Winston-Salem branch of the Norfolk and Western should be merged with the Atlantic Coast Line system. The continued independence of the Seaboard Air Line merits attentive consideration. Its financial condition does not permit it to support further additions which are not at least of equal contributing strength. At present the road is unduly spread out and its various arms are disconnected. These arms extend somewhat entreatingly toward a connection with the Illinois Central. A combination of the two properties gives general comprehensiveness to the combined group, quite analogous to the reach and scope of the other two great systems. The S. A. L., is not at present a preferred connection of either the Illinois Central or the Central Georgia. Nor would such a merger contribute to the distribution of coal, since both the Illinois Central in Alabama and Tennessee and the entire Seaboard system are lacking in coal development. For these and other reasons the alternative is elected of retaining the independence of the S. A. L. as a fourth system in the southeast. Given a coal supply from the north by participation in the affairs of the Clinchfield property and the Seaboard may well establish itself finally as a great railroad. The Georgia Southern and Florida Ry. operates about 400 miles of line in southern Georgia and northern Florida. It is controlled at present by the Southern. It would accord apparently with the announced policy of the Southern to abstain from local development in Florida to withdraw from a part of this investment. The Southern Ry. is

most profitably utilizing the main line of this railroad. But the southern branch from Valdosta, Ga., to Palatka quite appropriately fits into the Florida network of lines in the Seaboard system. It is further recommended that the Durham branch of the Norfolk & Western extending from Lynchburg south be merged in the Seaboard Air Line system. The net result as to the Virginia gateways would be to give access for the Southern Ry. to all of them except Roanoke and Petersburg; to give the Atlantic Coast Line access to every Virginia gateway except Lynchburg, and to let the Seaboard into all of them except Roanoke. Coincidentally all these southern systems would be afforded satisfactory interchange points with all three of the principal routes to the west. The A. C. L. would perhaps be favored because the Roanoke gateway would afford a through route to the east by way of the Norfolk & Western to Hagerstown. But this advantage is a necessary feature of the situation. The Illinois Central occupies a unique position among the carriers of the country. Traversing one of the most fertile regions on the earth, confronted by no physical obstacles of grade or alignment and rigidly confining its activities to the cultivation of its native territory it has prospered accordingly. It is evident what one has to do here with a system which is industriously pursuing its own best ends and contributing thereby to the upbuilding of the country. Neither from an operating, traffic or financial standpoint does there appear to be a necessity for disturbance of the existing situation. Such modification as is suggested is merely in detail. It must remain as a trunk line to the Gulf. It is recommended that no change take place in so far as the stem from Chicago to Council Bluffs is concerned. The Memphis-Birmingham division of the St. Louis-San Francisco is one of the great arteries of commerce in the south. The recommendation is that it be assigned to the Illinois Central. The Illinois Central has so far built the Yazoo & Mississippi Valley road into its system that to recommend any transfer would be manifestly prejudicial to the parent system. The only other addition to the I. C. system is the Tennessee Central, affording entrance into Nashville, and the Gulf & Ship Island, which more naturally attaches to this system than any other. The Carolina, Clinchfield & Ohio R. R., although operating only 291 miles is so situated stragetically in its relation to the southeastern territory and particularly to the coal supply, that its disposition under a national consolidation plan merits careful consideration. It is at once a bridge line and also an indispensable fuel line for the south. It is essential in many ways to the successful operation of a number of adjoining systems. The second dominant feature of the Clinchfield property is its relation to the coal supply of the southern states. The coal measures of the territory of eastern Kentucky, western Virginia and northeastern Tennessee constitute the supply primarily for the entire southeastern territory. The incorporation of the Clinchfield with the Southern would not put an end to competition. Analysis of the traffic interchange between the Clinchfield and the three principal systems operating in the Carolinas confirms the impression as to the great and increasing preponderance of business with the Southern. In conclusion, it is clear that while originally the Seaboard stood closest to the Clinchfield enterprise, the role of next friend has been most successfully assumed by the Southern. The Southern Ry. has assuredly built itself into the enterprise. The Florida East Coast Ry. is plotted to all these southeastern railways because of the fact that it is a bridge line, operating in a territory which assuredly will not support, at least for many years to come, another competing line. It would be a manifest injustice and a hardship to other railroads to tie this property up to any single system. It is recommended therefore, that the Florida East Coast Ry. remain independent, or else that some plan be evolved which shall guarantee by joint control equal and impartial treatment for the Southern Ry., the L. & N.-A. C. L., and Seaboard Air Line. THE WESTERN TRANSCONTINENTAL REGION. The grand strategy for transcontinental traffic in western territory necessarily depends upon the supply of available through routes connecting either Chicago or St. Louis with the Pacific coast. In the northern group there are three lines: The Great Northern, the Northern Pacific, and the Chicago, Milwaukee & St. Paul. The middle group consists of the Union Pacific, and Denver and Rio Grande. Southern railroads are the Santa Fe and the Southern Pacific. The western trans-

continental problem thus resolves itself into such an arrangement of these seven existent stems as shall best preserve a well balanced competition within each of the three territorial groups, and which again, in an even broader way, shall promote a normal rivalry as between group and group, covering the entire transcontinental field from Canada to Mexico. The east and west plan lines naturally end at important centers like Omaha and Denver. And, to a considerable degree, the situation at St. Paul-Minneapolis is the same. More through lines, in short, enter each of these cities from the east than there are available through lines leaving them toward the west. The neck of the bottle, in other words, becomes progressively narrower. This circumstance greatly complicates the stragetic analysis, for it forces a choice as to stem connections among a much greater number of available roads towards the east than the seven possible gateways which penetrate the Rocky Mountains. Whether actually separated or not as distinct corporations, the difference between the ordinary railroad and the mere bridge line is basic and determinant. Inasmuch as the Santa Fe, the St. Paul, and the Hill lines have all elected to conduct transcontinental business competitively, under unified ownership clear through from the Pacific coast into Chicago, it seems imperitive that the same scope should be given to all the rest. The Union Pacific Railroad is the key log to the transcontinental jam—it is the clue to the plot. It is at once the oldest and shortest, logically the most perfect and financially the strongest, among all the transcontinental stems. Until the completion of the Western Pacific from Ogden westward, the Union Pacific was a veritable monopoly, the only through route directly to San Francisco. The U. P. has attained an inordinate strength and a dominant position, as practically the only first class direct through route. And yet there is available for competition with it another new bridge line, the Western Pacific, which, while physically prepared to function, has broken down because of the lack of interchange, connection, and support at both ends. The first essential choice to be made therefore is of such a merger for the Western Pacific—and with it also, of course, the Denver & Rio Grande—as shall enable them to be matched against this dominant key line, the Union Pacific Railroad. Regardless of source, however, the fact remains that to successfully rival the Union Pacific will call for an army of operating and financial resources which it will be extremely troublesome to find. The difficulty of matching the Union Pacific by a rival direct route is not confined alone to the carriage of the burden of the Western Pacific. This bridge line is pivotal to the situation. It is manifestly a precarious bridge, with absolutely no friendly footing at the western bridgehead. But that is not all. The Denver & Rio Grande is most equally a bridge line, essential to the constitution of any direct through route by way of Salt Lake City. It is in a pathetic and parlous state. There are but two railroads in western territory which by reason of their geographical location, their traffic interchange, and their inherent financial strength are adequate to undertake the effective utilization and development of the Western Pacific-D. & R. G. bridge. The first of these is the Chicago Burlington & Quincy; the other is the Sante Fe. Over a series of parallel lines closely bound together, the Burlington runs directly west to the base of the mountains both at Denver and at Cheyenne. It is self-sufficient, having amply strengthened itself by the provision of coal lines the entire length of Illinois. Its financial strength finds no counterpart anywhere except the Union Pacific. Evidently the Burlington must be still further strengthened by some alliance with another strong railroad. All the relationships which our subsequent examination reveals, points to the Northern Pacific as the most obvious side partner with which to undertake a difficult joint enterprise, the support of the Western Pacific bridge line. It will be shown that an effective counterpart for the Union Pacific can be produced only by some such alliance between a middle transcontinental road and one lying in the north. The location of the Denver & Rio Grande is such, and the Sante Fe so approaches it, that this property to the Sante Fe would be a feeder, more than a mere bridge. To the Burlington, both the D. & R. G. and the W. P. would be merely the means to an end. To the Sante Fe, one of them—the former—would be a thing in itself. For these reasons, the Santa Fe is better fitted to assume the new obligation of the Western Pacific bridge line than the Burlington. There is the same objection to Santa Fe control of the Western Pacific, that is to

say, of two gateways into California, as there is to the single control by the Southern Pacific of both these gateways. Seeking to produce evenly matched conditions, therefore, the Burlington-Western Pacific is much more closely parallel to a Union Pacific-Central Pacific system than any combination built upon the Santa Fe could possibly be. It is just as essential that the Western Pacific be administered free from Santa Fe control, as that the Central Pacific be divorced from the Southern Pacific. Not to do so would far more than counterbalance the Panama handicap. It would then so far press the advantage against the other railroad connections into Ogden from the east as to jeopardize their future. Subsequent financial analysis clearly establishes such a diversity as to earning power, feeders, and general conditions between the three lines west of St. Paul, that a much better balance can be brought about by pitting the two weaker companies against the Northern Pacific than by leaving all three of them to compete with one another. The plan proceeds therefore upon the basis of two through northwestern transcontinental systems. It subsequently appears that for decisive reasons the Union Pacific and the Chicago & Northwestern should be merged in a very strong combination, running due west from Chicago, and no other relationship for a direct eastern stem for the Union Pacific conforms to the statute as to preservation of existing trade routes. But this arrangement obviously intertwines the northwestern transcontinental sector with the middle group of through lines. The Union Pacific-Chicago & Northwestern combination is left in possession of lines, not only due west to San Francisco, but up into the territory northwest of Chicago as far as the head of Lake Superior. This system also penetrates by way of the Oregon Short Line into the northwest, into Washington and Oregon alike. To balance up conditions, it is imperative that an equally strong and an equally comprehensive system be set up against it, having as wide a range on the Pacific coast. This is another reason for the Burlington-Western Pacific combination, also because remaining intact as a system, including the river line to St. Paul, it creates a worthy competitor as to reach and power. Only by way of the Burlington and the Northern Pacific, the two strongest roads through St. Paul, is Seattle reached by a line able to cope on even terms with the Oregon Short Line. The simplest solution for the northwest therefore, apparently forced by the express terms of the statute and in order to minimize existing corporate disruption, is to elect the alternate of two rather than three transcontinental systems through the twin cities. And this choice involves a divorce of the Great Northern from the Northern Pacific; and the alliance of one or the other to the St. Paul system. The Northern Pacific is amply provided with branches at the western end, just where the St. Paul is notoriously weak. And, conversely, the wealth of branches throughout the territory northwest of Chicago admirably supplements the Northern Pacific in reaching traffic originating territory. All these considerations, of economical operation, conservation of investment for future use, and grouping as to branches and feeders, commend this union. The union of the Northern Pacific and the St. Paul is open, however, to one fundamental objection. It runs directly counter to the terms of the statute as to the preservation of competition. It is believed that the objection springing from the almost complete obliteration of competition by merger is conclusive in and of itself. Almost every advantage except that of economy and efficiency from joint operation attaches to a consolidation of the St. Paul with the Great Northern. The two lines instead of being locally competitive, and keenly so, are in several ways supplementary. The Great Northern is materially more developed at the west end than the St. Paul, and its numerous feeders through North Dakota add, rather than duplicate, the St. Paul lines. This merger has certain decided advantages as to terminals over the St. Paul-Northern Pacific combination. The fundamental test of financial stability, namely, margin of safety above fixed charges, commends the Great Northern-St. Paul combination. This combination needs certain additions in order to balance competition throughout the northwest more fairly with the Northern Pacific-Burlington combination It must be protected as to access into Portland, Ore. The Spokane, Portland & Seattle admits the St. Paul automatically under the proposed merger to Portland territory. And the continuance of the joint line owned by the N. P. between Seattle and Portland would assure competition south of Seattle. North of Seattle, the alliance admits the St. Paul

over the Great Northern lines into Vancouver. Similarly the rights of the Great Northern in the Deschutes River Canyon, and down the Willamette Valley should be assured equally with the St. Paul. Thus, it appears that each company would profit greatly by the partnership and would be able to cope more successfully with the old and firmly entrenched Northern Pacific line in this district. The Union Pacific is unique among transcontinental lines in having so far refrained from entrance into Chicago over its own rails. The outstanding facts as to interchange is with the Chicago & Northwestern, as it, excepting the St. Paul, exchanged more cars than all of the other lines put together. An equally potent factor which accounts for the preference to the Northwestern over the St. Paul, doubtless, is the heavy traffic from the east by way of the Vanderbilt lines which the Northwestern is able to offer in exchange. Its terminals at Chicago and its eastern affiliations render it beyond all question the natural eastern connection for this system. This alliance conforms in another respect to the requirements of the act. The statute directs that strong and weak properties shall be combined. The Northwestern, always considered a strong road because of its honest and conservative financing, has suffered nevertheless, along with other properties, similarly circumstanced, by reason of war conditions. The two properties are part and parcel of the best direct transcontinental route at present. But it should be operated as one property from end to end, permitting the earnings on the long haul to balance up against the heavy expenses at either end, but notably at Chicago. Incidently, of course, the Chicago, St. Paul, Minneapolis & Omaha, controlled by the Northwestern system since 1883, and built into it fundamentally, should be merged corporately with the other two. Comprehensive development of the Union Pacific system calls for adequate entrance into St. Louis. The lines most favorably placed for this purpose are those of the Wabash system, west of the Mississippi river. It is obvious again that a natural current of traffic here exists—a closer relation, in fact, than is indicated with any other of the great systems. The proposed dismemberment of the Wabash affords an opportunity to build in these lines with, it is believed, constructive effect. The Wabash trackage over the Missouri, Kansas & Texas to Hannibal affords an eastern connection to the proposed Erie system, and constitutes another route from the West avoiding the congestion both at Chicago and St. Louis. Yet another essential complementary line in the new Union Pacific system is abstracted from the Chicago Great Western. The line from Des Moines to Kansas City is superfluous for the Burlington and distinctly adds to the effectiveness of the Union Pacific system. It is recommended therefore that this division of the C. G. W. be thus transferred; and that trackage rights up to Marshalltown, Iowa, be given, in order to cut off the corner of the route to Chicago. This would have an added advantage, as the C. G. W. has a poor station and location at Marshalltown. The station of the Northwestern could profitably serve for both systems. The possible transfer of the Central Pacific from the control of the Southern Pacific is one of the greatest single issues calling for determination under this plan. The Central Pacific is dependent upon the Southern for a sole access to San Francisco, other than by the Oakland ferry service. Yet further interrelation arises at the terminals themselves in San Francisco. These all belong to the Southern Pacific. The Central Pacific has no terminals, while at Oakland the reverse is true, the main terminals belonging to the Central Pacific. And then, the Central Pacific owns the original line from Roseville, Calif., to the Oregon boundary. Even today the Southern Pacific has no line of its own up the Sacramento valley beyond Tehama. The economic advantage of ownership and operation of a line from the middle west clear through to San Francisco, absolutely independent of all other routes, is so evident technically as to suffice in itself for such recommendation in this plan. The entire transcontinental rate adjustment is affected by the circumstance that the Southern Pacific and other transcontinental lines, wholly or in part operated by water, compete most effectively at the Atlantic Seaboard. But the effectiveness decreases as the distance inland becomes greater. This circumstance accounts for the blanket rate on transcontinental business for the United States east of Chicago. It is evident that progressively with increase in the distance from the seaboard, the force of Southern Pacific competition for its Sunset route declines, until a dead center is reached at which traffic presumably might move

directly all rail via Ogden, or else back to the seaboard and by vessel round to New Orleans. Both because of operating ability and strength of financial motive, what happened practically was that competition was open and keen between the all rail, the Central Pacific route, and the Sunset route, throughout the territory in which the Sunset route was more or less handicapped by reason of the expense of the back haul to the seaboard. But actually a dead line existed, somewhere between Chicago and Pittsburgh, the location varying according to the nature of the traffic; and the S. P. did not solicit or prefer to haul via Ogden any traffic having origin or destination east thereof. The fact that all through business depended finally upon the good will of the S. P. manifested in rates, facilities, dispatch, and all of the other concomitants, gave that company a decisive influence ultimately in the carrying out of its plans. Competition in transportation with the outside world is and always has been the supreme need of California. Theoretically the California shipper has a right to route his freight; but the S. P., controlling at present all of the local lines, is too powerful to risk affronting. To confer a real freedom upon the California shipper, as well as thorough-going rivalry in service everywhere, would certainly be an unmixed advantage. On the ground that a more nearly universal and thorough ingoing instead of half-hearted and tepid competition may be promoted for the California slope, the dissolution is herewith recommended This entire plan purports to bring about a more evenly balanced competition. An endeavor is being made to match two great transcontinental systems with one another in order to keep each one on its toes and provide service for the public. Along with the Central Pacific lines there are a considerable number of isolated branches. Those which appear to belong to the Central Pacific are as follows: Placerville, Ione, Valley Springs, Raymond, Madera, and Oakdale. The Southern Pacific will have the following lines: Through to Tehama and on to Portland, with existing trackage to Seattle, together with the spur from Wed. It will have running rights from Brighton, near Sacramento, to Lathrop, Niles, Redwood and Oakland, thus completing a through line the length of California and into San Francisco. Co-operative utilization under a pooling arrangement for the two lines down the San Joaquin valley. The S. P. should give full privileges to the C. P. from Redwood into the San Francisco terminals, together with a grant of equal running rights over the Benica cut off line from Sacramento to Oakland. In this cut off the Western Pacific should also participate. What shall become of the S. P. line in Oregon? Further time for comparison of data is necessary. Panama competition will certainly increase, and the roundabout transcontinental routes can hardly be expected to hold their own unless afforded every encouragement. To take away the Portland traffic also, or even a goodly share of it, in addition to the loss of such part of the C. P. traffic as will be diverted by the new arrangement, would be manifestly unfair. It is finally recommended that these Oregon lines remain in the possession of the Southern Pacific-Rock Island system. The broadest national interests invite attention to the course of future construction in the great undeveloped triangle, with the western base on Portland-Sacramento and its apex at Salt Lake City. The program ultimately necessary for the completion of an entire interior line of communication should be the reconstruction of the Nevada-California-Oregon Ry. from Reno, Nev., north, acquired by the Western Pacific, bringing it to standard gauge and then competing it to a connection from the North with the DesSchutes lines. Thus would be provided a military detour route which might be of great importance in time of need. Ultimately, of course, it is to be hoped that the great systems reaching the coast in Washington and California shall be linked up by north and south connecting lines. It would appear that an equipoise would best be promoted by continuation of the existing trackage rights to the Oregon Short Line into Seattle, coupling this with such an adjustment of rates as to discourage roundabout hauling. The activities of the U. P. in the northwest ought not fairly to be circumscribed short of the same competitive opportunities which attach to the N. P. It would doubtless contribute to more effective operation of the U. P. as well as promote competition, were full and equal trackage rights to be accorded by the Colorado & Southern from Orin Junction, Wyo., to Cheyenne. Duplication of the line is apparently unnecessary. To the same end there ought to be trackage on the Burlington line from Pratt, the end of a U. P. stub, also up to Orin Junction. At

present the Burlington route to the Pacific coast by way of the Denver & Rio Grande at Pueblo, is most indirect. The bulwark of the Rocky Mountains behind Denver is bound to be overcome before long by the construction of a penetrating direct line toward Salt Lake City. It is probably in order to supply this need that the Denver and Salt Lake City project has been so persistent, in the face of seemingly insuperable obstacles. It is said to be feasible to leave the D. & S. L. at McCoy and to reach the D. & R. G. at Dotsero. The remainder of the D. & R. G. on the Salt Lake City is almost all water grade and could readily be fitted to carry the Burlington load of traffic. The question of terminals at San Francisco and of California feeders for the W. P. is a complicated one. Feeders doubtless will come in time. But obviously a line to the coast is of no use without adequate approaches to the water front at once. The joint use of essential facilities ought to be upheld and developed. The outstanding characteristic of the Burlington-Northern Pacific system is the lack of connection between the twin cities and the Missouri River gateways. For this purpose it is recommended that the C. G. W. be merged with this group. The Chicago Great Western is by far the shortest line between Omaha and St. Paul; and between Kansas City and St. Paul it stands second on the list; whereas the Burlington is one of the most roundabout in each instance. The Minneapolis and St. Louis Ry. may also find a fitting employment in completing the supplementary lines in the Burlington system. The line of the M. & St. L., west through South Dakota, being connected up along the Missouri River valley with the not distant N. P. lines might afford another short cut across country toward Chicago, thus avoiding congestion at the twin cities. The missing link for such a route is supplied by the Rock Island lines in Minnesota and South Dakota. Probably more tonnage originates at Great Falls, Mont., industrial districts than from the whole stretch of local points west of Billings. Trackage should be granted the Northen Pacific over one of the approaches to this district. It is incumbent to strengthen the St. Paul-Great Northern by every possible means. One of these is the possible addition of the financial strength of the Soo Line. The excellent freight terminals of the Soo, considerably exceeding its present needs at Chicago, together with its superior facilities at the twin cities, constitute still further elements of strength. The Wisconsin & Northern, Duluth, South Shore & Atlantic and the Copper Range ought to be included. Also the Spokane International. The final recommendation is, however, that the Soo Line remain independent. The Duluth & Iron Range, Duluth, Mesaba & Northern should be allotted to the Great Northern-St. Paul. Strength for the St. Paul will undoubtedly flow from the recent acquisition of the Chicago, Terre Haute & Southeastern railroad. It is further recommended that the eastern division of the Chicago & Eastern Illinois be allotted to the St. Paul. The Chicago, Milwaukee & Gary Road is a belt line around Chicago and should not be awarded to one line exclusively. The St. Paul-Great Northern ought surely to have an independent access to St. Louis the most feasible connection seems to be to take the line of the M. & St. L., from Mason City, Iowa, south to Albia. From this point Wabash trackage with the U. P. would carry the line to Moberly, Mo. Thus would be provided a route to match the Burlington river line via Dubuque. The independence and prestige of the St. Paul system might well be promoted by taking over the Burlington line from Shoshoni, Wyo., up to Laurel, Mont., or at all events, trackage rights might be given thereon. Entrance of the St. Paul to Portland would be over the Spokane, Portland & Seattle. Merger of the Chicago, Rock Island and Pacific and the Southern Pacific to constitute a thorough transcontinental system via the southern gateway is unreservedly recommended. Such a combination matches almost point by point with the Santa Fe. The connecting link is the El Paso & Southwestern. A prime requisite for logically rounding out the Rock Island-Southern Pacific system is the provision of a line up the Mississippi Valley from Memphis to St. Louis and thence on to the north. To meet the situation an exchange with the St. Louis Southwestern is proposed. This, it is believed, permits of a satisfaction of the Rock Island need and will not prejudicially affect the resultant Frisco system. Supplementation of the Rock Island system by a line up the Mississippi Valley north of St. Louis is as important as entrance to St. Louis from the south. The river line of the Burlington at least as far as Keokuk should be merged with the Rock Island, and that such use as the Burlington de-

sires to make of it shall be had by means of trackage. The Vicksburg, Shreveport and Pacific road should be included in the Rock Island, also the Midland Valley. San Antonio & Arkansas Pass, Texas-Mexican Ry., Texas Midland, San Diego & Arizona, Arizona & New Mexico, the Houston & Brazos Valley and Franklin & Abbeville, San Antonio, Uvalde & Gulf, may be reserved for final decision. Some disposition should be made of the North-Western Pacific, the line from San Francisco between the ocean and the Coast Range. It is now controlled equally by the Santa Fe and the Southern Pacific. The physical condition inclines to the belief it should remain as at present. The Atchison, Topeka & Santa Fe stands as one of the most compact, complete and financially well balanced railroads in the United States. It is a monument to the sagacity of its late distinguished president and his fellow managers of the enterprise. A combination of courage and intelligence has produced a railroad which at present reaches almost every point it should, and which has such connections hither and thither as to consolidate its strength at all strategic points. The Santa Fe is inherently strong enough to be trusted to continue alone, even although surrounded by much stronger transcontinental systems. It is a prime example of the principle of net mileage, that is to say, mileage which counts, is of much more value than a mere heterogeneous aggregation of more or less ill-connected parts. The Santa Fe should have entrance to St. Louis. It will probably prefer to build anew, following in general the location of the Wabash. The Santa Fe should be admitted to New Orleans. The Gulf Coast Line from De Quincy east should be merged with the Santa Fe. The Colorado & Southern and its extension, the Fort Worth & Denver City is another one of those hybrid properties which it is extremely difficult to allocate. This could be incorporated in the Santa Fe. On the whole, there remains for the Colorado & Southern only the possibility of its transference from the Burlington to that of the Missouri Pacific. The underlying reason, based upon the broadest reasons for so doing, is that this strategic line would be thereby neutralized, in effect, as between the two middle group systems. The Santa Fe should have the Kansas branch of the M. P. from Atchson to Lenora, Kas., the north and south branch from Concordia to Hastings is allocated to the Rock Island. The Santa Fe branch from Dallas to Paris, Tex., is given to the Frisco. The Forth Worth & Rio Grande is assigned to the Santa Fe.

SOUTHWESTERN GULF REGION. The railroads operating in the great sector of southwestern territory lying between the Mississippi river and the main line of the Santa Fe and the Southern Pacific-Rock Island transcontinental systems, are possessed of a sufficient individuality to require that they be treated as an independent group. This region is bounded on the north by the Missouri River between St. Louis and Kansas City and upon the south by the Gulf and the Mexican frontier. The great railway systems avoid this highland territory, except for certain bridge lines. From Kansas City and St. Louis there radiates certain systems which either split into two distinct halves east and west of the Ozark Mountains, or else confine their activities entirely to one or the other flank of these highlands. In the former group is the Frisco system mainly lying west and north; and the Missouri Pacific widely extended on both sides, with certain bridge lines thrown across. The Missouri, Kansas & Texas spreads out to the west and south from Kansas City down to Texas; the Kansas City Southern an air line straight south to the Gulf from Kansas City; the St. Louis Southwestern skirts the Ozarks down the Mississippi Valley, only swinging west well south of Little Rock, Ark., where open country occurs. There remains for consideration only the Texas & Pacific, the international Great Northern, the Kansas City, Mexico & Orient, the Louisiana Railway & Navigation Co., and the Gulf Coast Lines. They are nearly all dependent, not alone upon business in and out of these Missouri River gateways, but upon their relation to the Gulf ports. They have had in the past a certain interest in transcontinental traffic, but only in so far as the Southern Pacific utilized them as a connection through to the Missouri River gateways. Traffic conditions throughout the southwestern gulf region are fairly uniform. Naturally there are no manufacturers, and the carriage outward consists of the products of the territory. Inbound, there is, of course, the lesser volume of manufactures and supplies which are consumed by the population. But the principal earnings of all these roads arise from the carriage of grain, shading off into the carriage of cotton and lumber from the southern and southeastern portions,

the carriage of petroleum in large volume from the recently developed oil fields, and the handling of coal in considerable volume from the measures which quite generally underlie a part of the region. Only by holding them all together, abandoning where absolutely necessary lines which may be dispensed with, can a constructive policy be pursued to the end. Again, one is driven to the conclusion that a general rearrangement of these roads, segregating them into two competing systems in order to conform to the requirements of the act, is the proper course to pursue. A marked characteristic of the Southwestern Gulf territory is the very large amount of mileage which still remains in independent hands. Another general feature is that there are too many railroads to be supported by the available traffic. This is partly due to the well known activities of the railway promotor, which has found this territory the last and a most inviting field for the practice of his art. There are more railways in fact than the country can probably support for many years ahead. This condition is more true in this region than anywhere else in the United States, and it is a considerable source of embarassment. One hesitates to recommend the downright abandonment of a railroad line once constructed. New capital, where imperatively needed by large systems having branches in Texas has necessarily been raised through the issue of their own collateral trust securities, based upon the deposit of Texas line bonds. Concomitantly this financial segregation has left a considerable number of these supplementary Texas lines in very bad case financially. It is evident that with the exception of the Texas lines of the Kansas City Southern the subsidiaries in Texas are all notably weak. Whether this is wholly due to the local traffic conditions, or arises in part from prorating and accounting methods, it is difficult to determine. The Gulf-Southern roads are properly called upon to perform an important function for the nation as a whole through engaging in long haul business to and from the Gulf ports to the Missouri river gateways. They are necessary outlets for the entire country west of the Mississippi River. The construction of the Panama Canal and our recently developed mercantile marine interests are bound to emphasize still further the import and export feature of the Southwestern-Gulf traffic.

The two widespread systems in this Gulf region are the Frisco and the Missouri Pacific. These pretty well match one another in general scope throughout a considerable territory. Having adopted the foregoing program for the Southwestern-Gulf systems, it is next in order to decide whether or not these systems, resident southwest of Kansas and St. Louis, had best stop short at those strategic points or be extended into Chicago. Chicago and St. Louis particularily are keen rivals for business, and it will contibute to national development that they should continue to be so throughout as wide a territory as possible, rather than that private domains should be marked off here and there as appurtenant to each great city. Such being the case, it will unquestionably contribute to holding the Chicago market on a parity with those of the Missouri River cities if the railroads of this region operate their own trains into Chicago and have a substantial investment to support. Through billing and quick delivery, with a number of other favoring concomitants would be much more likely to prevail than if Chicago were compelled to do business in Oklahoma, Kansas, or Texas, both at longer range and without distinct railroads friends at court. The conclusion then, is that the two southwestern systems should include stems into Chicago, comprehended by consolidation within their own groups. The St. Louis-San Francisco systems, operating 5,252 miles of first main track, ramifies throughout the southwest. The strongest portion of it is the old Kansas City, Fort Scott & Memphis line, which passes by way of Fort Scott, Kas., and Springfield, Mo., from the Missouri river gateways down toward the southeast. Obviously the Frisco should not be weakened, but ought rather to be upbuilt by the elimination of its weaker units and the incorporation of lines which add earning power, or which effect the completion of through routes or long hauls. This line is incomplete as to ownership between Paris and Dallas, Tex. This stretch is owned by the Gulf, Colorado & Santa Fe—the Texas unit of the Santa Fe system. The Frisco, especially, should not be left dependent upon the use of a branch line of another system. It is recommended, therefore, that this branch be transferred to the Frisco system. It might well be changed for the Fort Worth and Rio Grande which runs from Fort Worth southwest. The transfer would put the

latter into a system tied in at both ends of the line instead of attached at one end as at present. The Kansas City, Clinton & Springfield Ry., 162 miles long, closely parallels the entire local division of the Frisco between Kansas City and Springfield. It looks like another one of those little properties in this territory which contributes nothing except local service to the community. This case is submitted for consideration as to abandonment, unless the road can indeed be carried along purely as a local enterprise through the support and interest of the towns affected. The Missouri, Kansas & Texas operates 3,863 miles of track. The lines owned ramify widely through the territory directly south of Kansas City, trending southwesterly across Kansas, Oklahoma and Texas. Until drastically reorganized the Katy is little suited to add financial strength to any system. But, nevertheless, the southern portion of its system especially supplements and re-enforces the Frisco lines north of Texas. On the whole, it is the judgment of those best qualified to decide, that the Katy should be merged with the Frisco system rather than the Missouri Pacific. It is therefore recommended that the Katy be merged with the Frisco, subject perhaps, to negotiation with the Missouri Pacific concerning some of the minor exchanges. The line from Fort Scott to Oklahoma City and branch to Tulsa and Muskogee should be transferred to the Missouri Pacific. The St. Louis Southwestern Ry. is to be utilized under this plan to provide a Frisco competitive service across Arkansas to match the old Iron Mountain route. It is the strongest financially of all these southwestern properties. Useless duplication of the Frisco should be avoided, while, at the same time, the Rock Island can be provided with a necessary line, by division of the Cotton Belt at Brinkley, Ark. It is recommended that the lines north of Brinkley go to the Rock Island system. A prime requisite for an effective Southwestern-Gulf system is the provision of through routes to the sea; and these ought to be afforded both to New Orleans and Galveston. As to New Orleans a route is afforded by the inclusion of the Louisiana Railway & Navigation Co., from Shreveport to New Orleans. the route from Kansas City to New Orleans of the Frisco system will still be quite indirect from Shreveport north. It is recommended therefore that trackage be provided, first over the Texas & Pacific from Shreveport to Texarkana, and from that point on over the Kansas City Southern to Hartford Junction, where the main line of the Frisco is once more reached. A second through route to the Gulf must reach Galveston as well as New Orleans. The best way apparently is by trackage over the Trinity & Brazos Valley. A considerable railroad is the Kansas City, Mexico & Orient. It is a local line from Wichita southwest across the arid plains of Texas almost to the Mexican border. The road as a whole could not be placed effectively in either one of the two great systems proposed for this region. But to split it up north and south of Altus, Okla., permits the southern half across Texas to be added to the Frisco system where it has no line; and the northern half may be utilized by the Missouri Pacific system to give it a road across western Oklahoma, without which it would have no representation in the district. The Frisco system as compared with the Missouri Pacific is peculiarly lacking in mileage in northern Louisiana. It is recommended that the Vicksburg, Shreveport & Pacific be added to the Frisco combination. The best railroad for affording an entry into Chicago for the Frisco system is believed to be the Chicago & Alton Ry. It can not add financial strength, but its rails afford an admirable connection both for Kansas City and St. Louis to Chicago. It is well fitted to serve the Frisco system. It not only gives a short line from St. Louis to Chicago, but it also affords a better line to the Frisco between Kansas City and St. Louis. It is recommended, however, in view of the proposed merger of the Katy and Alton that the Hannibal division be included at least as far as Higbee, Mo., the junction of the Hannibal division with the Alton. The Katy line from Booneville into St. Louis should be transferred to the Missouri Pacific system. This would give them a double track, with a lower grade in fact than they now have along the south bank of the river. It should also be noted in connection with the Katy line from Moberly to Hannibal that it may well go to the Union Pacific-Northwestern system along with the Wabash, west of the Mississippi. The Missouri Pacific system, assumes the shape of a wide open fan ranging widely all over the territory between Pueblo, Colo., on the west and the mouth of the Mississippi River. It is substantially larger, already, as a

nucleus for the second great competing southwestern system, to match against the Frisco. As a result of its reorganization, there is a greater degree of unity in the geographic layout than is evinced by the Frisco. A weakness of the Missouri Pacific system is the sharp separation on the two flanks of the Ozarks between the western and southern halves These are at present united only by two long bridge lines running northwest to southeast over the Ozark uplands or along the valley of the Arkansas river. As against this route the Kansas City Southern goes straight as an arrow from Kansas City down the eastern boundary of Kansas, Oklahoma and Texas, to the Gulf. Nothing could be shorter than this competitive route, which, of course, got most of the long haul lucrative traffic. It is recommended that the Kansas City Southern be included in the Missouri Pacific system. It is recommended that the Kansas, Oklahoma & Gulf be included in the M. P. This is a line directly matching and paralleling the Katy between Muskogee and Denison, Tex., and would open up at once also another through route between Kansas City and Galveston. The Louisiana & Arkansas should be merged with the Missouri Pacific. This extends from Alexandria, La., northwest to Hope, Ark. The Kansas branch of the Missouri Pacific west of Kansas City should remain where it is. The main river line up to Omaha should be left undisturbed. The status of the M. P. line into Colorado is somewhat disquieting. Conceiveably this line might go to the Burlington system in order to give it something to match with the Kansas mileage of its great competitor. This suggestion is made only tentatively, subject to confirmation upon further inquiry. The disposition of the Colorado & Southern Ry., with its Texas line, known as the Fort Worth & Denver City, is a matter of peculiar difficulty, owing to the fact that these lines are concerned both in transcontinental business and also engage in through carriage to the Gulf of Mexico. Their national function is to afford a short and direct line from Galveston through to the far northwest by way of Denver. The final choice, must be made between transfer of this important bridge line either to the Santa Fe, to the Rock Island, or to the Missouri Pacific. But one point that is definitely settled is that this portion of the Colorado & Southern system should not remain in the control of the Burlington. It appears that the claim of the Missouri Pacific is substantiated. The Missouri Pacific system as thus amplified has a certain interest in the Gulf Coast Lines. It is recommended that the southern half from Beaumont on, be assigned to this system. From De Quincy east, the Gulf Coast lines go to the Santa Fe for an entrance into New Orleans. The need for a Chicago line for the Missouri Pacific having been demonstrated, it is recommended that the western half of the Chicago & Eastern Illinois be incorporated in this system. RECAPITULATION. The objects sought in the foregoing plan are as follows: An inherently natural geographic scope for each system; a sound operating adaption of each unit to its surroundings, due consideration being given to the nature of its traffic; administrative practicability, that is to say, a size under each particular set of circumstances, commensurate with human capacity in management; an ever present competition between rival roads, in order to insure the continuance of an alert and accelerated service to the public, assuming that the foregoing physical arrangements have already provided economical carriage by each competitor; and such an equalization of earning capacity between these competitors, as to perpetuate such rivalry in service on an even-handed and wholesome basis. A total of 21 systems has resulted from the foregoing proposals, made serially in detail. These are as follows: Five systems within the trunk line region; two lake to tide soft coal systems in the Chesapeake Bay region; in the southeast, four systems; five transcontinental systems west of the Mississippi, two running southwest toward the Gulf ports. In addition, New England lines, southern Michigan peninsula and down east coast of Florida. In the main everything is based, centrally, upon Chicago and St. Louis as far as the main stems are concerned. The objective of conformity to the statute as respects competition, it will be observed, is sought wherever possible by having each considerable city all over the United States tapped by at least two railways; all of the great competitive routes, hither and thither, are so arranged that there is a matching for competitive purposes everywhere. It is inevitable that as competition becomes keener, the greater the commercial importance of the city. But scale as a remedy for the existing sit-

the progression under a well ordered system seems to be more nearly an expression of the natural geographical fitness of that center, rather than because of a fortuitous or artificial, and to that degree, less deserved advantage. The principle that earning capacity in terms of valuation constituted the ultimate test of the feasibility of any proposed grouping of railroads, in contradistinction to any attempt to bring about an absolute equalization in size among these projective competitive units, was avowedly adopted at the outset. The last step in financial analysis is theoretically necessary and in a measure practicable. The systems herein proposed are intended to be matched one against another to the end that the net operating income in percentage of investment shall be the same for all. Where one line owns and it can be made serviceable to others, even though they be direct competitors, it is believed that useless duplication of facilities is thereby avoided to common advantage. The defects and shortcomings of this comprehensive scheme are manifold and in many cases self evident. No illusion need be entertained in this regard. The outcome is avowedly almost everywhere a compromise, a choice between evils. All of the warring and conflicting interests; all of the hopes, aspirations, fears, and prejudices have come home to roost in the course of its preparation. An extra amount of friendliness and cooperation has been encountered. But, as is inherent and natural under the circumstances, much of this assistance has necessarily been circumscribed by the particular interest of the participants; and a governmental plan, in contradistinction to one projected for private profit or interest, may not content itself with caring even for most of the properties. It must of necessity recognize the right and the interest of every last one of them. It is this requirement of university which so often compels the halfway expedient, the compromise, the solution which falls so far short of the ideal. And then again, there are the class interests which deserve recognition. Administrative influences impel one, in certain directions; the bankers would have some matters otherwise; the representatives of the employes entertain quite positive views, it may be; and all of the shippers organizations have to be satisfied. But despite these divergent interests, the desirability, nay more, the downright necessity for the furtherance of consolidation on a large uation is almost universally conceded.

CONSOLIDATION OF RAILROADS. We find for the purposes of this tentative plan that the railway properties of the continental United States may be consolidated under the statute into the following systems: SYSTEM NO. 1—NEW YORK CENTRAL: New York Central; Pittsburgh & Lake Erie; Rutland; Michigan Central; Chicago, Kalamazoo & Saginaw; Cleveland, Cincinnati, Chicago & St. Louis; Cincinnati Northern; Western Maryland; Fonda, Johnstown & Gloversville ;Lake Erie & Pittsburgh; Central Indiana; Pittsburgh, Chartiers & Youghiogheny; Monongahela; Boston & Maine; Maine Central; Bangor & Aroostook. And all railway properties controlled by the above carriers through lease, stock ownership, or otherwise, except: Lake Erie & Western and Toledo & Ohio Central (both now controlled by New York Central); Zanesville & Western and Kanawha & Michigan (both now controlled by Toledo & Ohio Central) · Indiana Harbor Belt, now controlled by New York Central, 30 per cent; Michigan Central, 30 per cent; Chicago & North Western, 20 per cent; Chicago, Milwaukee & St. Paul, 20 per cent. Note:—Prof. Ripley recommends the inclusion of the Western Maryland in system No. 5, Nickel Plate-Lehigh Valley. Prof. Ripley makes no specific assignment of the Fonda, Johnstown & Gloversville. The Lake Erie & Pittsburgh; Central Indiana; Pittsburgh, Chartiers & Younghiogheny; and Monongahela may be incorporated in either system No. 1 or No. 2. Prof. Ripley makes no specific assignment of these four roads, which are controlled jointly in the interest of the New York Central and the Pennsylvania. The Boston & Maine, Maine Central, and Bangor & Aroostook may be included in system No. 7, New England, or system No. 7a, New England-Great Lakes. Prof. Ripley rejects the trunk line treatment of the New England roads, but we present this alternative with a view to developing the situation upon hearing. The Lake Erie & Western may be included in system No. 5, Nickel Plate-Lehigh Valley. The Toledo & Ohio Central, Zanesville & Western, and Kanawha & Michigan may be included in system No. 9, Norfolk & Western. The Indiana Harbor Belt is reserved for consideration in connection with terminal situations. SYSTEM NO. 2—PENNSYLVANIA. Pennsylvania; West Jersey & Seashore; Long Island; Baltimore, Chesapeake & Atlantic; Cumberland Valley;

Maryland, Delaware & Virginia; New York, Philadelphia & Norfolk; Pittsburgh, Cincinnati, Chicago & St. Louis; Waynesburg & Washington; Grand Rapids & Indiana; Cincinnati, Lebanon & Northern; Ohio River & Western: Louisville Bridge & Terminal; Wheeling Terminal; Toledo, Peoria & Western; Lorain, Ashland & Southern; Lake Erie & Pittsburgh; Central Indiana; Pittsburgh, Chartiers & Younghiogheny; Monongahela. And all other railway properties controlled by any of the above carriers under lease, stock ownership, or otherwise, except the Norfolk & Western and railway properties controlled by it, which may be included in system No. 9, Norfolk & Western. Notes:—The Lorain, Ashland & Southern may be included in system No. 4, Erie, which owns one-half the stock, the Pennsylvania owning the other half. The Lake Erie & Pittsburgh; Central Indiana; Pittsburgh, Chartiers & Younghiogheny; and Monongahela may be included in system No. 1, New York Central, which controls one-half the stock, the Pennsylvania controlling the other half. SYSTEM NO. 3—BALTIMORE & OHIO. Baltimore & Ohio; Sandy Valley & Elkhorn; Staten Island Rapid Transit; Reading system, comprising the Philadelphia & Reading, Central Railroad of New Jersey, and various others. Cincinnati, Indianapolis & Western; Chicago, Indianapolis & Louisville; New York, New Haven & Hartford; Central New England; Lehigh & New England; Lehigh & Hudson. Notes:—The Baltimore & Ohio Chicago Terminal is reserved for consideration in connection with terminal situations. The New York, New Haven & Hartford; Central New England; Lehigh & New England; and Lehigh & Hudson may be included in system No. 7, New England, or system No. 7a, New England-Great Lakes. SYSTEM NO. 4—ERIE. Erie; Chicago & Erie; New Jersey & New York; New York, Susquehanna & Western; Delaware & Hudson; Delaware, Lackawanna & Western; Ulster & Delaware; Bessemer & Lake Erie; Buffalo & Susquehanna; Pittsburgh & Shawmut; Pittsburgh, Shawmut & Northern; Lorain, Ashland & Southern; Wabash lines east of the Missouri river. Notes:—Prof. Ripley recommends including the Lehigh Valley in this system; but in this tentative plan that carrier is proposed as a main stem for system No. 5, Nickel Plate-Lehigh Valley. The Delaware & Hudson, Delaware, Lackawanna & Western, Ulster & Delaware, Pittsburgh & Shawmut, and Pittsburgh, Shawmut & Northern may be included in system No. 7a, New England-Great Lakes. The Bessemer & Lake Erie may be included in system No. 5, Nickel Plate-Lehigh Valley. The Lorain, Ashland & Southern may be included in system No. 2, Pennsylvania. SYSTEM NO. 5—NICKEL PLATE-LEHIGH VALLEY. Lehigh Valley; New York, Chicago & St. Louis; Toledo, St. Louis & Western; Detroit & Toledo Shore Line; Lake Erie & Western; Wheeling & Lake Erie; Pittsburgh & West Virginia; Bessemer & Lake Erie. Notes:—Prof. Ripley recommends the Lackawanna as main stem in this system. In this tentative plan it is replaced and made available for either system No. 7a, New England-Great Lakes, or system No. 4, Erie. He also includes the Buffalo, Rochester & Pittsburgh and Wheeling & Lake Erie in this system. The Bessemer & Lake Erie may be included in system No. 4, Erie. SYSTEM NO. 6—PERE MARQUETTE. Pere Marquette; Detroit & Mackinac; Ann Arbor; Detroit, Toledo & Ironton; Boyne City, Gaylord & Alpena. Note:—The last named road is a Class-II road not specifically covered by Prof. Ripley's report. SYSTEM NO. 7—NEW ENGLAND. New York, New Haven & Hartford; New York, Ontario & Western; Central New England; Boston & Maine; Maine Central; Bangor & Aroostook; Lehigh & Hudson River; Lehigh & New England. Notes:—Prof. Ripley recommends inclusion of the New York, Ontario & Western in system No. 4, Erie. The Lehigh & Hudson River is not included in any system under Prof. Ripley's report, but is left as a "bridge line." SYSTEM NO. 7A.—NEW ENGLAND-GREAT LAKES. Same as system No. 7 with addition of the following, which otherwise with the exception of the Buffalo, Rochester & Pittsburgh may be included in system No. 4, Erie. That carrier may be included in system No. 5, Nickel Plate-Lehigh Valley. Delaware & Hudson; Ulster & Delaware; Delaware, Lackawanna & Western; Buffalo, Rochester & Pittsburgh; Pittsburgh & Shawmut; Pittsburgh, Shawmut & Northern. Note:—The addition of these lines has not been recommended by Prof. Ripley. SYSTEM NO. 8 — CHESAPEAKE & OHIO. Chesapeake & Ohio; Hocking Valley; Virginian. Note:—Prof. Ripley recommends consolidation of the Virginian with the Norfolk & Western, Toledo & Ohio Central, and Kanawha & Michigan, in order to afford a western outlet for coal originating on the Vir-

ginian. This apparently would involve upgrade eastbound haul of westbound coal to the vicinity of Roanoke, unless there be new construction near Gauley Bridge, W. Va. The Virginian's present outlet to the west is via Deepwater, W. Va., and the Chesapeake & Ohio. SYSTEM NO. 9—NORFOLK & WESTERN. Norfolk & Western; Toledo & Ohio Central; Zanesville & Western; Kanawha & Michigan; Kanawha & West Virginia. Note:—From the Norfolk & Western is excepted the branch from Roanoke to Winston Salem, which may be included in system No. 11, Atlantic Coast Line. Louisville & Nashville and the branch from Lynchburg to Durham which may be included in system No. 12, Illinois Central-Seaboard. SYSTEM NO. 10—SOUTHERN—Southern; Alabama Great Northern; Georgia, Southern & Florida; Mobile & Ohio; Southern Railway in Mississippi; Northern Alabama; Cincinnati, New Orleans & Texas Pacific; New Orleans Great Northern; Alabama & Vicksburg. Note:—Prof. Ripley recommends inclusion of the Georgia Southern & Florida branch from Valdosta, Ga., to Palatka, Fla., in the Seaboard system. SYSTEM NO. 11.—ATLANTIC COAST LINE-LOUISVILLE & NASHVILLE. Atlantic Coast Line; Atlantic & West Point; Charleston & Western Carolina; Louisville & Nashville; Nashville, Chattanooga & St. Louis; Louisville, Henderson & St. Louis; Western Railway of Alabama; Richmond, Fredericksburg & Potomac; Norfolk Southern; Atlanta, Birmingham & Atlantic; Winston-Salem Southbound; Roanoke to Winston-Salem branch of Norfolk & Western; Florida East Coast; Carolina, Clinchfield & Ohio Georgia & Florida; Gulf, Mobile & Northern; Mississippi Central. Notes:—Prof. Ripley recommends that the Richmond, Fredericksburg & Potomac and Florida East Coast retain their present status without inclusion in any system. The Carolina, Clinchfield & Ohio may be included in system No. 12, Illinois Central-Seaboard. Prof. Ripley recommends inclusion in system No. 10, Southern. The Gulf, Mobile & Northern and Mississippi Central are not specifically included in any system under Prof. Ripley's report. SYSTEM NO. 12.—ILLINOIS CENTRAL SEABOARD. Illinois Central; Yazoo & Mississippi Valley; Central of Georgia; Seaboard Air Line; Lynchburg, Va., to Durham, N. C., branch of Norfolk & Western; Gulf & Ship Island; Tennessee Central; Carolina, Clinchfield & Ohio. Notes:—Prof. Ripley recommends that a separate system be built around the Seaboard Air Line. The Gulf & Ship Island is not included in any system by Prof. Ripley. The Carolina, Clinchfield & Ohio may be included in system No. 11, Atlantic Coast Line-Louisville & Nashville. SYSTEM NO. 13 — UNION PACIFIC NORTH WESTERN. Union Pacific; St. Joseph & Grand Island; Oregon Short Line; Oregon-Washington Railroad & Navigation Company; Los Angeles & Salt Lake; Chicago & North Western; Chicago, St. Paul, Minneapolis & Omaha, Lake Superior & Ishpeming; Wabash lines west of the Missouri River. Notes:—Prof. Ripley recommends inclusion of the Central Pacific in this system. The Lake Superior & Ishpeming is not specifically included in any system by Prof. Ripley. SYSTEM NO. 14.—BURLINGTON-NORTHERN PACIFIC. Chicago, Burlington & Quincy; Northern Pacific; Chicago Great Western; Minneapolis & St. Louis; Spokane, Portland & Seattle. Notes:—From the Chicago, Burlington & Quincy are excepted the Colorado & Southern and Fort Worth & Denver City, which may be included in system No. 16, Santa Fe. Prof. Ripley recommends that they be included in system No. 19, Chicago-Missouri Pacific. Prof. Ripley recommends extension of this system to the Pacific coast by including the Denver & Rio Grande and the Western Pacific. He also recommends redistribution of portions of the Minneapolis & St. Louis and Chicago Great Western. The Spokane, Portland & Seattle may be included in system No. 15, Milwaukee-Great Northern. SYSTEM NO. 15—MILWAUKEE-GREAT NORTHERN. Chicago, Milwaukee & St. Paul; Great Northern; Chicago, Terre Haute & Southeastern; Duluth & Iron Range; Duluth, Missabe & Northern; Green Bay Western; Spokane, Portland & Seattle; Butte, Anaconda & Pacific. Notes:—The Green Bay & Western and Butte, Anaconda & Pacific are not included in any system under Prof. Ripley's report. The Spokane, Portland & Seattle may be included in system No. 14, Burlington-Northern Pacific. Prof. Ripley recommends that the eastern half of the Chicago & Eastern Illinois be included in this system. SYSTEM NO. 16.—SANTA FE. Atchison, Topeka & Santa Fe; Gulf, Colorado & Santa Fe; Colorado & Southern; Fort Worth & Denver City; Denver & Rio Grande; Western Pacific; Utah Railway;

Northwestern Pacific; Nevada Northern. Notes:—Prof. Ripley recommends inclusion of the Colorado & Southern and the Fort Worth & Denver City in the Missouri Pacific system. He also recommends inclusion of a part of the Gulf Coast Lines in the above system. Prof. Ripley recommends that the Northwestern Pacific retain its present status. The Nevada Northern is not specifically included in any system by Prof. Ripley. It may be included in system No. 17, Southern Pacific-Rock Island. SYSTEM NO. 17—SOUTHERN PACIFIC-ROCK ISLAND. Southern Pacific Company; Nevada Northern; Chicago, Rock Island & Pacific; Chicago, Rock Island & Gulf; Arizona & New Mexico; El Paso & Southwestern; San Antonio & Aransas Pass; Trinity & Brazos Valley; Midland Valley; Vicksburg, Shreveport & Pacific; Chicago, Peoria & St. Louis. Notes:—The Nevada Northern may be included in system No. 16, Santa Fe. The Arizona & New Mexico and Chicago, Peoria & St. Louis are not specifically included in any system by Prof. Ripley. The Trinity & Brazos Valley may be included in system No. 18, Frisco-Katy-Cotton Belt. So recommended by Prof. Ripley. Prof. Ripley recommends redistribution of portions of the carriers included by us in this system. SYSTEM NO. 18—FRISCO-KATY COTTON BELT. St. Louis-San Francisco; St. Louis Southwestern; Louisiana Railway & Navigation Company; Chicago & Alton; Missouri, Kansas & Texas; Trinity & Brazos Valley; San Antonio, Uvalde & Gulf. Notes:—The Trinity & Brazos Valley may be included in system No. 17, Southern Pacific-Rock Island. Prof. Ripley recommends inclusion of the San Antonio, Uvalde & Gulf in either system No. 17, Southern Pacific-Rock Island, or in a Southwestern-Gulf system. Prof. Ripley recommends redistribution of portions of the carriers included by us in this system. SYSTEM NO. 19.—CHICAGO-MISSOURI PACIFIC. Chicago & Eastern Illinois; Missouri Pacific; Kansas City Southern; Kansas City, Mexico & Orient; Kansas, Oklahoma & Gulf; Texas & Pacific; Fort Smith & Western; Louisiana & Arkansas; Gulf Coast Lines; International & Great Northern. Note:—Prof. Ripley recommends redistribution of portions of the carriers included by us in this system. Certain lines such as the Minneapolis, St. Paul & Sault Ste. Marie and the Central Vermont, which are controlled by Canadian carriers, have not been specifically included in this tentative plan because these lines form parts of through transcontinental Canadian systems in active competition with systems above set forth. The carriers included in this tentative plan comprise most of the class-I steam railroads but very few of those in class II and class III. Those not so included, whether industrial common carriers, terminal carriers, interurban electric railways operated as a part of general steam railroad systems of transportation or engaged in the general transportation of freight, "short lines," or others, will be considered at the hearings to be hereafter assigned so that in the plan to be ultimately adopted provision can be made for their inclusion in the systems. We have not specifically mentioned water carriers. Where these carriers are now controlled by carriers by rail they will be considered as being included tentatively in the systems in which the controlling rail carrier has been included. Consolidation of Railroads 63 I. C. C. 455.

(k) Contention that merger of electric railways, originally performing purely intrastate and city street-car service, into an operating company now performing an interstate interurban business, does not change their original status. HELD, Whatever may have been the original service afforded by the respective railways at the time of the merger, the consolidated company now is carrying on much more than a street railway business and in its interurban operations it now assumes the status of an electric railway and as such is engaged in interstate transportation. Ohio and Pennsylvania Rates, Fares and Charges. 64 I. C. C. 517, 524.

(l) In section 5 of the Interstate Commerce Act Congress provided a complete scheme of regulation of contracts or other arrangements whereby one common carrier subject to the act might secure control of another such carrier, either by consolidation into one corporation, or in some manner not involving such consolidation, or by entering into any agreement for the pooling of freight or earnings with a competing railroad. Lease of Valley Terminal Ry., 65 I. C. C. 105.

CONSPIRACY

See Crimes §24½; Evidence §10.

CONSTITUTIONAL LAW

See Act to Regulate Commerce I; Commodities Clause I; Crimes §1; Interstate Commerce §4; §5; Long and Short Hauls §1; §3; Loss and Damage §1; Pipe Lines §2; Special Contracts §1.

(a) It does not appear that there has been any such confiscation as amounts to a taking of property without due process of law, because the income of a railroad at the rate of fare fixed by the statute will pay only 1½ per cent on the original cost of the road. Dow v. Beidelman (U. S. Sup. Ct.), 2 I. C. R. 56.

CONSTRUCTION

§1. In general.

CASES 1887-1908

(a) A claim for pecuniary damages entitles the plaintiff to a jury trial and the Interstate Commerce Commission will not consider it. Peck v. East Tennessee, V. & G. R. Co., 1 I. C. R. 775; Council v. Western & A. R. Co., 1 I. C. R. 638; Riddle v. New York, L. E. & W. R. R. Co., 1 I. C. R. 787.

(b) A claim for pecuniary damages entitles the defendant to a jury trial, and the Interstate Commerce Commission will not consider it. Peck v. East Tennessee, V. & G. R. Co., 1 I. C. R. 775; Council v. Western & A. R. Co., 1 I. C. R. 292, 355, 638; Riddle v. New York, L. E. & W. R. Co., 1 I. C. R. 787.

(c) In the absence of any legislative regulation upon the subject, the courts must decide for the company, as they do for private persons, when controversies arise, what rates are reasonable. Dow v. Beidelman (U. S. Sup. Ct.), 2 I. C. R. 56.

(d) A corporation created and existing solely under the laws of a State in which it has its principal office and place of business cannot be said to be an inhabitant of another state so that it can be sued there in the federal court, although it does business there through agents. Connor v. Vicksburg & M. R. Co. (C. C. E. D. Mo.), 2 I. C. R. 177.

(e) A corporation is an inhabitant of the state that created it, or of the state where it keeps its records and principal office, and where its chief officers reside or may most usually be found. Connor v. Vicksburg & Meridian R. R. Co., 2 I. C. R. 177.

(f) The fact that a railroad corporation keeps an office and an agent for the purpose of making freight contracts in a federal judicial district outside of the state which chartered it and in which are its road and chief office, will not make it an inhabitant of such district so as to give the Federal courts of that district jurisdiction of actions against it in which jurisdiction is not founded only on the fact of diverse citizenship. Connor v. Vicksburg & Meridian R. R. Co., 2 I. C. R. 177.

(g) An inquiry by the courts into the reasonableness of rates established by state authority for railroad transportation is not prevented by the fact that the legislature has pursued the forms of law in prescribing a schedule of rates; but the question is open and must be decided in each case whether the rates prescribed are within the limits of legislative power, or are mere proceedings which, if not restrained, will work a confiscation of property. Chicago & N. W. R. Co. v. Dey (C. C. S. D. Iowa), 2 I. C. R. 325.

(h) A communication signed by the secretary of the board of railroad commissioners, stating that the time for the taking effect of the schedule of rates had been extended, sent to the complainant railroad company in reply to a telegram sent by it to the board, officially requesting such extensions, is to be considered as the official act of the board. Chicago & Northwestern R. Co. v. Dey, 2 I. C. R. 325.

(i) The courts have no power to interfere with rates for railroad transportation, fixed by a state, when such rates will give some compensation, however small, to the owners of railroad property; but it is their duty to interfere when the rates prescribed will not pay any

compensation to the owners; i. e., some dividend to stock holders after payment of fixed charges and cost of service. Chicago & Northwestern R. Co. v. Dey, 2 I. C. R. 325.

(j) An inquiry by the courts into the reasonableness of rates established by state authority for railroad transportation is not prevented by the fact that the legislature has pursued the forms of law in prescribing a schedule of rates; but the question is open and must be decided in each case whether the rates prescribed are within the limits of legislative power, or are mere proceedings which, if not restrained, will work a confiscation of property. Chicago & Northwestern R. Co. v. Dey, 2 I. C. R. 325.

(k) That the state board of railroad commissioners have advertised in papers that a schedule of rates prepared by them will be put in force on a named day gives equity jurisdiction to restrain the enforcement of the schedule, before the expiration of the time, to prevent a multiplicity of suits. Chicago & N. W. R. Co. v. Dey (C. C. D. Iowa), 2 I. C. R. 325.

(l) On submission of a controversy without action, under N. C. Code, §567, a complete and concise statement of all the facts necessary to the solution of the controversy is required on appeal; and a statement referring to exhibits which are not annexed, and which leaves to either party to add to the facts in the case agreed, is wholly inadmissible. Richmond & D. R. Co. v. Reidsville (N. C.), 2 I. C. R. 416.

(mn) The court will not interfere or grant any relief to a railroad company against rates fixed by commissioners, upon a complaint made as to one of several rates only, or where the freight and passenger rates established by the commissioners are not assailed as an entirety. Pensacola & A. R. Co. v. State (Fla.), 2 I. C. R. 522.

(o) Where a tariff of freight and passenger rates has been established by the railroad commissioners, and the railroad company and the commissioners differ as to whether such rates, considered as a whole, will prove remunerative to the company, and there is room for a difference of intelligent opinion on the question, the courts cannot interfere or substitute their judgment for that of the commissioners, but the tariffs as fixed by the commissioners must, in so far as the courts are concerned, be left to the test of experiment. Pensacola & A. R. Co. v. State (Fla.), 2 I. C. R. 522.

(p) The courts have no power to make freight or passenger tariffs. Pensacola & Atlantic R. Co. v. State of Florida, 2 I. C. R. 522.

(q) So long as public officers confine themselves to such duties as are confided to them by law, the court will not interfere to see whether they are acting wisely or judiciously. Western U. Teleg. Co. v. New York (C. C. S. D. N. Y.) 2 I. C. R. 533.

(r) Whether the difference in rates for transportation for local traffic and through traffic is reasonable or unreasonable is a question of fact for the jury. United States v. Tozer (D. C. E. D. Mo.) 597, aff'g Same v. Same. 2 I. C. R. 540.

(s) A court of equity has no power, either at common law, or under the Interstate Commerce Act, to compel a railroad company to enter into a contract with another company for a joint through rate or joint through routing of freight and passengers. Little Rock & Memphis R. Co. v. St. Louis, I. M. & S. R. Co., 2 I. C. R. 763.

(t) Section 1 of the Fourteenth Amendment to the Constitution, declaring that no state shall "deny to any person within its jurisdiction the equal protection of the laws," does not prohibit a state from imposing such conditions upon foreign corporations as it may choose, as a condition of their admission within its limits. Norfolk & W. R. Co. v. Commonwealth of Pa., 3 I. C. R. 178.

(u) Corporations are not citizens within the meaning of clause 1, sec. 2, of art. IV., of the U. S. Constitution, declaring that "the citizens of each state shall be entitled to all privileges and immunities of citizens in the several states." Norfolk & W. R. Co. v. Commonwealth of Pa., 3 I. C. R. 178.

(v) A witness is protected by the constitutional provision from being compelled to disclose the circumstances of his offense, or the sources from which or the means by which evidence of its commission, or of his connection with it, may be obtained or made effectual for his conviction. Counselman v. Hitchcock (U. S. Sup. Ct.) 3 Inters. Com. Rep. 3 I. C. R. 816; Reversing Re Counselman, 3 I. C. R. 326; and also Overruling Re Peasley, 3 I. C. R. 333.

(w) A rule of court requiring a copy of each pleading to be filed with it, and

allowing therefor a fee of 10 cents per hundred words, and directing the same to be taxed with the costs, does not apply to a petition which consists of many counts precisely alike with the exception of dates, etc., as to which a copy of one count with a reference to the others will suffice so as to allow the taxing of costs for a copy of the whole pleading. Cook & Wheeler v. Chicago, R. I. & P. R. Co., 3 I. C. R. 383.

(x) A rule of practice allowing costs at a certain rate per folio for all copies of pleadings filed does not authorize such charge for copies of pleadings consisting of many counts which are all alike except as to names, dates, and figures, where the purpose of this rule would have been fully subserved by a copy of one count, with a mere reference to the others. Cook v. Chicago, R. I. P. R. Co. (Iowa), 3 I. C. R. 383.

(y) An order made by a referee, that on account of defendant's refusing to produce books and papers the petition be taken as true, except so far as its averments were modified by the evidence introduced on the trial, cannot be assigned as error, where there is no disputed question of fact in the case, and the evidence of plaintiff's witnesses establishes the facts pleaded in the petition without conflict. Cook v. Chicago, R. I. & P. R. Co. (Iowa), 3 I. C. R. 383.

(z) A federal court will discharge from custody on habeas corpus a person imprisoned in violation of the United States Constitution. Re White v. 3 I. C. R. 531.

(aa) The enforcing of an order of railroad commissioners requiring a railroad company to conform to their schedule of rates is a matter of public right for which an action may be maintained in behalf of the state. Campbell v. Chicago, Milwaukee & St. P. R. Co., 4 I. C. R. 203.

(bb) A claim for the refunding to a shipper of an overcharge, made in a petition to railroad commissioners for the enforcement of their order as to rates, is waived on appeal if the refund is not asked in the appellate court. Campbell v. Chicago, M. & St. P. R. Co. (Iowa) 4 I. C. R. 203.

(cc) The judiciary can only inquire whether the means devised by Congress in the execution of a power granted are forbidden by the Constitution. Interstate Commerce Commission v. Brimson, 4 I. C. R. 545.

(dd) A schedule of rates made by railroad commissioners, being challenged as a whole, the court must either condemn or sustain it as a whole, and cannot rearrange it or prepare a new schedule. Reagan v. Farmers' Loan & T. Co. (U. S. Sup. Ct.), 4 I. C. R. 560.

(ee) Although the formation of a tariff of charges for transportation by a common carrier is a legislative or ministerial rather than a judicial function, the court may decide whether or not such rates are unjust and unreasonable and such as to work a practical destruction to rights of property, and if found so it may restrain their operation. Reagan v. Farmers Loan & Trust Co., 4 I. C. R. 560.

(ff) A tariff of railroad rates fixed by a commission which will so diminish the earnings of a road that they will not be able to pay one half the interest on its bonded debt above the operating expenses, is unjust and unreasonable, where without waste or mismanagement in construction or operation, the road has cost far more than the amount of stock and bonds outstanding, which represent money expended in its construction, and the rates have been voluntarily decreased by the company within ten years more than 50 per cent, while under these rates the stock, representing two fifths of the value of the road, has never received a dividend, and for the last three years the earnings above operating expenses have been insufficient to pay the bonded debt. Reagan v. Farmers Loan & Trust Co., 4 I. C. R. 560.

(gg) Congress has not adopted the common law of England as a national municipal law. The enforcement of the common law by the courts of the United States has in every instance been as the municipal law of the state in which the subject-matter was affected. Swift v. Philadelphia & R. R. Co. (C. C. N. D. Ill.), 4 I. C. R. 633.

(hh) A schedule of rates cannot be excluded from evidence under the Illinois statutes, when accompanied by a regular certificate of the commissioners as to its publication, on the ground that it never took effect because never published as required by statutes, since the statutes make the schedule and accompanying certificate prima facie evidence that the schedule offered is a schedule of the commissioners. Chicago, B. & Q. R. Co. v. Jones (Ill.), 4 I. C. R. 683.

(ii) Making a schedule compiled by commissioners prima facie evidence that the rates therein fixed are reasonable maximum rates of charges for railroad carriage does not infringe upon the right of trial by jury. Chicago, B. & Q. R. Co. v. Jones (Ill.), 4 I. C. R. 683.

(jj) Proof of demand and insistence, under effective penalty or threat that railroad employes quit their service, and of consequent injury to the transportation of the mails or interstate commerce, imposes the burden upon those making such demand or insistence, of showing lawful authority conferred by the men themselves, and good faith in its execution. Re Charge to Grand Jury (No. 2) (D. C. N. D. Ill.), 4 I. C. R. 781.

(kk) The principles of the common law apply to controversies in the Federal courts in matters of national control, so far as they are applicable to the subject matter. Murray v. Chicago & N. W. R. Co., (C. C. N. D. Iowa), 4 I. C. R. 806.

(ll) Parol testimony is not admissible to impeach the validity of an act which by the record is shown to have been duly and legally passed. Ames v. Union Pacific R. Co., 4 I. C. R. 835.

(mm) In Nebraska a statute duly authenticated cannot be overturned by extrinsic evidence, if the journals of the two houses show that everything was done which the constitution requires should be done and recorded in the due passage of the act. Ames v. Union P. R. Co. (C. C. D. Neb.), 4 I. C. R. 835.

(nn) There is no national common or general law which can be made the basis of an action to recover back unreasonable rates imposed by a carrier. Swift & Co. v. Philadelphia & Reading R. Co., 5 I. C. R. 116.

(oo) There is no national common or general law in the sense of a rule of civil conduct prescribed by the nation as sovereign as distinguished from the body of common law in force in the several states, which will be enforced by the Federal courts except in those areas not taken into the boundaries of the states. Swift & Co. v. Philadelphia & Reading R. Co., 5 I. C. R. 116.

(pp) The settled rule that the objection to evidence which was made and decided below must appear, and that the evidence improperly admitted must be set out either in the motion for a new trial or the bill of exceptions, applies to several of the grounds of the motion in this case, and therefore these grounds are not considered. The charge of the court was free from error, and there was no error in denying a new trial. Western Union Telegraph Co. v. Michelson, 5 I. C. R. 236.

(qq) If the court instructs the jury to find more than is absolutely necessary for them to find in order for plaintiffs to recover, such action cannot be complained of by the defendant. Seawell v. Kansas City, Ft. S. Scott & Memphis R. Co., 5 I. C. R. 262.

(rr) A verdict will not be disturbed on appeal where there is evidence tending to prove each fact necessary to support it, although the appellate court might have come to a different conclusion on the whole evidence. Rouse v. Youard (Kan. App.), 5 I. C. R. 315.

(sstt) New remedies and unprecedented orders may be availed of and made by a court of equity to meet an emergency, when based on sound principles and calculated to afford necessary relief without imposing illegal burdens. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(uu) Court may inhibit unreasonable charges.—Although the court cannot compel a railroad company to enter into a contract for through shipments with another company under the Interstate Commerce Act, it may compel it to receive and forward the freights tendered at its terminus by the latter company, and inhibit it from charging for such service rates so unreasonable as to prohibit the shipment of interstate freight by the road of the latter and as to compel all such freight to be shipped over the road in whose favor a discrimination is made. Augusta Southern Ry. Co. v. Wrightsville Tennille Ry. Co., 7 I. C. C. app. XXXVIII.

(vv) Prohibition of suit by foreign corporation not applicable to interstate business.—A statute prohibiting foreign corporations transacting or soliciting business, or which have established an office within the state, from maintaining an action on any demand in any of the courts thereof, does not apply to such corporations while engaged in interstate commerce. Keating Implement & Machine Co. v. Favorite Carriage Co. et al., 7 I. C. C. app. XXXIX.

(ww) A court of equity will not dictate policy of carrier (quoting Judge Dillon.) Railroad Commission of Ohio

v. Hocking Valley Ry. Co., 12 I. C. C. 398.

IMPORTANT CASES SINCE 1908

(xx) In a proceeding brought by a carrier to show that a system of rates is confiscatory the courts have before them the protection of the security holder's investment, a question of private rights, under the constitutional guaranties. Railroad Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 367.

(yy) Under the Act complainant had the right to elect whether it would prosecute its claims for damages before the Commission or in the courts, and having elected to pursue the former course its right to prosecute the claim anew in the courts is controlled by the statute, the provisions of which the Commission is not empowered to modify. Hormel & Co. v. C. G. W. R. R., 56 I. C. C. 419, 425.

(zz) Under section 8 of the Act making a carrier liable for damages resulting to a shipper from the carrier's violation of the Act, a shipper may, for the carrier's failure to post and keep open for inspection its established rates, whereby the shipper is compelled to pay a higher rate than that in effect over a competing line, recover the difference between the rate paid and the competitive rate, and this despite the fact that the shipper would thereby be charged less than the defendent's published charge. St. L. S. W. Ry. Co. v. Lewellen Bros., 192 Fed. 540, 542.

(3a) While it is entirely proper for parties against whom an order of the Commission has been made reducing rates, to apply to the Commission for a rehearing, such application is not a condition precedent to the bringing of a suit in the Commerce Court for the purpose of setting aside such an order. A. C. L. v. I. C. C., 194 Fed. 449, 452.

(3b) A petition to the Commerce Court to enjoin an order of the Commission reducing rates is not an appeal or writ of error requiring all parties against whom the order of the Commission was rendered to join, but is a plenary suit in equity and may be brought by one carrier without joining the other parties to the order. A. C. L. v. I. C. C., 194 Fed. 449, 452.

(3c) Railroads may complain of rates prescribed by the Commission as to their effect upon their revenue, but not as to their effect upon shippers and places. A. C. L. v. I. C. C., 194 Fed. 449, 453.

(3d) After an order has been made by the Interstate Commerce Commission in favor of a complainant shipper against a railroad carrier for the payment of a damage award, proceedings brought in court because of the refusal of the carrier to comply with the order are properly for the damages sustained by the complainant (limited to the amount set forth in the pleadings), and such proceedings are de novo, and the damages are to be found by the jury under all the evidence, including the findings of the Commission, which are made evidence by the Acts of Congress. The right of action given by the Interstate Commerce laws to a partnership to recover damages suffered by it through the discriminatory acts and unfair practices of a railroad carrier is not lost in whole or part by the death of one of the partners. The common-law rule that personal actions die with the person has no application. The jury, in assessing damages, may consider as an element the lapse of time between the incurring of the damage and the rendering of the verdict, and allow for this in the assessment. Such element of damage, however, could not exceed the equivalent in amount of lawful interest. These principles are in consonance with and can be deduced from the rulings in a number of cases, of which it is sufficient to refer to Texas Ry. Co. v. Abilene Co., 204 U. S. 442, 27 Sup. Ct. 350, 51 L. ed. 553, 9 Ann. Cas. 1075; I. C. C. v. Alabama Ry. Co., 168 U. S. 174, 18 Sup. Ct. 45, 42 L. ed 414; West. ern N. Y. v. Penn. Co., 137 Fed. 343, 70 C. C. A. 23; P. R. R. v. Clarke, 238 U. S. 456, 35 Sup. Ct. 896, 59 L. ed. 1406. Minds v. Pennsylvania R. R., 237 Fed. 267, 268.

(3e) The remedies given by the Interstate Commerce Act to an aggrieved party are these: Any form of action, otherwise open to the injured party, is preserved to him. He is given the right to resort to an action at law, or he may, at his option, ask the Commission to award him damages. If he brings his action at law, it is necessarily based upon two propostions: One is that the regulation of which he complains is unlawful and the rule which he seeks to have established is the proper one. Whether this be a conclusion of law or a finding of fact is an academic distinction, but it must in fact appear. The other is the fact and amount of his damage. The first is an administrative question, and for obvious reasons is committed to the Commission, and the Com-

mission alone, to find. The second is a judical question, which may be submitted to the courts, or to any tribunal having the lawful power to determine it. The consequence follows that recourse to the Commission is only in part optional. The administrative question must be first determined by the Commission, because, if an action were brought at law, without this first finding, the plaintiff could not make out his case. His real option is this: He may submit the administrative question alone to the Commission, and thus, having established his right to recover his damages, may bring his action at law, and prove both his injury and the amount of his damages, or he may exercise the right given him by the statute by submitting both questions to the Commission. If he takes the first course, the action is one for damages and subject to well-known rules. If he takes the second course (as these plaintiffs did), what results? Had the right of trial by jury not been involved, Congress would doubtless have given the award of the Commission the effect of a judgment. The complainant, being a volunteer, is concluded by what the Commission does. The defendant is not concluded. If the defendant complies with the order, the plaintiff is done. If the order is not complied with, the plaintiff may have recourse to the courts (federal or state), setting forth his injury, the fact of his complaint to the Commission and the order made thereon, and that it has not been complied with. In the words of the statute, the cause then proceeds as an action for damages, except that the findings of the Commission are made evidence, and the defendant must pay costs and counsel fees. If this language of the statute is taken at its face value, and the action regarded as one for damages, the whole proceeding is simplified. If the view now presented by the defendant is taken, a host of baffling queries rush upon the mind. The obstacles which shut out this view may be summed up in the observation that, if such be the law, the defendant is given the undeserved advantage of being in a position in which it may gain, but cannot lose, and all its risks in this speculation are costs and counsel fees. In this view the jury would be required to find under all the evidence (including the order), not the damages (up to the limit of the award), but how much of the damage found by the Commission is shown by the evidence of the defendent at the trial to have been improperly allowed. Without meaning it as a statement of defendant's position, the practical effect may be presented by this illustration: If the Commission found a loss in tonnage of 1,000 tons, and a money loss of $2 per ton, and a consequent damage of $2,000, the plaintiff would be bound by each of these findings, but the defendant would not. If the defendant showed at the trial that the money loss per ton was only $1, the jury must apply this to the 1,000 tons found by the Commission, and could not render a verdict for over $1,000, notwithstanding that it also further appeared at the trial that the Commission had made another mistake, and that the true tonnage was 2,000 tons, and the actual damage $2,000. In other words, any mistakes made by the Commission against the defendant must be corrected by the jury; but mistakes made against the plaintiff cannot be corrected, notwithstanding the fact that one may offset the other. This is inconsistent with the rulings in the cited cases, and under them we do not feel at liberty to consider the question an open one. The action is one for damages, the proceedings in which are de novo, and in the nature of an appeal, with the added consequences ingrafted upon it by the Act of Congress. Whether the jury could award a larger sum in damages that the Commission allowed does not arise here. It might be conceded that under the Act of Congress the plaintiff was so limited, without affecting the character of the action as one for damages. This disposes of practically all of the questions raised. A formal disposition is made of all of them in the order in which they are set forth in the reasons for a new trial. Minds v. Pennsylvania R. R., 237 Fed. 267, 269, 270.

(3f) A plaintiff who brings his action at law for a cause of action arising under the provisions of the Interstate Commerce law, must (as every plaintiff must) make out his case. If he has been damaged by a car distribution made in accordance with a system or rule of distribution adopted by a railroad carrier and filed with the Commission in accordance with the requirements of the statutes, he has not suffered a legal injury, unless the distribution be one of the character condemned by law. This he must prove, and he can prove it only by a finding of the Commission. In consequence he is driven to go first to the Commission for all the administrative

findings. The reason for this lies on the surface of things. When, however, these have been found, either on complaint of our suppositious plaintiff or of some one before him, then he may bring his action at law and can recover. He can recover, because he can make out his case first by proving (through the finding of the Commission) that the system of car distribution enforced by the carrier defendant was unjust and discriminatory; and, secondly, that he has been damaged thereby, and to what amount. He is only compelled to go to the Commission when his case depends upon the administrative finding that the rule of car distribution of which he complains is an improper one. If the carrier has adopted and filed a fair and proper rule, or one has been found by the Commission, and the cause of action arises out of an unjust and discriminatory departure from it, causing damage, this fact may be established in an action at law, and no preliminary recourse to the Commission is necessary. The adjudged cases make clear the distinction by which it may be readily determined whether such recourse is necessary. The distinction indicated is not only consistent with, but is to be found in, the section of the act and the cases to which we have been referred; Section 9, Act to Regulate Commerce; P. R. R. v. Clark, 238 U. S. 456, 35 Sup. Ct. 896, 59 L. ed. 1406; Proctor v. U. S., 225 U. S. 282, 32 Sup. Ct. 761, 56 L. ed. 1091; Riddle v. Railroad, 3 Interst. Com. R. 230; P. R. R. v. International, 230 U. S. 184, 33 Sup. Ct. 893, 57 L. ed 1446, Ann Cas. 1915A, 315; P. R. R. v. Puritan, 237 U. S. 121, 35 Sup. Ct. 484, 59 L. ed. 867, Railroad v. Penn., 137 Fed. 343, 70 C. C. A. 23. To which may be added Barret v. Gimbel Bros., 226 Fed. at page 631, 141 C. C. A. 379, the approved ruling being reported in (D. C.) 215 Fed. 104, reference to which latter ruling is made merely as an expression of the views of this court already made. This further distinction is, of course, also clear, emphasizing the distinction already made. The complaining party is given an option or choice of the tribunal he will ask to assess his damages. When he has once made his election, he is (again of course) bound by it. He cannot follow an unsuccessful resort to one tribunal by taking the same claim of damages before another. What he can do, and what he must do, are sometimes coupled, and sometimes not. Both of them may be thus summarized If the question he asks to have determined is an administrative one, he has no option, but must make his complaint to the Commission, and cannot take it elsewhere. 2. If the questions are all and wholly juridical, he has the option (under the ruling of the courts, although the Commission has suggested a different view) of either bringing his action at law or complaining to the Commission. 3. If the questions necessarily arising are some of them administrative and some juridical, then he must first go to the Commission to have the administrative questions determined, but as to the juridical questions he still retains his alternative or optional right. 4. He may first apply to the Commission to have the administrative questions determined, limiting his complaint to this feature, and, if determined in his favor, may bring his action at law, establishing what may be called the administrative facts by putting in evidence the finding of the Commission and proving the judicial facts by any evidence at his command; or 5. He may include in his complaint to the Commission both the administrative and the juridical elements of his case, and have them determine both and everything involved in his complaint. If there had been no right of trial by jury involved, the supply of remedies provided by the act would doubtless have been stopped at this point. Because it was involved, Congress saw that something further was required. As the right of trial by jury was not involved in the administrative questions, the findings of the Commission as to them were made to conclude everybody. As the plaintiff would not bring the juridical questions before the Commission, except as a volunteer, the findings of the Commission were made to conclude him. As the defendant was not a volunteer, and as Congress wished to give to the carriers (whether it was a constitutional right or not) the right to a jury trial, the findings of the Commission were not made to conclude them. The carrier was therefore left at liberty to pay or not pay the award as it might elect. If it paid it, the complaint of the plaintiff was satisfied, and of course silenced. If it did not pay it, the plaintiff must have a further remedy, and this necessarily must be by a proceeding at law, because in no other way could the carrier be brought before a jury. He is therefore given (or there is restored to him)

a right of action at law. To make use (as far as could be done), of the fruits of the labor and time expended in securing the report of the Commission, the findings are made evidence, and the plaintiff is allowed his costs and counsel fees. If, to paraphrase the language of Congress, this action, to which the act of the defendant has driven the plaintiff, is treated in all respects as an action for damages, except that all the findings of the Commission are made evidence, etc., all or nearly all troubling questions are eliminated. If the findings of the Commission, are further regarded as binding upon the plaintiff, but open to any attack by the defendant, then a veritable legal chaos reigns. It will be seen to follow that in such final action the administrative findings must (as in the case of a first action at law) conclude everybody and settle the administrative facts. The facts to be found by the jury must be open ones to the defendant, and (at least may) be alike open to the plaintiff. The simplest view which might be taken of such a proceeding is that it is to be tried (with the exceptional features noted) precisely as the action for damages would have been tried, had the plaintiff gone first to the Commission to determine the administrative facts, and then brought his action; the administrative findings included in the report being treated as such preliminary findings. This would, however, open to the plaintiff the opportunity to go beyond the cause of action presented to the Commission, and would be inconsistent with some of the provisions of the act of Congress. All such inconsistencies disappear, however, if the proceedings are treated as in the nature of appeal proceedings, taking into court only the original complaint or cause of action presented to the Commission, but otherwise de novo, except for the evidentiary and other features ingrafted upon it by Congress, and with the administrative features conclusively established by the findings of the Commission, and the juridical facts open to be established by any otherwise proper evidence, and to be found under all the evidence, in the body of which is embraced the findings of fact by the Commission. Hinsdale Coal & Coke Co. v. Pennsylvania R. Co., 237 Fed. 272, 273, 274, 275.

(3g) The Transportation Act Feb. 28, 1920, §206, giving jurisdiction of claims against the Railroad Administration for violations of the Act to Regulate Commerce to the Interstate Commerce Commission but also providing that actions at law and suits in equity, which prior to federal control could have been brought against the carrier, might, after the termination of the control be brought against an agent designated for that purpose did not vest in the Commission sole jurisdiction over claims for a violation of the Interstate Commerce Act, but an action can be prosecuted by the shipper in the courts in cases where proceedings before the Commission are not a prerequisite to such action. Davis v. Parrington, 281 Fed. 10.

(3h) Where the Commission orders carriers to desist from according different rates to coal intended for the use of railroads as fuel than to commercial coal, and the facts, circumstances and conditions upon which it bases its orders are undisputed, and the question involved is the construction of sections 2 and 3 of the Act to determine whether the different charges constitute violations of those sections, the order is not merely administrative and is open to review by the Commerce Court. I. C. C. v. B. & O. R. R. Co., 225 U. S. 326, 32 Sup. Ct. 742, 746, 56 L. ed. 1107.

(3i) The courts have not been given jurisdiction to fix rates or practices in direct proceedings, nor can they so collaterally during the progress of a lawsuit when the action is based on the claim that unreasonable allowances have been paid, for if the decision of such questions was committed to the different courts, with different juries, the results would not only vary in degree, but might often be opposite in character, to the destruction of the uniformity in rate and practice which is the cardinal object of the Interstate Commerce Act. Mitchell Coal & Coke Co. v. P. R. R. Co., 33 Sup. Ct. 916; 230 U. S. 247.

(3j) The courts are no more authorized to determine the reasonableness of an allowance for a haul over a spur track, between mine and station, than they are to pass upon the reasonableness of a rate for a haul over a trunk line between station and station. Mitchell Coal & Coke Co. v. P. R. R. Co., 33 Sup. Ct. 916, 923; 230 U. S. 247.

(3k) Where the court has no jurisdiction over a suit for damages for unlawful discrimination in the payment of allowances, parties cannot by consent give jurisdiction to the court. Mitchell Coal

& Coke Co. v. P. R. R. Co., 33 Sup. Ct. 916, 924; 230 U. S. 247.

(3l) The Interstate Commerce Act, §9, allowing persons damaged by any common carrier to complain to the Interstate Commerce Commission, or to bring suit for damages in federal courts, provides two methods for the ascertainment of damages, which are exclusive, one to the Commission, and the other to the federal courts. Petition of Southern Lumber & Mfg. Co., 210 S. W. 639.

(3m) The Transportation Act Feb. 28, 1920, §206, giving jurisdiction of claims against the Railroad Administration for violations of the Act to Regulate Commerce to the Interstate Commerce Commission but also providing that actions at law and suits in equity, which prior to federal control could have been brought against the carrier, might, after the termination of the control be brought against an agent designated for that purpose did not vest in the Commission sole jurisdiction over claims for a violation of the Interstate Commerce Act, but an action can be prosecuted by the shipper in the courts in cases where proceedings before the Commission are not a prerequisite to such action. Davis v. Parrington, 281 Fed. 10.

(3n) The provision of Interstate Commerce Act, §9, giving an option of going before the Commission or the courts to recover damages occasioned by a violation of the statute, does not give the option to sue in court, contrary to another provision of the act, denying a right to recover in court for the same cause. Fulton Bag & Cotton Mills v. American Ry. Express Co., 288 Fed. 854.

United States (Interstate Commerce Commission, Intervener), 295 Fed. 558.

§1a. Contempt of Court.

CASES 1887-1908

(a) In matters of contempt a jury is not required by "due process of law." Courts possess the power to punish for contempt. Interstate Commerce Commission v. Brimson (U. S. Sup. Ct.), 4 I. C. R. 545.

(b) It is a contempt of court to interfere with property in the hands of a receiver, or with men in their employ. Ames v. Union P. R. Co. (C. C. D. Neb.), 4 I. C. R. 619.

(c) Punishment for contempt is not such a remedy for a conspiracy to obstruct the business of a railroad in the hands of a receiver as to prevent the remedy of the injunction. Farmers Loan

& Trust Co. v. Northern Pacific R. Co., 4 I. C. R. 744.

(d) Imprisonment for six months was imposed as a punishment for contempt of court in interfering with the operation of a railroad by a receiver, where, after the service of the restraining order, the defendant continued in his unlawful course and aggravated his contempt by speeches to the employes of the receiver. Thomas v. Cincinnati, N. O. & T. P. R. Co., (C. C. S. D. Ohio), 4 I. C. R. 788.

(e) Any wilful attempt, with knowledge that a railroad is in the hands of a court through its receiver, to prevent or impede the court in running the road, which as between private individuals would give a right of action for damages, —is a contempt of court. Thomas v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 4 I. C. R. 788.

(f) Inciting the employes of a road in charge of a receiver to quit their service, in pursuance of the plans of an unlawful conspiracy, constitutes a contempt of court. Thomas v. Cincinnati, N. O. & T. R. Co., (C. C. S. D. Ohio), 4 I. C. R. 788.

(g) Instigating the employes of a receiver to leave their employment may be contempt without being a crime. Thomas v. Cincinnati, N. O. & T. P. R. Co., (C. C. S. D. Ohio), 4 I. C. R. 788.

(hi) In a proceeding for contempt in equity, a sworn answer, however full and unequivocal, is not conclusive, and does not entitle the defendant to discharge without inquiry into the facts. United States v. Debs. (C. C. N. D. Ill.), 5 I. C. R. 163.

(j) Alleged advice of counsel as to what a person under injunction might do will constitute no justification or mitigation, where the statement of facts made to such counsel is not disclosed, but on the contrary a presumption is raised that a full statement would not be advantageous. United States v. Debs. (C. C. N. D. Ill.), 5 I. C. R. 163.

(k) No violation or disregard of an injunction totally invalid for any reason can constitute a punishable contempt; but no irregularity or error in the procedure, or the order itself, can justify disobedience if the court acquired jurisdiction and did not exceed its powers in the particular case. United States v. Debs. (C. C. N. D. Ill.), 5 I. C. R. 163.

(l) An employee of a railroad company is not guilty of contempt as disobeying an injunction restraining the company from refusing to another road equal facilities for the interchange of traffic, where, rather than perform the duties necessary to such interchange, he quits the service in good faith, unconditionally and absolutely, while his train is safely stored in the company's yard and no special injury can result, no lives be imperiled, or property jeopardized, by his refusal to continue in the service; but so long as he continues in the service he is guilty of contempt in refusing to obey such injunction. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 545.

(m) An engineer who, while on the road with his train, refuses to switch into the train a car from another road with which the labor organization to which he belongs is in conflict, declares that he quits the employment of the company, and refuses repeated orders to proceed with his train; but, upon receiving an order from such labor organization, completes his trip, and thereafter, upon being told what his next run will be, gives no notice of having quit or intending to quit his employment,—is guilty of contempt as violating an injunction restraining the company from refusing equal facilities for the interchange of traffic to such other company, of which he has notice. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 545.

(n) The proper practice, upon the refusal of employees to obey an injunction against a railroad corporation, is the issuance of a citation requiring them to appear and show cause why they should not be attached for contempt. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 545.

(o) Punishment of servant of corporation for violating injunction against it. —The servant of a corporation which has been enjoined from violating the Interstate Commerce Act may be punished for contempt in assisting in the violation of the injunction, although he was not a party to the suit or served with the order, if he had notice of it. Ex parte James Lennon v. 7 I. C. C. app. XIII.

(p) Violation of injunction against interference with interstate commerce, punishable as a contempt.—The United States circuit courts have power to punish for contempt persons who violate their injunctions against interference

with interstate commerce. The court says: The entire strength of the nation may be used to enforce in any part of the land the full and free exercise of the national powers and the security of all rights intrusted by the Constitution to its care. The strong arm of the national government may be put forth to brush away all obstructions to the freedom of interstate commerce or the transportation of the mails. If the emergency arises, the army of the nation and all its militia are at the service of the nation to compel obedience to its laws. But, the court continues, the right to use force does not exclude the right of appeal to the courts for a judicial determination and for the exercise of all their powers of prevention. Re Debs. v. 7 I. C. C. app. XXVII.

§2. Defenses.

See Cars and Car Supply §34; Crimes VIII; Interstate Commerce Commission §3; Special Contracts §6; Undercharges §3.

IMPORTANT CASES SINCE 1908

(a) In determining the validity of a decision of the Commission its order cannot be considered by itself alone, but must be read in the light of the entire record. I. C. C. v. U. P. R. R., 222 U. S. 541, 551, 32 Sup. Ct. 108, 56 L. ed. 308.

(b) In determining the mixed questions of law and facts involved in the decisions of the Commission, the court confines itself to the ultimate question as to whether the Commission acts within its powers, and it will not consider the expediency or the wisdom of the order, or whether, on like testimony, it would have made a similar ruling. I. C. C. v. U. P. R. R., 222 U. S. 541, 547, 32 Sup. Ct. 108, 56 L. ed. 308.

(c) Where the complaint in a suit by a shipper to recover the excess exacted above the quoted rate does not reveal on its face that the quoted rate was less than the schedule rate filed with the defendant carrier cannot prove such fact as a defense under a plea of the general issue. Baldwin Land Co. v. Columbia Ry. Co., 58 Or. 285, 291, 114 P. 469.

§3. Mandamus.

CASES 1887-1908

(a) The discretionary power of the court, under the Interstate Commerce Act, to grant a mandamus to prevent unjust discrimination by a carrier, although some question of fact is undetermined, does not apply where no case of unjust discrimination is shown to exist. Re Morris v. D. L. & W. R. Co., 2 I. C. R. 617.

(b) The duty enjoined by the Act of Congress of Aug. 7, 1888, §2, upon the Pacific railroad companies, of affording equal facilities to all connecting lines of telegraphs without discrimination against any, should be enforced in the mode prescribed by §3, of application to the Interstate Commerce Commission, which is required to proceed by mandamus, rather than by bill in equity, as the remedy provided is exclusive. Union P. R. Co. v. United States (C. C. App. 8th C.), 4 I. C. R. 705.

IMPORTANT CASES SINCE 1908

(c) A petition for mandamus which demands the production of papers executed before the passage of the Hepburn Act, so indefinitely worded that the court cannot determine what portions may be privileged communications between attorney and client, and what not, may be denied in the court's discretion. United States v. L. & N. R. R. Co., 212 Fed. 486, 494.

(d) Mandamus will not lie under section 20 to disclose privileged communications between an individual and his counsel. United States v. L. & N. R. R. Co., 212 Fed. 486, 493.

(e) Although mandamus will not lie so as to interfere with the exercise of its discretion by the Commission, it will lie to compel the Commission to take jurisdiction over carriers operating between Alaska and the States and betwen Alaska and adjacent foreign countries, where the Commission has refused to do so pursuant to its belief that the Interstate Commerce Act has conveyed upon it no authority over such carriers. I. C. C. v. H. S. S. Co., 224 U. S. 474, 484, 32 Sup. Ct. 556, 56 L. ed. 849.

(f) The Supreme Court of the District of Columbia will issue a writ of mandamus to compel the Interstate Commerc Commission to entertain a petition by a steamship company to compel the filing with the Commission of rates and the establishment of through routes and joint rates on traffic moving between Alaska and adjacent foreign countries, and Alaska and the state of Washington. Humboldt S. S. Co. v. I. C. C., 37 App. Cas. D. C. 266, 275.

§4. New Trial.

(a) Where the defendant carrier in a

suit by a shipper for unlawful discrimination produces all the books required to enable plaintiff to prove his case as to payment of rebates to competitors, plaintiff is not entitled to a new trial by reason of defendant's failure to produce the whole list of documents called for by him at the trial. International Coal Mining Co. v. Penn. R. R. Co., 162 Fed. 996, 997.

(b) Where a judgment against a railroad company in a suit to enforce an award of damages by the Interstate Commerce Commission for discrimination was reversed by the Supreme Court on the ground of the insufficiency of the evidence to sustain the award of the commission, and the case remanded for a new trial, the court on the second trial may properly admit additional evidence, not only such as was taken before the commission, but the testimony of new witnesses. Pennsylvania R. Co. v. Weber, 269 Fed. 111.

§5. Suits by or against Commission

See Procedure Before Commission §12.

CASES 1887-1908

(a) The principal office, within the meaning of the Act of Congress authorizing a circuit court where such office is situated, to enforce orders of the Interstate Commerce Commission, of a railroad corporation created by an Act of Congress which does not prescribe where such office shall be kept, is the one where its principal officers have their business domicil, the meetings of stockholders, directors, and executive committee are held, the stock books kept and the dividends declared, rather than the place where the subordinate officers in charge of the operating, traffic, and accounting departments of the business, discharge their duties. Interstate Commerce Commission v. Texas & P. R. Co. (C. C. S. D. N. Y.), 4 I. C. R. 62.

(b) The process of a Federal court cannot be exercised in aid of an investigation before the Interstate Commerce Commission as that is an administrative and not a judicial body as a proceeding before an administrative body is not a "case' 'or "controversy" within the constitutional powers of the Federal courts. Re Interstate Commerce Commission, 4 I. C. R. 315.

(c) A suit brought by the Interstate Commerce Commission in the United States circuit court to enforce an order of the Commission, is an original and independent proceeding. The court is not confined to a mere re-examination of the case as heard and reported by the Commission; but the court hears and determines the cause de novo upon proper pleadings and proof. The Commission's report is prima facie evidence of the matters of fact therein reported; but the court will hear all such other, and further testimony as either party may introduce, bearing upon the matters in controversy; and will permit such pleadings as will bring before the court clearly, and in legal form, such matters as may be pertinent and proper in view of the issues raised. Cases cited: 2 Inters. Com. Rep. 351, 2 L. R. A. 289, 37 Fed. Rep. 567, Kentucky & I. Bridge Co. v. Louisville & N. R. Co.; 3 Inters. Com. Rep. 796, 49 Fed. Rep. 177, Interstate Commerce Com. v. Lehigh Valley R. Co.; 50 Fed. Rep. 295, Interstate Commerce Com. v. Atchison, T .& S. F. R. Co. Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 4 I. C. R. 332.

(d) Where a carrier has an office in one state, which is that of the executive officers, and where the stockholders' and directors' meetings are held, and the stock certificate books and the records of stockholders' and directors' meetings are kept, while the administrative offices of the carrier are in another state, the former is its principal office within the meaning of the Interstate Commerce Act, §16, relating to the place of bringing suits to enforce orders of the Commission. Interstate Commerce Commission v. Texas & P. R. Co. (C. C. App. 2d C.), 4 I. C. R. 408.

(e) The mingling indiscriminately of matters of legal and equitable cognizance in the same complaint, and the enforcement in a single suit of all the rights and duties mentioned, is not authorized by the Act of Congress of Aug. 7, 1888, §4, providing in effect that to secure and preserve to the United States the full value and benefit of its lines upon all the telegraph lines belonging to the railroad and telegraph companies mentioned in the Pacific Railroad companies acts, and to have them possessed, used, and operated in conformity with the statutes, it is made the duty of the attorney general by proper proceedings to prevent any unlawful interference with the rights and equities of the United States, to have legally ascertained and adjudicated all alleged rights of all persons and corporations claiming any control or interest in any telegraph lines or property, or ex-

clusive rights of way upon the lands of said railroad companies, and to have set aside all contracts and their provisions entered into by such companies unlawfully and beyond their powers. Union Pacific R. Co. v. United States, 4 I. C. R. 705.

(f) The Attorney General of the United States in a suit to enforce the duty imposed upon the Pacific railroad companies by Act of Congress of Aug. 7, 1888, §2, of affording equal facilities to all connecting lines of telegraph without discrimination, has, if such suit can be maintained, the burden of showing that some telegraph company has placed itself in a position to demand of the railway company the same facilities accorded to other companies, and that such demand has been refused, as it cannot be presumed that the railroad company intends to disregard its duty. Union Pacific R. Co. v. United States, 4 I. C. R. 705.

(g) The court cannot, upon a certificate of the Interstate Commerce Commission that in making an order it did not design to make it so broad as its terms import, enforce the order in such restricted sense, where it otherwise would not be enforceable. Interstate Commerce Commission v. Delaware, L. & W. R. Co., 5 I. C. R. 146.

(h) The opinion of the Interstate Commerce Commission has not the effect of a judicial determination; and in a proceeding to enforce it the court proceeds to hear the complaint de novo. Shinkle, Wilson, & Kreis Co. v. Louisville & N. R. Co., 5 I. C. R. 282.

(i) The circuit court and circuit court of appeals having refused to enforce an order of the commission requiring carriers to cease and desist from charging more than $1.00 per 100 lbs. on first class freights from Cincinnati to Atlanta, on the ground that the existing rate of $1.08 charged by such carriers had been shown, by evidence adduced in the circuit court, to be no more than reasonable, and that the prima facie case of unreasonableness made by the findings of the Commission had been overcome by such additional evidence,—this court will not review the finding of both such courts on that matter of fact. C., N. O. & T. P. R. Co. v. Inters. Com. Commission, 5 I. C. R. 391.

(j) An erroneous decision of the circuit court affirming the validity of an order of the Interstate Commerce Commission, made under a misconception of the extent of its powers, should be reversed by the circuit court of appeals, and the order set aside, and the cause remanded to the Commission in order that the latter, if it saw fit, might proceed therein according to law; and the circuit court of appeals should not undertake of its own motion to find and pass upon the questions of fact involved which were not considered by the Commission. Texas & P. R. Co. v. Interstate Commerce Commission, 5 I. C. R. 405.

(k) That the disparity in rates between import and domestic traffic was too great to be justified by ocean competition cannot be made by the circuit court of appeals the basis of an affirmance of a decision by the circuit court sustaining an order of the Interstate Commerce Commission denying that ocean competition should be regarded, when there was no allegation or testimony in the court below as to the extent to which a disparity in rates could be justified by ocean competition if that could be considered. Texas & P. R. Co. v. Interstate Commerce Commission (U. S. Sup.), 5 I. C. R. 405.

(l) An order made by the Commission, which rests upon an erroneous principle and is unreliable, cannot be sustained, and is not to be judicially enforced. Interstate Commerce Commission v. Lehigh V. R. Co., 5 I. C. R. 643.

(m) The court may go fully into the proof to determine whether it will approve an order made by the Commission, and may hear any additional proof. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(n) The jurisdiction of the United States circuit court is limited to an approval or disapproval and to an enforcement or refusal to enforce an order of the Commission. The court has no authority to modify the order of the Commission. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(o) The proper remedy, where the record of proceedings before the Interstate Commerce Commission by shippers of oil in accordance with a previous order of the Commission does not enable the Commission to determine whether any of the claims are supported by facts which would bring them within the terms of the order, is by proceeding in the courts under the Act to Regulate Commerce, §16. Independent Ref. Asso. v. Pennsylvania R. Co., 6 I. C. C. 449.

(p) Court cannot modify or change

order of Interstate Commerce Commission.—The circuit court cannot modify or change an order of the Interstate Commerce Commission as, the powers of the Commission being administrative and not judicial, the ancillary and supplemental jurisdiction is necessarily limited to granting or refusing compulsory obedience to the lawful orders of the Commission as made by it. Detroit, Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. app. LXXIV.

(q) Court will not determine rates to be charged by road which has been in, but has passed out of, possession of receiver.—The United States circuit court cannot assume jurisdiction to determine the question of rates of a railroad company in a proceeding to enforce an invalid order of the Interstate Commerce Commission because when the proceeding commenced the railroad was in the custody of receivers appointed by the court, where it has since been transferred to a new company, as a decision as to the duties of receivers in the past would be profitless. Farmers' Loan and Trust Co. v. Northern Pacific R. R. Co., 8 I. C. C. app. XXXV.

(r) Court cannot adjust differences between carrier and shipper, and correct abuses in railroad charges.—In a proceeding to enforce a decision and order of the Interstate Commerce Commission, the court has no general power to adjust differences between the litigants, or correct abuses by a railroad company in the conduct of its business, and can grant no relief unless a valid order has been made by the commission and violated by the railroad company. Farmers' Loan and Trust Co. v. Northern Pacific R. R. Co. 8 I. C. C. app. XXXV.

(s) Commission may maintain suit to restrain exaction of unreasonable rates.—The Interstate Commerce Commission may maintain a suit to compel a railroad to desist from exacting rates which it has determined to be unreasonable, although it has no authority to fix maximum rates. I. C. C. v. Chicago, Burlington & Quincy R. R. Co., 8 I. C. C. app. LXXIX.

(t) Petition to enforce order on sufficient facts not demurrable.—A demurrer will not lie to a petition by the Interstate Commerce Commission to compel a railroad company to desist from exacting unreasonable rates on the ground that the Commission's finding of facts does not support its order if the findings expressly state that the charge made is unreasonable, although the findings may not appeal to the judgment of the court upon the merits. I. C. C. v. Chicago, Burlington & Quincy R. R. Co., 8 I. C. C. app. LXXIX.

IMPORTANT CASES SINCE 1908

(u) Suits to enforce the Commission's orders for reparation "shall proceed in all respects like other civil suits for damages." Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 67.

(v) In view of the difficult questions so frequently arising out of the relations between trunk line carriers and industries with industrial railways, rulings in this case should be reviewed by the courts in order that some definite principle may be judicially established by which the Commission may hereafter be guided in such cases as they arise. National Tube Co. v. B. & O. R. R. Co., 50 I. C. C. 489, 504.

(w) In 17 I. C. C. 552, the Commission reduced gathering rates on citrus fruits, pineapples and vegetables, from Florida points of production on the F. E. Ry. to the basing point at Jacksonville, Fla. Such reduction was made because of increased tonnage shown to exist on similar traffic handled by the S. A. L. Ry. and the A. C. L. R. R., though no evidence was adduced tending to show that similar conditions existed with respect to the F. E. C. Ry. HELD, that the order of the Commission directing such reductions should have been enjoined. F. E. C. Ry. Co. v. United States, 34 Sup. Ct. 867, 873; 234 U. S. —., 58 L. ed.—; reversing 200 Fed. 797, refusing to enjoin the commission's order in 17 I. C. C. 552.

(x) The court in substituting its judgment as to the existence of preference for that of the Commission, on the ground that where there was no dispute as to the facts it had a right to do so, obviously exerted an authority not conferred upon it by the statute. It is not disputable that from the beginning the very purpose for which the Commission was created was to bring into existence a body which, from its peculiar character, would be most fitted to primarily decide whether from facts, disputed or undisputed, in a given case, preference or discrimination existed. The amendments by which it came to pass that the findings of the Commission were made not merely prima facie but

conclusively correct in case of judicial review, except to the extent pointed out in the Illinois Central and other cases, show the progressive evolution of the legislative purpose and the inevitable conflict which exists between giving that purpose effect and upholding the view of the statute taken by the court below. It cannot be otherwise, since if the view of the statute upheld below be sustained, the Commission would become but a mere instrument for the purpose of taking testimony to be submitted to the courts for their ultimate action. U. S. v. L. & N. R. R. Co., 35 Sup. Ct. Rep. 113, 114; 235 U. S. 314; 236 U. S., 318, 59 L. ed.

(y) The Interstate Commerce Commission and the Railroad Labor Board, when sued by a state as corporate entities created by the United States for governmental purposes, are not "citizens" of any state, within the provision fixing the original jurisdiction of the Supreme Court. State of Texas v. Interstate Commerce Commission, 42 Sup. Ct. 261.

(z) The remedy by suit in the District Court to set aside or suspend orders of the Interstate Commerce Commission, to which the United States shall be made a party, under Judicial Code, §§207, 208, 211, and Act, Oct. 22, 1913 is the exclusive remedy, and precludes an original suit by the state in the Supreme Court, in which the United States is not made a party. State of Texas v. Interstate Commerce Commission, 42 Sup. Ct. 261.

(aa) Allegations, in an original bill filed by a state against the Interstate Commerce Commission, that it owned an intrastate railroad and was a shipper of freight affected by the rates prescribed by the Commission, which it sought to set aside, do not relieve the state of the necessity of pursuing the statutory remedy to annul such orders by suit in the District Court, to which the United States shall be made a party. State of Texas v. Interstate Commerce Commission, 42 Sup. Ct. 261.

(bb) Suits to restrain or set aside orders of the Interstate Commerce Commission are required to be brought in the United States District Court by Judicial Code, §§208, 211 and Act. Oct. 22, 1913, and cannot be brought in a state court. Lambert Run Coal Co. v. Baltimore & O. R. Co., 42 Sup. Ct. 349.

(cc) Under the Interstate Commerce Act the parties who may maintain suits in the courts to enjoin, set aside, annul or suspend an order of the Interstate Commerce Commission are not limited to those who were parties to the proceeding before it upon which the order was based. The proceeding in the courts is not an appeal; it is a plenary suit in equity. The determination of the question as to what parties may maintain such suits is left by the Interstate Commerce Act to the general rules and practices in equity, and under them any party whose rights of property are in danger of irreparable injury from an unauthorized order of the Commission may appeal to a Federal Court of equity for relief. Peavey & Co. v. U. P. R. R. Co., 176 Fed. 409, 417.

(dd) The courts cannot by mandamus, injunction or otherwise, control or modify any order of the Commission made by it in the due performance of its merely administrative functions. Jacoby v. P. R. R. Co., 200 Fed. 989, 997.

(ee) The sole question before the courts in passing upon the validity of an administrative order of the Commission is whether it had power to make the order, and not the mere expediency or wisdom of having made it. Jacoby v. P. R. R. Co., 200 Fed. 989, 997.

(ff) Where an entire system of rates has been established by the Commission, the courts are empowered to inquire whether all classes of traffic are charged relatively reasonable rates, or are justly classified; whether the body of rates prescribed is such as to work a practical destruction to rights of property, and, if it be found that such system is unjust and unreasonable to such extent, to restrain its operation. L. V. R. R. Co. v. U. S., 204 Fed. 986, 991.

(gg) Jurisdiction of a suit to review an order of the Commission is not affected by the fact that the order of the Commission has already been complied with by the railroad company by putting the rates into effect. McLean Lumber Co. v. United States, 237 Fed. 460.

(hh) An order of the Interstate Commerce Commission, made on petition of shippers complaining of new rates about to be established by a railroad company, which, while not granting relief to the extent prayed for by retaining the old rates in force, establishes a schedule of new and higher rates, but lower than those proposed by the company, is not a mere negative order, and is reviewable

by the courts. McLean Lumber Co. v. United States, 237 Fed. 460.

(ii) While recognizing fully the general doctrine of Railroad Co. v. Ellerman, 105 U. S. 166. 26 Sup. Ct. 1015, In re Debs, 158 U. S. 564, 15 Sup. Ct. 900, 39 L. ed. 1092, and other cases upon which the Commission relies in argument, that a plaintiff in equity having no pecuniary or property interest in the subject-matter of the litigation is not entitled to injunctive relief, we find nothing in these decisions constraining us to conclude that the interest of a shipper in the rate which he is required to pay for the transportation of his property in the necessary conduct of his business is not such a direct pecuniary interest and property right as to give him the necessary standing in a court of equity for its protection. McLean Lumber Co. v. United States, 237 Fed. 460, 465.

(jj) A new trial granted in an action on an award of damages by the Interstate Commerce Commission for discrimination in the distribution of coal cars, on the ground that the award of the Commission, which was a part of the evidence submitted to the jury, under a later decision of the Supreme Court was made on an erroneous basis, and that the jury were not fully instructed on the point. Clark Bros. Coal Mining Co. v. P. R. R. Co., 238 Fed. 642.

(kk) A suit by a shipper against a carrier to recover charges for switching and weighing services performed by the shipper, which charges had previously been disallowed by the Interstate Commerce Commission, is not one in which an order of the Commission can be set aside. Finkbine Lumber Co. v. Gulf & S. I. R. Co., 269 Fed. 933.

(ll) A District Court of the United States would not review the action of the Interstate Commerce Commission in determining what is the operating revenue of a carrier for the purpose of obtaining compensation from the United States government for the use of the railroad while being operated by the government during the world's war. Detroit & T. S. L. R. Co. v. Interstate Commerce Commission, 277 Fed. 535.

(mm) A writ of certiorari should not issue to review a decision of the Interstate Commerce Commission, even if such decision was beyond its jurisdiction, especially where the Commission's action was not final under the statute. Detroit & T. S. L. R. Co. v. Interstate Commerce Commission, 277 Fed. 535.

(nn) Under Act March 21, 1918, §1, making it the duty of the Interstate Commerce Commission to ascertain the average annual operating scheme on which the compensation of a railroad during federal control was to be based, it was necessary for the Commission to determine what items should be included in the income, and a decision deducting from the income the item in controversy was within its jurisdiction, and not reviewable by certiorari. Detroit & T. S. L. R. Co. v. Interstate Commerce Commission, 277 Fed. 535.

(oo) Certiorari will not issue to an administrative officer or body to review a decision in a matter over which the officer or body had jurisdiction. Detroit & T. S. L. R. Co. v. Interstate Commerce Commission, 277 Fed. 535.

(pp) A finding by the Interstate Commerce Commission that a discrimination is undue or unjust relates to an administrative question of fact, and is not reviewable by the District Court. Pennsylvania R. Co. v. United States. 295 Fed. 523.

(qq) Under Commerce Court Act (Comp. St. §993), and Comp. St. §994, as to District Court's jurisdiction of cases brought to set aside, annul, or suspend any order of the Interstate Commerce Commission, the federal District Court has jurisdiction of a suit to enjoin entry of and to set aside a "tentative valuation" placed on property of common carrier by the Intertsate Commerce Commission, under Interstate Commerce Act, §19a, as amended (Comp. St. Ann. Supp. 1923, §8591); such valuation being an "order" of the Commission. Delaware & Hudson Co. v. United States (Interstate Commerce Commission, Intervener) 295 Fed. 558.

ALL OTHER CITATIONS

National Paving Brick Mfrs. Asso. v. A. & V. Ry., 80 I. C. C. 179, 183.

II. APPEAL.

§6. In general.

Important Cases Since 1908

(a) Under the Act as amended June 29, 1906, a suit in the courts to enjoin an order of the Commission fixing terminal charges is not confined to an ascertainment of what was determined by the Commission and to a consideration of the sufficiency of the facts as

determined by it to sustain the order, but on the contrary the hearing may be de novo and may include the taking and consideration of evidence other than that before the Commission. M. K. & T. Ry. Co. v. I. C. C., 164 Fed. 645, 649.

(b) In a suit in equity to enjoin an order of the Interstate Commerce Commission fixing terminal charges the court should start with the presumption that the order is valid, and the burden of showing that the facts are such as to render the order invalid rests upon the carrier assailing it, and unless the case made on behalf of the carrier is a clear one the order ought to be upheld. M. K. & T. Ry. Co. v. I. C. C., 164 Fed. 645, 650.

(c) Where the Interstate Commerce Commission exceeds the authority conferred upon it by the statute, the courts may review and enjoin its decision. C. R. I. & P. Ry. Co. v. I. C. C. 171 Fed. 680, 688.

(d) Where it is not contended that the Commission acted unlawfully or otherwise improperly in fixing rates, except that it failed to give weight, or not sufficient weight to this or that consideration, which the carrier thinks ought to have been weighed, and, if weighed, should have produced a different opinion, the United States Circuit Court cannot review the discretion of the Commission so acting in its legislative capacity. L. & N. R. R. Co. v. I. C. C. 184 Fed. 118, 124.

(e) The courts will not review the discretion of the Commission in selecting the element to be considered in fixing reasonable rates or in determining the weight to be given to particular elements. L. & N. R. R. Co. v. I. C. C. 184 Fed. 118, 124.

(f) In a petition to a Circuit Court, under section 16 of the Act, to enforce an order of reparation it is not necessary that the order of the Commission offered as evidence state the cause of action involved where the petition and the record show that the cause of action before the Circuit Court is the same as that before the Commission. Chicago, B. & Q. R. R. Co. v. Feintuch, 191 Fed. 482, 486.

(g) In a petition to the Circuit Court to enforce an order of the Commission before the judge sitting without a jury, the full report of the Commission, containing a commingled statement of opinion drawn from the facts and of conclusions of law, as well as of the facts themselves, was admitted in evidence, complainant stating to the court the nature of said report and offering it in evidence in so far as the facts therein contained were material or competent. HELD, the admission of said report was not prejudicial on the ground that it included the extraneous opinions and conclusions of the Commission. Chicago, B. & Q. R. R. Co. v. Feintuch, 191 Fed. 482, 487.

(h) Under Rev. St. §700 (Comp. St. 1913, §1668), providing that, when an issue of fact in a civil cause is tried by the court without a jury, the rulings of the court in progress of the trial, if excepted to and presented by bill of exceptions, may be reviewed on a writ of error or appeal, and when the finding is special the review may extend to the determination of the sufficiency of the facts found to support the judgment, assignments of error attacking the judgment as not based on the evidence cannot be considered, where there was no request for findings of fact or declarations of law and none were made by the court, though rulings on the sufficiency of the petition and on the admission and exclusion of evidence may be reviewed if proper exceptions were taken. Chicago, M. & St. P. Ry. Co. v. George A. Herzel & Co., 240 Fed. 281.

(i) The Supreme Court may not, under the guise of exerting judicial power, usurp merely administrative functions by setting aside a lawful order upon its conception as to whether the administrative power has been wisely exercised. I. C. C. v. I. C. R. R., 215 U. S. 452, 470, 30 Sup. Ct. 155, 54 L. ed. 280; I. C. C. v. C. & A. R. R. Co. 215 U. S. 479, 30 Sup. Ct. 163, 54 L. ed. 291.

(j) In determining whether an order of the Commission shall be suspended or set aside, the Supreme Court must consider (a) all relevant questions of constitutional power or right; (b) all pertinent questions as to whether the administrative order is within the scope of the delegated authority under which it purports to have been made; and (c) whether, even although the order be in form within the delegated power nevertheless, it must be treated as not embraced therein because its authority has been manifested in such an unreasonable manner as to cause it to be within the elementary rule that the substance, and not the shadow, deter-

mines the validity of the exercise of the power. I. C. C. v. I. C. R. R. 215 U. S. 452, 470, 30 Sup. Ct. 155, 54 L. ed. 280. I. C. C. v. C. & A. R. R. Co., 215 U. S. 479, 30 Sup. Ct. 163, 54 L. ed. 291.

(k) A railroad cannot complain of an order of the Commission where the grievance is one not against it but against the shipper. I. C. C. v. C. R. I. & P. Ry., 218 U. S. 88, 109, 30 Sup. Ct. 651, 54 L. ed. 946.

(l) The primary jurisdiction over unjust discrimination by carriers is with the Commission, the power of the courts being that of review and is confined in that review to questions of constitutional power and all pertinent questions as to whether the action of the Commission is within the scope of the delegated authority under which it purports to have been taken. I. C. C. v. C. R. I. & P. Ry., 218 U. S. 88, 110, 30 Sup. Ct. 651, 54 L. ed. 946.

(m) It would be a very strong proposition to say that parties were bound in the higher courts by a finding of the Commission, based on specific investigation made in the case without notice to them. U. S. v. B. & O. S. W. R. R. Co., 33 Sup. Ct. 5, 6; 226 U. S. 14.

(n) Where reports and orders of the Interstate Commerce Commission were admitted in evidence upon the trial of an appeal in the district court under an agreement that part of such reports were incompetent and could be eliminated in the charge to the jury, and parts of such reports were read to the jury without any objection by opposing counsel, objection to the same cannot be raised for the first time upon appeal. Meeker v. Lehigh Valley R. Co., 35 Sup. Ct. Rep. 328, 334; 236 U. S. 412, 434; 59 L. ed.

(o) A decree enjoining the enforcement of intrastate rates fixed by a state for an interstate carrier as being confiscatory will not be disturbed on appeal because of errors which would not change the result. Rowland v. Boyle, 37 Sup. 577, 244 U. S. 106; 61 L. Ed.

(p) Objections that, in advance of a determination by the Interstate Commerce Commission as to whether the routing was reasonable, the state courts assumed jurisdiction of an action to recover an amount equal to that by which the freight for shipments carried on an interstate route between intrastate points exceeded the intrastate rate, are available in the federal Supreme Court, though first urged in the state Supreme Court, where they were considered and overruled. Northern Pac. Ry. Co. v. Solum, 38 Sup. Ct. 550.

(q) Prior to the Act of Sept. 6, 1916, c. 448, §2, a judgment of the state court, allowing recovery of the amount by which freight for a shipment carried over an interstate route between intrastate points exceeded the intrastate rate, may be reviewed on writ of error, a federal question being raised by assignments of error that the state court erred in holding the cause of action was not affected by the federal statutes regulating interstate commerce (Act Feb. 4, 1887, c. 104, 24 Stat. 379), and that the state court erred in assuming jurisdiction in advance of a determination by the Interstate Commerce Commission as to whether the routing was reasonable, but after the Act of 1916 went into effect, such a judgment could not be reviewed on writ of error, as the question of the validity of a statute or treaty, or the validity of any authority exercised under the state, was not drawn in question. Northern Pac. Ry. Co. v. Solum, 38 Sup. Ct. 550.

(r) Claim that the case is governed by federal law, raised after the case had twice been passed on by the state Supreme Court, is too late to allow of error to such court. Missouri, K. & T. Ry. Co. v. Sealy, 39 Sup. Ct. 97.

(s) Though an appeal to the Supreme Court is the only method of review when the jurisdiction of the District Court rests solely upon the claim that a state statute violates the federal Constitution, an appeal may be taken to the Circuit Court of Appeals where the state statute is attacked not only as violating the federal Constitution, but also as violating a federal statute, in which case the jurisdiction of the District Court arises under a law of the United States within Judicial Code, §24 (Comp. St. §991). Lemke v. Farmers' Grain Co. of Embden, N. D., 42 Sup. Ct. 244.

(t) In a case involving a through shipment, based on a contract between carriers as to rates, the initial carrier cannot raise a moot question as to the constitutionality of the Carmack Amendment as to shipments under the local rates of connecting carriers. C. C. C. & St. L. Ry. Co. v. Hayes (Ind., 1914), 104 N. E. 581, 585.

(u) A terminal carrier cannot on appeal take advantage of the provisions of

the Carmack Amendment, where there is no pleading covering the point and the matter was not included in a motion to direct a verdict nor any instruction asked on the subject. Glassman v. C. R. I. & P. Ry. Co. (Iowa, 1914), 147, N. W. 757, 759.

(v) An appellate court, being confined to a review of the rulings of the trial court cannot consider a ruling of the Interstate Commerce Commission neither pleaded nor put in evidence, but merely cited in an appeal brief. Keeney v. Chicago, B. & Q. R. R., (Iowa 1918), 167 N. W. 475.

(w) The Court of Appeals cannot take judicial notice of an order of the Interstate Commerce Commission, though published in the reports of such Commission, as when applicable, it should be put in evidence. Banaka v. Missouri Pac. Ry. Co., (Mo. 1916) 186 S. W. 7.

(x) In an action against a carrier for loss of a shipment of household goods, where no question as to an order of the Interstate Commerce Commission was raised in the pleadings or evidence in the trial court, such order can have no consideration in the Court of Appeals, when brought up for the first time since the submission of the cause in such court. Banaka v. Missouri Pac. Ry. Co., (Mo. 1916) 186 S. W. 7.

(y) In an action against a carrier for damages to a shipment, where the question of the necessity for written notice to the carrier of the shipper's claim was raised in the circuit court, a proviso of the Federal Interstate Commerce Act may be considered on appeal, though such act was not cited to the judge of the circuit court. Van Lindley Nursery Co. v. Southern Ry. Co., (S. C. 1918), 96 S. E. 221.

III. UNITED STATES COURTS.

§6½. Jurisdiction in general.

CASES 1887-1908

(a) A corporation is a citizen of the State by which it is created and in which its principal place of business is situated, so far as its right to sue and be sued in the federal courts is concerned, and within the clause of the Constitution extending the jurisdiction of said courts to controversies between citizens of different states. Baron v. Burnside, 1 I. C. R. 295.

(b) The jurisdiction of the federal courts depends upon and is regulated by the laws of the United States, and it cannot be affected by state legislation. Baron v. Burnside, 1 I. C. R. 295.

(c) A corporation is a citizen of the State by which created, so far as its right to sue and be sued in the federal courts is concerned. Barron v. Burnside (U. S. Sup. Ct.), 1 I. C. R. 295.

(d) Under the Act of Congress of March 3, 1887, a civil action in a federal court for violations of the Interstate Commerce Act can be brought only in the district whereof defendant is an "inhabitant," as jurisdiction is not dependent on citizenship. Connor v. Vicksburg & M. R. Co. (C. C. E. D. Mo.), 2 I. C. R. 177.

(e) The jurisdiction of the Federal Courts over actions for violations of the Interstate Commerce Act is not dependent on the fact of diverse citizenship, and hence, under Act of Congress of March 3, 1887, a civil action for such violations can be brought only in the district whereof the defendant is an "inhabitant." Connor v. Vicksburg & Meridian R. R. Co., 2 I. C. R. 177.

(f) The federal courts have jurisdiction of a suit against state railroad commissioners, brought by a corporation created by another State, to restrain the enforcement of a schedule of rates prepared by such commissioners under a state statute claimed by the complainant to be unconstitutional; such a suit is not in effect a suit against the State, and hence is not within the Eleventh Amendment to the Constitution, which prohibits the federal courts from entertaining suits brought against a State by citizens of another state. Chicago & Northwestern R. Co. v. Dey, 2 I. C. R. 325.

(g) Constitutional law; constitutional tenure of office of federal judges. Congress, in establishing "inferior courts," and prescribing their jurisdiction, must confer upon the judges, appointed to administer them, the constitutional tenure of office, that of holding "during good behavior," before they can become invested with any portion of the judicial power of the government. Kentucky and Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(h) Jurisdiction of the United States Circuit Court, independent of citizenship. The right asserted by petitioner arises, and is claimed, under a law of the United States, which relates to a subject, over

which Congress has exclusive control; and this is sufficient to sustain the court's jurisdiction, independent of the citizenship of the parties to the controversy, since it involves a federal question. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(i) Constitutional law; jurisdiction of United States Circuit Court, under the Act to Regulate Commerce. The Act does not make the circuit court the mere executioner of the Commissioner's order, or recommendation, so as to impose upon the court a nonjudicial power. The court is not restricted to the mere ministerial duty of enforcing an order of the Commission. The suit in this court is, under the provisions of the Act, an original and independent proceeding, in which the Commissioners' Report is made prima facie evidence of the matters or facts therein stated. The court is not confined to a mere re-examination of the case, as heard and reported by the Commission; but hears and determines the cause de-novo, upon proper pleadings, and proofs; the latter including not only the prima facie facts reported by the Commission, but all such other and further testimony as either party may introduce bearing upon the matters in controversy. Kentucky and Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(j) Congress, in establishing "inferior courts" and prescribing their jurisdiction, must confer upon the judges appointed to administer them the constitutional tenure of office,—that of holding "during good behavior,"—before they can become invested with any portion of the judicial power of the government. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. R. 351.

(k) A federal court may take cognizance of a case involving the constitutionality of a state statute requiring the inspection of articles, and subjecting them to an inspection charge while they remain distinctly a commodity of interstate commerce. Re Rebman v. 3 I. C. R. 126.

(l) A federal court will discharge from custody on habeas corpus a person imprisoned in violation of the United States Constitution. Re White (C. C. W. D. Pa.), 3 I. C. R. 531.

(m) This court has jurisdiction of the question whether a tax is in violation of the clause of the United States Constitution granting to Congress the power to regulate commerce among the states. Pullman's Palace Car Co. v. Commonwealth of Pa., 3 I. C. R. 595.

(n) Congress may give the federal courts exclusive jurisdiction when a right arises under a law of the United States. Copp v. Louisville & N. R. Co. (La.), 3 I. C. R. 625.

(o) Circuit courts of the United States may constitutionally be given jurisdiction of suits by the government to enjoin illegal combinations in restraint of Interstate Commerce, and it does not depend on diverse citizenship of the parties. U. S. of America v. Jellico Mt. Coke & Coal Co. 3 I. C. R. 626.

(p) Diversity of citizenship of the parties is not necessary to give jurisdiction to United States circuit courts of suits arising out of alleged violations of the Interstate Commerce Act. Little Rock & M. R. Co. v. East Tennessee, V. & G. R. Co., (C. C. W. D. Tenn.), 4 I. C. R. 261.

(q) That the remedies prescribed by the Interstate Commerce Act are not applicable to a particular case arising under its provisions does not deprive the United States circuit court of jurisdiction, since by the Judiciary Act such courts are given jurisdiction of all controversies arising under any Act of Congress. Little Rock & M., R. Co. v. East Tennessee, V. & G. R. Co. (C. C. W. D. Tenn.), 4 I. C. R. 261.

(r) The Act of March 3, 1891, establishing United States circuit courts of appeals, repealed those clauses of the Act to Regulate Commerce which relate to appeals from the Circuit Court of the United States in cases prosecuted under the Interstate Commerce Act. Interstate Commerce Commission v. Atchison, T. & S. F. R. Co. (U.S. Sup. Ct.), 4 I. C. R. 347.

(s) The Federal court will remand a cause removed to it on the ground that the matter in dispute arose under the Constitution, laws, or treaties of the United States, where the only showing to that effect in the record is that a Federal question may arise if the evidence proves certain facts. State v. Chicago, M. & St. P. R. Co. (C. C. N. D. Iowa), 4 I. C. R. 425.

(t) To give a Federal court jurisdiction on the ground that the matter in dispute arose under the Constitution, laws, or treaties of the United States, it must clearly and unmistakably appear from the record that such Federal ques-

tion must necessarily be decided before the merits of the case can be disposed of. State v. Chicago, M. & St. P. R. Co. (C. C. N. D. Iowa), 4 I. C. R. 425.

(u) A suit to recover damages for acts which constitute a violation of the Interstate Commerce Act, the construction of which is in dispute between the parties, presents a Federal question for which it may be removed to a Federal court. Lowry v. Chicago, B. & Q. R. Co. (C. C. D. Neb.), 4 I. C. R. 435.

(v) On motion to remand, the court will not anticipate the trial of the case by deciding a Federal question for which the right of removal is claimed. Lowry v. Chicago, B. & Q. R. Co. (C. C. D. Neb.), 4 I. C. R. 435.

(w) The fact that a plaintiff rests his case on a common law liability will not deprive defendant of the right to remove it, if he bases his defense on an Act of Congress. Lowry v. Chicago, B. & Q. R. Co., 4 I. C. R. 435.

(x) A Federal court having jurisdiction will not, through principles of comity, hold its hand and leave the determintion of the validity of a state statute to the state courts. Re Langford (C. C. D. S. C.), 4 I. C. R. 437.

(y) In order to justify removal of a cause from a state court to the United States circuit court on the ground of a separable controversy between citizens of different states, the whole subject matter of the suit must be capable of being finally determined as between them, and complete relief afforded as to the separate cause of action, without the presence of others originally made parties to the suit. Merchants' Cotton Press & S. Co. v. Insurance Co. of North America (U. S. Sup. Ct.), 4 I. C. R. 499.

(z) The right to take steps for the removal of a cause to the circuit court of the United States, on the ground of a separable controversy, is confined to the parties actually interested in such controversy. Merchants' Cotton-Press & S. Co. v. Insurance Co. of North America (U. S. Sup Ct.), 4 I. C. R. 499.

(aa) A proceeding to compel the attendance of a witness before the Interstate Commerce Commission, or to require him to answer questions put to him, or to compel the production of books, documents, or papers in his possession, is a case of which, under the Constitution, a court of the United States may take cognizance. Interstate Commerce Commission v. Brimson (U. S. Sup. Ct.), 4 I. C. R. 545.

(bb) The 12th section of the Act of Feb. 4, 1887, as amended in 1889 and 1891, is constitutional and valid, so far as it authorizes or requires the circuit courts of the United States to use their process in aid of inquiries before the Interstate Commerce Commission. Interstate Commerce Commission v. Brimson, 4 I. C. R. 545.

(cc) The constitutionality of a state statute will not oust the jurisdiction of a Federal court in a suit between citizens of different states to prevent the wrongful administration of the statute by state officers, so as to make it an illegal burden and exaction upon an individual. Reagan v. Farmers' Loan & T. Co. (U. S. Sup. Ct.), 4 I. C. R. 560.

(ddee) A United States court in a case removed from a state court on the ground of diverse citizenship has no jurisdiction over a question as to the reasonableness of an interstate commerce rate. Swift v. Philadelphia & R. R. Co. (C. C. N. D. Ill.), 4 I. C. R. 633.

(ff) The mingling indiscriminately of matters of legal and equitable cognizance in the same complaint, and the enforcement in a single suit of all the rights and duties mentioned, is not authorized by the Act of Congress of Aug. 7, 1888, §4, providing in effect that to secure and preserve to the United States the full value and benefit of its liens upon all the telegraph lines belonging to the railroad and telegraph companies mentioned in the Pacific Railroad Companies Acts, and to have them possessed, used, and operated in conformity with the statutes, it is made the duty of the attorney general by proper proceedings to prevent any unlawful interference with the rights and equities of the United States, to have legally ascertained and adjudicated all alleged rights of all persons and corporations claiming any control or interest in any telegraph lines or property, or exclusive rights of way upon the lands of said railroad companies, and to have set aside all contracts and their provisions entered into by such companies unlawfully and beyond their powers. Union P. R. Co. v. U. S. (C. C. App. 8th C.), 4 I. C. R. 705.

(gg) The principles of the common law apply to controversies in the Federal courts in matters of national control so far as they are applicable to the

subject-matter. Murray v. Chicago & N. W. R. Co., 4 I. C. R. 806.

(hh) A state legislature cannot deprive a United States equity court of jurisdiction over an alleged unlawful reduction of freight rates affecting citizens of other states by itself, prescribing them by direct act, instead of delegating the authority to a commission. Ames v. Union Pacific R. Co., 4 I. C. R. 835.

(ii) There is no sufficient remedy at law to deprive a United States court of equity of jurisdiction over an alleged unlawful reduction by a state statute of freight rates, by reason of the fact that the statute provides for a petition to the state court which may, in its discretion, direct the board of transportation to permit the carrier to raise its rates to the former amount. Ames v. Union Pacific R. Co., 4 I. C. R. 835.

(jj) A state statute duly authenticated will be regarded by the United States courts as having been enacted in full compliance with all the prescribed forms, unless the constitution or decisions of such state require a determination of the question of enactment upon different evidence. Ames v. Union P. R. Co. (C. C. D. Neb.), 4 I. C. R. 835.

(kk) An erroneous decision of the circuit court affirming the validity of an order of the Interstate Commerce Commission, made under a misconception of the extent of its powers, should be reversed by the circuit court of appeals and the order set aside and the cause remanded to the Commission in order that the latter, if it saw fit, might proceed therein according to law; and the circuit court of appeals should not undertake of its own motion to find and pass upon the questions of fact involved which were not considered by the Commission. Texas & P. R. Co. v. Interstate Commerce Commission (U. S. Sup.), 5 I C. R. 405.

(ll) The United States circuit court has jurisdiction to enforce any rights arising under the interstate Commerce law, although the same rights may have existed at common law. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 522.

(mmnn) A case for cognizance by a Federal court is constituted by the fact that a single question dependent of the Constitution or a law or treaty of the United States is involved, although at the same time other questions dependent upon the general principles of law are also involved. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. G. Ohio), 5 I. C. R. 545.

(oo) While the decision of the United States circuit court of appeals upon the same set of facts, but not between the same parties, has not the technical effect of a previous adjudication, it ought to be and is considered in this case conclusive upon the Commission as to the questions involved and decided. Cattle Raisers' Association v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(pp) Each of several roads liable for violation of Commission order by one.—Each of several railroad companies engaged in transporting petroleum oil under a common arrangement for continuous carriage from Pennsylvania to the seaboard is guilty of violating an order of the Interstate Commerce Commission where one of such companies violates such order, and all are subject to the jurisdiction of the court in the western district of Pennsylvania in which such violation was made, in a suit brought therein by the Commission to enforce such order. Interstate Commerce Commission v. Western N. Y. & Philadelphia R. R. Co., 7 I. C. C. App. LXII.

(qq) Court has jurisdiction to enforce order against resident of another district.—A United States circuit court has jurisdiction of a bill by the Interstate Commerce Commission to enforce its order against a railroad company which has its principal office in another district, where such company in connection with other companies operates all their roads under a common management or arrangement in making the interdicted rates, although such company by itself has been guilty of no violation of the order in the district. The court says the order of the Commission relates to charges for transportation between Pueblo, Colorado, and San Francisco, California, as to which it is averred that the respondent roads are "under a common control, management, or arrangement for a continuous carriage or shipment" between the points. The statute provides that a petition of this kind shall be filed in the district in which the common carrier complained of has its principal office or in which the violation or disobedience of the order or requirement shall happen. This is the district in which the

violation or disobedience of the order has happened. The fact appears to be that the Southern Pacific Company has lines in California and in some of the States and territories between California and Colorado which connect with lines of the other respondents extending into and through the State of Colorado and to the City of Pueblo. If all these roads are operated under a common control, management, or arrangement in making the rates interdicted by the Interstate Commerce Commission, the act of one in this district is the act of all, and the violation or disobedience of the order by all the roads may be said to take place in this district. Interstate Commerce Commission v. Southern Pacific Co. et al., 7 I. C. C. App. XLVI.

IMPORTANT CASES SINCE 1908

(rr) Where a federal court had no jurisdiction of anything but state rates in a certain case, it could make no decree as to rates from Minneapolis and St. Paul to Iowa points. In re Advances in Class Rates, 25 I. C. C. 268.

(ss) The amendment of March 2, 1889, to section 16 provided for a jury trial before the Federal Courts. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 67.

(tt) Where a party elects under section 9 to sue in a Federal court for alleged unreasonable charges, the court in which action is brought has jurisdiction to determine the sufficiency of the complaint. National Pole Co. v. Chicago & N. W. R. Co., 211 Fed. 65, 68.

(uu) Act Oct. 22, 1913, c. 32, 38 Stat. 219 (Comp. St. 1913, § 994), which provides that "the venue of any suit hereafter brought to enforce, suspend, or set aside . . . . . any order of the Interstate Commerce Commission shall be in the judicial district wherein is the residence of the party or any of the parties upon whose petition the order was made, ... except that where the order does not relate either to transportation or to a matter so complained of before the Commission the matter covered by the order shall be deemed to arise in the district where one of the petitioners in court has either its principal office or its principal operating office." HELD, that a suit by petitioners before the Commission to review an order establishing railroad rates, whether such order was made on their petition or not, was within the jurisdiction of the court of the district wherein all the petitioners either reside or have their principal operating office, and that whether or not the railroad company has its principal operating office within the district is immaterial. McLean Lumber Co. v. United States, 237 Fed. 460.

(vv) The determination of whether, under a contract for the transportation of live stock and an attendant, the attendant is a passenger for hire, is a question on which the federal courts are not bound by state decisions. Tripp v. Michigan Cent. R. R., 238 Fed. 449.

(ww) An ordinary action by a carrier to collect a freight bill from the consignor after it failed through error to collect the full amount from the consignee involves no action under the Elkins Act or any other interstate commerce laws, and therefore does not give a federal court jurisdiction where the amount involved is less than $3,000. Yazoo & M. V. R. Co. v. Zemurray, 238 Fed. 789.

(xx) On an application to the District Court for a temporary injunction restraining a State Railroad Commission and others from bringing suits to enforce rates prescribed by such commission so far as in conflict with an order of the Interstate Commerce Commission, heard before three judges, it was not necessary for the court to decide upon the merits of the case, but only to determine if the bill presented a case for equitable relief, especially where proceedings were still pending before the Interstate Commerce Commission affecting certain of the rates. E. Tex. R. Co. v. R. R. Comm. of Tex., 242 Fed. 300.

(yy) Subsequent reports of the Interstate Commerce Commission in the same case will be passed on by the Circuit Court of Appeals, rather than to subject the parties to the delay and expense of taking further steps in the court below, especially the question concerning the setting aside of the order of reparation becomes one of a moot character, in view of the later proceeding, and no attempt was made, and no purpose was expressed, by the railroads, either before the Commission or in the lower court, to offer evidence tending to overcome the prima facie effect of the order of reparation. M. L. & T. R. & S. S. Co. v. Isaac Joseph Iron Co., 243 Fed. 149.

(zz) Where the claim of a shipper against a railroad company to recover freight paid involves the construction of the tariff schedule, to determine what

rate applied to the shipment, and not any question of the reasonableness of rates, the jurisdiction of the Interstate Commerce Commission is not exclusive, but an action may be maintained in this instance in a District Court. National Elevator Co. v. Chicago, M. & St. P. Ry., 246 Fed. 588.

(3a) The provision of Act Oct. 22 1913, c. 32, that "the venue of any suit to enforce, suspend or set aside * * * any order of the Interstate Commerce Commission shall be in the judicial district wherein is the residence of the party * * * upon whose petition the order was made," applies only to the class of cases jurisdiction of which was transferred from the Commerce Court, thereby abolished, and does not by implication amended by Act June 18, 1920, c. 309, §13, conferring jurisdiction on District Courts of suits to enforce awards of money reparation to shippers, of which the Commerce Court was never vested with jurisdiction. Vicksburg, S. & P. Ry. Co. v. Anderson-Tully Co., 261 Fed. 741.

(3b) Where the tracks of a railroad company stopped across the Mississippi river from Vicksburg, but its trains and their crews, except the engines and engine crews, were transferred by boat across the river, and by arrangement with another company were hauled by the latter over its tracks to the Vicksburg terminal, used jointly by the two companies, the District Court of the Southern District of Mississippi held to have jurisdiction of a suit against it to enforce an award of damages to a shipper by the Interstate Commerce Commission, under Interstate Commerce Act, §16, as amended by Act June 18, 1910, c. 309, §13, giving jurisdiction to the District Court of any district "through which the road of the carrier runs." Vicksburg, S. & P. Ry. Co. v. Anderson-Tully Co., 261 Fed. 741.

(3c) Where another federal court had obtained jurisdiction over a suit to determine which of two railroads was entitled to a fund, that jurisdiction is exclusive, and the District of Columbia courts will not entertain certiorari to compel the Interstate Commerce Commission to credit the amount of that found as part of the operating revenue of one of the railroads, in determining the compensation to which it was entitled while under federal control, which would involve the determination of the right of that railroad to the fund. Detroit & T. S. L. R. Co. v. Interstate Commerce Commission, 277 Fed. 535.

(3d) While the Federal Control Act, §10 giving the right to initiate freight rates during federal control by filing them with the Interstate Commerce Commission, and Transportation Act, §208a, continuing the rates which existed under federal control during the six months period of government guaranty, were based as much on the war power as on the power of Congress to regulate interstate commerce, those provisions are laws regulating commerce, within Judicial Code, §24, subsec. 8, giving jurisdiction to the United States District Court over cases involving such laws without reference to the amount involved. Atlantic Coast Line Ry. Co. v. Railroad Commission of Georgia, 281 Fed. 321.

(3e) Under the rule that a federal court has primary jurisdiction of an action against an interstate carrier to recover overcharges, without previous submission of the claim to the Interstate Commerce Commission, where there is no occasion for the exercise of administrative discretion, and the construction of the tariff requires only determination of the meaning of words used in their ordinary sense, a complaint held prima facie to state a cause of action cognizable by a court in the first instance. Collins Co. v. Davis, 283 Fed. 837.

(3f) A question as to the carrier's responsibility under the bill of lading is none the less a federal one because it must be resolved by the application of principles under the common law. Southern R. Co. v. Prescott, 36 Sup. Ct. 469, 473; 240 U. S. 632; 60 L. ed. 836.

(3g) The interpretation of the uniform bill of lading issued in accordance with the schedule of freights and fares filed with the Interstate Commerce Commission in pursuance of the act of Congress and relating to an interstate shipment, and the consideration of the liability of the shipper thereunder, involve federal questions concerning which the decisions of the federal courts are supreme. Southern Railway Co. v. Prescott, 240 U. S. 632, 36 Sup. Ct. 469, 60 L. Ed. 836; Georgia, Florida & Alabama R. R. Co. v. Blish Milling Co., 241 U. S. 190, 36 Sup. Ct. 541, 60 L. Ed. 948; A., T. & S. F. Ry. v. Harold, 241 U. S. 371, 36 Sup. Ct. 665, 60 L. Ed. 1050. Crenshaw Bros. & Saffeld v.

Southern Pac. Co. (Cal. 1919) 181 Pac. 252, 256.

(3h) The jurisdiction of the Federal district courts, under the Acts of June 18, 1910 of "cases brought to enjoin, set aside, annul, or suspend in whole or in part any order of the Interstate Commerce Commission," does not extend to a suit to set aside an order of such Commission, fixing a future day and place for the hearing of certain complaints made to it by certain coal companies seeking damages for the alleged failure of certain interstate carriers to furnish coal cars on demand, and to enjoin proceedings upon such complaints. The action of the Commission was not an "order" within the meaning of the statutes, but was a mere incident in the proceeding. U. S. v. I. C. R. R. Co., 37 Sup Ct 584, 244, U. S. 82, 61 L. Ed.

(3i) Where claimant in a state court sought to recover a sum less than $3,000 from defendant refrigerator company for damages to peaches, on the theory that it failed to properly load and ice refrigerator cars pursuant to its contract with a railroad company, defendant's liability, if any, depends upon the contract, and defendant cannot remove the cause from the state court, on the theory that it was one governed by the Acts of Congress, though the railroad company was subject to the Interstate Commerce Act and defendant, not being a common carrier, was not subject to the inhibition of the Judicial Code (Act March 3, 1911, c. 231) §28, as amended by Act Jan. 20, 1914, c. 11, 38 Stat. 278 (Comp. St. 1916, §1010) against removal by common carriers of suits under the Act to regulate commerce, where the amount does not exceed $3,000. Emery & Co. v. American Refrigerator Transit Co. 38 Sup. Ct. 414.

(3j) A claim for loss or damage to an interstate shipment is not a suit under the Interstate Commerce Act, so a suit for damages by a shipper of peaches against a refrigerator line which had a contract with a railroad to ice its cars, and which in this particular case had failed to do so properly, is not a suit under the Interstate Commerce Act, and a federal court has no jurisdiction of it unless the amount involved exceeds $3,000. Emery & Co. v. American Refrigerator Transit Co., 38 Sup. Ct. 414, 246 U. S. 634, 62 L. Ed. 912.

(3k) The United States court acquires no jurisdiction by removal of a cause of action from the state court, if the state court had no jurisdiction thereof, even though the action was one which might have been originally brought in the United States District Court. Lambert Run Coal Co. v. Baltimore & O. R. Co., 42 Sup. Ct. 349.

(3l) The district court has jurisdiction of a suit to recover excessive freight charges and demurrage paid under protest, though the Interstate Commerce Commission has power to fix and establish rules and rates; suit being to recover charges demanded and paid in violation of the Interstate Commerce Commission's rule fixing demurrage charges and freight rates, and not to assail the rule as unreasonable. Payne v. White House LumberCo., (Tex. 1921,) 231 S. W. 417.

(3m) An action by a shipper for damages to a jack delivered to a connecting carrier in Missouri to be transported over its lines and defendant's lines to a point in this state, the injury occurring in 1913, involving interstate commerce, arose under the laws of the United States, in view of the Carmack Amendment, and was removable to the federal courts, which had jurisdiction under Judicial Code, §24 (U. S. Comp. St. §991), notwithstanding that the jack was worth less than $3,000. Missouri, K. & T. Ry. v. Miller, (Tex. 1919), 211 S. W. 543.

(3n) The interpretation of a uniform bill of lading issued in accordance with a schedule of freights and fares with the Interstate Commerce Commission, in pursuance of acts of Congress relating to interstate shipments and the consideration of liability of shipper thereunder, involve federal questions concerning which the decisions of the federal courts are supreme. Crenshaw Bros. & Saffold v. Southern Pacific Co. (Cal. 1919), 181 Pac. 252.

(3o) An action brought in a state court against a carrier under the Carmack Amendment, involving less than $3,000, can be removed to the Federal District Court only where it affirmatively appears from the complaint that a Federal question is involved, or the validity, interpretation or construction of the laws of the United States arise, and not where the question presented is one of fact only. Orr v. Baltimore & O. Ry. Co., 145 N. Y. Supp. 378, 381.

of Railroads, v. Age-Herald Pub. Co., 293 F. 591; American R. Co. of Porto Rico v. South Porto Rico Sugar Co., 293 Fed. 670; Ga. S. & F. Ry. Co. v. Ga. Public Service Com. (Ga., 1923), 289 Fed. 878.

§7. Concurrent Jurisdiction.

See Interstate Commerce Commission §2; §16.

IMPORTANT CASES SINCE 1908

(a) In cases of the exaction of a rate higher than that in the published tariff, the shipper may go into court in the first instance, but the Act also appears to give the Commission and courts concurrent jurisdiction in this respect. Laning-Harris Coal & Grain Co. v. St. L. & S. F. R. R. Co., 15 I. C. C. 37, 39.

(b) Section 9 provides that any person claiming to be damaged, in accordance with the provisions of section 8, may either begin suit in court or apply to this Commission. National Wool Growers' Ass'n. v. O S. L. R. R. Co., 25 I. C. C. 675, 676.

§8. Exclusive Jurisdiction.

IMPORTANT CASES SINCE 1908

(a) A suit for damages arising from the payment to plaintiff's competitors of allowances not provided for in the published rates is one which, under sections 8 and 9 of the Interstate Commerce Act, can only be brought in a district or circuit court of the United States. Mitchell Coal & Coke Co. v. P. R. R. Co., 33 Sup. Ct. 916, 918; 230 U. S. 247.

(b) The question as to the proper construction of a bill of lading for an interstate shipment issued under the Carmack amendment is a Federal one which will sustain the appellate jurisdiction of the Federal Supreme Court over a state court. Ga., Fla. & Ala. Ry. Co. v. Blish Milling Co., 36 Sup. Ct. Rep. 541, 542; 241 U. S. 190; 60 L. ed. 948.

(c) The jurisdiction of all actions brought under the remedial sections of the Interstate Commerce Act to enforce its provisions, lies exclusively in the United States Courts. Pittsburgh, C. C. & St. L. Ry. Co. v. Wood (Ind., 1908), 84 N. E. 1009, 1012.

ALL OTHER CITATIONS

Hardaway v. Southern Ry. Co., (S. C. 1912), 73 S. E. 1020, 1023; K. C. S. Ry. Co. v. Albers Comm. Co., 79 Kans. 59, 60, 99, P. 819.

§9. Original Jurisdiction.

IMPORTANT CASES SINCE 1908

(a) United States courts under the Act as amended June 29, 1906, have no jusiduction to award damages for freight charges collected on cross-ties under duly published tariffs prior to the testing of the reasonableness of such rates by a complaint before the Interstate Commerce Commission, although the question involved is one of the relative reasonableness of rates and the Commission has passed upon the same relative classification in a proceeding between other parties, and has held that the rates on cross-ties should not, as in the case in question, exceed the rate on lumber. Howard Supply Co. v. C. & O. Ry. Co., 162 Fed. 188, 191.

(b) Under the Act as amended June 19, 1906, United States courts have jurisdiction to enjoin the putting into effect of interstate rates, made by an unlawful combination of carriers in restraint of commerce, prior to the institution of a proceeding before the Interstate Commerce Commission to test the reasonableness of such rates where the evidence indicates that the same are unreasonable and confiscatory. Macon Grocery Co. v. A. C. L. R. R. Co., 163 Fed. 738, 753.

(c) Under the Act as amended June 19, 1906, the courts have jurisdiction to enjoin an order of the Interstate Commerce Commission reducing terminal charges where the order results from a misconception and misapplication of the law to conceded or undisputed facts. Stickney v. I. C. C., 164 Fed. 638, 644.

(d) Under the Act a United States Circuit Court has original jurisdiction in a suit by a carrier for demurrage charges, where the reasonableness of such charges is not involved and where the question in dispute is the meaning of rules filed with the Interstate Commerce Commission, and a prior proceeding before the Commission is not necessary. Central R. R. Co. of N. J. v. Hite, 166 Fed. 976, 978.

(e) United States courts may, in their discretion, permit the parties to any complaint in the matter involved before the Interstate Commerce Commission to intervene as defendant in a suit to enjoin the order of the Commission, where such intervention does not delay the progress of the suit. D.

L. & W. R. R. Co. v. I. C. C., 169 Fed. 894.

(f) Under section 9 of the Act the courts have jurisdiction to entertain an original suit at law by a shipper against a carrier where the latter has extended free time to plaintiff's competitors for peddling goods from its cars after the expiration of the free time period allowed in its published tariffs and has denied the same privilege to plaintiff, and it is not necessary first to resort to the Interstate Commerce Commission since no question of the reasonableness of the published regulation is involved. Lyne v. D. L. & W. R. R. Co., 170 Fed. 847, 849.

(g) Where the reasonableness or unreasonableness of demurrage rules is not involved and the question is one of interpretation as to what the schedule of rates in regard to the charges for demurrage actually is, a United States Circuit Court has original jurisdiction without prior application to the Interstate Commerce Commission. Hite v. Central R. of N. J., 171 Fed. 370, 372.

(h) The Interstate Commerce Commission is an administrative tribunal and the wisdom and expediency of the lawful exercise of the discretion delegated to it under the Constitution and the statutes is not reviewable by the courts. But the power is vested in and the duty is imposed upon the United States Circuit Courts to relieve from orders of the Commission which deprive complainant of their property without due process of law or take it without just compensation, in violation of the fifth amendment to the Constitution, from orders which are beyond the limits of the power delegated to the Commission and from orders which, though in form within its delegated power, evidence so unreasonable an exercise of it that they are in substance beyond it. Peavey & Co. v. U. P. R. R. Co., 176 Fed. 409, 418.

(i) Where the Commission has primary jurisdiction over a practice affecting rates, original jurisdiction cannot be conferred on a United States Circuit Court to hear the case by stipulation of the parties. Mitchell Coal & Coke Co. v. Penn. R. R. Co., 183 Fed. 908, 909.

(j) By the amendments of 1906 the original jurisdiction of a United States court under section 9 of the Act has not been entirely destroyed, but it still may redress "such wrongs as can, consistently with the context of the Act, be redressed by courts without previous action by the Commission," and, whenever a complainant comes into the courts to redress a wrong which he alleges has resulted from some discriminatory act of a common carrier, it will always be necessary in the first instance to determine whether or not it is a wrong which can be redressed by the courts. Langdon v. Pennsylvania R. R. Co., 186, Fed. 237, 240.

(k) Upon the question whether a suit by a shipper charging discriminatory practices and payments should first be brought before the Commission, the court, upon motion of defendant to dismiss on the ground that a United States Circuit Court had no jurisdiction, denied the motion and refused to pass upon the question of jurisdiction until the jury should determine whether the payments and practices involved were made generally to all owners of lateral roads or were made simply to particular shippers. Langdon v. Penn. R. R. Co., 186 Fed. 237, 241.

(l) On February 22, 1911, plaintiff sued in a state court of Tennessee to recover the excess exacted above the lawfully published rate on lumber. The suit was removed to a United States Circuit Court on the ground of diversity of citizenship. The claim was never presented to the Interstate Commerce Commission. HELD, Under sections 9 and 16 of the Act as amended June 18, 1910, the state court had no jurisdiction to entertain the suit and therefore the federal court could not acquire jurisdiction by the removal proceedings. Darnell v. I. C. R. R. Co., 190 Fed. 656, 658.

(m) Under Judicial Code, §24, par. 1, diversity of citizenship of the parties will not give the federal court jurisdiction, where the amount involved is less than $3,000. New York Cent. R. Co. v. Mutual Orange Distributors, 251 Fed. 230.

(n) Where a bill of lading for an interstate shipment required the owner or consignee to pay the freight, an action by a connecting carrier to recover freight due is governed by the Carmack Amendment, and under Judicial Code §24, par. 8, is within the jurisdiction of a federal District Court, regardless of the amount involved. New York Cent. R. Co. v. Mutual Orange Distributors, 251 Fed. 230.

(o) A federal court, and not the Interstate Commerce Commission, HELD

to have original jurisdiction to determine the right of a railroad company to refuse to furnish cars for loading by a manufacturer of gasoline on a side track built by the railroad company for the purpose, at the expense of the shipper, on the ground that the loading point is too near the main track for safety, in the absence of any statute or regulation on the subject. Hines v. Henaghan, 265 Fed. 831.

(p) The conclusion of the Commission is subject to review, but when supported by evidence is accepted as final; not that its decision, involving as it does so many and such vast public interests, can be supported by a mere scintilla of proof, but the court will not examine the facts further than to determine whether there was substantial evidence to sustain the order. I. C. C. v. U. P. R. R. Co., 222 U. S. 541, 547, 32 Sup. Ct. 108, 56 L. ed. 308.

(q) A United States Circuit Court has no jurisdiction to enjoin the putting into effect of a schedule of interstate rates without prior application to the Interstate Commerce Commission, which body is vested with exclusive jurisdiction over questions of the reasonableness of interstate rates under the Interstate Commerce Act as amended June 29, 1906. A. T. & S. F. Ry. Co. v. Foster Lumber Co. (Okla., 1911), 122 P. 139.

§9a. Commerce Court.

C., 188 Fed. 256; Florida East Coast Ry. Co. v. U. S., 200 Fed. 797, 802; U. S. v. Union Stockyard & T. Co., 33 Sup Ct. 83, 89., 226 U. S. 286; United States v. A. T. & S. F. Ry. Co., 34 Sup Ct. 986, 993; 234 U. S. 476; 58 L. ed.—; Arkansas Fertilizer Co. v. U. S., 193 Fed. 667, 669; Southern Ry. Co. v. U. S. 193 Fed. 664, 666; A. C. L. R. R. Co. v. I. C. C., 194 Fed. 449, 458; Nashville Grain Exch. v. U. S., 191 Fed. 37, 39; A. T. & S. F. Ry. Co. v. I. C. C. 188 Fed. 229, 237, 239; S. P. Co. v. I. C. C. 188 Fed. 241; A. T. & S. F. Ry. Co. v. U. S., 203 Fed. 56, 57, 58; Florida East Coast Ry. Co., v. U. S., 200 Fed. 797, 802; Chamber of Commerce of Augusta, Ga. v. U. S., 197 Fed. 66; Louisville & N. R. Co. v. U. S., 197 Fed. 58, 65; L. & P. Ry. Co. v. United States, 209 Fed. 244, 252; Kansas City S. Ry. Co. v. U. S., 204 Fed. 641, 644, 646; A. T. & S. F. Ry. Co. v. I. C. C. 188 Fed. 229, 237; S. P. Co. v. I. C. C. 188 Fed. 241; Hooker v. I. C. C. 188 Fed. 242, 251; Eagle White Lead Co. v. I. C. C., 188 Fed. 256; L. & P. Ry. Co. v. United States, 209 Fed. 244, 251.

IV. UNITED STATES SUPREME COURT.

§10. In General.

CASES 1887-1908

(a) In cases arising under the law merchant, the Supreme Court of the United States has held itself less bound by the decisions of the state courts than in other cases. Cited in Smith v. Alabama (U. S. L. ed., 508), 1 I. C. R. 809.

(b) Where a state court decided that a state law taxing telegraph companies authorized and imposed a tax upon receipts derived from messages from or to other states, and sustained a state tax thereon under such law, the Supreme Court of the United States has jurisdiction to review such decision. Western U. Teleg. Co. v. Seay (U. S. Sup. Ct.), 2 I. C. R. 726.

(c) The Mississippi statute of March 2, 1888, as settled by the supreme court of that state, applies solely to commerce within the state, and the Supreme Court of the United States must accept as conclusive such construction of the statute of the State by its highest court. Louisville, N. O. & T. R. Co. v. Mississippi (U. S. Sup. Ct.), 2 I. C. R. 801.

(d) The construction put upon a Minnesota statute by the Supreme Court of Minnesota must be accepted by the U. S. Supreme Court. Chicago, M. &

St. P. R. Co. v. State of Minn., 3 I. C. R. 209.

(e) The Supreme Court of the United States has jurisdiction on error to a state court, of the question whether a tax is in violation of the clause of the United States Constitution granting to Congress the power to regulate commerce among the states. Pullman's Palace Car Co. v. Com. (U. S. Sup. Ct.), 3 I. C. R. 595.

(f) On a motion to remand, the court will not anticipate the trial of the case, by deciding a Federal question for which the right of removal is claimed. Lowry v. Chicago, B. & Q. R. Co., 4 I. C. R. 435.

(g) A writ of error to a state court brings to the Supreme Court of the United States only the Federal questions in the case. Ashley v. Ryan (U. S. Sup. Ct.), 4 I. C. R. 664.

(h) It is not within the province of this court to review any question as to the admission or rejection of testimony in the state court which does not bear directly upon some matter of a Federal nature. Cleveland, C. C. & St. L. R. Co. v. Bachus, 4 I. C. R. 677.

(i) Supreme Court will refuse to permit appeal from judgment enforcing order of Commission to operate as supersedeas.—This court will not grant a motion to declare that an appeal to it from the circuit court of appeals, when perfected and bond aproved, does not operate as a supersedeas, or to vacate the supersedeas, in a case where the judgment of that court reversed the decree of the circuit court dismissing a suit to enforce an order of the Interstate Commerce Commission, and directed the enforcement of such order. Louisville & Nashville R. R. Co. v. Behlmer, 8 I. C. C. App. LIII.

IMPORTANT CASES SINCE 1908

(j) The question of the legality of an order of the Commission reducing rates does not become moot on appeal to the United States Supreme Court merely because the period to which the order applied the new rates prescribed has expired, in view of the public interests involved and in view of possible claims for reparation. S. P. Co. v. I. C. C., 219 U. S. 433, 452, 31 Sup. Ct. 288, 55 L. ed. 283.

(k) The Commission ordered defendant carrier to desist for a period of two years from Nov. 15, 1908, from granting to a shipper a certain unduly preferential wharfage privilege. The bill in equity to enjoin the order was argued Dec. 9, 1910, in the Supreme Court of the United States. HELD, in view of the public character of the questions involved and the fact that orders of the Commission are continuing, the appeal should not be dismissed on the ground that, the order of the Commission having expired, the case had thereby become moot. So. Pac. Terminal Co. v. I. C. C., 219, U. S. 498, 515, 31 Sup. Ct. 279, 55 L. ed. 310.

(l) Where in a suit in a state court to recover an overcharge the interpretation of the Act is involved to determine what were the legally applicable rates on the shipments in question, the Supreme Court of the United States has jurisdiction to review the decision of the state courts. Kansas City So. Ry. v. Albers Comm. Co., 223 U. S. 573, 591, 32 Sup. Ct. 316, 56 L. ed. 516.

(m) The supreme Court of the United States will not on appeal reverse an order of preliminary injunction granted by the Commerce Court to restrain an order of the Interstate Commerce Commission forbidding carriers to make certain allowances, except where there has been an abuse of discretion by the Commerce Court, and where it plainly appears that the preliminary order was in effect a decision by the Commerce Court of the whole controversy on its merits or where it is demonstratable that grave detriment to the public interests will result from a failure of the Supreme Court finally to dispose of the controversy without remanding the case. U. S. v. B. & O. R. R. Co., 225 U. S. 306, 32 Sup. Ct. 817, 821, 56 L. ed. 1100.

(n) The Supreme Court of the United States has power to review a ruling dismissing, for want of jurisdiction, a suit brought in a district or circuit court of the United States to recover under sections 8 and 9 of the Interstate Commerce Act, damages arising from the payment to plaintiff's competitors of allowances not provided for in the published tariffs. Mitchell Coal & Coke Co. v. P. R. R. Co., 33 Sup. Ct. 916, 918, 230 U. S. 247.

(o) The contention that an arrangement made by certain carriers with a terminal company violates the commodity clause of the Interstate Commerce Act will not be considered by the Supreme Court on an appeal from the Com-

merce Court from an order by the latter enjoining the enforcement of an order of the Commission, where there is nothing in the record showing that such a contention was pressed upon the Commission, considered by that body, or that the order rendered was in any respect based upon the commodity clause. United States v. Baltimore & O. Ry. Co., 34 Sup. Ct. 75, 82, 231 U. S. 274, 58 L. ed. —.

(p) The wife of an employee of the C. & W. C. Ry. sustained personal injuries while traveling on that line on a pass that purported to exempt the company form liability, the pass having been issued gratuitously under the Hepburn Act. On suit the state court, in 79 S. E. 242, held that under the act the pass was not a free pass, but was issued in consideration of the services of the employee. HELD, that a question was presented under the act, reviewable by the U. S. Supreme Court on writ of error. C. & W. C. Ry. Co. v. Thompson, 34 Sup. Ct. 964, 234 U. S. 576, 58 L. ed. —.

(q) In an appeal from an order of the District Court denying an interlocutory injunction to restrain the enforcement of an order of the Interstate Commerce Commission, the United States Supreme Court will determine whether as a matter of law the Commission's findings of fact support its order. L. & N. R. Co. v. United States, 35 Sup. Ct. 696, 697, 238 U. S. 1, 59 L. ed.

(r) It was no doubt because of the limited time in which orders of the Commission would be operative, and that there might be cases in which irreparable injury would result if an interlocutory injunction was not granted, that Congress, by the act of October 22, 1913 (38 Stat. at L. 220, chap. 32), provided that "an appeal may be taken direct to the Supreme Court of the United States from the order granting or denying, after notice and hearing, an interlocutory injunction." L. & N. R. Co. v. United States, 35 Sup. Ct. 696, 698, 238 U. S. 1, 59 L. ed.

(s) An appeal lies to the U. S. Supreme Court from an order of the district court directing a witness to answer certain questions propounded by the Interstate Commerce Commission and to produce certain documents called for by it. Ellis v. I. C. C., 35 Sup. Ct. 645, 646, 237 U. S. 5434; 59 L. ed. 1036.

(t) An order of a Federal district court, made upon a petition of the Interstate Commerce Commission filed under the Act which directs an officer of a corporation to answer certain questions propounded, and to produce certain documents called for by the Commission, possesses the finality requisite to sustain an appeal to the Federal Supreme Court. Ellis v. Interstate Com. Com., 35 Sup. Ct. 645, 646; 237 U. S. 434, 59 L. ed. 1036.

(u) The Federal Supreme Court on an appeal taken under the act of October 22, 1913, from an order of a Federal district court denying an interlocutory in junction to restrain the enforcement of an order of the Interstate Commerce Commission reducing an existing freight rate, will determine whether, as a matter of law, the Commission's findings of fact sustain its order. Louisville & N. R. Co. v. United States, 35 Sup. Ct. 696, 697, 238 U. S. 1; 59 L. ed. 1177.

(v) The quesion whether proper effect was given to the Interstate Commerce Act, and its amendments, in interpreting a stipulation in a bill of lading for an interstate shipment requiring notice of claims for damages to be given to the carrier's officers or station agents as excluding officers or station agents of connecting carriers,—is fairly presented, so as to sustain a writ of error from the Federal Supreme Court to review a judgment of the highest state court adjudging the stipulation to be no defense to the initial carrier when sued for injuries to the shipment, being unreasonable and inoperative, because no officer or agent primarily employed by the initial carrier was accessible at destination, where a through bill of lading was issued under the Federal legislation, the pleadings show that its application was invoked, and in the answer, as also in the instructions given at the defendant carrier's request, there was a distinct assertion that notice was not given to any officer or station agent of the defendant, or to any officer or station agent of the connecting carrier, which means that the defendant was proceeding upon the theory that the stipulation, when read in connection with the Federal statutes, contemplated and recognized that notice to an officer or agent of the connecting carrier would suffice. Northern Pac. Railway Company v. Wall, 36 Sup. Ct. 493, 241 U. S. 87, 60 L. ed. 905.

(w) The Federal Supreme Court has juridiction of a writ of error to a state court to review a decision adverse to

the contention that a local freight rate for coal shipped from Galewood, a station inside of Chicago, to Morton Grove, Illinois, a distance of about 12 miles, over a route wholly within that state, is so related to through freight rates to Galewood from coal-producing districts inside or outside the state, as to exclude regulation by the Illinois Public Utilities Commission. Chicago, M. & St. P. Ry. v. State Public Utilities Comm., 37 Sup. Ct. 173, 242 U. S. 333, 61 L. ed. 341.

(x) A case in which the defeated party insisted at the trial court and on appeal in the highest state court upon its asserted rights under the Interstate Commerce Act and in which those rights were passed upon adversely by the latter court, is within the appellate jurisdiction of the Federal Supreme Court, L. & N. R. R. v. Ohio Tie Co., 37 Sup. Ct. 120, 242 U. S. 288, 61 L. ed. 305.

(y) A stipulation in a suit to recover demurrage charges on private cars, "made for the purpose only of reviewing the judgment" below, that the track on which the cars were placed was a "private track," will be treated by the Federal Supreme Court on writ of error as a nullity, where the facts set forth in the petition and exhibits which determine the character of the track and relation to it of carrier and shipper, and which were admitted by the demurrer, show that such track in fact was owned by the carrier. Swift & Co. v. Hocking Valley R. R. 37 Sup. Ct. 287, 243 U. S. 281, 61 L. ed. 175.

(z) On writ of error to a state court the Supreme Court must accept the state court's definition of the authority of the state Public Service Commission under the state law. P. R. Co. v. Towers, 38 Sup. 2, 245 U. S. 6, 62 L. ed. 117.

(aa) A judgment of the Circuit Court of Appeals, reversing a judgment of the District Court and granting a new trial, is not reviewable on writ of error, as it calls for further proceedings in the trial court, and a writ of error will lie to review final judgment only. Spiller v. Atchison, T. & S. F. Ry. Co., 40 Sup. Ct. 466, 467.

(bb) Though a judgment of a Circuit Court of Appeals, reversing the judgment of the District Court and granting a new trial, is not a "final judgment" if it is advisable to review such judgment without further protracting the litigation it is reviewable by certiorari under Judicial Code, §262 (Comp. St. §1239), authorizing the Supreme Court to issue all writs necessary for the exercise of its jurisdiction. Spiller v. Atchison, T. & S. F. Ry. Co., 40 Sup. Ct. 466, 467.

(cc) A judgment of a Circuit Court of Appeals involving less than $1,000 is made "final" by the combined effect of the U. S. Judicial Code,§§ 128, 241 and is therefore reviewable by certiorari under section 240. Spiller v. Atchison, T. & S. F. Ry. Co., 40 Sup. Ct. 466, 467.

(dd) In a carrier's action against a consignee to collect a balance of freight charges on interstate shipments in which neither party was wholly successful, the judgment of the state court is reviewable by writ of certiorari. New York Cent. & H. R. R. Co. v. York & Whitney, 41 Sup. Ct. 509.

(ee) Where a railroad company brought suit in a federal court attacking intrastate freight rates established by a state railroad commission, on the ground that they violated the federal Constitution, but the decree was reversed by the Supreme Court, with directions to dismiss the bill, that court has jurisdiction of an appeal from a decree allowing claims of shippers for overcharges during the time an injunction was in force, though the appeal involves only the construction of the tariff adopted by the commission; the decree being but supplementary to the main cause. St. Louis, I. M. & S. Ry. Co. et al. v. J. F. Hasty & Sons, et al., 41 Sup. Ct. 269.

(ff) A finding by the District Court that the report and order of the Interstate Commerce Commission, requiring a refund of excessive charges to the shipper, was prima facie evidence of the facts therein stated, did not adopt the findings by the Commission as special findings by the court, which might be reviewed by the Supreme Court without exception taken to them. Vicksburg, S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup. Ct. 524.

(gg) The Supreme court will not substitute its judgment for that of Congress in determining whether practices threaten to burden or obstruct interstate commerce, unless the relation of the subject to interstate commerce and its effect on it are clearly nonexistent. Stafford v. Wallace, 42 Ct. 397.

(hh) In cases arising in the state courts involving the rights and liabilities of the parties to an interstate ship-

ment, the decisions of the Supreme Court of the United States, construing and applying the federal Act, are controlling upon the state courts. St. Louis, I. M. & S. Ry. Co. v. Bentley (Okla. 1918), 176 Pac. 250.

(ii) A decision by the United States Supreme Court that a state oil inspection statute was void as a burden on interstate commerce, which that court itself had subsequently construed as not holding the state statute absolutely void, is not res judicata as to the right of an oil company to recover all payments made by it for oil inspection under that statute. Union Oil Co. of Calif. v. State (Wash. 1923), 216 P. 22.

(jj) The corrections of findings of the Interstate Commerce Commission cannot be assailed in the United States Supreme Court, the evidence not being before that court. Hines v. United States (1923) 44 Sup. Ct. 72.

W. 890; Hines, Director General of Railroads, v. Mason (Ark., 1920), 221 S. W. 861.

V. STATE COURTS

See Actions at Law; Discrimination §16; Interstate Commerce Commission §2; Loss and Damage §5; Overcharges §3; State Rates and Regulations; Undercharges §7½; War Legislation.

§11. In General.

CASES 1887-1908

(a) A legal or equitable right under state laws may be prosecuted before state courts, and, when the parties reside in different states, before federal courts, subject to this qualification, that, when a right arises under a law of the United States, Congress may give the federal courts exclusive jurisdiction. Copp v. Louisville & Nashville R. Co., 3 I. C. R. 625.

(b) A state court has no jurisdiction of an action for damages against a carrier for violation of the Interstate Commerce Law as that provides for redress, either by procedure before the Commission or suit before a federal court. Copp v. Louisville & N. R. Co. (La.), 3 I. C. R. 625.

(c) The state courts have not lost their jurisdiction of the subject-matter of actions against carriers because of interstate shipments by reason of the fact that Congress has legislated upon the subject. St. Joseph & G. I. R. Co. v. Palmer, 4 I. C. R. 494.

(d) The fact that a subject like interstate commerce is beyond state legislative control does not ipso facto exclude the jurisdiction of state courts from cases growing out of such commerce. Murray v. Chicago & N. W. R. Co. (C. C. N. D. Iowa), 806; St. Joseph & G. I. Co. v. Palmer (Neb.), 4 I. C. R. 494.

(e) A state court is bound by the decision of the United States Supreme Court on the question of the legality of the taxation of the business of express and telegraph companies in respect to interstate commerce. Western U. Teleg. Co. v. Fremont (Neb.), 5 I. C. R. 66.

IMPORTANT CASES SINCE 1908

(f) In the Minnesota rate case, the Federal Court had no jurisdiction of anything but state rates, In re Advances in Class Rates, 25 I. C. C. 268, 271.

(g) The question of expediency in granting the Commission and courts concurrent jurisdiction in suits for damages was decided by Congress and is a matter reserved for the consideration of the legislative branch of the Government, into which the Commission can not inquire. Vulcan Coal & Mining Co. v. I. C. R. R. Co., 33 I. C. C. 52, 68.

(h) State courts are not without jurisdiction in every case involving rights or questions under the Interstate Commerce Act. Detroit, M. & T. S. L. Ry. v. City of Monroe et al. (Mich. 1919), 262 Fed. 177.

(i) An action to determine the rate applicable to dunnage used in shipments of automobiles, where the only

question was the construction of the terms of published tariff classifications, HELD, within the jurisdiction of a court, and not requiring a precedent application to the Interstate Commerce Commission. Butler Motor Co. v. Atchison, T. & S. F. Ry. Co., 272 Fed. 683.

(j) A state court has jurisdiction to compel by mandamus an interstate carrier to switch a car from a shipper's mill located on a spur track to its main track, thence a short distance on its main track, thence by a connecting switch to an intersecting interstate carrier, although the car is destined to another state, the purpose of such order being to prevent discrimination among shippers in local switching service. Missouri Pacific Ry. v. Larabee Mills, 211 U. S. 612, 623, 29 Sup. Ct. 214, 53 L. ed. 352.

(k) An action cannot be maintained against a carrier in a state court under sections 9 and 22 of the Act to recover reparation for unjust discrimination in charging a published rate of 50c higher per ton for coal loaded from wagons than the published rate when the coal is loaded from tipples, where no prior application has been made to the Commission for relief. Robinson v. B. & O. R. R. Co., 222 U. S. 506, 509, 32 Sup. Ct. 774, 56 L. ed. 288.

(l) In a suit in a state court to recover reparation for unjust discrimination, the court is not required by section 14 of the Act, in order to make the reports of the Commission competent evidence, to take judicial notice of the decisions of the Commission where they are not mentioned in the pleadings or in the agreed statement of facts. This provision makes the decisions of the Commission as published admissible in evidence without other proof of their genuineness, but does not relieve litigants from the necessity of offering them in evidence. Robinson v. B. & O. R. R. Co., 222 U. S. 506, 512, 32 Sup. Ct. 114, 56 L. ed. 288.

(m) Without preliminary action by the Interstate Commerce Commission a state court has no jurisdiction of an action by shippers to recover from an interstate carrier sums expended by them in constructing grain doors or bulkheads in cars furnished by the carrier for interstate carload shipments of farm products in bulk, the applicable duly filed interstate rate schedules making no reference to allowances for grain doors or bulkheads. Loomis v. Lehigh Valley R. Co., 36 Sup. Ct. 228, 229, 240 U. S. 43, 60 L. ed. 517.

(n) It is true that §§8 and 9 deal with the redress of injuries resulting from violations of the act, and give the person injured a right either to make complaint to the Interstate Commerce Commission or to bring an action for damages in a federal court, but not to do both. If the Act said nothing more on the subject it well may be that no action for damages resulting from a violation of the act could be entertained by a state court. But the Act shows that §§8 and 9 do not completely express the will of Congress as respects the injuries for which redress may be had or the modes in which it may be obtained, for §22 contains this important provision: "Nothing in this act contained shall in any way abridge or alter the remedies now existing at common law or by statute but the provisions of this act are in addition to such remedies." The three sections if broadly construed, are not altogether harmonious, and yet it evidently is intended that all shall be operative. Only by reading them together and in connection with the act as a whole can the real purpose of each be seen. They often have been considered and what they mean has become pretty well settled. Thus it has been held that the manifest purpose of the provision in §22 is to make it plain that such "appropriate common law and statutory remedies" as can be enforced consistently with the scheme and purposes of the Act are not abrogated or displaced. (Texas & P. R. Co. v. Abilene Cotton Oil Co., 204 U. S. 426, 446, 447, 51 L. ed. 553, 561, 562, 27 Sup. Ct. Rep. 350, 9 Ann. Cas. 1075) that this provision is not intended to nullify other parts of the act, or to defeat rights or remedies given by earlier sections, but to preserve all existing rights not inconsistent with those which the Act creates (Pennsylvania R. Co. v. Puritan Coal Min. Co., 237 U. S. 121, 129, 59 L. ed. 867, 872, 35 Sup. Ct. Rep. 484); that the act does not supercede the jurisdiction of state courts in any case, new or old, where the decision does not involve the determination of matters calling for the exercise of the administrative power and discretion of the Interstate Commerce Commission or relate to a subject as to which the jurisdiction of the Federal courts is otherwise made exclusive (id.

130); that claims for damages arising out of the application, in interstate commerce, of rules for distributing cars in times of shortage, call for the exercise of the administrative authority of the Commission where the rule is assailed as unjustly discriminatory, but where the assault is unequal and discriminatory application, no administrative question is presented and the claim may be prosecuted in either a Federal or a state court without any precedent action by the Commission (id. 131, 132); and that, if no administrative question is involved, as well may be the case, a claim for damages for failing upon reasonable request to furnish to a shipper in interstate commerce a sufficient number of cars to satisfy his needs may be enforced in either a Federal or a state court without any preliminary finding by the Commission, and this whether the carrier's default was a violation of its common-law duty existing prior to the Hepburn Act of 1906, or of the duty prescribed by that act (id. 132-135; Eastern R. Co. v. Littlefield, 237 U. S. 140, 143, 59 L. ed. 878, 882, 35 Sup. Ct. Rep. 489; Illinois C. R. Co. v. Mulberry Hill Coal Co., 238 U. S. 275, 283, 59 L. ed. 1306, 1310, 35 Sup. Ct. Rep. 760; Pennsylvania R. Co. v. Clark Bros. Coal Min. Co., 238 U. S. 456, 472, 59 L. ed. 1406, 1413, 35 Sup. Ct. Rep. 896). Pennsylvania R. Co. v. Sonman Shaft Co., 37 Sup. Ct. 46, 47, 48, 242 U. S. 120, 61 L. ed. 188.

(o) A state court has jurisdiction without previous action by the Interstate Commerce Commission of a suit by a coal mining company against an interstate carrier to recover the damages arising in interstate commerce out of the latter's failure to furnish such company with the number of coal cars to which it claims to be entitled under the carrier's own rule for car distribution, since, the rule itself not being attacked, there was no administrative question involved. Pa. R. Co. v. Stineman Coal Min. Co., 37 Sup. Ct. 118, 242 U. S. 298, 61 L. ed. 316.

(p) The state court cannot acquire jurisdiction of a suit to enjoin the enforcement of a rule of the carriers, which was in fact prescribed by the Interstate Commerce Commission, by the plaintiff's concealment in his bill of the fact that the rule was so prescribed. Lambert Run Coal Co. v. Baltimore & O. R. Co., 42 Sup. Ct. 349.

(q) In an action for freight on an interstate shipment controlled by the Elkins Act, counterclaim for injuries to the shipment cannot be maintained in a state court, that being the ruling of the federal courts, despite plaintiff's contention that his personal interest as suitor in the state court would be inconvenienced, for the state public policy cannot run counter to the national. Delaware, L. & W. R. Co. v. Henry Nuhs Co. (N. J. 1919), 111 Atl. 223.

(r) Under the Act as amended in 1906, a state court has no jurisdiction to determine whether an express company shall, as to interstate shipments, deliver packages to the residences and places of business of consignees, since there has been an assumption of exclusive jurisdiction by Congress over such shipments down to the point where the transit is entirely at an end. State v. Adams Express Co., 171 Ind. 138, 144, 85 N. E. 337, 966.

(s) The Interstate Commerce Commission is not vested with jurisdiction over suits to recover damages for delay in the delivery of an interstate shipment, so far as to prevent the state courts from entertaining such actions. Pittsburgh, C. C. & St. L. Ry. Co. v. Knox (Ind. 1912), 98 N. E. 295, 299.

(t) A state court has no jurisdiction of an action to recover overcharges where it is alleged that the carrier published a rate of 1c per 100 lbs., with a minimum charge of $5.00 per car, under which it should have furnished cars of a carrying capacity of 50,000 lbs., but instead was furnished cars of a capacity of 40,000 lbs., which was insufficient to enable them to earn $5.00 at the given rate, since such allegations show a contention relating to the lawful construction of an interstate tariff. St. Louis Southern Ry. Co. v. J. S. Patterson Const. Co. (Ind. 1914), 104 N. E. 512, 516.

(u) Suits by interstate carriers may be instituted in the state courts to recover the difference between the lawful charge for service as shown by published tariffs and the amount actually paid for such service. Cleveland, C. C. & St. L. Ry. Co. v. Talge Mahogany Co., 112 N. E. (Ind. 1916), 890.

(v) A state court has jurisdiction, in a suit by a carrier to collect a greater charge for a shorter than for a longer haul, to entertain a defense by the shipper that the carrier had no permission

from the Interstate Commerce Commission to make such charge and was not authorized to do it on account of dissimilar circumstances and conditions. (Hancey, J., dissenting.) Great Northern Ry. Co. v. Loonan Lumber Co. (S. D. 1910), 125 N. W. 644, 646.

(w) Under the Interstate Commerce Act as amended a shipper cannot sue in a state court to recover excessive demurrage charges exacted of him on an interstate shipment, but must first resort to the Interstate Commerce Commission, which has exclusive original jurisdiction over such shipment. Starks Co. v. Grand Rapids & I. Ry. Co. (Mich. 1911), 131 N. W. 143, 145.

(x) The provision of the Act as amended June 29, 1906, and April 13, 1908, relating to attorney's fees do not give the right to recover such fees in a state court in a suit for loss or damage in transit. Blair & Jackson v. Wells-Fargo Co. (Ia. 1912), 135 N. W. 615, 620.

(y) Without preliminary action by the Interstate Commerce Commission, a state court has no jurisdiction of an action by a shipper to recover from an interstate carrier sums expended by him (the shipper) in lining and coopering cars furnished by the carrier for interstate carload shipments of grain in bulk; the applicable duly filed interstate rate schedules making no reference to allowances therefor. Midway Co-op. Elevator Co. v. Great Northern Ry. (N. Dak. 1918), 169 N. W. 494.

(z) A shipper cannot bring an original action for recovery of cooperage, in a state court, as the Interstate Commerce Commission has primary juridiction. Midway Co-op. Elevator Co. v. Great Northern Ry. (N. Dak. 1918), 169 N. W. 494, 496.

(aa) A rate established in violation of Section 4 of the Interstate Commerce Act is an illegal rate and the excess over the reasonable rate may be recovered by a claimant in a state court without first resorting to the Interstate Commerce Commission. McCaull-Dinsmore Co. v. Great Northern Ry. Co. (Minn. 1922), 191 N. W. 42.

(bb) A state court has power to construe a tariff. Wilson v. Long Island R. Co., 165 N. Y. S. 913.

(cc) Where the plaintiff, in a suit for excessive charges, resulting in unjust discrimination, does not rely upon the Interstate Commerce Act, but bases his claim on common law principles, an action for such recovery may be brought in a state court, although the shipments involved were made across state lines. Missouri, K. & T. Ry. Co. v. The New Era Milling Co., 79 Kans. 435, 448, 100 P. 273.

(dd) Where a carrier represents that it is collecting of all shippers switching charges on interstate shipments levied by a connecting carrier and is, in fact, absorbing such charges for favored shippers, a state court has jurisdiction in an action for damages for discrimination, since, under sections 9 and 22 of the Act, the state courts are not deprived of jurisdiction over actions for breaches of duty by the carriers which would give rise to causes of action at common law or under a state statute. Lilly Co. v. Northern Pac. Ry. Co. (Wash. 1911), 117 P. 401, 402.

(ee) A state court has power to construe a tariff on file with the Interstate Commerce Commission and to say whether or not a particular rate exacted is in accordance with the tariff. So. Pac. Co. v. Frye & Bruhn (Md. 1914), 143 Pac. 163, 165.

(ff) Since the Hepburn Act, the federal statutes, supplemented by the Common law as declared by the federal courts, have superceded all state laws pertaining to the substantive rights of parties to an interstate shipment of property; but, in respect to remedies and procedure, the state laws are applicable in state courts. St. L. & S. F. R. Co. v. Mounts (Okla. 1914), 144 Pac. 1036.

(gg) Where the Interstate Commerce Commission has held a published rate to be excessive, a state court has jurisdiction under section 22 of the Act to entertain an action by a shipper to recover the excess exacted over and above the reasonable rate prescribed. Robinson v. B. & O. R. R. Co., 64 W. Va. 406, 63 S. E. 323.

(hh) Section 22 of the Interstate Commerce Act permits an action to be brought in a state court for the wrongful failure of a terminal carrier to deliver an interstate shipment. W. & A. R. Co v. White Provision Co. (Ga. 1914), 82 S. E. 644, 646.

(ii) A carrier failed to post an interstate rate in the depot at the point of origin, as required by section 6 of the

Interstate Commerce Act as amended June 29, 1906. A shipper purchased grain and relied on the lower rate previously in effect and on file at the depot. He was compelled to pay the higher rate, unposted, but filed with the Interstate Commerce Commission. HELD, a state court had jurisdiction to entertain an action for damages for a failure to post the rate, under section 22 of the Interstate Commerce Act, providing that "nothing in this Act contained shall in any way abridge or alter the remedies now existing at common law or by statute, but the provisions of this Act are in addition to such remedies," I C. R. R. Co. v. Henderson Elevator Co., 138 Ky. 220, 229, 127 S. W. 779.

(jj) While there is an overcharge resulting from the application of the wrong rate, and a state court only needs to consider the quesion as to which of two rates applies, without reference to the reasonableness of either of them, the case is one within its jurisdiction. Kansas City Southern Ry. Co. v. Tonn, 102 Ark, 20, 143 S. W. 577; C. R. I. & P. Ry. Co. v. Lena Lumber Co., 99 Ark. 105, 137 S. W. 562; St. L. S. W. Ry. Co. v. Gramling, 97 Ark. 353, 133 S. W. 1129; St. L. S. F. & T. Ry. Co. v. Roff Oil & Cotton Co., 61 Tex. Civ. App. 190, 128 S. W. 1194; Western & A. R. Co. v. White Provision Co., 142 Ga. 246, 82 S. E. 644; St. Louis, I. M. & S. Ry. v. Ft. Smith & V. B. Ry. (Ark. 1917), 191 S. W. 902, 903.

VI. PRACTICE AND EVIDENCE.

See Evidence; Procedure Before Commission; Reparation §23.

§12. In General.

CASES 1887-1908

(a) The right of removal must be determined by the pleadings at the time the petition is filed. Merchants Cotton Press & S. Co. v. Insurance Co. of North America, 4 I. C. R. 499.

IMPORTANT CASES SINCE 1908

(b) Commission will not undertake to pass upon the merits of issues involved in court cases, nor will it draw any inferences from the fact that such decree was discontinued prior to entry of decree. The Missouri River-Nebraska Cases, 40 I. C. C. 201, 253.

(c) A petition brought in the courts to recover an award of reparation by the Commission for the exaction of unreasonable rates must itself allege that the rates were unreasonable, and it is not sufficient to set forth the proceedings of the Commission, setting out the causes of complaint, in order to comply with section 5 of the Act of June 29, 1906, which requires the petitioner to set forth briefly the causes for which he claims damages. Baer Bros. Merchantile Co. v. D. & R. G. R. R. Co., 200 Fed. 614, 616.

(d) A petition to recover in the courts an award of reparation by the Commission does not sufficiently allege service of the Commission's order on the defendant which alleges that "thereafter, said Commission, agreeable to the provisions of law in that regard, duly caused a properly authenticated copy of its said report, together with order aforesaid, to be delivered to the said defendant," as defendant is entitled to a direct averment of service and the manner thereof in terms so clear as to permit an issue of fact. Baer Bros. Merchantile Co. v. D. & R. G. R. R. Co., 200 Fed. 614, 618.

(e) It does not at all follow that because the Act makes certain findings of fact by the Commission prima facie evidence of such facts, it also determines their probative force. Lehigh Valley R. R. Co. v. Clark, 207 Fed. 717, 728.

(f) In a proceeding to recover on a reparation order the finding of the Commission that the rate charged was unreasonable and fixing the excess over the legal rate, is prima facie correct, if not conclusive; and if no evidence to the contrary is offered, and both parties ask peremptory instruction, verdict for plaintiff is properly directed. St. L. & S. F. Ry. Co. v. S. Samuels & Co., 211 Fed. 588, 594.

(g) Sections 14 and 16 of the Interstate Commerce Act, as amended by the Act of June 2, 1906, clearly distinguish suits to enforce administrative orders of the Commission, which are in equity, where the only issue is as to the legality of the order, and an action to recover reparation awarded. The latter is not a suit to enforce the order, but an action at law, triable by jury, and the proceedings are as in other civil actions, save that the findings and order of the Commission are received as prima facie evidence of the facts recited. L. V. R. R. Co. v. Meeker, 211 Fed. 785, 792.

(h) In an action to recover reparation awarded, where plaintiff has introduced the report of the Commission, the court should instruct the jury as to what findings are and what are not made prima facie evidence by the statute. L. V. R. R. Co. v. Meeker, 211 Fed. 785, 795.

(i) Under the provision of the Interstate Commerce Act, that a suit for damages based on an award of the Interstate Commerce Commission "shall proceed in all respects like other civil suits for damages," except that "the findings and order of the Commission shall be prima facie evidence of the facts therein stated," plaintiff in such action may introduce evidence in addition to that produced before the Commission. Missouri Pac. Ry. Co. v. C. E. Ferguson Sawmill Co., 235 Fed. 474.

(j) A motion by defendants to dismiss on grounds going to the merits is a waiver of any objection to the venue or jurisdiction of the particular court, where it has general jurisdiction by reason of diversity of citizenship. McLean Lumber Co. v. United States, 237 Fed. 460.

(k) The courts will take judicial no-

tice of the proclamation of the President of December 26, 1917, declaring the necessity to take possession and control of certain systems of transportation in the United States, including railroads. Muir v. Louisville & N. R. R. Co., 247 Fed. 888.

(l) In action by railway company to recover alleged storage charges on interstate shipments, where the case was one of far-reaching importance, a judgment entered on motion for judgment for want of sufficient affidavit of defense may, in the discretion of appellate court, be reversed without opinion on the questions involved, so as to allow proofs to be placed of record before the case is reviewed. Freedom Oil Works Co. v. Pittsburgh, C. C. & St. L. Ry. Co., 254 Fed. 800.

(m) The provision of General Order of Director General of Railroads No. 50 of October 28, 1918, that pleadings in pending actions for injuries against a railroad company "may" be amended by substituting the Director General and dismissing the company as defendant, must be construed as permissive only, in view of Federal Control Act, providing that carriers, while under federal control, shall be subject to all laws and liabilities as common carriers, and that actions may be brought against them, "and judgments rendered as now provided by law," and such substitution of parties will not be made on motion of defendant. Jensen v. Lehigh Valley R. R., 255 Fed. 795.

(n) In a suit against a railroad company, under Interstate Commerce Act, §16, as amended by Act June 18, 1910, c. 309, §13, to enforce an award of damages made to a shipper by the Interstate Commerce Commission, a complaint is sufficient which sets out the findings of the commission and its order, which are by, the statute made prima facie evidence of the facts stated. Vicksburg, S. & P. Ry. Co. v. Anderson-Tully Co., 261 Fed. 741.

(o) In a suit to enforce an award of damages made to a shipper by the Interstate Commerce Commission, the introduction in evidence of the findings and order of the commission is sufficient to entitle plaintiff to judgment, in the absence of any evidence on behalf of defendant. Vicksburg, S. & P. Ry. Co. v. Anderson-Tully Co., 261 Fed. 741.

(p) That the person on whom service of summons was made in a suit against a railroad company was at the time an employe of the government railroad administration, then in control of defendant's road, did not prevent him from being at the same time an agent of defendant on whom service might properly be made. Vicksburg, S. & P. Ry. Co. v. Anderson-Tully Co., 261 Fed. 741.

(q) The unreasonableness of the rate and the amount of plaintiff's damage caused thereby were found by the commission. The introduction of the award was unreasonable and that the plaintiff was injured thereby to the extent of the award. If the defendants declined to introduce evidence to rebut the plaintiff's case so made, the District Judge had no alternative than to render judgment. He did not rule that defendants could not rebut the prima facie case made by plaintiff, but that they had not done so; and not having done so, that he was required to treat the plaintiff's prima facie case, which unrebutted, as entitling the plaintiff to a judgment. Vicksburg. S. & P. Ry. Co. v. Anderson-Tully Co., 261 Fed. 746.

(r) Insufficient or defective certification of a carrier's applicable tariff schedules on file with the Interstate Commerce Commission, which were admitted in evidence by the trial court, could not justify a state appellate court in arbitrarily disregarding such schedules when passing upon the question whether or not the carrier had limited its liability for the baggage of an interstate passenger to a specified sum unless a greater value is declared and excess charges paid. New York C. & H. R. R. v. Beaham, 37 Sup. Ct. 43, 242 U. S. 148, 61 L. ed. 210.

(s) Under Act Oct. 22, 1913, requiring suits to enforce, suspend, or set aside an order of the Interstate Commerce Commission made upon petition to be brought in the district of the residence of the parties upon whose petition the order was made, and Judicial Code, §§ 208, 211 (Comp. St. 1916, §§ 997, 1004), requiring such suits to be brought against the United States, a suit to set aside an order of the Interstate Commerce Commission made on the petition of residents of Missouri could not be maintained in the Northern district of Illinois, as the United States, being suable only by its consent, could not be sued in a district not within the consent given. Illinois Cent. R. R. v. Public

Utilities Commission, 38 Sup Ct. 170, 245 U. S. 493, 62 L. ed 425.

(t) The Interstate Commerce Act provides that, if an order of the Interstate Commerce Commission respecting transportation be not obeyed by the carrier, it may be enforced at the suit of the Commission, an injured party, or the United States, by an appropriate writ or process restraining further disobedience and enjoining due compliance with the order. Oct. 22, 1913, c. 32, 38 Stat. 219, provides, that suits to enforce, suspend, or set aside in whole or in part an order of the Commission relating to transportation, and made upon petition, may be brought only in the district in which the petitioners or one of them resides. HELD, that where the Commission on petition of residents of Missouri ordered carriers to cease discriminating between St. Louis, Mo., Keokuk, Iowa, and Illinois points respecting rates between such points and other Illinois points, and the carriers thereupon raised the Illinois intrastate rates and sued to enjoin the state authorities from interfering with the establishment and maintenance of the increased rates, the suit was not one to enforce, suspend, or set aside an order of the Commission, and might be brought in the Northern district of Illinois. Illinois Cent. R. R. v. Public Utilities Commission, 38 Sup. Ct. 170, 245 U. S. 493, 61 L. ed 425.

(u) A cross-bill to set aside an order of the Interstate Commerce Commission could not be retained as to other defendants after its dismissal as to the United States, since under Judicial Code, §§ 208, 211, the United States is made a necessary party to such a suit. Illinois Cent. R. R. v. Public Utilities Commission, 38 Sup. Ct. 170, 245 U. S. 493, 62 L. ed. 425.

(v) Within Act Oct. 22, 1913, declaring venue of suit to set aside order of Interstate Commerce Commission to be the district wherein is the residence of the party or any of the parties on whose petition the order was made, the carriers making fourth section applications (constituting the proceedings) wherein the order was made, and not the other parties (a merchants' association and a state railroad commission) whose applications were instrumental in securing a reopening of the proceedings resulting in the order, are the parties whose residence is controlling. Skinner & Eddy Corp. v. U. S. 39 Sup. Ct. Rep. 375.

(w) The return of the marshal that he served the process on an agent of defendant is sufficient showing of the agency of the person served, where the only denial was a stipulation that the railroad of defendant at the time was under government control, since the agent may not have been in the employ of the Director General of Railroads at all, or may have been serving as agent for both the Director and the company. Vicksburg, S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup. Ct. 524.

(x) An arrangement between two railroad companies, one of which owned no line within the district, whereby the cars of the latter were carried over the tracks of the other within the district for payments computed on the mileage basis and on a through tariff, is equivalent to a lease of the tracks within the district, so as to authorize suit in that district, under Interstate Commerce Act, §16, as amended by Act June 18, 1910, §13 (Comp. St. §8584), allowing such action in any district through which the road of the carrier runs. Vicksburg, S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup. Ct. 524.

(y) Requiring briefs with references to the pages of the record, has been so neglected that the court could not determine whether going concern value should be included in the rate base, without itself reading and briefing the record, and the assignment of error to the refusal to include such value will not be considered. City of Houston v. South-Western Bell Telephone Co., 42 Sup. Ct. 486.

(z) An award of the Commission is not a judgment in the sense that it concludes the enforcement of the claim upon which it rests in a court otherwise having jurisdiction of the cause of action. The award is merely prima facie evidence of the facts contained therein in an action brought on it in a state or Federal Court; and when introduced in evidence to support a claim is open to attack and may be wholly discredited. Clark Bros. Coal Mining Co. v. Pennsylvania Ry. Co. (Pa 1913), 88 Atl. 1754, 761.

(aa) In an action against an initial carrier for losses due to delay in the shipment of a carload of strawberries, it is error to refuse to allow the defendant to prove its published tariffs filed with

the Commission containing regulations providing for a higher rate if the shipments were not made subject to the terms and limitations of the bill of lading. N. Y. P. & N. Ry. Co. v. Peninsula Produce Exchange (Ind., 1914), 89 Atl. 433, 437.

(bb) Plaintiff sued in a state court to recover for materials and labor furnished in repairing freight cars and furnishing grain doors for such cars, which had been furnished by the defendant for transporting grain by the plaintiff in interstate commerce. Rule 78 of the Interstate Commerce Commission made the reimbursement of shippers for expense incurred in attaching grain doors to box cars unlawful unless expressly provided for in the tariffs of the carrier. No such provision was incorporated in the tariffs. The answer did not show that this rule was in force at the time the shipments were made and the labor and material furnished. HELD, on demurrer, the answer did not state a defense as contended on the ground that to permit recovery would result in a violation of sections 6 and 3 of the Interstate Commerce Act. Hanks v. M. P. Ry. Co. (Neb. 1912) 138 N. W. 750, 753.

(cc) Courts will take judicial notice that the country is at war, and has taken over the railroads under an act of Congress, and that there are extraordinary conditions making it necessary to raise the rates in order to defray the expenses of federal control and operation. Kneeland-Bigelow Co. v. Michigan Cent. R. Co. (Mich. 1919), 174 N. W. 605.

(dd) Courts will not take judicial notice of the schedules of rates filed by a carrier with the Commission and published as required by Acts of Congress. Cranor v. Southern Ry. Co. (Ga. 1913), 78 S. E. 1014, 1018.

(ee) Where suit is brought against a connecting carrier in interstate commerce for damage to goods delivered to it by the preceding carrier, a prima-facie case is made for the plaintiff by proof at reception of the goods by the defendant and their delivery in damaged condition. Thereupon the presumption arises that they were damaged through the negligence of the carrier sued. There is nothing in the Act of Congress fixing the liability of interstate carriers for loss or damage which would relieve them from this common-law presumption. A C. L. Ry. v. Thomasville Live Stock Co. (Ga. 1913), 78 S. E. 1019, 1022.

(ff) The fact that the certificate of the secretary of the Interstate Commerce Commission is made prima facie evidence of the character of the interstate rate certified implies that such rates may be proved in some other manner and by some other evidence. Aldrich v. S. Ry. Co. (S. C. 1913), 79 S. E. 3, 316, 320.

(gg) An action against an express company for loss of diamonds, in absence of contrary evidence, the court must presume from certificate of secretary of Interstate Commerce Commission that company's tariff of released rates was legally in effect. Tribble v. Southern Express Co., (S. C. 1918), 96 S. E. 712.

(hh) Court of Appeals will take judicial knowledge of a proclamation of the President of the United States. Western Union Telegraph Co. v. Glover, (Ala. 1920), 86 Sou. 154.

W. 509.

§12½. Parties.

See Parties.

IMPORTANT CASES SINCE 1908

(a) In a suit to annul orders of the Interstate Commerce Commission granting to carriers increased rates on the ground that Transportation Act. Feb. 28, 1920, tit IV, authorizing such decision, was unconstitutional, the carriers were

necessary parties, and the relief prayed for cannot be granted in their absence. State of Texas v. Interstate Commerce Commission, 42 Sup. Ct. 261.

(b) The fact that the carriers and their employees, who were necessary parties to a suit by a state to set aside decisions of the Railroad Labor Board, could not be joined therein because of their citizenship, does not justify the court in proceeding in their absence. State of Texas v. Interstate Commerce Commission, 42 Sup. Ct. 261.

(c) In a suit by a state to vacate decisions of the Railroad Labor Board, establishing wages of railway employees within the state on the ground that Transportation Act Feb. 28, 1920, tit. III, giving the board such power, is unconstitutional, the carriers and their employees, who had recognized the validity of such decision and were operating thereunder, are necessary parties. State of Texas v. Interstate Commerce Commission, 42 Sup. Ct. 261.

(d) The United States is an indispensable party to a suit to restrain or set aside orders of the Interstate Commerce Commision, and cannot be joined as a party in a suit brought in the state court ,where the United States has not consented to be used. Lambert Run. Coal Co. v. Baltimore & R. Co., 42 Sup Ct. 349.

§13. Pleading.

See Loss and Damage §17; Pleading; Reparation §23.

CASES 1887-1908

(a) The voluntary joinder of the parties has the same effect for purposes of jurisdiction as if they had been compelled to unite. Merchants Cotton Press & S. Co. v. Insurance Co. of North America, 4 I. C. R. 499.

(b) A declaration to recover back unreasonable rates imposed by a carrier upon shipments since the passage of the Interstate Commerce Act is bad in failing to aver that no rates were published and in existence as required by the law. Swift & Co. v. Philadelphia & Reading R. Co., 5 I. C. R. 116.

IMPORTANT CASES SINCE 1908

(c) Fact that one company may be a subsidiary of another does not ipso facto entitle the latter to bring an action in its own name for damages suffered by the former. American Agricultural Chemical Co. v. Director General, as Agent, 66 I. C. C. 650, 651.

(d) In an action by a shipper against a carrier under Section 16 of the Interstate Commerce Act to recover for excessive charges upon which the Commission had awarded damages, an allegation that the rates collected were unjust, unreasonable and in violation of law is one largely of fact and as against a general demurrer is sufficiently specific. D. & R. G. Ry. Co. v. Baer Bros. Merchantile Co. (C. C. A. 1913), 209 Fed. 577, 579.

(e) Since the shipper's right to recover for excessive charges made on interstate shipments depends entirely upon the rights given by the terms of the Interstate Commerce Act, it must appear from the complaints that such rates are in excess of those permitted as reasonable by the Commission. Goraty v. A. C. L. R. R. Co., 211 Fed. 227, 229.

(f) Since the Commission is charged with the duty of determining whether a charge is unreasonable, the plaintiff must, as a condition to his right to recover, allege and produce an order from the commission that the rate charged was unreasonable and therefore illegal. Goraty v. A. C. L. R. R. Co., 211 Fed. 227, 230.

(g) Mandamus will not lie under section 20 to disclose privileged communications between an individual and his counsel. United States v. L. & N. R. R. Co., 212 Fed. 486, 493.

(h) In an action against railroad companies to enforce an order of the Interstate Commerce Commission awarding reparation to plaintiff for unjust and unreasonable freight charges exacted by the carriers, a motion to require plaintiff to elect on which one of two orders of the Commission it would rely was properly denied, where the second order merely modified the first in a formal particular having nothing to do with the award of damages; nor was it material that the second order did not change the date fixed by the first for payment of the award, which had already passed. Missouri Pac. Ry. Co. v. C. E. Ferguson Sawmill Co., 235 Fed. 474.

(i) Where, in an action to enforce an order of reparation by the Interstate Commerce Commission, a demurrer was sustained to an answer alleging that the Commission had rescinded such order, and an appeal was taken, the Circuit

Court of Appeals may judicially notice subsequent proceedings of the Interstate Commerce Commission, resulting in the reinstatement of such order, though not brought to the attention of the court below, especially where they are practically admitted by counsel. M. L. &. T. R. & S. S. Co. v. Isaac Joseph Iron Co., 243 Fed. 149.

(j) A railroad company discriminated against a partnership engaged in coal mining and against the succeeding firm, a copartnership composed of one of the original partners and the widow of the deceased partner. The Interstate Commerce Commission made awards in favor of the new firm and of the surviving partner of the old firm. Separate suits were instituted on such awards, but they were confused, so that the surviving partner sued on the award in favor of the second firm, and vice versa. HELD, that the railroad company could not complain because, more than one year after the awards of the Interstate Commerce Commission were made, the trial court allowed them to be transposed so that each action was upon the proper award; such amendment not affecting its rights. P. R. Co. v. Minds, 244 Fed. 53.

(k) That a person jointly charged with a railroad company in an action to recover damages for unlawful discrimination, under Interstate Commerce Act, is a member of the partnership alleged to have been preferred, does not make it necessary to join the other members of the firm. Dusenberry v. Lehigh Valley R. Co. et al. (N. Y. 1920), 269 Fed. 1009.

(l) In vew of the Interstate Commerce Act, §13, permitting municipal corporations to apply by petition to the Interstate Commerce Commission for the correction of certain forbidden practices, and conferring on the Commission authority to institute inquiries, on its own motion or on the petition of any carrier, into any rate or fare made or imposed by authority of any state, a municipal corporation, which has a franchise contract with a transportation railway company fixing the rate or fare, has the right in its corporate capacity to bring suit under Act Oct. 22, 1913 to restrain the enforcement of an order of the Interstate Commerce Commission establishing different rates especially where the corporation might, under Gen. Code Ohio §§ 4311, 4312, be a party to an action to enjoin a violation of the franchise or to enforce its terms. Village of Hubbard, Ohio v. United States, 278 Fed. 754.

ALL OTHER CITATIONS

Williams v. Shows, 187 Ala. 132, 65 South 839; C. C. C. & St. L. Ry. Co. v. Hayes (Ind. 1914), 104 N. E. 581, 583; Reynolds v. Missouri, K. & T. Ry. (Mass. 1919), 123 N. E. 235; Cleveland, C. C. & St. L. Ry. (Ind. 1919), 123 N. E. 838; Hurt v. Atlanta, B. & A. Ry. Co. (Ala. 1919), 84 So. 631; Williams v. Shows, 187 Ala. 132, 65 South 839.

§14. Injunctions.

See Injunctions.

CASES 1887-1908

(a) A federal court has jurisdiction of a suit by a railroad company chartered in one state to restrain the railroad commissioners of another State from putting in force a schedule of rates, since such a suit is not one against a State within the 11th Amendment of the United States Constitution. Chicago & N. W. R. Co. v. Dey (C. C. S. D. Iowa), 2 I.C. R. 325.

(b) A preliminary injunction will be granted at the suit of a railroad company, to restrain the enforcement of a schedule of rates established by the state railroad commissioners when it is shown that the enforcement of such schedule would probably prevent the company from being able to declare any dividend and where the state statute furnishes a full remedy for the exaction of any unreasonable rates by the company. Chicago & Northwestern R. Co. v. Dey, 2 I. C. R., 325.

(c) To prevent a multiplicity of suits, equity may interfere by preliminary injunction, at the suit of a railroad company to restrain the enforcement of a schedule of rates established by the railroad commissioners although the schedule has not yet gone into effect, but the commissioners have begun the publication of notice of the date when it is to take effect. Chicago & Northwestern R. Co. v. Dey, 2 I. C. R. 325.

(d) In a suit to restrain the enforcement of unreasonable rates, it is no defense that plaintiff is a foreign corporation and may retire when the business ceases to be profitable, or that it operates through other States, where no rates are fixed, which will enable it to make profit. Chicago & N. W. R. Co. v. Dey (C. C. S. D. Iowa), 2 I. C. R. 325.

(e) Where a schedule of rates for railroad charges, fixed by legislative au-

thority, will not pay the cost of necessary service, appliances, and the repair thereof, interest on bonds, and then leave something for dividends, its enforcement will be enjoined. Chicago & N. W. R. Co. v. Dey (C. C. S. D. Iowa, 2 I. C. R. 325.

(f) The right asserted by a petitioner asking for the enforcement of an order of the Interstate Commerce Commission arises and is claimed under a law of the United States which relates to a subject over which Congress has exclusive control; and this is sufficient to sustain the jurisdiction of the circuit court, independent of the citizenship of the parties to the controversy, since it involves a federal question. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. R., 351.

(g) The rule that the dissolving of an injunction is discretionary, and that the refusal of the court below will not be disturbed unless the discretion is abused, does not apply to cases involving questions of law arising upon the face of the pleadings. Burlington, C. R. & N. R. Co. v. Dey (Iowa), 3 I. C. R. 584.

(h) Allegations of a petition for an injunction, that the right and liberty of contracting with reference to its business is denied to the petitioner, and that its property is therefore taken from it without its consent, and that it is compelled to enter into involuntary, unreasonable, and unprofitable contracts, do not amount to allegations of facts, but to mere statements of conclusions, and are not, therefore, admitted by a motion to dissolve the injunction. Burlington, C. R. &. N. R. Co. v. Dey (Iowa), 3 I. C. R. 584.

(i) An injunction may be dissolved on motion, although the facts alleged in the petition are not denied, if the issues involved simply the validity of statutes which, if valid, will render the injunction improper notwithstanding the allegations of fact. Burlington, Cedar Rapids & N. R. Co. v. Dey 3 I. C. R. 584.

(j) Circuit courts of the United States may constitutionally be given jurisdiction of suits by the government to enjoin illegal combinations in restraint of interstate commerce; and it does not depend on diverse citizenship of the parties. United States v. Jellico Mountain Coke & C. Co. (C. C. M. D. Tenn.), 3 I. C. R. 626.

(k) Authorizing an injunction by a federal court against illegal combinations in restraint of interstate commerce, although they are made misdemeanors, does not violate the provisions of the Constitution of the United States requiring the trial of crimes to be by a jury. United States v. Jellico Mountain Coke & C. Co. (C. C. M. D. Tenn.) 3 I. C. R. 626.

(l) Decree enjoining violation of an order of the Interstate Commerce Commission passed October 29, 1891, which prohibited the exaction of a rate for the transportation of oranges from Florida to northeastern cities which should exceed the rates in force prior to November 23, 1890, by more than 5 cents per box,—allowing complainant a counsel fee of $5,000,—and directing defendant to pay costs of the suit, including the Master's charges of $870.50. Florida Fruit Exchange v. Savannah F. & W. R. Co., 4 I. C. R. 400.

(m) All the carriers which united in making a joint rate are not necessary parties in a suit for an injunction against one of them, founded on an alleged disobedience of an order of the Interstate Commerce Commission, which commanded its abandonment. Interstate Commerce Commission v. Texas & P. R. Co. (C. C. App. 2d C.), 4 I. C. R., 408.

(n) The enforcement of city ordinances which attempt an unconstitutional interference with interstate commerce may be restrained by injunction from a federal court. Georgia Packing Co. v. Macon (C. C. S. D. Ga.), 4 I. C. R. 508.

(o) An injunction against the enforcement of unreasonable and unjust rates fixed by railroad commissioners must not extend to restraining the commission from proceeding to establish other rates. Reagan v. Farmers' Loan & T. Co. (U. S. Sup. Ct.), 4 I. C. R. 560.

(p) A suit to restrain the enforcement by state officers of unjust and unreasonable rates fixed for carriers by state authority is not a suit against the state, within the prohibition of the 11th amendment, since the state is interested only in a governmental, and not in a pecuniary, sense. Reagan v. Farmers' Loan & T. Co. (U. S. Sup. Ct.), 4 I. C. R. 560.

(q) So much of the decree of the States circuit court in this case as restrains the state railroad commissioners from proceeding under the railroad commission act to establish reasonable rates and regulations is set

aside, but so much of it as restrains the enforcement of the rates already established is affirmed. Reagan v. Merchantile Trust Co., 4. I. C. R. 575.

(r) Decree reversing a decree of the United States circuit court refusing to enforce an order of the Interstate Commerce Commission requiring defendants to desist from making a greater charge in aggregate on freight in less than car lots from Cincinnati to Social Circle than they charge on such freight from Cincinnati to Augusta. Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 4 I. C. R. 582.

(s) No one can have an injunction against the collection of a tax until he has paid so much of the tax assessed against him as it can plainly be seen he ought to pay. Northern P. R. Co. v. Clark (U. S. Sup. Ct.), 4 I. C. R. 641.

(t) A preliminary injunction will be granted to restrain threatened acts in pursuance of an unlawful conspiracy in restraint of commerce between the states. United States v. Elliott (C. C. E. D. Mo.), 4 I. C. R. 708.

(u) Equity will not enjoin employes of a receiver of a railroad from quitting his service although the effect of such action will be to cripple the property or prevent or hinder the operation of the road. Arthur v. Oakes, (C. C. App. 7th C.), 4 I. C. R. 744.

(v) Trade unions are not prohibited by an injunction against illegal combinations of workingmen. Arthur v. Oakes (C. C. App. 7th C.), 4 I. C. R. 744.

(w) A combination and conspiracy of the employes of a receiver of a railroad company to quit the service with the object and intent of crippling the property and preventing or hindering the operation of the road is illegal, since it involves the intimidation and oppression of others and the injury to property in their keeping tending to the prejudice of the public. Farmers Loan & Trust Co. v. Northern Pacific R. Co., 4 I. C. R. 744.

(x) A combination or conspiracy having for its purpose the inauguration of a strike upon the lines of a railway operated by receivers is unlawful and may be prevented by injunction. Farmers Loan & Trust Co. v. Northern Pacific R. Co., 4 I. C. R. 744.

(y) An injunction is the appropriate remedy to prevent an unlawful combination and conspiracy to interfere with the operation of a railway and paralyze its business, since the injury would be irreparable and compensation could be obtained only through a multiplicity of suits. Farmers Loan & Trust Co. v. Northern Pacific R. Co., 4 I. C. R. 744.

(z) A preliminary injunction will be granted to restrain threatened acts in pursuance of an unlawful conspiracy in restraint of commerce between the states. United States v. Elliott, 4 I. C. R. 798.

(aa) An injunction will lie against railroad employes who, continuing in employment, refuse to perform their duties, where the direct result of such refusal works irreparable damage to the employer, and at the same time interferes with the transmission of the mail and with commerce between the states, notwithstanding there is no precedent for such injunction. Southern California R. Co. v. Rutherford (C. C. S. D. Cal.), 4 I. C. R. 800.

(bb) An injunction against an unlawful combination in restraint of trade, in violation of the Act of Congress, will not be denied because, after the filing of the bill, the unlawful interference with trade has ceased. United States v. Workingmen's Amalgamated Council, 4 I. C. R. 831.

(cc) The enforcement of an unreasonable reduction, by the legislature, of freight rates, may be enjoined. Ames v. Union P. R. Co. (C. C. D. Neb.), 4 I. C. R. 835.

(dd) A preliminary injunction will not be granted in a proceeding to enforce an order of the Interstate Commerce Commission where the questions involved are for the first time presented for judicial determination, as the Interstate Commerce Commission is an administrative body, and not a court. Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 5 I. C. R. 131.

(ee) A motion for a preliminary restraining order in proceedings to enforce an order of the Interstate Commerce Commission will be overruled where a like motion upon the same order has been overruled by another judge after full argument. Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 5 I. C. R. 131.

(ff) It is not necessary to file with a petition for the enforcement of an order of the Interstate Commerce Com-

mission the transcript of the evidence taken before it, under the statute making the findings of fact of the Commission prima facie evidence of the matter stated, but either party may introduce and use as evidence any competent and relevant testimony taken before the Commission. Interstate Commerce Com. v. Cincinnati N. O. & T. P. R. Co., 5 I. C. R. 131.

(gg) In proceedings to enforce an order of the Interstate Commerce Commission fixing rates, the carrier will not be required to keep an account with every shipper, and pay into the registry of the court the excess over the rates fixed by the Commission, as a condition of refusing a preliminary order, in the absence of a very strong showing of right in favor of the complainant. Interstate Commerce Com. v. Cincinnati, N. O. & T. P. R. Co., 5 I. C. R. 131.

(hh) A preliminary injunction will not be granted to restrain a carrier from charging or collecting freight in excess of rates fixed by the Interstate Commerce Commission, where the carrier will be practically without remedy if the order of the Commission is held unlawful, but the injury to the shippers in paying such rates will be comparatively slight, and excessive and speculative shipments would be induced by the temporary lowering of rates. Interstate Commerce Com. v. Cincinnati, N. O. & T. P. R. Co., 5 I. C. R. 131.

(ii) Upon a motion for a preliminary injunction the comparative inconvenience and injury to the parties must be looked at, and the injunction will not be granted when the injury to the defendant is likely to be greater than the benefit to the complainant. Interstate Commerce Com. v. Cincinnati, N. O. & T. P. R. Co., 5 I. C. R. 131.

(jj) The rule that an injunction will not be granted to prevent the commission of a crime penally punishable does not apply to a conspiracy of employees to injure and destroy their employer's property and obstruct interstate Commerce, as irreparable injury would be done and a multiplicity of suits to redress the wrongs would be occasioned. United States v. Elliott, 5 I. C. R. 148.

(kk) The remedy by injunction against combinations and conspiracies to obstruct or destroy interstate commerce, given by the act of Congress of July 2, 1890, §1, is within the power of Congress. United States v. Elliott (C. C. E. D. Mo.), 5 I. C. R. 148.

(ll) An injunction to restrain a conspiracy may be made operative upon all persons acting in concert with the designated conspirators and committing acts in furtherance of the conspiracy, although not especially named in the writ, by ordering of service of the writ upon them, and that they shall then come within the terms of the injunction. United States v. Elliottt, 5 I. C. R. 148.

(mm) A private person cannot maintain a bill in equity to enforce the provisions of the act of Congress of July 2, 1890, against unlawful restraints and monopolies, as §7, which is the only one giving a private remedy, confers only the right to sue at law for damages. Pidcock v. Harrington, 5 I. C. R. 161.

(nn) Alleged advice of counsel as to what a person under injunction might do will constitute no justification or mitigation of disobedience, where the statement of facts made to such counsel is not disclosed, but, on the contrary, a presumption is raised that a full statement would be advantageous. United States v. Debs., 5 I. C. R. 163.

(oo) The answer of a stranger to a bill for an injunction, charged with contempt in its violation, is no more conclusive than that of a party to the bill. United States v. Debs., 5 I. C. R. 163.

(pp) An injunction will lie under the act of Congress of July 2, 1890, §§1, 4, declaring conspiracies in restraint of trade or commerce among the several states illegal, and empowering the circuit courts to restrain violations of the act, in proceedings instituted by the district attorney to enjoin a conspiracy of striking employees to prevent the operation of railroads engaged in interstate commerce. United States v. Debs (C. C. N. D. Ill.), 5 I. C. R. 163.

(qq) If the report of the Interstate Commerce Commission is to be regarded as making out a prima facie case of illegal rates upon an application for preliminary injunction, such effect is lost when an issue is made by a sworn answer upon the principal conclusions of the report. Shinkle, W. & K. Co. v. Louisville & N. R. Co. (C. C. S. D. Ohio), 5 I. C. R. 282.

(rr) A preliminary injunction would not be granted in a proceeding to enforce a report of the Interstate Commerce Commission, as the Interstate

Commerce Act, §16, contemplates an injunction only as the final result of a hearing on pleadings and proof. Shinkle, Wilson & Kreis Co. v. Louisville &N. R. Co., 5 I. C. R. 282.

(ss) To obtain a preliminary injunction plaintiff should show either that his right is very clear, or that the injunction will operate with but little injury to the defendant, and that, if refused, the injury to himself will be very great. Shinkle, Wilson & Kreis Co. v. Louisville & N. R. Co., 5 I. C. R. 282.

(tt) An injunction will lie to prevent the chief officers of a labor organization from enforcing or putting into operation a rule of such organization making it the highest offense against the order for a member in the employ of a railroad company to handle cars received from another company with which a conflict approved by such chief officers exists, where refusal to handle such cars will constitute a violation of the Interstate Commerce Act requiring the furnishing of equal facilities for the interchange of traffic; and such officers may be required to rescind a direction already given for the enforcement of such rule,—especially where the order so directed to be rescinded will induce violations of an injunction previously granted against the company and its employees. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 522.

(uu) A mandatory injunction may be issued by a court of equity upon a preliminary hearing, to enforce a duty which is defined by law, where the rights of the parties are free from doubt. Toledo, A. A. & N. M. R. Co. v. Pennsylvania (C. C. N. D. Ohio), 5 I. C. R. 545.

(vv) Employees of a railroad company need not be made parties to an injunction restraining its officers and employees from refusing equal facilities for the interchange of traffic to another road, in order to make the injunction binding upon them, but it is sufficient if they are served with full and proper notice of the orders and process of the court. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 545.

(ww) Employees of a railroad company may be restrained from commission of violence or intimidation, or from enforcing rules and regulations which result in irremediable injuries to their employers and to the public. Toledo, A. A. & N. M. R. Co. v. Pennsylvania (C. C. N. D. Ohio), 5 I. C. R. 545.

(xx) Jurisdiction to enjoin violation of Interstate Commerce Act.—The Federal courts have jurisdiction of a suit to enjoin violation of the Interstate Commerce Act by refusing to accept from a connecting carrier goods designed for interstate transportation. Ex parte James Lenon 7 I. C. C. App. XIII.

(yy) Carrier not compelled to give facilities to all carriers.—A mandatory injunction will not be granted under the general equity powers of a court to compel one carrier which has contracted for through traffic with another to give a third carrier the same facilities. Gulf, Colorado & Santa Fe R. R. Co. v. Miama Steamship Co., 8 I. C. C. App. XLVII.

IMPORTANT CASES SINCE 1908

(zz) Injunctions restraining defendants from taking baggage cars supplied to express companies and equipped for transporting live fish, granted by state and federal courts. Lay v. Amer. Exp. Co., 51 I. C. C. 373, 374.

(3a) A brewing company that tenders beer to a railroad for transportation from Oklahoma to Missouri, which the carrier refused to accept and transport does not have to first apply to the Interstate Commerce Commission for relief before asking for an injunction as that body has no jurisdiction over such a case, Royal Brewing Co. v. M. K. & T. Ry. Co. (Kan. 1914), 217 Fed. 146, 148.

(3b) A forwarder of freight is a shipper and hence the acceptance by the forwarding company of a commission or salary for forwarding all shipments over a specified railroad is acceptance by the forwarder of a rebate in violation of both the Interstate Commerce Act and the Elkins Act, and an injunction will lie at the suit of the United States to restrain such practice. United States v. Lehigh Valley R. Co., 222 Fed. 685.

(3c) A bill to enjoin an order of the Interstate Commerce Commission denying special relief from the fourth section which, while making general averments that the order is confiscatory, makes no specific facts from which such conclusions are derived, is not sufficient in law. Louisville & N. R. Co. v. United States, 225 Fed. 571, 583.

(3d) A bill to enjoin an order of the Interstate Commerce Commission deny-

ing special relief from the fourth section is an original suit in equity and an ex parte of witness not subject to cross examination is not admissible without the consent of the other party. Louisville & N. R. Co. v. United States, 225 Fed. 571, 584.

(3e) The inherent power of a court of equity to maintain the status quo pending an appeal from a decree changing the status quo is not impaired or lessened by any provision of Interstate Commerce Act, the act creating the Commerce Court or Act Oct. 22, 1913, c. 32 38 stat. 219, abolishing the Commerce Court and transferring its jurisdiction to the District Courts. Louisville & N. R. Co. v. United States, 227 Fed. 273, 275.

(3fg) Where it appeared, on a motion to modify a decree denying an interlocutory injunction and dismissing the petition, in a suit to set aside an order of the Interstate Commerce Commission relative to the interchange of traffic between the petitioners and a certain other railroad, that if the decree should be reversed by the Supreme Court, a great and irreparable injury would in the meantime result to the petitioners, by reason of a diversion of part of their traffic by competing railroads, enabled to obtain access to local industries on their lines through the enforcement of such order, and the expense and disturbance of their business caused by changing their former practices and the publication of new tariffs, while it did not clearly appear that any particular individuals would suffer material financial injury if the order of the Commission was stayed for a short time, the enforcement of the order would be stayed, to enable the petitioners to perfect their appeal, and present to the Supreme Court an application for a preliminary suspension order pending the hearing of the appeal. Louisville & N. R. Co. v. United States, 227 Fed. 273, 275.

(3h) In a suit against the Interstate Commerce Commission and carriers to prevent enforcement of new rates, where there is an application for a temporary injunction, and the District Judge calls in two other judges, one of them being a Circuit Judge, to dispose of such application, the court as constituted is without jurisdiction to dispose of the case on the merits. Brown Drug Co. v. United States, 235 Fed. 603.

(3i) Where new rates permitted by the Interstate Commerce Commission would work injury and possible discrimination against towns in South Dakota, while the previous existing rates worked injury and possibly had for several years discriminated against a town in Iowa, a temporary injunction pending a suit against enforcement of the rates, will not be granted, the court being unable to measure the respective injuries, and the order of the Interstate Commerce Commission being presumptively valid. Brown Drug Co. v. United States, 235 Fed. 603.

(3j) When the Commission has acted concerning rates, a court should not substitute its judgment for that of the Commission. The question as to whether the court should enjoin certain rates pending a full hearing, or not, would necessarily to a great extent turn upon the Commission's opinion as to the reasonableness or unreasonableness of the new rates. This court cannot decide that question. It is not within its power to decide it, but such power is vested in the Commission exclusively. Kiser Co. v. Central of Georgia Ry Co., 236 Fed. 573, 578.

(3k) Act Oct. 15, 1914, c. 323, section 20, 38 Stat. 730, declares that no restraining order or injunction shall be granted in any case between an employer and employees, or between persons employed and persons seeking employment, involving or growing out of a dispute concerning the terms or conditions of employment, unless necessary to prevent irreparable injury to property or property rights, and that no such restraining order shall prohibit any person or persons, whether singly or in concert, from terminating any employment, or from ceasing to perform any work or labor, or from recommending, advising, or persuading others by peaceable means to do so. Employees of complainant, ship company, engaged as a common carrier, which also carried the mails, struck, and defendants, composing the union of which they were members, picketed the wharves of complainant and intimidated other laborers from accepting complainant's offers of employment. Defendants threw rocks on the wharves, and in other ways interfered by violence with complainant's business and access to its shins. Interstate Commerce Act Feb. 4. 1887, c. 104, §3, 24 Stat. 380 (Comp. St. 1913, §8565), and §10, as amended by Act March 2, 1889, c. 382, §2, 25 Stat. 857 (Comp. St. 1913, §8574), respectively declare that every common

carrier subject to the provisions of the Act shall afford reasonable facilities for the exchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and that any common carrier which shall wilfully omit to do any act or thing required to be done shall be guilty of a misdemeanor. HELD, that, though defendants were authorized under the statute to persuade third persons to decline complainant's offers of employment, and to refuse to deliver goods to complainant, or to patronize it, their interference with complainant's transportation business by violence was unlawful and will be enjoined, as it would not only expose complainant to loss, but to prosecution for violations of law. Alaska S. S. Co. v. International Longshoremen's Ass'n., 236 Fed. 964.

(3l) Owners of lumber mills, whose operation is dependent to a large extent upon logs shipped by them over a particular railroad, have such a pecuniary "interest" in the rates charged for the transportation of logs over such road as to entitle them to maintain a suit to enjoin enforcement of an order of the Interstate Commerce Commission fixing such rates, made in a proceeding to which they were parties. McLean Lumber Co. v. United States, 237 Fed. 460.

(3m) A suit by shippers to enjoin enforcement of an order of the Interstate Commerce Commission requiring the establishment and maintenance of rates is not open to the objection that it seeks to have the court itself establish rates. McLean Lumber Co. v. United States, 237 Fed. 460.

(3n) The courts have power and are required by the statute to set aside and enjoin the enforcement of an order of the Interstate Commerce Commission, based upon a finding which is unsupported by evidence. Chestnut Ridge Ry. Co. v. United States, 248 Fed. 791.

(3o) Under the U. S. Judicial Code, a federal court cannot enjoin prosecution of a suit in a state court, where not in aid of its own jurisdiction previously acquired, but to enable it to assume jurisdiction of the controversy then pending in the state court, because a federal question is incidentally involved therein. Detroit, M. & T. S. L. Ry. v. City of Monroe et al. (Mich. 1919), 262 Fed. 177.

(3p) Under the Interstate Commerce Act, as amended, as to the duty of common carriers subject to that act, a suit may be maintained. without first resorting to the Interstate Commerce Commission, to restrain carriers from putting into effect a supplement to their freight classifications whereby the classification under which a commodity has been carried for years is canceled, and the commodity is included among articles not accepted for transportation, as no question of reasonableness of classifications, etc., is involved. Viscose Co. v. Hines, Director Gen. of Railroads, et al., 263 Fed. 726.

(3q) Where a preliminary injunction, granted by a state court ex parte, without notice, is dissolved by a federal court after removal of the cause and a hearing on the ground that neither court has jurisdiction of the subject matter, the court will not, in the exercise of its discretion, allow a supersedeas to continue the injunction in force pending an appeal. Corona Coal Co. v. Southern Ry. Co., 266 Fed. 726.

(3r) A preliminary injunction granted, restraining enforcement of an order of the Interstate Commerce Commission directing trunk line carriers to cease and desist from making allowances to a terminal railroad company, for switching services, where such order was made on a petition of the terminal company for reparation for failure to make such allowances in a past period during which they had been discontinued, though subsequently resumed, which petition did not tender any issue as to the future practice, and petitioner was not advised that such issue was to be considered, and where the only evidence as to existing conditions was the record in a proceeding several years before. National Tube Co. et al. v. United States et al., 272 Fed. 735.

(3s) Communities or shippers aggrieved by tariff schedules filed conformably to an order of the Interstate Commerce Commission relieving the carrier in certain respects from the operation of the long-and-short-haul clause of the act, are afforded ample remedy by the provisions of §§13, 15, for complaints to the Commission and action by such commission on complaints or on its own initiative, and they may not seek redress in the courts by way of injunction after having been refused a rehearing by the Commission in the proceedings upon

the carriers' application, to which the communities and shippers were not parties. U. S. v. Merchants' & M. Traffic Asso., 37 Sup. Ct. 24, 242 U. S. 178, 61 L. Ed. 233.

(3t) The courts have jurisdiction to enjoin increase of rates under authority of order of Interstate Commerce Commission, and that without redress being first sought in a proceeding before the commission, where the claim is not that the rate is unjust as unreasonably high or discriminatory, but that the commission has exceeded its authority, and therefore the order is void, inview of the Interstate Commerce Act prescribing conditions on which only an increase shall be permitted, where a carrier by rail shall in competition with a water route reduce rates. Skinner & Eddy Corp. v. U. S. 39 Sup. Ct. Rep. 375.

(3u) The United States District Court cannot grant an injunction against the enforcement of a rule prescribed by the Interstate Commerce Commission, unless there are present three judges, as required by Act Oct. 22, 1913. Lambert Run Coal Co. v. Baltimore & O. R. Co., 42 Sup. Ct. 349.

(3v) Where a railroad property terminated its contract with an express company for the latter's breach, it may, suing by the Federal Director General enjoin the express company from forcibly placing shipments on its trains and having employees ride thereon without paying fares. Director General of Railroads v. People's Express (Mass. 1920), 126 N. E. 417.

(3w) Injunction proceedings by a state to compel a railway company chartered by such state to obey orders of the state Railroad Commission which had not been declared void by any court and to restrain it from adopting a schedule of intrastate rates prepared in compliance with orders brought in a state court, Judicial Code 207, 208, not applying, such a proceeding not being a "suit to enjoin, set aside, annul or suspend any order of the Interstate Commerce Commission," which is required by such sections to be brought in a federal court, which court shall have exclusive jurisdiction. Abilene & S. Ry. v. State (Tex. 1918), 199 S. W. 878.

(3x) A complaint in suit for injunction, alleging that defendant railroad threatened to cut off side tracks owned by complainant, a sugar company, unless complainant paid an alleged illegal greasing charge, HELD to show absence of adequate remedy at law, and to state a cause of action for equitable relief. American R. Co. of Porto Rico v. South Porto Rico Sugar Co. 293 F. 670.

ALL OTHER CITATIONS

Village of Hubbard, Ohio v. United States, 278 Fed. 754; Peoria & P. U. Ry. Co. v. United States, 44 Sup. Ct. 194; P. & W. Ry. v. I. C. C. 293 Fed. 1001.

§15. Limitation of Actions.

IMPORTANT CASES SINCE 1908

(a) Amended regulation No. 18a, promulgated by the Director General of Railroads April 18, 1918, providing that "all suits against carriers while under federal control must be brought in the county or district where the plaintiff resided at the time of the accrual of the cause of action or in the county or district where the cause of action arose," as applied to suits in the federal courts, is within the authority conferred on the President by Act March 21, 1918. Wainwright v. Pennsylvania R. Co., 253 Fed. 459.

(b) Under General Order No. 26 of Director General of Railroads, as to staying trial, on showing that just interests of government will be prejudiced by present trial of action against carrier under federal control pending in a county or district other than where the cause of action arose or plaintiff then resided, but allowing a new action in the other county or district, stay depends on the circumstances of each case; the primary consideration being the situation of the government relative to railroad witnesses leaving their work. Cocker v. New York, O. & W. Ry. Co., 252 Fed. 676; Harnick v. Penn. R. R., 253 Fed.

(c) Under circumstances of case, held, trial of action against railroad, brought in New York, for injury, at Scranton, Pa., of a boy then residing there, should be stayed, under General Order No. 26 of the Director General of Railroads. Cocker v. New York, O. & W. Ry., 253 Fed. 676.

(d) Suit against carrier while under federal control, brought, after promulgation of and contrary to General Orders Nos. 18 and 18a of the Director General of Railroads, in a county or district other than where the cause of action arose, or where plaintiff resided when it accrued, will be dismissed. Cocker v. New York, O. & W. Ry., 253 Fed. 676.

(e) Limitations begin to run, as to an action for refusal of switching facilities

in violation of federal and state acts relating to unlawful discrimination, from the refusal of the application, not from the date the application was made. Langhill v. Pennsylvania R. Co., 98 Atl. (Pa. 1916), 873.

(f) The 3-year statute of limitations applies to actions to recover the cost of repairing cars to put them in condition to receive the property to be shipped therein, and the statute begins to run on each item when the shipment is made. Rock Milling & Elevator Co. v. Atchison, T. & S. F. Ry. Co., 158 Pac. (Kans. 1916) 859.

(g) One injured in New Mexico suing a railroad in Texas could not by mandamus compel immediate trial of his action contrary to general orders Nos. 18, 18a and 26 of the Director General of Railways, in the absence of compliance with No. 26, permitting application to the Director General for relief in event of unnecessary hardship by postponment according to those orders. Rhodes v. Tatum (Tex. 1918), 206 S. W. 114.

(h) An action to recover money paid on a settlement, through mistake of law and fact, is not one on an express contract, and is barred in two years under the statute of limitations of Texas. Galveston, H. & S. A. Ry. Co. v. Lykes Bros. 294 Fed. 968.

§16. War Legislation and Venue.

See War Legislation.

IMPORTANT CASES SINCE 1908

(a) To remove from the state to the federal court an action on the ground that it arose under the Constitution and laws of the United States such fact must appear from the initial pleading of the plaintiff; and, where it did not appear, such cause cannot be removed, though the action was one against a railroad company, and it was contended that, because the President, under Act Aug. 29, 1916, had taken possession of and assumed control of railroads before the initiation of the action, the cause was one removable, as arising under the laws of the United States. Muir v. Louisville & N. R. R., 247 Fed. 888.

(b) Where claimants acquired a cause of action prior to the Presidential proclamation taking over the carriers, as the Act of Aug. 29, 1916, does not authorize the President to make any proclamation of any character in taking possession and assuming control of transportation systems, and thus the presidential proclamation is without force of law, actions begun in the state court against a railroad company after the President had taken possession of railroads, which were based on the negligence of the railroad company occurring prior to the executive action, cannot be removed to the federal courts, under the Judicial Code, on the ground that they were actions arising under the Constitution and laws of the United States, for the cause of action was not based on any Act of Congress, and the proclamation of the President, though it might have afforded basis for the actions, was without effect as law. Muir v. Louisville & N. R. R., 247 Fed. 888.

(c) A finding by the Interstate Commerce Commission that a rate or fare imposed by a state authority on intrastate commerce causes undue,, unreasonable, and unjust discrimination against interstate and foreign commerce is binding on the courts, if there is any evidence to support it. Lehigh Valley R. Co. v. Public Service Commission, Second Dist. of State of New York et al., 272 Fed. 758.

(d) Interstate Commerce Act, §16, as amended by Act June 18, 1910, §13 (Comp. St. §8584), authorizing action to enforce an order of the Commission requiring a carrier to refund excessive charges to the insurer, does not require that the carrier shall be the owner of a railroad within the district, to sustain venue under the provision allowing suit in any district through which the road runs. Vicksburg, S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup Ct. 524.

(e) The provision of the act abolishing the Commerce Court (Comp. St. §§ 992, 994), fixing the venue of any suit to enforce, suspend, or set aside an order of the Interstate Commerce Commission, did not impliedly repeal the provision of Interstate Commerce Act, §16, as amended by Act June 18, 1910, §13 (Comp. St. §8584), allowing actions to enforce a reparation order by the Commission in any district through which the carrier's road ran, since the amendments of the Interstate Commerce Act indicated an intention to broaden the venue for the later remedy, and the repealing provisions in the act abolishing the Commerce Court were restricted to acts or parts of acts

in so far as they related to the establishment of the Commerce Court, which never had jurisdiction over a reparation action. Vicksburg, S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup. Ct. 524.

(f) Under Federal Control Act, §10 (Comp. St. 1918, Comp. St. Ann. Supp. 1919 § 3115, 3-4j), allowing actions at law against carriers without defense that the carrier is an instrumentality of the federal government, an action to enforce an order by the Interstate Commerce Commission, requiring the carrier to repay to the shipper excessive charges collected before the government took control, can be maintained against the company during the period of government control. Vicksburg, S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup. Ct. 524.

(g) Freight rates are controlled by the schedules and tariffs on file with and approved by the Interstate Commerce Commission, but provisions relating to the limitation of actions are controlled by special contracts made between the parties and subject to the approval of the Commission, and the fact that the Commission has given the carrier the right to make a contract does not authorize its enforcement unless and until the contract is in fact made. Mason v. Maine Central R. R. Co. (Me. 1920), 110 Atl. 425.

§16a. Enforcement of Commission's Orders.

ALL CITATIONS

Vicksburg S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup. Ct. 524; Lehigh Valley R. Co. v. Public Service Commission, Second Dist., of State of New York et al., 272 Fed. 758.

§17. Election of Remedies.

IMPORTANT CASES SINCE 1908

(a) Under the Interstate Commerce Act, §9, where a consignee of coal invoked the jurisdiction of the Interstate Commerce Commission respecting the interpretation of a carrier's tariffs respecting reconsignments, their validity, charges for demurrage, reconsignment and reparation claims, etc., and the Commission passed on most of the questions, but had never made any final order of reparation or determination of the amount to be paid, the consignee had elected his remedy and could not sue to recover demurrage and reconsignment charges claimed to have been illegally collected in the state circuit court. Waters v. Becker, (Wisc. 1921), 186 N. W. 167.

CRATED SHIPMENTS

See Classification §6½.

CREDIT ACCOUNT

See Crimes §3; Discrimination §5; Evidence §19.

CASES 1887-1908

(a) The refusal of a carrier, after payment of freight and offer of customary switching charges, to switch cars to a connecting line for delivery at the coal yard of the consignee, whose financial responsibility is not questioned, unless he promises in advance to pay any demurrage charges that may be made, regardless of their unreasonableness, will render the carrier liable for damages to him, although he had previously refused to pay such charges on other cars. Macoon v. Chicago & N. W. R. Co. (Com.), 3 I. C. R. 711.

(b) The Act does not recognize uncertain or indefinite transportation charges, the idea of unequal compensation for like service, or discrimination in the treatment of persons similarly situated, is repugnant to every requirement of that law, and a party to an interstate shipment can not be excluded by the carrier from privileges afforded to other patrons in the same locality because of his refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should accompany the demand. Phelps & Co. v. T. & P. R. Co., 4 I. C. C. 363, 367.

(c) Complainant alleged unjust discrimination from the refusal of defendant to deliver uncompressed cotton consigned to complainants at New Orleans upon the same terms as it delivers such cotton to other consignees without requiring the payment of freight charges before delivery because of a guaranty in writing made by those consignees making them responsible for freight charges in case payment thereof should be refused by the original consignees. HELD, the record shows that the guaranty requested by defendants covered the payment of freight charges that were excessive in that they were not covered by tariff, and the discrimination should

be removed as the carrier has no right to collect any amount other than its legal tariff rate. Phelps & Co. v. T. & P. R. Co., 4 I. C. C. 363.

(d) The lien of carriers upon freight for charges earned is satisfied by payment of rates for their services which they are lawfully entitled to demand, and a guaranty executed to a carrier by consignees or third parties, which might be construed to enable the carrier, in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made. Phelps & Co. v. T. & P. R. Co., 4 I. C. C. 363, 367.

(e) Other connecting carriers are not entitled to through billing and rating and the use of tracks and terminals of a carrier which has voluntarily made an arrangement giving these advantages to one connecting carrier. Little Rock & M. R. Co. v. St. Louis & S. W. R. Co., 4 I. C. R. 854.

(f) Requiring prepayment of freight charges by a connecting carrier without requiring it of other shippers or carriers at the same place does not constitute an unreasonable or undue disadvantage within the meaning of the interstate commerce act. Little Rock & M. R. Co. v. St. Louis & S. W. R. Co., 4 I. C. R. 854.

(g) Express company need not extend equal credit to all connecting carriers.—The obligation to furnish equal facilities without discrimination does not require a common carrier to advance money to all other carriers on the same terms or to give credit for the carriage of articles of trade and commerce to all carriers because it extends credit for such service to some others. Southern Indiana Express Co. v. United St. Express Co., 8 I. C. C. App. LXII.

IMPORTANT CASES SINCE 1908

(h) Section 15 of the Act provides among other things, that whenever upon due procedure and after full hearing the Commission shall be of opinion and find that any regulation or practice of any carrier subject to the Act is unjust or unreasonable or unjustly discriminatory or unduly preferential or prejudicial it has the power to determine the question and make an order that the carrier shall cease and desist from the violation of the Act found to exist. Clearly the Commission has no authority as an independent proposition to require a carrier to extend credit to any of its patrons for charges for its services. However, it has long been a practice of carriers, for the convenience of themselves as well as their patrons, to accept payment of accumulated charges at the end of brief stated periods and this practice has not been found unlawful. It cannot be doubted, however, that the all-embracing prohibitions of the law against undue or unreasonable preference, prejudice, or disadvantage apply to this practice as to all others. Not all discriminations are unlawful, but only those that are unjust. American Coal & Coke Co. v. M. C. R. R., 36 I. C. C. 195, 197.

(i) It is unlawful for trunk lines through the device of unadjusted settlements with industrial lines indirectly to extend credit to the industries owning such lines to the prejudice of other shippers. Northampton & B. R. R. Co. Case, 41 I. C. C. 68, 72.

(j) Paragraph (2), section 3, of the Act held inapplicable to freight moving wholly or partly by water when delivery or relinquishment of possession at destination is affected by or through the water line, but extension of credit on freight moving under such circumstances by carriers subject to the act held to be a practice subject to control under other general provisions. Regulations for Payment of Rates and Charges. 63 I. C. C. 375, 376, 377.

(k) The extension of credit on freight moving partly by water and partly by railroad when both are under a common control, management, or arrangement for a continuous carriage or shipment, and when delivery or relinquishment of possession of the freight at destination is affected by or through the water line, found to be a practice subject to the provisions of section 1, paragraph (6); section 2; section 3, paragraph (1); and section 15, paragraph (1) of the act. Regulations for Payment of Rates and Charges, 63 I. C. C. 375, 377.

(l) Paragraph 3 section 2 of the Act is inapplicable to freight transported wholly or partly by water when delivery or relinquishment of possession at destination is effected by or through the water line, but the Commission has control over the extension of credit in such cir-

cumstances under other general provisions of the act. Ex Parte 73, 63 I. C. C. 375, 376.

(m) Original report, 57 I. C. C. 591, prescribed rules and regulations for the prompt payment of transportation rates and charges, and fixed 96 hours as the maximum time for which the carriers should extend credit. The McCloud River Railway requested relief from these provisions on freight from and to Bartle, Calif., when destined to or from interior points not served by railroad, but by stage or truck, in Siskiyou, Shasta and Modoc counties, California. Formerly petitioner maintained regular schedules for the handling of mail in connection with routes to and from the interior points. On account of loss of business, petitioner abandoned the regular mail service, and the Post Office Department changed the base of the routes from Bartle to Redding, Calif. Redding is on the S. P., about 78 miles south of Sisson. The average distance from Bartle to the interior points appears to be about 45 miles, and the minimum distance from Redding is about 68 miles, as compared with the former minimum distance of about 24 miles from Bartle. When freight bills are mailed to shippers and receives of freight at the interior points the letters must go by way of Sisson, S. P., to Redding and star routes to intermediate points. In many cases it has required as long as from a month to six weeks before replies to letters addressed to the interior points could be received. HELD, the period of 96 hours for payment of freight charges destined to interior points may be computed from the first 4 p. m. following 26 days after the mailing by petitioner of the freight bills for such traffic. Original order amended accordingly. In Re Section 3 of the Interstate Commerce Act, as Amended by section 405 of the Transportation Act, 1920, 69 I. C. C. 351.

(n) Where the rate tariffs on file with the Interstate Commerce Commission provided that carload shipments would not be delivered to a line which performed only switching services until transportation charges were paid, the carrier could not make a delivery without first requiring the payment of the charges, without thereby discriminating against other shippers in favor of the consignee, contrary to Interstate Commerce Act and Transportation Act. Feb. 28, 1920, § 405 (2). McGuire v. Atlantic Coast Line R. Co. (Va. 1923), 118 S. E. 225.

(o) Where a bill of lading designated a private siding as the destination of a carload shipment, but was expressly subject to the tariffs on file, which provided that the carrier would not deliver the car to another line, which performed switching services only, until all charges were paid, and it was necessary for the car to be handled by two switching lines to reach the designated siding, the initial carrier properly refused to deliver the car to a switching line until its charges were paid, and it was entitled to enforce the tariff provision for demurrage accruing before such payment. McGuire v. Atlantic Coast Line R. Co. (Va. 1923), 118 S. E. 225.

I. THE ELKINS ACT.

See Elkins Act.

§1. Constitutionality.

See Constitutional Law.

CASES 1887-1908

(a) Legislation cannot abridge a constitutional privilege, and cannot replace or supply one, at least unless it is so broad as to have the same extent in scope and effect. Counselman v. Hitchcock, 3 I. C. R. 816.

IMPORTANT CASES SINCE 1908

(b) The provision for the Elkins Act making it a crime for a shipper to receive a rebate whereby property is transported at less than the published rates, which provision applies to a shipment under a through bill of lading from an interior port of the United States via rail and an ocean carrier to a European port, is not in violation of Article I, Section 9, Paragraph 5, of the Constitution of the United States forbidding the laying of a tax or duty on exports, or as the giving of preference by a regulation of commerce or revenue to the ports of one state over those of another. Armour Packing Co. v. U. S., 209 U. S. 56, 79, 80, 28 S. Ct. 428, 52 L. ed. 681; C. B. & Q. Ry. Co. v. U. S., 209 U. S. 90, 28 S. Ct. 439, 52 L. ed. 698.

ALL OTHER CITATIONS

N. Y. C. & H. R. R. R. v. U. S. 212 U. S. 481, 495, 496, 500, 29 Sup. Ct. 304, 309, 53 L. ed. 613, 624; U. S. Vacuum Oil Co., 158 Fed. 536, 539; U. S. v. G. N. R. R. Co., 157 Fed. 288, 290, 291.

§2. Construction.

See Act to Regulate Commerce II.

CASES 1887-1908

(a) A carrier which has conformed to the ruling of the Commission should not be prosecuted for alleged violation

of law in that respect, which occurred before such ruling was made and under a construction of the law then approved by the carrier's counsel. Slater v. Northern Pacific R. Co., 2 I. C. R. 243.

(b) The Act to Regulate Commerce should be liberally construed in favor of commerce among the States; but when complaint is made or relief sought solely or mainly in the interest of common carriers, the act complained of or the right asserted must clearly appear to have been forbidden or conferred; and where the complaining carrier is not in a position to commend itself to the favorable consideration of a court of equity, no strained construction of the law will be made in its favor. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. R. 351.

(c) The offense is fully seen in the final result, but the result being unlawful, the condemnation of the statute falls alike upon the result itself and the means by which it is reached. When the ultimate thing done is unlawful the steps for the purpose of its perpetration are equally unlawful, and the parties engaged in the transaction must be presumed to have intended by their acts the breach of law that ensues as the necessary consequence. Shamberg v. D. L. & W. R. Co., 3 I. C. C. 502, 512.

(d) Common law terms used in an Act of Congress creating an offense without defining the terms may be interpreted by the common law. United States v. Trans-Missouri Freight Association, 4 I. C. R. 443.

(e) Failure of a railroad company to run any other trains than their regular passenger trains for carrying the mail, is not a violation of law, but failure or refusal to carry mails on regular passenger trains, whether local or through trains, upon which they are required to carry mails, is unlawful. Re Charge to Grand Jury, 4 I. C. R. 777.

(f) A railroad company which causes a development company, the entire stock of which it owns, to purchase and ship grain without any bona fide interest therein, the railroad company accepting drafts in payment of its freight charges, and the only rate paid being the profit upon the transaction, which varies with each shipment, the whole transaction being a device to procure transportation of the grain at other than the published rate,—violates the Act to Regulate Commerce, §§2, 3, and 6. Re Alleged Useful Rates & Practices, 7 I. C. C. 33.

(g) It is the purpose of section 2 of the act to enforce equality between shippers, and it prohibits any rebate or other device by which two shippers shipping over the same line, the same distance, under the same circumstances of carriage, are compelled to pay different prices therefor. Pennsylvania Millers State Asso. v. P. & R. R. Co., 8 I. C. C. 531, 551.

(h) The Atchison, Topeka & Santa Fe Railway Company has systematically and continuously violated the act of February 19, 1903 (the so-called "Elkins law"), notwithstanding that it has, in a suit begun in the United States Supreme Court at the instance and request of this Commission, been under injunction since March 25, 1902, to observe in all respects its published schedules of rates. Re Transportation of Coal & Mine Supplies, 10 I. C. C. 473.

(i) The act of February 19, 1903 (the so-called Elkins law), which prohibits carriers from transporting traffic until a tariff has been published, requires observance of the tariff, provides a penalty for each violation of not less than $1,000 nor more than $20,000, and applies both to the carrier and the party receiving the concession, has, respecting the transportation involved in this proceeding, been systematically and continuously violated by the Atchison, Topeka and Santa Fe Railway Company and the Colorado Fuel and Iron Company from the day of its passage down to November 27, 1904, when the tariffs upon which this coal moved were reduced in all cases $1.15; and this notwithstanding the Atchison, Topeka and Santa Fe Railway Company has, in a suit begun in the United States circuit court at the instance and request of this Commission, been under injunction since March 25, 1902, to observe in all respects its published schedules of rates. Re Atchison, T. & S. F. R. Co., 10 I. C. C. 473.

(j) The act to regulate commerce, which requires carriers to publish and adhere to their tariffs, has been grossly and continuously violated by the Atchison, Topeka and Santa Fe Railway Company during the last five years in the following respects: It published rates on interstate shipments of coal from mines in Colorado and New Mexico which, under the tariffs, applied only to the transportation thereof, but which

for the Colorado Fuel and Iron Company were made by the railway company to include the price of the coal, and such price was paid to the fuel and iron company by the railway company. While giving rebates to the fuel and iron company from such tariff rates, it charged the full tariff rates on interstate shipments of coal by other shippers in not only the general coal region involved, but in the same coal field. This practice of the railway company resulted in closing markets for coal to shippers competing with the Colorado Fuel and Iron Company. Re Atchison, T. & S. F. R. Co., 10 I. C. C. 473.

(k) The Atchison, Topeka & Santa Fe Railway Company violated the Act to Regulate Commerce, which requires carriers to punish and adhere to their tariffs, by publishing rates on interstate shipments of coal from mines in Colorado and New Mexico, which, under the tariffs, applied only to the transportation thereof, but which for the Colorado Fuel & Iron Company were made by the railway company to include the price of the coal, and such price was paid by the fuel and iron company to the railroad company. Re Transportation of Coal & Mine Supplies, 10 I. C. C. 473.

(l) The act of February 19, 1903 (the so-called "Elkins law"), which applies both to the carrier and the party receiving the concession, has been systematically and continuously violated by the Atchison, Topeka & Santa Fe Railway company, and the Colorado Fuel & Iron Company from the day of its passage down to November 27, 1904, when the tariffs upon which coal moved were reduced in all cases $1.15. Re Transportation of Coal & Mine Supplies, 10 I. C. C. 473.

(mn) The Atchison, Topeka & Santa Fe Railway Company grossly and continuously violated the Act to regulate commerce in the following respects: It published rates on interstate shipments of coal from mines in Colorado and New Mexico, which, under the tariffs, applied only to the transportation thereof, but which for the Colorado Fuel & Iron Company were made by the railway company to include the price of the coal; and such price was paid to the fuel and iron company by the railway company; while giving rebates to the fuel and iron company from such tariff rates, it charged the full tariff rates on interstate shipments of coal by other shippers, in not only the general coal region involved resulted in closing markets for coal to shippers competing with the Colorado Fuel & Iron Company. Re Transportation of Coal & Mine Supplies, 10 I. C. C. 473.

(op) Indemnity not sound doctrine. Hope Cotton Oil Co. v. T. & P. Ry. Co., 12 I. C. C. 265.

(q) In the contemplation of the statute any methods, however skillfully devised, by which an unlawful result is effected, become devices for the end attained. The law deals with the results produced; and it is not material what means may be employed for the purpose, whether the means be direct or indirect, open or covert, is of no importance if they culminate in what the law forbids. The offense is fully seen in final result; but, the result being unlawful, the condemnation of the statute falls alike upon the result itself and the means by which it is reached. When the ultimate thing done is unlawful, the steps for the purpose of its perpetration are equally unlawful. The parties engaged in the transaction must be presumed to have intended by their acts the breach of law which ensues, with the necessary consequence. Muskogee Commercial Club v. M. K. & T. Ry., 12 I. C. C. 312, 318.

IMPORTANT CASES SINCE 1908

(r) The object of the Elkins Act is to prevent favoritism and to place all shippers upon equal terms. Rate for Transportation of Anthracite Coal, 35 I. C. C. 220, 289.

§2¼. Bill of Lading Act.

IMPORTANT CASES SINCE 1908

(a) Act Aug. 29, 1916, c. 415, §41 (Comp. St. §8604-U), penalizing the forgery of interstate and foreign bills of lading, etc., unconstitutionally exceeds Congress' power under the commerce clause, when applied to an entirely fictitious bill of lading having no connection with any actual or contemplated interstate commerce. United States v. Ferger, 256 Fed. 388.

ALL OTHER CITATIONS

Louisville & Nashville R. R. Co. v. Mottley, 219 U. S. 467, 478, 487, 496, 31 Sup. Ct. 265, 55 L. Ed. 297, 34 L. R. A. (N. S.) 671; New Haven R. R. Co. v. Interstate Commerce Commission, 200 U. S. 361, 391, 26 Sup. Ct. 272, 50 L. Ed. 515; Armour Packing Co. v. United States, 209 U. S. 56, 72, 28 Sup. Ct. 428, 52 L. Ed. 681; United States v. Union Stock Yard, 266 U. S. 286, 307, 33 Sup. Ct. 83, 57 L. Ed. 266; Dye v. United States, 262 Fed. 6, 9.

II. DISCRIMINATION.

See Discrimination.

§2½. In General.

CASES 1887-1908

(a) A discount allowed by a railroad company where consignment of coal in one year shall amount to 30,000 tons or upward is an unjust discrimination. Providence Coal Co. v. Providence & Worcester R. Co., 1 I. C. R. 363.

(b) A contract by a railroad company to carry corn at the customary rates, and to grant a rebate to the shipper, is not illegal as being in violation of the law to prevent unjust discrimination; nor is it fraudulent as to the purchaser of the corn. Christie v. Missouri P. R. Co. (Mo.), 2 I. C. R. 22.

(c) The action of the Grand Trunk Railway Company of Canada in transporting coal and coke under a schedule specifying a total rate of $1 per ton from Buffalo, Blackrock, and Suspension Bridge, in the United States, to Hamilton, Dundas, and several other points in Canada,—the published tariff rate,—but accepting a reduced charge, or allowing a rebate of 25 cents a ton, in favor of certain consignees at Hamilton, Dundas, and other points in Canada,—is in violation of the Act to Regulate Commerce, and unlawful. Re Grand Trunk R. Co. (Com.), 2 I. C. R. 496.

(d) An agreement by a railroad company to transport coal at a specified rebate from regular tariff rates, in consideration of the shipper's erecting a dock and coal pockets on the company's land for use by both parties, is not, as a matter of law, void because of unjust discrimination against other shippers; especially where the shipper also agrees to do his own loading and to ship in large quantities. The question of unjust discrimination is one of fact. Root v. Long Island R. Co. (N. Y.), 2 I. C. R. 576.

(e) The practice by a common carrier of arbitrarily determining what persons should receive a so-called "manufacturers' rate" is a violation of the Act to Regulate Commerce. Re Louisville & N. R. Co. (Com.), 4 I. C. R. 157.

ALL OTHER CITATIONS

St. L. I. M. & S. Ry. Co. v. West Bros, (Tex. 1913), 159 S. W. 142, 144; Johnson v. N. Y. N. H. & H. Ry. Co., (Me. 1913), 88 Atl. 988, 991; Burgess Bros Co. v. Stewart, 184 N. Y. S. 199.

§3. Credit Account.

CASES 1887-1908

(a) A guaranty executed to a carrier by consignees or third parties, which might be construed to enable the carrier, in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made. Phelps v. Texas & P. R. Co. (Com.), 4 I. C. R. 44.

(b) The exercise by a railway company of the right to prepayment, or to retain a lien upon the goods until payment is made, or to hold the consignee responsible in case of delivery before payment, or the waiver of some of such rights at different times, cannot be construed to be a denial of equal facilities

or a discrimination. Little Rock & M. R. Co. v. St. Louis, I. M. & S. R. Co. (C. C. W. D. Ark.), 4 I. C. R. 537.

(c) Requiring prepayment of freight charges by a connecting carrier, without requiring it of other shippers or carriers at the same place, does not constitute an unreasonable or undue disadvantage within the meaning of the Interstate Commerce Act. Little Rock & M. R. Co. v. St. Louis & S. W. R. Co. (C. C. App. 8th C.), 4 I. C. R. 854.

(d) A guaranty executed to a carrier by consignees or third parties, which might be construed to enable the carrier, in consideration of freight delivery before settlement of transportation charges, to exact for services rendered in moving and delivering the freight whatever it chooses to demand, cannot be used by the carrier to force payment of charges in excess of those it would be entitled to collect or receive if previous freight delivery had not been made. Phelps v. Texas & P. R. Co., 6 I. C. C. 36.

IMPORTANT CASES SINCE 1908

(e) A carrier, under the Act as amended in 1906, practices a discrimination in respect to transportation in favor of one shipper and against others of the same class, shipping the same commodity from the same points and under substantially the same conditions, by the device of extending credit to such favored shipper for the freight charges on such shipments by it, while exacting and collecting cash compensation for substantially similar shipments from the other shippers in question. U. S. v. Hocking Valley Ry. Co., 194 Fed. 234, 246.

(f) If, a direct cash payment for exclusive tonnage is a rebate in respect to property transported under such a contract, any device whereby a similar payment is made comes within the prohibition of the statute. A loan at less than the market rate of interest, like a lease at less than market rental (C. C. C. & St. L. Ry. Co. v. Hirsch, 204 Fed. 849, 853, 123 C. C. A. 145), is in effect, a gift of the difference between the contract and the market rate, and is, in every respect, equivalent to a direct payment of that amount of money. Vandalia R. Co. v. United States, 226 Fed. 713, 717.

ALL OTHER CITATIONS

U. S. v. Sunday Creek Co., 194 Fed. 252, 254; Meeker & Co. v. Lehigh Valley R. R. Co., 21 I. C. C. 129, 161; Hocking Valley Ry. Co. v. United States, 210 Fed. 735, 740, 745;

III. FREE TRANSPORTATION.

See Express Companies §5; Tap Lines §8; Transportation.

§4. In General.

IMPORTANT CASES SINCE 1908

(a) Defendant, an employe of a railroad company, and entitled to receive a pass, delivered his pass to one Pounds, who was not an employe and not entitled to use or receive the same, but did use it in an interstate journey. Defendant was prosecuted under section 1 of the Act of June 29, 1906, prohibiting the use of free transportation by anyone except certain persons enumerated in the Act. HELD, under this section the statute intended that all persons making use of any interstate free pass should be liable to the penalty prescribed by the statute, unless they are excepted by the terms thereof, and that Pounds not being so excepted, defendant was liable for aiding and abetting an act in violation of the statute. U. S. v. Williams, 159 Fed., 310 313.

(b) Riding upon the tender of an interstate train by permission of the engineer without payment of fare is made unlawful by the act, under which any common carrier violating the provisions of that statute against free transportation is guilty of a misdemeanor and subject to a penalty, and any other person, other than those excepted, who uses such interstate free transportation, is made subject to a like penalty. Illinois C. R. Co. v. Messina, 36 Sup. Ct. 368, 369; 240 U. S. 395; 60 L. Ed. 709.

ALL OTHER CITATIONS

U. S. v. Martin, 176 Fed. 110, 113; Colorado Free Pass Investigation, 26 I. C. C. 491, 492, 495, 496; Montana Pass Situation, 29 I. C. C. 411; In Re Financial, etc., of Certain Carriers, 31 I. C. C. 261, 264; United States v. Illinois Centr. R. Co., 230 Fed. 940, 941.

IV. MISBILLING.

See Classification §8.

§5. In General.

See Classification V.

CASES 1887-1908

(a) Recommendations by Commission for regulations for detecting underbilling and of legislative action imposing penal-

ty upon shippers guilty of underbilling. Re Unbilling, 1 I. C. R. 813.

(b) Underbilling weights of freight, whereby one person pays less compensation for like services than another is within inhibition of Act. Re Underbilling, 1 I. C. R. 813.

(c) The methods of inspection adopted by certain railroad companies, to detect and prevent underbilling and false classification, are approved by the Commission, but can not be accepted as a substitute for the requirement that every carrier should itself be held, and in turn should itself hold every station agent, responsible for the correctness of the weight and classification of freight received, so far as the same can be practically ascertained. Re Underbilling, 1 I. C. R. 813.

(d) The permission by a common carrier, of the practice of underbilling the weight of freight or giving it a false classification, whereby less compensation is paid by one person than by another for "a like and contemporaneous service," is within the inhibition of the Act to Regulate Commerce. Re Underbilling, 1 I. C. R. 813.

(e) The permission of a common carrier, of the practice of underbilling the weight of freight or giving it a false classification, whereby less compensation is paid by one person than by another for a like and contemporaneous service is within the inhibition of the Act. The methods of inspection adopted by certain railroad companies, to detect and prevent underbilling are approved by the Commission, but can not be accepted as a substitute for the requirement that every carrier should itself be held, and in turn should itself hold every station agent, responsible for the correctness of the weight and classification of freight received, so far as the same can be practically ascertained. Re Underbilling, 1 I. C. C. 813.

(f) Underbilling, in its devices and its fruits, must necessarily be participated in by the owner of the goods; it can not be absolutely put down by imposing penalties upon the carriers alone. The complete termination of this practice is exceedingly to be desired, and there can be no doubt that this end will be greatly promoted by legislative recognition of the fact that not only the carrier but the shipper also, who both participate in the methods and the results of unjust discrimination, are each responsible to the public for the wrong which every such transaction involves. Re Underbilling, 1 I. C. C. 813, 821.

(g) Provisions against false billing not applicable to rebates.—The provision of the Interstate Commerce Act against false billing, classification, and weighing, does not cover such means of evasion of the Act as rebates, drawbacks, or special rates. United States v. Hanley, 7 I. C. C., App IX.

(h) Mistake of carrier's agent will not render shipper liable for false description of goods in bill of lading.—A shipper of goods who correctly describes their character to a contracting freight agent of the company over whose line they are shipped does not falsely describe them, within the meaning of the Interstate Commerce Act, although the agent describes them in the bill of lading as "gas reservoir materials," while they are intended for use in the construction of a malt house. Atchison, Topeka & Santa Fe Ry. Co. v. Goetz & Brada Manufacturing Co., 7 I. C. C. XIV.

(i) Complainant attacked the collection by defendants of charges in excess of the tariff rate on certain shipments of fruit from Michigan points to Chicago, and an unlawful contract with a delivering agent at Chicago, and thereupon complainant insisted that defendants had been guilty of penal offenses under the law which should be reported for prosecution. The complainant disclaimed at the hearing any demand for reparation or damages. The facts show errors in charges arising from lack of knowledge by the agent at Chicago, of the kind of package used, or the actual contents of the package shipped to complainant, the shipments having been unloaded by complainant, and also from a practice by the agent of the initial carrier at one point temporarily used as a receiving station for fruit, of making a charge in addition to the freight rate without the knowledge of the railroad company. The compensation paid to the delivering agent in Chicago for unloading and handling the freight was apparently reasonable. HELD, that defendants were not guilty of any wilful or intentional violation of the law. Davies v. P. M. R. R. Co., 10 I. C. C. 405.

(j) The defendants were not shown to be guilty of any wilful or intentional violation of the law, where it was charged that they imposed charges in excess

of the tariff rate on certain shipments of fruit from Michigan points to Chicago, and the facts showed the existence of errors in charges arising from lack of knowledge by the Chicago agent of the kind of package used, or the actual contents of the package shipped to complainant, the shipments having been unloaded by complainant, and that such errors also arose from a practice of the agent of the initial carrier at one point temporarily used as a receiving station for fruit, making a charge in addition to the freight rate, without the knowledge of the railroad company. Davis v. Pere Marquette R. Co., 10 I. C. C. 405.

IMPORTANT CASES SINCE 1908

(k) The law prohibits misbilling, and the carriers employ inspectors whose duty it is to see that the tariff regulations are complied with. National Association Waste Dealers v. A. A. R. R. Co., 68 I. C. C. 748, 752.

(l) If the carriers could lawfully base rates on ordinary livestock upon the values declared by shippers, the value declared would be a part of the description of the commodity and the shipper who, by undervaluing, secured a lower rate than he was entitled to would be guilty of violating section 10 of the act, and, by claiming full value in case of loss or damage, would subject himself to prosecution. North Packing & Provision Co. v. C. M. & St. P. Ry., 69 I. C. C. 235, 241.

(m) The law provides severe penalties for misdescription of traffic for purpose of obtaining lower rates, and it is not to be presumed that shippers will wilfully and knowingly violate the law. National Paving Brick Mfrs. Asso. v. A. & V. Ry. Co., 80 I. C. C. 179, 183.

(n) Conviction of defendant, a refining company, on the charge of receiving concessions from a carrier in violation of the Interstate Commerce Act Feb. 19, 1903, §1, as amended by Act June 29, 1906, §2, by securing transportation of gasoline at less than the published rate as "unrefined naptha," held not sustained by the evidence, which showed by large preponderance that the product shipped could not be used as commercial gasoline without further refining, for which purpose the shipments were made to defendant's refinery, and that "unrefined naptha" correctly designated the product and "gasoline" did not; that while defendant had previously shipped the same product as gasoline, and other producers did so, that was because at the time there was no rate covering unrefined naptha, and the term "gasoline" was loosely applied to both the finished and unfinished product. Gulf Refining Co. v. United States, 284 Fed. 90.

ALL OTHER CITATIONS

Bannon v. Southern Express Co., 13 I. C. C. 516, 519; In Re Rates, Practices, Accounts and Revenues of Carriers, 13 I. C. C. 212; Ford Co. v. M. R. R. Co., 19 I. C. C. 507, 510; Beekman Lumber Co. v. Society of Record Assn's. v. A. & R. R. R. Co., 40 I. C. C. 347, 354; U. S. Industrial Alcohol Co. v. Director General, 68 I. C. C. 389, 391, 392.

V. OVERCHARGES AND CLAIMS.

See Overcharges.

§5½. In General.

See Loss and Damage IV.

CASES 1887-1908

(a) When the refund of an excessive charge by a carrier has been unnecessarily delayed for a considerable period, the officials responsible therefor become fairly chargeable with willful intention to violate the law. Phelps v. Texas & P. R. Co. (Com.), 4 I. C. R. 363.

(b) Complainant alleged the collection by defendants of charges in excess of the tariff rate on certain shipments of fruit from Michigan points to Chicago, and an unlawful contract with a delivering agent in Chicago, and thereupon complainant insisted that defendants had been guilty of penal offenses under the law which should be reported for prosecution. The complainant disclaimed at the hearing any demand for damages or reparation. The facts show errors in charges arising from lack of knowledge by the agent at Chicago of the kind of package used, or the actual contents of the package shipped to complainant, the

shipments having been unloaded by complainant, and also from a practice by the agent of the initial carrier at one point temporarily used as a receiving station for fruit, of making a charge in addition to the freight rate without the knowledge of the railroad company. The compensation paid to the delivering agent in Chicago for unloading and handling the freight in that city was apparently reasonable. HELD, upon consideration of the evidence, that defendants were not guilty of any wilful or intentional violation of the law. Davies v. Pere Marquette R. Co. et al., 10 I. C. C. 405.

IMPORTANT CASES SINCE 1908

(c) A grain company filed a claim for loss and damage of a shipment of peaches in which it claimed that the invoice price at the place of shipment was $400, and that it had lost $175.19, when the invoice price of the peaches was really $320. The company was indicted on the ground that by making up this fictitious claim it attempted to get from the carriers more than its real damages and thereby rendered the compensation of the carriers for the transportation less than the regular established charges. HELD that an offense against the Interstate Commerce Act was committed. Laser Grain Co. v. United States, 250 Fed. 826.

ALL OTHER CITATIONS

U. S. v. T. & P. R. R. Co., 185 Fed. 820, 822, 823, 824; In Re Express Rates, 24 I. C. C. 380; New Orleans Shippers' Asso. v. I. C. R. R. Co., 34 I. C. C., 32 33; Laser Grain Co. v. United States, 250 Fed. 825; United States v. Ferger, 39 S. Ct. 445.

§6. False Claims.

IMPORTANT CASES SINCE 1908

(a) The Act provides: "nor shall any carrier charge, or demand, or collect, or receive a greater or less or different compensation for such transportation of passengers or property, or for any service in connection therewith, between the points named in such tariffs than the rates, fares, and charges which are specified in the tariff filed and in effect at the time." HELD, a railroad is criminally liable for merely demanding storage charges in excess of those lawfully applicable. U. S. v. T. & P. R. R. Co., 185 Fed. 820, 822, 824.

(b) Where a carrier willfully and knowingly demands and receives storage charges against a shipper for cars detained at a point other than the customary and usual place of delivery or point of destination, it is criminally liable under the Act to Regulate Commerce, although notice of the arrival of the car at point of detention was given by the carrier to the shipper. United States v. Texas & P. R. R. Co., 185 Fed. 820, 824.

(c) That carriers habitually overcharged complainant's members is a matter for criminal proceeding. New Orleans Shippers' Asso. v. I. C. R. R. Co., 34 I. C. C. 32, 33.

(d) That carriers habitually overcharged complainant's members is a matter for criminal proceeding. New Orleans Shippers' Asso. v. I. C. R. R. Co., 34 I. C. C., 32, 33.

ALL OTHER CITATIONS

In Re Express Rates, 24 I. C. C. 380; Laser Grain Co. v. United States, 250 Fed. 826; Laser Grain Co. v. United States, 250 Fed. 825, 826; United States v. Ferger, 39 S. Ct. 445.

VI. REBATING.

See Advertising II; Allowances VII; Crimes §18; Discrimination §5; Evidence §48; Water Carriers II.

A. Elements of Offense.

§7. In General.

See Lease.

CASES 1887-1908

(a) Upon an investigation by the Commission it appeared that the Grand Trunk Railway Company of Canada transports coal and coke under a schedule specifying a total rate from Buffalo, Black Rock, and Suspension Bridge, in the United States, to Hamilton, Dundas, and several other points in Canada; and that the published tariff rate for such transportation from that point named to Hamilton and Dundas is $1 a ton, but that it accepts a reduced charge, or allows a rebate of 25 cents a ton in favor of certain consignees at Hamilton, Dundas, and other points in Canada. HELD, that the reduced charge or rebate is illegal. Matter of Grand Trunk Railway Co. v. 2 I. C. R. 496.

(aa) Any benefit in relation to the shipment of goods, having a definite money value, conferred gratis by the carrier upon one shipper and not conferred upon another, is an undue reduction in the price of carriage to the former, and is illegal under the Interstate Commerce

Act, where the service to each is admittedly under substantially similar circumstances and conditions. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co. (C. C. W. D. Mich), 4 I. C. R.

(ab) Interstate shipments only are affected by the United States Act of March 2, 1889, against obtaining transportation for property over railroads at less than regular rates. United States v. Howell, 4 I. C. R. 818.

(b) A railway company owning the entire stock of a development company, which had been organized for the purpose of holding the title to certain lands of the railway company, caused grain to be purchased in Kansas City in the name of the development company, transported over the lines of the railway company, to Chicago, and there sold upon the market. The development company had no bona fide interest in the transaction. Neither the railway company nor the development company purchased the grain for the purposes of ownership, the whole transaction being simply a device to secure its transportation at other than the published rate; and the only rate paid was the profit upon the transaction, which varied with each shipment. HELD, that this constituted a violation of the 2d, 3d and 6th sections of the Act to Regulate Commerce. Grain Rates of Chicago Great Western Ry. Co., 7 I. C. C. 33.

(c) The second section of the Act to regulate commerce, which prohibits rebates whereby one shipper is preferred to another, refers to a like and contemporaneous service performed under similar circumstances and conditions; and such section is not violated by the granting of divisions of rates to lumber mills owning or controlling short originating roads, while other carriers fail or refuse to allow like concessions to complainants located in a different section of the country. Central Yellow Pine Asso. v. Vicksburg, S. & P. R. Co., 10 I. C. C. 193.

(d) The Act, which requires carriers to publish and adhere to their tariffs, has been grossly and continuously violated by the Santa Fe during the last five years in the following respects: it published rates on interstate shipments of coal from mines in Colorado and New Mexico which, under the tariffs, applied only to the transportation therefor, but which for the Colorado Fuel & Iron Company were made by the railway company to include the price of the coal, and such price was paid to the fuel and iron company by the railway company. While giving rebates to the fuel and iron company from such tariff rates, it charged the full tariff rates on interstate shipments of coal by other shippers in not only the general coal region involved, but in the same coal field. This practice of the railway company resulted in closing markets for coal to shippers competing with the fuel and iron company. In the matter of alleged unlawful rates and practices in the transportation of coal and mine supplies by the A. T. & S. F. Ry. Co., 10 I. C. C. 473.

(e) Complainant attacked through rates charged on livestock from points in Indian Territory to Kansas City, Mo., as unreasonable to extent they exceeded the combination of locals on intermediate points. In some cases the defendant charged the combination of locals and in other cases the through rate. Refunds were made by carriers in some cases based on the combination, although that combination was not published in a tariff cancelling the through rate. HELD, the record should be referred to the department of prosecutions, cases dismissed. D. Morgan v. M. K. & T. Ry., 12 I. C. C. 525.

IMPORTANT CASES SINCE 1908

(f) The fact that the original Interstate Commerce Act, which made rebates unlawful, did not prescribe any punishment for a shipper who accepted rebates, does not affect the application of the construction of that act as not invalidating the contract of carriage because of the rebate provision to contracts made under subsequent amendments which did impose punishment on the shipper. Adams Express Co. v. Darden, 286 Fed. 61.

C. 220, 245, 246; Allowances on Anthracite Coal, 36 I. C. C. 164, 171; Alleged Rebates to U. S. Steel Corp., 36 I. C. C. 557; Vandalia R. Co. v. United States, 226 Fed. 713, 716; Central R. Co. of New Jersey v. United States, 229 Fed. 501, 508; Mitchell Coal & Coke Co. v. P. R. R. Co., 38 I. C. C. 40, 43; Northampton & B. R. R. Co. Case, 41 I. C. C. 68, 74; United States v. Cleveland, C. C. & St. L. Ry. Co., 234 Fed. 178, 184, 185, 186; The Alaska Investigation, 44 I. C. C. 680, 705, 709; N. C. Ry. Co. v. U. S., 241 Fed. 25, 30; Michigan Cent. R. R. v. U. S., 246 Fed. 353; Pittsburgh, C., C. & St. L. Ry. Co. v. Fink, 40 Sup. Ct. 27; Lehigh Coal & Navigation Co. v. United States, 266 Fed. 457; Mobile & O. R. Co. v. Laclede Lumber Co., (Mo. 1919), 216 S. W. 798; Wertheim Coal & Coke Co. v. L. V. R. R. Co., 62 I. C. C. 211, 216; Cambia Steel Co. v. Director General, 64 I. C. C. 737, 740, 741.

§8. Intent and Knowledge.

IMPORTANT CASES SINCE 1908

(a) The Elkins Act originally made a carrier who should offer, grant, or give a rebate, concession or discrimination criminally responsible. This was amended by the Hepburn Act, so that the carrier, to be criminally liable, must knowingly offer, grant or give a rebate or concession or discrimination. United States v. Erie R. Co., 222 Fed. 444, 446.

(b) Under the Interstate Commerce Act the railroad company is held to know the tariffs which it has filed and published. It is also presumed to know that a departure from such tariffs constitutes a violation of law and subjects it to punishment. United States v. Erie R. Co., 222 Fed. 444, 448.

ALL OTHER CITATIONS

Armour Packing Co. v. U. S., 209 U. S. 56, 71, 85, 28 Sup. Ct. 428, 52 L. Ed. 681; C. B. & Q. R. R. v. U. S., 209 U. S. 90, 28 Sup. Ct. 439, 52 L. Ed. 698; U. S. v. Merchants' & Miners' Transp. Co., 187 Fed. 363, 366; U. S. v. T. & P. R. R. Co., 185 Fed. 820, 821, 824; A. T. & S. F. Ry. Co. v. U. S., 170 Fed. 250, 255, 256; Standard Oil Co. of N. Y. v. United States, 179 Fed. 614, 625; Standard Oil Co. of Indiana v. U. S., 164 Fed. 376, 382; United States v. Erie R. Co., 222 Fed. 444, 449, 450; Grand Trunk Ry. Co. v. United States, 229 Fed. 116, 117, 119; Central R. Co. of New Jersey v. United States, 229 Fed. 501, 509; Michigan Cent. R. R. v. United States, 246 Fed. 353.

§9. Payment.

IMPORTANT CASES SINCE 1908

(a) To warrant a conviction under the Elkins Act of Feb. 19, 1903, on a charge of accepting a rebate, concession, or rebate, it is unnecessary to charge or prove the payment or receipt thereof. It is sufficient if it is shown that the concession was offered by the carrier, or his agent, and by the shipper accepted. The fact that the carrier, after the offer had been made by it and accepted by the shipper refused to make payment of the rebates, did not prevent a conviction under an indictment charging the shipper with the acceptance of such an offer, the acceptance of the offer being the gist of the offense. U. S. v. Bunch, 165 Fed. 736, 738.

§10. Posting of Tariff.

See Infra §22, Tariffs III.

IMPORTANT CASES SINCE 1908

(a) It is unlawful to be engaged in interstate commerce by carriage of traffic in respect of which no rate has been published and filed. Maxwell v. W. F. & N. W. Ry. Co., 20 I. C. C. 197, 198.

(b) It is unlawful not to file a tariff stating storage charges and privileges. Goldenberg v. Clyde S. S. Co., 20 I. C. C. 527, 529.

(c) To a criminal prosecution under the Act as amended June 29, 1906, against railroads for accepting from a shipper less than the published rate filed with the Interstate Commerce Commission, it is no defense that defendants had spread broadcast among the shippers of the country an announcement of the lower rate accepted, when in fact such rate had not been filed and published as required by the Act, and the higher rate was the only one lawfully in effect. U. S. v. Merchants' & Miners' Transp. Co., 187 Fed. 363, 365.

(d) That the carrier failed to keep its rate sheet posted, as required by law, is no defense to a shipper who has, by accepting a settlement on the basis of a transit rate, when his shipment was only entitled to the local rate, been guilty of accepting a rebate. Nichols & Cox Lumber Co. v. United States, 212 Fed. 588, 593.

ALL OTHER CITATIONS

U. S. v. Standard Oil Co., 170 Fed. 988 1002, 1007; U. S. v. I. T. R. R. Co., 168 Fed. 546, 549; N. Y. C. & H. R. R. R. Co. v. U. S., 166 Fed. 267, 270; Camden Iron Works v. U. S., 158 Fed. 561, 564.

§11. Route and "Common Arrangement."

See Through Routes and Joint Rates §2.

Important Cases Since 1908

(a) A tariff filed with the Interstate Commerce Commission by the Penn. R. R. and concurred in by the N. Y. C. & H. R. R. R. fixed the rate on petroleum and its products from Olean, N. Y., to Norwood, N. Y., at 26½c, and stated that "the route should be in accordance with agreed percentages and as designated within." It did not, however, designate the route, and no percentage sheets were filed with the Commission. HELD, that the route to which the tariff applied was the natural and direct route from Olean to Norwood by way of Rochester, and not the roundabout route by Buffalo and that the tariff was therefore sufficiently definite to establish the rate specified over the former route, in a criminal prosecution under the Elkins Act for accepting a concession. Standard Oil Co. of N. Y. v. U. S., 179 Fed. 614, 623.

ALL OTHER CITATIONS

Standard Oil Co. of New York v. U. S., 179 Fed. 614, 622.

§12. Transportation.

IMPORTANT CASES SINCE 1908

(a) In a prosecution under the Elkins Act for receiving a rebate whereby property is transported at a less than the published rate, the transportation is an essential element of the offense and equally takes place over any and all of the route traveled and during transportation the crime is being continuously committed. Armour Packing Co. v. U. S. 209 U. S. 56, 76, 28 Sup. Ct. 428, 52 L. Ed. 681; C. B. & Q. R. R. v. U. S., 209 U. S. 90, 28 Sup. Ct. 439, 52 L. Ed. 698.

ALL OTHER CITATIONS

Langdon v. Penn. R. R. Co., 194 Fed. 486, 496.

B. Number of Offenses.

§13. Payment.

IMPORTANT CASES SINCE 1908

(a) Where a shipper makes a number of shipments and pays the full legal rate on each, and the carrier remits by various checks a portion of this rate, the offense is complete when the carrier remits a single check, and each remittance constitutes a separate offense. N. Y. C. & H. R. R. R. v. U. S., 212 U. S. 481, 498, 29 Sup. Ct. 304, 53 L. Ed. 613.

(b) In an indictment under the Elkins Act against a shipper for receiving concessions, the settlement between the carrier and the shipper of the difference betwen the concession and the legal rate is an essential part of the offense, and the number of offenses cannot therefore exceed the number of payments made by the carrier. U. S. v. Standard Oil Co., 170 Fed. 988, 997.

ALL OTHER CITATIONS

U. S. v. Stearns Salt & Lumber Co., 165 Fed. 735, 736; U. S. v. Bunch, 165 Fed. 736, 738, 739, 740, 741; Standard Oil Co. of Indiana v. U. S., 164 Fed. 376, 386; U. S. v. A. T. & S. F. Ry. Co., 163 Fed. 111, 113; U. S. v. Central Vt. Ry. 157 Fed. 291, 293; U. S. v. Gt. N. Ry. Co., 157 Fed. 288, 290.

§14. Shipments.

IMPORTANT CASES SINCE 1908

(a) Defendant was indicted under the Elkins Act for accepting and receiving a concession. The shipments in question were carried in 1,462 carloads and were settled for, and the charges thereon paid, upon 36 distinct days within the period in question. In the regular course of business, whenever an order came to defendant from a buyer (the order being in gallons or barrels, not cars), the order was translated by defendant's clerks into carloads according to the capacity of the cars, running all the way from 30,000 to 80,000 lbs. The oil was then loaded upon the cars, some single orders filling six or eight cars. The trial court, in imposing a fine, counted each single carload as a separate offense. HELD, such a method of computation of offenses was erroneous, since the offense charged was not committed until payment was made and the number of offenses should correspond with the number of settlements made. Standard Oil Co. of Indiana v. U. S., 164 Fed. 376, 386.

(b) Where an indictment, under the Elkins Act, charges as separate and distinct offenses, the acceptance of concessions, by a shipper on different days, each shipment constitutes a separate offense. U. S. v. Vacuum Oil Co., 158 Fed. 536, 539.

C. Liability.

§14½. In General.

CASES 1887-1908

(a) A railroad corporation is not subject to an indictment under the Interstate Commerce Act. United States v. Michigan C. R. Co. (D. C. N. D. Ill.), 3 I. C. R. 287.

§15. Act of Agent.

See Agency.

CASES 1887-1908

(a) When an agent of a railroad is prosecuted under the Interstate Commerce Act, it is not necessary either to allege or prove that the particular unlawful act complained of was done under authority conferred by its principal or by its direction; it is sufficient to show that the accused was in fact an and that the wrong was committed under transportation of officers and employes agent of a railroad subject to the Act, States v. Tozer (D. C. E. D. Mo.), 2 I. C. R. 422.

(b) If the agents or employes of a railroad, of whatever rank, make an unlawful contract, or if they knowingly aid and abet in the execution of an unlawful contract, they become liable to the penalties of the Act violated; but the proof, as in all criminal cases, should be clear and leave no reasonable ground for doubt as to their guilty knowledge of the illegality of the act. United States v. Michigan C. R. Co. (D. C. N. D. Ill.), 3 I. C. R. 287.

(c) Men who occupy merely clerical positions, who are only the instruments which carry out an unlawful action or contract made by their superior officers, which they do not concoct, should not be punished for violation of the Interstate Commere Act, except where the proof of guilty knowledge and participation is clear. United States v. Michigan C. R. Co. (D. C. N. D. Ill.), 3 I. C. R. 287.

(d) The Interstate Commerce Act was intended to punish only an active and willful violation of its provisions. Men who occupy merely clerical positions, who are only the instruments which carry out an unlawful action or contract made by their superior officers, which they do not concoct, should not be punished except where the proof of guilty knowledge and participation is clear. U. S. v. Mich. Central R. Co., 3 I. C. R. 287.

(ef) An indictment will lie against any officer, director, agent, or employe of a carrier who aids and abets in violation of the Interstate Commerce Law, as well as against the carrier, such officers and employes having knowledge that they were engaged in an illegal act. United States v. Cleveland, C. & S. R. Co., (C. C. N. D. Ohio), 3 I. C. R. 290.

(g) Unreasonable and unlawful preference may be given by a common carrier by granting free transportation over its lines from one State into another to one passenger while denying it to others. Such carrier is guilty of misdemeanor under the Interstate Commerce Act, and for such an offense an indictment will lie against any officer, director, agent or employe who aids and abets in such violation of the law, as well as against the an illegal act. This does not apply to carrier, such officers and employes having knowledge that they were engaged in color of this office or agency. United

of the carrier. The U. S. v. The Cleveland, Canton & Southern R. Co., 3 I. C. R. 291.

IMPORTANT CASES SINCE 1908

(h) The corporation which profits by the transaction of rebating, may be held punishable by fine, because of the knowledge and intent of its agents to whom it has intrusted authority to act in the subject matter of making and fixing rates of transportation, and whose knowledge and purposes may well be attributed to the corporation for which the agents act. N. Y. C. v. U. S., 212 481, 495, 29 Sup. Ct. 304, 53 L. Ed. 613.

(i) A conviction for rebating against a railroad can be sustained although an agent who was guilty of giving the rebate and jointly indicted with the company may be acquitted. United States v. Erie R. Co., 222 Fed. 444, 447.

(j) The Elkins Act makes the carriers' agents and officers, who come within its provisions, criminally responsible, as well as the carrier. An agent or officer can therefore properly be jointly indicted with his principal. United States v. Erie R. Co., 222 Fed. 444, 447.

ALL OTHER CITATIONS

Nicholis & Cox Lumber Co. v. United States, 212 Fed. 588, 593; United States v. Lehigh Valley R. Co., 222 Fed. 685; United States v. Cleveland, C. C. & St. L. Ry. Co., 234 Fed. 178.

§16. Connecting Carrier.

IMPORTANT CASES SINCE 1908

(a) The concluding part of section 1 of the Elkins Act brings all the carriers who have participated in any rate filed or published within the terms of the Act, as much so as if the tariff had been actually published and filed by such participating carrier, so that a connecting carrier may be convicted of rebating for accepting a lower rate than the one filed with the Commission by the initial carrier. U. S. v. N. Y. C. & H. R. R. R. Co., 212 U. S. 509, 515, 29 Sup. Ct. 313, 53 L. Ed. 629.

§16½. Giver of Rebate.

CASES 1887-1908

(a) Employers who knowingly permit their employes to obtain less than schedule rates for transportation of their property over railroads, and who receive the benefit of such conduct, either directly or indirectly, may be punished under the United States Act of March 2, 1889, against obtaining transportation at rates less than the schedule. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(b) Receiving rebate not indictable. —Merely receiving a rebate will not subject a shipper to indictment under the section of the Interstate Commerce Act prohibiting false billing, weighing, classification, or representation of the contents of the package. United States v. Hanley, 7 I. C. C. App. IX.

(c) Shipper is in pari delicto in accepting illegal rate.—A shipper is in pari delicto with the carrier with reference to a contract of shipment which is illegal because it stipulates for a greater or less rate of transportation than is fixed by the Interstate Commerce Commission, although he did not in fact know that the contract was illegal. Miss. Kans., & Tex. R. R. Co. v. Bowles, 7 I. C. C. App LXII.

VII. INDICTMENT.

A. Charging Elements of Offense.

§17. In General.

CASES 1887-1908

(a) A count under the Interstate Commerce Act, §6, alleging the allowance of a rate less than the established and published rate which "was in force on that day," sufficiently negatives the inference that the rate might have been reduced by the carrier without notice, as permitted by that section. United States v. Tozer (D. C. E. D. Mo.), 2 I. C. R. 422.

(b) Counts under the Interstate Commerce Act, §6, for "undue and unreasonable preference," and "for undue or unreasonable prejudice or disadvantage," need not allege that the service for which a different rate was charged was rendered "under substantially similar circumstances and conditions,"—those words being found only in §4, in relation to greater charge for shorter haul. United States v. Tozer (D. C. E. D. Mo.), 2 I. C. R. 422.

(c) A count under the Interstate Commerce Act, §3, charging the subjection of a certain locality to an undue prejudice by charging its merchants a higher rate for transporting property to a certain point than was exacted from residents of a certain other locality, must show with precision that the lower rate was for transportation between the same

points as the higher rates. United States v. Tozer (D. C. E. D. Mo.), 2 I. C. R. 422.

(d) A count under the Interstate Commerce Act, §9, is sufficient if it shows with requisite certainty, by any apt language, that the accused has committed an act which gives one shipper or class of shippers an advantage, or subjects others to a disadvantage. United States v. Tozer (D. C. E. D. Mo.), 2 I. C. R. 422.

(e) A count under the third section is sufficient if it shows with requisite certainty by any apt language that the accused has committed an act which gives one shipper or class of shippers an advantage, or subjects others to a disadvantage. United States v. Tozer, 2 I. C. R. 422.

(f) Counts under the third section, for "undue and unreasonable preference" and for "undue or unreasonable prejudice or disadvantage," need not allege that the service for which a different rate was charged was rendered "under substantially similar circumstances and conditions"—those words being only found in the fourth section, in relation to greater charge for shorter haul. United States v. Tozer, 2 I. C. R. 422.

(g) A count under the third section, charging the subjection of a certain locality to an undue prejudice, by charging its merchants a higher rate for transporting property to a certain point than was exacted from residents of a certain other locality, must show with precision that the lower rate was for transportation between the same points as the higher rate. United States v. Tozer, 2 I. C. R. 422.

(h) A count under the sixth section, alleging the allowance of a rate less than the established and published rate which "was in force on that day," sufficiently negatives the inference that the rate might have been reduced by the carrier without notice, as permitted by that section. United States v. Tozer, 2 I. C. R. 422.

(i) An averment that an express company "was a corporation and a common carrier engaged in the transportation of property by railroad from one State of the United States to other States of the United States" tends to show simply that the company is an independent concern engaged in business for its own profit, and does not show that it is connected with any railroad company, hence it is insufficient to show that such company is within the purview of the Interstate Commerce Act; nor is it a sufficient description of a carrier delared by the Act to be subject to its provisions, as such carriers must be engaged in transportation of property "wholly by railroad." United States v. Herman Morsman, 3 I. C. R. 112.

(j) An indictment for violations of the Interstate Commerce Law in the transaction of a business which is subject to the provisions of that Law only when it is carried on in a particular manner must show that the particular business with respect to which complaint is made is so carried on as to be within the provisions of the Law. United States v. Herman Morsman, 3 I. C. R. 112.

(k) An indictment against an express company for violation of the Interstate Commerce Act, inasmuch as the liability of such companies under the Act must depend on the manner in which the business is conducted,—as, for instance, where it is conducted by railroad companies,—must show by proper averment the facts to bring the case within the law. United States v. Morsman (D. C. E. D. Mo.), 3 I. C. R. 112.

(l) The objection that an indictment under the long and short haul clause of the Interstate Commerce Act is an attempt by the government to interfere with the revenues of the railroad contrary to the terms of the contract under which it was built cannot be raised upon a motion to quash. United States v. Mellen (D. C. D. Kan.), 4 I. C. R. 247.

(m) Allegations of what was done in pursuance of an alleged conspiracy cannot enlarge the necessary allegations of an indictment for conspiracy under a particular statute, such as the Act of Congress against conspiracies in restraint of commerce. United States v. Pattson (C. C. D. Mass.), 4 I. C. R. 775.

(n) An indictment for conspiracy in restraint of trade or commerce, under the act of Congress of July 2, 1890, must declare the means by which it is intended to engross or monopolize the market; and it is not sufficient to declare the conspiracy in the words of the enactment. United States v. Patterson (C. C. D. Mass.), 4 I. C. R. 775.

(o) Insufficient allegations in an indictment, which alleges the offense with

reasonable precision are only surplusage under a general demurrer. United States v. Patterson (C. C. D. Mass.), 4 I. C. R. 775.

(p) To justify the finding of an indictment the evidence must satisfy the grand jury that a conviction of the accused by a petit jury would be warranted. Re Charge to Grand Jury 4 I. C. R. 784.

(q) Form of indictment for rebate on series of shipments.—In case of a rebate in a gross amount upon a series of shipments, the government, for the purpose of founding an indictment, may treat the whole series as one transaction, and the indictment need not specify the times of the respective shipments. United States v. Hanley, 7 I. C. C. App. IX.

(r) Injury from discrimination must be shown.—Merely alleging the wilful giving of a rebate to a shipper is insufficient in an indictment under a clause of the Interstate Commerce Act forbidding such act, without showing injury to a rival shipper therefrom. United States v. Hanley, 7 I. C. C. App. IX.

(s) Sufficiency of indictment for receiving special rates or rebates.—An indictment for unjust discrimination in giving or receiving special rates or rebates under the Interstate Commerce Act is insufficient unless it is shown that an advantage is given to one person over that obtained by another, where both, fairly considered, are upon an equality in the time, kind, and circumstance of their offering. United States v. Hanley, 7 I. C. C. App. IX.

(t) An indictment for unjust discrimination sufficient when charging that a specific charge was less than that charged another shipper.—An indictment for making unjust discrimination in freight rates against a shipper is sufficiently specific if it sets out the time, place, and circumstances under which the more valuable rate was received, and then alleges that the service was for less compensation than was received from another person "for doing for him a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions." U. S. v. De Coursey, 7 I. C. C. App. LVIII.

IMPORTANT CASES SINCE 1908

(u) An indictment for rebating, under the Elkins Act, describes the offense with sufficient particularity where it specifically states the elements of the offense so as to fully advise the defendant of the crime charged and to enable a conviction, if had, to be pleaded in bar of any subsequent prosecution for the same offense. N. Y. C. & H. R. R. R. v. U. S., 212 U. S. 481, 497; 29 Sup. Ct. 304, 53 L. Ed. 613.

(v) An indictment sufficiently charges failure to observe a published schedule of demurrage charges, where it charges that for two years defendant delivered to a certain consignee without collecting any demurrage charges or keeping record thereof, while making such charges and keeping such record as to other shippers and consignees. United States v. Erie Ry. Co., 209 Fed. 283, 285.

(w) An allegation in a complaint for violation of the Twenty-Eight Hour Law, §1 (Comp. St. §8651), that a shipment of live stock was made to a consignee in Denver, is to be construed as including the transportation to the point of final delivery to the consignee within the city, and not merely to the city limits. United States v. Chicago, B. & A. R. Co. (1923), 293 Fed. 185.

ALL OTHER CITATIONS

U. S. v. Sterling Salt Co., 200 Fed. 593, 596; Grand Trunk Ry. Co. v. United States, 229 Fed. 116, 117, 119; United States v. Philadelphia & R. Ry. Co., 232 Fed. 946, 953. United States v. P. K. Koenig Coal Co. (Mich., 1923), 219 Fed. 385.

§18. Concession or Rebate.

IMPORTANT CASES SINCE 1908

(a) An indictment under the Elkins Act which alleges the lawful rate to be $70 per car, and that defendant carrier charged and received only $64.75 a car, sufficiently charges a "concession," although the word "concession" is not mentioned in the count. A. T. & S. F. Ry. Co. v. U. S., 170 Fed. 250, 256.

§19. Description of Device.

CASES 1887-1908

(a) An indictment, under the Interstate Commerce Act, §2, for "Unjust discrimination," need not aver by what particular device the defendant managed to discriminate in favor of a particular shipper. United States v. Tozer (D. C. E. D. Mo.), 2 I. C. R. 422.

IMPORTANT CASES SINCE 1908

(b) An indictment against a shipper, under the Elkins Act, for receiving a rebate, whereby property is transported at

less than the published rate, is not insufficient on the ground of failing to set out the kind of device by which traffic was obtained, and of what the concession consisted, and how it was granted, where it distinctly and clearly charges each and every element of the offense, advises the defendant of what he is to meet at the trial, and where no objection is made to the indictment until after verdict by a motion in arrest of judgment. Armour Packing Co. v. U. S., 209 56, 83, 84; 28 Sup. Ct. 428, 52 L. Ed. 681; C. B. & Q. R. R. v. U. S. 209 U. S. 90, 28 Sup. Ct. 439, 52 L. Ed. 698.

(c) In an indictment for violation of the provision of Hepburn Act, making it unlawful to grant any rebate or concession whereby, "by any device whatever," any advantage is given or discrimination is practiced in favor of a shipper, it is not necessary to describe the device used. Dye v. United States, 262 Fed. 6.

ALL OTHER CITATIONS

C. St. P. M. & O. Ry. Co. v. U. S., 162 Fed. 835, 838; G. R. & I. Ry. Co. v. United States, 212 Fed. 577, 582; United States v. Erie R. Co., 222 Fed. 444.

§20. Language of Statute.

IMPORTANT CASES SINCE 1908

(a) While in pleading a criminal offense under the Elkins Act, as amended June 29, 1906, it is safe to employ the words of the statute, such action is not obligatory, and any language which is seen to be capable of apprising one of ordinary intelligence of the several essential ingredients of the crime meets every requirement. U. S. v. Sunday Creek Co., 194 Fed. 252, 254.

§21. Payment.

IMPORTANT CASES SINCE 1908

(a) In an indictment under section 1 of the Elkins Act against a shipper charging the acceptance of a concession, it is not necessary to aver that payment of the unlawful rate was made, since the charge being an acceptance of a concession, proof of payment is evidence not necessary to be pleaded. Standard Oil Co. of N. Y. v. U. S., 179 Fed. 614, 619.

ALL OTHER CITATIONS

U. S. v. Vacuum Oil Co., 158 Fed. 536, 538; U. S. v. Central Vt. Ry., 157 Fed. 291, 293.

§22. Posting of Tariff.

See Supra §10.

CASES 1887-1908

(a) To sustain an indictment for conspiracy to obtain less than established rates for the shipment of property over a railroad, it is not necessary that the rate should have been published by posting it as required by the interstate commerce law. United States v. Howell, 4 I. C. R. 818.

IMPORTANT CASES SINCE 1908

(b) An indictment against a shipper for obtaining rates lower than the lawfully published rate is not demurrable by reason of the fact that it fails to allege that the published rates were posted for public inspection as required by the Interstate Commerce Act as amended June 29, 1906. U. S. v. Miller 223 U. S. 599, 602, 32 Sup. Ct. 323, 56 L. Ed. 568, reversing 187 Fed. 375.

(c) An indictment for granting privileges not specified in the tariffs filed should allege that the tariffs were actually filed. United States v. Philadelphia & R. Ry. Co., 232 Fed. 946, 952.

ALL OTHER CITATIONS

U. S. v. N. Y. C. & H. R. R. R. Co., 157 Fed. 293, 294; U. S. v. Gt. N. Ry. Co., 157 Fed. 288, 290; U. S. v. Miller, 187 Fed. 375, 377.

§23. Route.

IMPORTANT CASES SINCE 1908

(a) An indictment, charging that the defendant carrier participated in the interstate transportation of coal over a route partly by rail and partly by water without having filed with the Interstate Commerce Commission tariffs for the rate of water transportation, averred that a shipment of coal from a point in Pennsylvania to a port in that state was from thence shipped by water to a point in the foreign state. The indictment further averred that defendant owned the railroad and the barge line by means of which the coal was transported. It was averred that the coal was rebilled at the port to the point of ultimate destination, but no consignor or consignee at that point was stated. HELD, that while the mere billing would not determine the character of the shipment, yet the indictment was insufficient to show an interstate shipment of coal over a route partly on land and partly by water; for, there being no averments showing that there were not two separate shipments, the original shipment between the two points in Pennsylvania may be taken as an in-

trastate shipment. United States v. Philadelphia & R. Ry. Co., 232 Fed. 946.

(b) The fact that the defendant was a carrier in interstate commerce over through routes part rail and part water is not sufficient to establish the fact that certain carloads involved in an indictment was carried in interstate commerce. If, for instance, a shipment were made over the railroad from the coal regions in Pennsylvania to a point in New Jersey to a certain consignee, and that consignee, after delivery, reshipped from the point in New Jersey to another point in New Jersey under a new consignment to a different consignee, the interstate through rate from the coal regions in Pennsylvania to the second point in New Jersey would not apply, but the intrastate rate would apply from the first to the second point in New Jersey. Gulf Colorado & Santa Fe Ry. Co. v. Texas, 204 U. S. 403, 27 Sup. Ct. 360, 51 L. Ed. 540; Chicago, Milwaukee & St. Paul Ry. Co. of Iowa, 233 U. S. 334, 34 Sup. Ct. 592, 58 L. Ed. 988; Pennsylvania R. Co. v. Mitchell Coal & Coke Co., 238 U. S. 251, 35 Sup. Ct. 787, 59 L. Ed. 1293. United States v. Philadelphia & R. Ry. Co., 232 Fed. 946, 949.

ALL OTHER CITATIONS

U. S. v. Vacuum Oil Co., 158 Fed. 536, 538; U. S. v. Vacuum Oil Co., 158 Fed. 536, 537; C. B. & Q. Ry. Co. v. U. S., 157 Fed. 830, 834; United States v. Grand Trunk Ry. Co. of Canada, 225 Fed. 283, 285.

§23½. Misrepresentation.

ALL CITATIONS

U. S. v. Sterling Salt Co., 200 Fed. 593, 595, 596, 597.

B. Joinder of Defendants.

§24. Principal and Agent.

IMPORTANT CASES SINCE 1908

(a) In indictments for rebating under the Elkins Act, a corporation and its agents may be legally joined as defendants in one indictment. N. Y. C. & H. R. R. R. Co. v. U. S., 212 U. S. 481, 497, 29 Sup. Ct. 304, 53 L. Ed. 613.

(b) An agent of a carrier charged with the duty of allotting coal cars, gave one mine entitled to receive five cars per day ten cars per day, alloting the excess five cars for fuel coal. The agent of said carrier then rebilled such cars after arrival at destination and sold the same as commercial coal. HELD, that although the agent received primarily the principal benefit from transaction, still the coal company could lawfully be indicted under the Elkins Act. Dye v. United States (1920) 262 F. 6.

§24½. Conspiracy.

CASES 1887-1908

(a) A contract between competing railroad companies is not necessarily "in restraint of trade" and illegal, within the meaning of the Anti-Trust Act of Congress, because it in some manner imposes a restriction upon competition. United States v. Trans-Missouri Freight Asso. (C. C. App. 8th C.), 4 I. C. R. 443.

(b) It is not unlawful for employes to associate, consult, or confer together with a view to maintain or increase their wages by lawful and peaceful means. Ames v. Union P. R. Co. (C. C. D., Neb.), 4 I. C. R. 619.

(c) Illegal combinations are not sanctioned in any degree by the Act of Congress of June 29, 1886, legalizing the incorporation of national trades unions. Arthur v. Oakes (C. C. App. 7th C.), 4 I. C. R. 744.

(d) A strike is not unlawful if it is merely a combination among employes having for its object their orderly withdrawal in large numbers or in a body from their employer's service, to accomplish some lawful purpose. Arthur v. Oakes (C. C. App. 7th C.), 4 I. C. R. 744.

(e) Violence and intimation are as much within the mischief of the Act of Congress against conspiracies in restraint of trade or commerce as negotiations, contracts, or purchases, if such means are used for the purpose of engrossing, monopolizing, or grasping a particular trade. United States v. Patterson (C. C. D. Mass.), 4 I. C. R. 775.

(f) A conspiracy to drive certain competitors out of the field by violence, annoyance, intimidation, or otherwise, is not within the prohibition of the Act of Congress against conspiracies in restraint of trade, where there is no aim to engross, monopolize, or grasp the market. United States v. Patterson (C. C. D. Mass.), 4 I. C. R. 775.

(g) A combination or conspiracy to obstruct or retard the passage of the mail, or to interfere or restrain commerce between the states, is unlawful. Re Charge to Grand Jury (No. 1) (D. C. S. D. Cal.), 4 I. C. R. 777.

(h) The corrupt or wrongful agreement of two or more persons with each

other, the employes of several railroads carrying mails and interstate commerce shall quit, and that successors shall by threats, intimidation, or violence, be prevented from taking their places, will constitute a conspiracy against interstate trade or commerce. Re Charge to Grand Jury (No. 2) (D. C. N. D. Ill.), 4 I. C. R., 781.

(i) Any concerted action upon the part of others to demand or insist, under any effective penalty or threat, upon railroad employes quitting to the injury of the mail service or the prompt transportation of interstate commerce, is a conspiracy, unless such demand or insistence is in pursuance to a lawful authority conferred upon them by the men themselves, and is made in good faith in the execution of such authority. Re Charge to Grand Jury (No. 2) (D. C. N. D. Ill.), 4 I. C. R. 781.

(j) To constitute an insurrection against the United States, it is not necessary that there should be blood shed, or that its dimensions should be so portentous as to insure probable success, but it is necessary that the rising should be in opposition to the execution of the laws of the United States, and should be formidable as for the time being to defy the authority of the United States. Re Charge to Grand Jury, 4 I. C. R. 781.

(k) Men who gather together to resist the civil or political power of the United States, or to oppose the execution of its laws in such force that the civil authorities are inadequate to put them down, and a considerable military force is needed to accomplish that result, become, with every person who knowingly incites, aids or abets them with whatever motives, insurgents. Re Charge to Grand Jury, 4 I. C. R. 781.

(l) Proof of demand and insistence under effective penalty or threat that railroad employes quit their service, and of consequent injury to the transportation of the mails or interstate commerce, imposes the burden upon those making such demand or insistence of showing lawful authority conferred by the men themselves, and good faith in its execution. Re Charge to Grand Jury, 4 I. C. R. 781.

(m) Insurrection is a rising against civil or political authority, the open and active opposition of a number of persons to the execution of law in a city or state. Re Charge to Grand Jury 4 I. C. R. 781.

(n) Opposition to the arrest of persons who have willfully obstructed or retarded the mails, by such a number of persons as would constitute a general uprising in that particular locality, and threatens for the time being the civil and political authority constitutes an insurrection. Re Charge to Grand Jury 4 I. C. R. 781.

(o) One who by speech, writing, or other inducements assists in setting on foot an insurrection or carrying it along, or who gives it aid or comfort, is guilty of a violation of law. Re Charge to Grand Jury (No. 2) (D. C. N. D. Ill.), 4 I. C. R. 781.

(p) Any combination or conspiracy on the part of any class of men who by violence and intimidation prevent the passage of railroad trains engaged in transporting the interstate commerce of the country is a violation of the Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states. Re Charge to Grand Jury (No. 3.) (D. C. N. D. Cal.), 4 I. C. R. 784.

(q) A combination or conspiracy that will interrupt the transportation of commodities from one state to another is within the Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states. Re Charge to Grand Jury (No. 3) (D. C. N. D. Cal.), 4 I. C. R. 784.

(r) Declarations by one of the parties to a conspiracy during the pendency of the illegal enterprise is evidence against all the others when the combination is proved. Re Charge to Grand Jury (No. 3) (D. C. N. D. Cal.), 4 I. C. R. 784.

(s) A combination of railroad employes to quit employment for the purpose of preventing their employers from running certain cars, with the intent to stop mail trains as well as others, is an unlawful conspiracy under U. S. Rev. Stat. § 3995, imposing a penalty for obstructing or retarding the passage of the mail. Thomas v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 4 I. C. R. 788.

(t) A combination between railroad employes with the purpose of paralyzing the interstate commerce of the country

by refusal of such employes to perform their duties is an unlawful conspiracy under the Act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states. Thomas v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 4 I. C. R. 788.

(u) The right of assembly and free speech secured by the constitution of Ohio cannot be used to carry out an unlawful and criminal conspiracy to obstruct the operation of a railroad by a receiver. Thomas v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 4 I. C. R. 788.

(v) A conspiracy is a combination of two or more persons by concerted action to accomplish a criminal or unlawful purpose, or some purpose not in itself criminal or unlawful, by criminal or unlawful means. Thomas v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 4 I. C. R. 788.

(w) A combination of railroad employes to compel railroad companies to injure the manufacturer of cars by breaking their contracts with him is an unlawful conspiracy. Thomas v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 4 I. C. R. 788.

(xy) Boycotts are unlawful though unaccompanied by violence or intimidation. Thomas v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 788.

(zaa) A combination of railroad employes to quit their employment, to compel their employer to withdraw from a mutually profitable relation with a third person, for the purpose of injuring the latter, when such relation has no effect on the character or reward of their services,—is an unlawful conspiracy. Thomas v. Cincinnati, N. O. & T. P. R. Co. (C. C. S. D. Ohio), 4 I. C. R. 788.

(bb) A combination whose professed object is to arrest the operation of interstate railroads until they accede to certain demands, whether such demands are reasonable or unreasonable, just or unjust, is an unlawful conspiracy in restraint of commerce among the states, under the Act of Congress of July 2, 1890, declaring every conspiracy in restraint of trade or commerce among the several states illegal. United States v. Elliott (C. C. E. D. Mo.) 4 I. C. R. 798.

(cc) An agreement between two or more men connected with a railroad company, that for the purpose of creating public sympathy in a strike they will discharge men from their employ who would otherwise not have been discharged, intending that such discharge shall stop the running of mail or interstate commerce trains and thereby raise public indignation, constitutes a conspiracy. Re Charge to Grand Jury (No. 4) (C. C. N. Ill.), 4 I. C. R. 801.

(dd) A wrongful and corrupt agreement between two or more men connected with a railroad, whatever their position, for the purpose of creating public sympathy in a threatened strike, or any other purpose, to cause the mail trains carrying interstate commerce to be stopped, with acts in pursuance of such agreement,—constitutes a conspiracy. Re Charge to Grand Jury (No. 4) (C. C. N. D. Ill.), 4 I. C. R. 801.

(ee) An agreement between two or more men connected with a railroad, in view of a threatened strike, that will not employ men to take the place of those who quit their service, but will allow mail and interstate commerce trains to stand still, for the purpose merely of creating public sympathy or indignation against the strikers,—constitutes conspiracy, unless the circumstances and situation were such the employment of new men, reasonably viewed, would lead to danger to them or to the railroad property or to any public interest. Re Charge to Grand Jury (No. 4) (C. C. N. D. Ill.), 4 I. C. R. 801.

(ff) Residence within the territorial jurisdiction of a court is not necessary to render one punishable by such court for a conspiracy committed there. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(gg) A conspiracy may be established by circumstantial evidence. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(hh) But one overt act need be proved to sustain an indictment for conspiring to violate the United States Act of March 2, 1889, against obtaining transportation for property over railroads at less than regular rates. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(ii) Conspiracy is an agreement, combination, or undertaking entered into between two or more persons to do something which is against the law of the country. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(jj) One who joins a conspiracy for the purpose of furthering its design is punishable as though he had been a party to it from the beginning. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(kk) A conspiracy may be established by circumstantial evidence. United States v. Howell, 4 I. C. R. 818.

(ll) To sustain an indictment for conspiring to obtain less than established rates for the shipment of property over a railroad, it is not necessary that the rate should have been published by posting it, as resquired by the Interstate Commerce Law. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(mm) Circumstantial evidence which is equal in proving power to the testimony of one positive, uncontradicted, creditable eyewitness, is sufficient to sustain a conviction of conspiracy to violate the United States Act against obtaining illegal shipping rates. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(nn) The stopping of transportation of goods and merchandise in transit from state to state and to and from foreign countries, which is caused by a strike of all the members of labor organizations in a certain city, in all kinds of business, in an attempt to compel the employment of none but union men in a certain business,—is an unlawful restraint of commerce in violation of the Act of Congress. United States v. Workingmen's Amalgamated Council (C. C. E. D. La.), 4 I. C. R. 831.

(oo) The interdiction by Act of Congress, of contracts or combinations in restraint of trade or commerce among the several states or with foreign nations, applies to combinations of labor as well as of capital, which are in restraint of such trade or commerce. United States v. Workingmen's Amalgamated Council (C. C. E. D. La.), 4 I. C. R. 831.

(pp) An unlawful combination in restraint of interstate or foreign commerce may exist among labor organizations, although their original purpose and general character is lawful. United States v. Workingmen's Amalgated Council (C. C. E. D. La.), 4 I. C. R. 831.

(qqrr) Persons who, in combination with a union of railway employes and others, are engaged in a conspiracy in restraint of interstate commerce over railroads, in furtherance of which design those actively engaged use threats, violence, and unlawful means of interference, from which they are commanded to desist by injunction, are guilty of contempt in persisting in their purpose without essential change of conduct until compelled to yield to superior force. United States v. Debs (C. C. N. D. Ill.), 5 I. C. R. 163.

(ss) The conspiracies in restraint of trade or commerce among the several states, declared illegal by the act of Congress of July 2, 1890, § 1, embrace all which are contrived with intent, or of which the necessary or probable effect shall be to restrain, hinder, interrupt, or destroy interstate commerce, embracing all instrumentalities and subjects of transportation among the states. United States v. Debs (C. C. N. D. Ill.), 5 I. C. R. 163.

(tt) All members of a union of railway employees which has conspired to restrain interstate commerce by preventing the operation of railroads engaged therein, and all who join in the movement, are each criminally responsible for the acts of others done in furtherance of the common purpose, whether they intend them or not. United States v. Debs (C. C. N. D. Ill.), 5 I. C. R. 163.

(uu) Members of a labor organization, employees of a railroad company, and the officers of such organization though not such employees, who, by threatening to withhold their labor from such company unless it violates the Interstate Commerce Act by refusing to accept cars containing interstate freights from another road with which such organization is in conflict, cause it to refuse to accept such freights,—are civilly liable to the latter road for any loss inflicted in pursuance of their conspiracy. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 522.

(vv) While an employee may bestow or withhold his labor as he will, if he uses the benefit which his labor is or will be to another by threatening to withhold or agreeing to bestow it, or by actually withholding it or bestowing it, for the purpose of inducing, procuring or compelling that other to commit an unlawful and criminal act, such withholding or bestowing his labor is itself an unlawful and criminal act. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 522.

(ww) Members of a labor organization who procure railroad companies to refuse to handle interstate freight from a company with which such organization is in conflict violate the provision of the interstate commerce law declaring any carrier or any director, officer, receiver, agent, or person acting for or employed by an incorporated carrier, who, alone or with any other corporation, person, or party, shall wilfully fail or omit to do any act, or cause or willingly suffer or permit any act, required by such act to be done or not to be done, or aid or abet such omission or failure, to be guilty of a misdemeanor. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 522.

(xx) All persons combining to carry out the rule of the Brotherhood of Locomotive Engineers which requires employees on one road to refuse to handle property belonging to a connecting road on which a strike of engineers is pending are, in case such roads are subject to the interstate commerce law, punishable under U. S. Rev. Stat. § 5440, relating to conspiracies to commit offenses against the United States, if any one of them does an act in furtherance of the combination. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 522.

(yy) A combination of railroad employees to act concertedly in quitting their employment, in a way to injure their employer, aid in enforcing a boycott, injure the public, and oppress other employees,—is criminal. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co. (C. C. N. D. Ohio), 5 I. C. R. 545.

(zz) A combination of persons, without regard to their occupation, which will have the effect to defeat the provisions of the interstate commerce law inhibiting discriminations in the transportation of freight and passengers, and further, to restrain the trade or commerce of the country,—will be obnoxious to the penalties therein prescribed. Waterhouse v. Comer (C. C. S. D. Ga.), 5 I. C. R. 564.

(3a) Rule 12 of an association of locomotive engineers, styled "The Brotherhood of Locomotive Engineers," which provides: "That hereafter when an issue has been sustained by the grand chief, and carried into effect by the Brotherhood of Locomotive Engineers, it shall be recognized as a violation of obligations if a member of the Brotherhood of Locomotive Engineers, who may be employed on a railroad run in connection with or adjacent to said road, handle the property belonging to said railroad or system in any way that may benefit said company with which the Brotherhood of Locomotive Engineers are at issue, until the grievances or issues or differences of any nature or kind have been amicably settled,"—is plainly a rule or agreement in restraint of trade or commerce, and violative of the act of Congress of July 2, 1890, §1. Waterhouse v. Comer (C. C. S. D. Ga.), 5 I. C. R. 564.

(3b) Illegal act by railroad company no justification for interference with interstate commerce.—It is no defense to a prosecution of railroad employees for conspiring to interfere with the United States mails or interstate commerce, that the railroad company obstructed and retarded the passage of the mails, or entered into a conspiracy in restraint of trade and commerce. United States v. John Cassidy, 7 I. C. C. App IX.

(3c) Concerted action to induce railroad employees to quit work illegal.—Concerted action by several members of an organization of railroad employees in sending telegrams advising all its members to quit work until a controversy between a sleeping-car company and its employees shall be settled will become a criminal conspiracy if such action is knowingly and wilfully directed by the parties to it for the purpose of obstructing and retarding the passage of the United States mails, or in restraint of trade and commerce among the States. United States v. John Cassidy, 7 I. C. C. App. IX.

(3d) Combination to interrupt interstate commerce illegal.—A combination or conspiracy that will interrupt the transportation of commodities from one state to another is within the act of Congress of July 2, 1890, declaring illegal every combination or conspiracy in restraint of trade or commerce among the several states; but the doing of some act in pursuance of the conspiracy is a necessary element of the offense. United States v. John Cassidy, 7 I. C. C. App. IX.

Burgess Bros. Co. v. Stewart, 184 N. Y. S. 199.

C. Proof and Variance.

See Evidence I.

§25. In General.

CASES 1887-1908

(a) Variance between allegations and proof as to the point of shipment of property for which less than schedule rates was obtained is immaterial, if both points were within the same state and subject to the same rates for shipment to the points of destination in another state. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

IMPORTANT CASES SINCE 1908

(b) Where in a prosecution under the Elkins Act the indictment avers that the defendant carrier over whose line the shipment was made had established and published rate over its line of 19½c, and the proof shows that the tariffs and schedules filed specify 18c over the defendant's route, and show that the 19½c rate is made up by adding to the 18c rate the 1½c rate of another independent carrier, there is a fatal variance between the allegations and the proof. U. S. v. Standard Oil Co., 170 Fed. 988, 1002.

(c) In an action for the value of nitrate of soda stolen from the government and sold to defendants, where it was shown by other evidence that certain cars were loaded with nitrate belonging to the United States, entries by railroad officers in the due course of the railroad's business, showing that such cars were consigned to defendants, were admissible; the verity of the books on this point not depending on information furnished by the thief. Whitehurst v. United States, 272 Fed. 46.

ALL OTHER CITATIONS

A. T. & S. F. Ry. Co. v. U. S., 170 Fed. 250, 254; G. R. & I. Ry. Co. v. United States, 212 Fed. 577, 581, 582.

D. Venue.

§26. In General.

CASES 1887-1908

(a) U. S. Const.. art. 3, providing for the trial of all crimes in the State where they were committed, applies only to trials in federal courts, and not to trials in state courts. Nashville, C. & St. L. R. Co. v. Alabama (U. S. Sup. Ct.), 2 I. C. R. 238.

(b) Residence within the territorial jurisdiction of the court is not necessary to render one punishable by such court for a conspiracy committed there. United States v. Howell, 4 I. C. R. 818.

IMPORTANT CASES SINCE 1908

(c) Where a shipper in sending products from Kansas City, Kan., to New York City, N. Y., the course of transportation being through the Western District of Missouri, secures concessions from the lawfully published rate, it may be prosecuted in the Western District of Missouri under the provision of the Elkins Act conferring jurisdiction to prosecute in any criminal court in the United States in the district through which the transportation may have been conducted. Armour Packing Co. v. U. S., 209 U. S. 56, 74, 28 Sup. Ct. 428, 52 L. Ed. 681; C. B. & Q. R. R. v. U. S., 209 U. S. 90, 28 Sup. Ct. 439, L. ed. 698.

ALL OTHER CITATIONS

U. S. v. Ill. Term. R. R. Co., 168 Fed. 546, 548; N. Y. C. & H. R. R. R. Co. v. U. S., 166 Fed. 267, 269; N. C. Ry. v. U. S., 241 Fed. 25.

VIII. DEFENSES.

See Courts §2.

§26½. In General.

CASES 1887-1908

(a) A conviction for criminal violation of the section of the Interstate Commere Act which prohibits undue or unreasonable preferences or advantages cannot be sustained upon the finding of a jury that a certain charge was an unreasonable preference, if no standard of comparison is established by which such unreasonableness is shown with definiteness and certainty. Tozer v. United States (C. C. N. D. Mo.), 4 I. C. R. 245.

(b) The objection that an indictment under the long and short haul clause of the Interstate Commerce Act is an attempt by the government to interfere with the revenues of the railroad, contrary to the terms of the contract under which it was built, cannot be raised upon a motion to quash. United States v. Mellen, 4 I. C. R. 247.

(c) An answer under oath does not preclude an injunction in the Federal courts, where the oath of the respondent is waived in the bill according to Equity Rule 41. United States v. Workingmen's Amalgamated Council, 4 I. C. R. 831.

(d) Where it appears that a complainant has invoked the aid of the law for the purpose of securing what he, with the acquiescence of the carrier, had previously obtained in apparent contravention of the law, such acquiescing carrier will not be held entitled to plead violations of the law by complainant in

bar of a decision on the merits, nor will the individual interests of the complainant be taken into consideration; but the Commission will examine the evidence and make such report thereon as, under the provisions of the law, the rights of other shippers and the public generally may require. If, independently of any action or interest of complainants, the conduct of defendants with reference to the transportation which is the subject of the proceeding is shown by the evidence to be unlawful, it is the duty of the Commission to execute and enforce the statutory provisions applicable thereto. Alanson S. Page v. D. L. & W. R. R. Co., et al, 6 I. C. C. 148.

IMPORTANT CASES SINCE 1908

(e) On a trial of a railroad company under an indictment for rebate it would not be proper to convict the defendant on bare suspicion or assumption of facts, which the evidence did not disclose. United States v. Erie R. Co., 222 Fed. 444, 452.

(f) In prosecution of a Coal Company for knowingly accepting rebates and concessions from a railroad, to which it had leased its own lines, in violation of the Elkins Act, as amended June 29, 1906, coal company had a right to offer in the evidence that the allowance to it by the railroad, referred to in the railroad's filed tariffs, but not specified in figures therein, was received under the honest belief that it was lawfully established by the tariffs, and that in receiving it the company was not disregarding what it believed to be the provisions of the tariffs; misunderstanding in supposing the allowances could be justified by a footnote to the tariffs not being a misunderstanding of the statute itself, instead of the tariffs. Lehigh Coal & Navigation Co. v. United States, 40 Sup. Ct. 24.

(g) That defendant in obtaining delivery of a car of grain from a railroad company by fraud and deception acted in the name and for the benefit of a corporation of which he was the principal owner held not a defense, but to render both defendant and the corporation chargeable. Boyd v. United States, 275 Fed. 16.

§27. Former Jeopardy.

IMPORTANT CASES SINCE 1908

(a) Defendant shipper was formerly indicted and convicted for accepting concessions on shipments of petroleum from Olean, N. Y., to Bellows Falls, and to Rutland, Vt. Defendant was again indicted for accepting concessions on shipments transported under separate bills of lading and shipping orders from Olean, N. Y., to Burlington, Vt., upon different days, over three railroads involved in the haul of the shipments covered by the former indictment, and also over another carrier. The same tariff rate on the shipment specified in both indictments was paid by the defendant monthly, upon bills rendered by the carrier covering all the transportations of petroleum during the preceding month, and such payments and settlements included, not only the transportations contained in the indictment upon which the defendant was formerly convicted, but also the specific transportations included in the second indictment. HELD, the second indictment covered offenses separate and distinct from those included in the first indictment, and defendant's plea of a former conviction should be denied, since, although the payment of charges by the shipper was essential to the completion of the offense, the separate shipments, nevertheless, constituted separate offenses. U. S. Standard Oil Co. of New York, 192 Fed. 438, 440.

§27½. Liability as Corporation.

ALL CITATIONS

Boyd v. United States, 275 Fed 16.

§28. Statute of Limitations.

IMPORTANT CASES SINCE 1908

(a) Defendant carrier in 1902 agreed with a shipper to transport sugar at less than the published rate. The transportation was made and the rebates were paid by defendant in May, 1904. The indictment was found in February, 1907, charging defendant with the acceptance of rebates in violation of the Elkins Act. HELD, the rebate was not given or accepted until the amount thereof was paid, and defendant was liable under the Elkins Act, despite the fact that the indictment was found after the effective date of the Hepburn Act of June 29, 1906. U. S. v. Gt. N. Ry. Co., 157 Fed. 288, 289.

(b) Section 1044, Rev. St. U. S., fixing the period of limitation for crimes, applies to misdemeanors for rebating under the Elkins Act, and the period of limitation is not governed by section 721 of the Rev. St. U. S., making the period of limitation fixed by the laws of the states determinative in certain instances. U. S. v. Central Vt. Ry., 157 Fed. 291, 292.

§28½. Mistake.

CASES 1887-1908

(a) A reasonable doubt which will require acquittal must be a real and substantial one and not a mere conjecture or a surmise as to the possibility of innocence. United States v. Howell, 4 I. C. R. 818.

(b) Although a conviction may be had on the testimony of accomplices if it produces on the minds of the jury a full and complete conviction of its truthfulness, it is a prudential rule that such witnesses should be corroborated by circumstances or otherwise as to some material point of their testimony. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(c) The provision of the interstate commerce act, that no person testifying as to its violation shall be prosecuted on account of any matter or transaction concerning which he may testify or produce evidence, is not unconstitutional as an infringement of the pardoning power vested by the Constitution in the Executive. Brown v. Walker (C. C. W. D. Pa.), 5 I. C. R. 300.

(d) Protection against the infamy and disgrace which may result from a witness' disclosures is not afforded by U. S. Const. amendment 5, protecting from self-incrimination. Brown v. Walker, 5 I. C. R. 300.

(e) Protection to a witness against self-crimination, as broad as that afforded by U. S. Const. amendment 5, is given by act of Congress of Feb. 11, 1893, requiring a person to testify in proceedings growing out of alleged violations of the Interstate Commerce Act, but absolving him from prosecution on account of any matter concerning which he may testify, so that he can no longer refuse to testify in such cases. Brown v. Walker, 5 I. C. R. 300.

(f) The pardoning power of the Executive is not infringed by a statute exempting a witness from prosecution for any offense disclosed by his testimony in a proceeding against another person. Brown v. Walker, 5 I. C. R. 300.

(g) The vesting of pardoning power in the President by the Constitution does not take from Congress the power to pass acts of general amnesty, such as the provision in the act of Congress of February 11, 1893, that no person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may give evidence before the Interstate Commerce Commission or in obedience to its subpoena. Brown v. Walker, 5 I. C. R. 369.

(h) The fact that witness cannot be shielded by statute from the personal disgrace or approbrium attaching to the exposure of his crime does not render a statute exempting him from prosecution therefor insufficient to satisfy the constitutional guaranty of protection against being compelled to be a witness against himself. Brown v. Walker, 5 I. C. R. 369.

(i) The immunity from prosecution on account of any matter concerning which evidence is given before the Interstate Commerce Commission or in obedience to its subpoena under the act of Congress of February 11, 1893, is not limited to prosecutions in Federal courts but is applicable in state courts as well. Brown v. Walker, 5 I. C. R. 369.

(j) The constitutional guaranty of protection against being compelled in any criminal case to be a witness against one's self is sufficiently satisfied by the provision of the act of Congress of February 11, 1893, that no person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may give evidence before the Interstate Commerce Commission or in obedience to its subpoena. Brown v. Walker, 5 I. C. R. 369.

(kl) The bare possibility that by disclosure a witness may be subjected to the criminal laws of some other sovereignty, and that he may be put to the annoyance and expense of pleading his immunity by way of confession and avoidance, notwithstanding the law has given him immunity from prosecution therefor, is not sufficient to render such immunity insufficient to satisfy the constitutional guaranty of protection against being compelled to be a witness against himself. Brown v. Walker (U. S. Sup.), 5 I. C. R. 369 Aff'g. (C. C. W. D. Pa.), 5 I. C. C., 300, and Overruling (D. C. N. D. Ill.), 5 I. C. R., 578.

(m) The fact that a witness cannot be shielded by statute from the personal disgrace or approbation attaching to the exposure of his crime does not render a statute exempting him from prosecution therefor insufficient to satisfy the

constitutional guaranty of protection against being compelled to be a witness against himself. Brown v. Walker (U. S. Sup.) 5 I. C. R., 369, Aff'g. (C. C. W. D. Pa.), 5 I. C. C. 300, and Overruling (D. C. N. D. Ill.), 5 I. C. R., 578.

(n) The immunity from prosecution on account of any matter concerning which evidence is given before the Interstate Commerce Commission or in obedience to its subpoena under the act of Congress of February 11, 1893, is not limited to prosecutions in Federal courts, but is applicable in state courts as well. Brown v. Walker (U. S. Sup.), I. C. R., 369, Aff'g. (C. C. W. D. Pa.), 5 I. C. C., 300, and Overruling (D. C. N. D. Ill.), 5 I. C. R. 578.

(o) The constitutional guaranty of protection against being compelled in any criminal case to be a witness against one's self is sufficiently satisfied by the provision of the act of Congress of February 11, 1893, that no person shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he may give evidence before the Interstate Commerce Commission or in obedience to its subpoena. Brown v. Walker (U. S. Sup.), 5 I. C. R. 369, Aff'g. (C. C. W. D. Pa.), 5 I. C. C. 300, and Overruling (D. C. N. D. Ill.), 5 I. C. R. 578.

(p) A witness cannot be deprived of the protection of United States Constitution, Amendment 5, that no person shall be compelled to be a witness against himself, by exempting him from liability to punishment for acts disclosed by him. United States v. James, 5 I. C. R. 578.

IMPORTANT CASES SINCE 1908

(q) In an indictment under the Elkins Act against a carrier for charging less than the published rate, evidence offered by it to show that it understood such rate was not intended to apply as specified in the schedule filed is properly rejected. Merchants' and Miners' Transp. Co. v. U. S., 199 Fed. 902, 904.

IX. PROCEDURE.

§28½a. In General.

CASES 1887-1908

(a) An instruction was proper, that as defendant resisted the payment of the sum claimed as rebate, on the sole ground that no such contract had been made, the jury might infer that the amounts claimed to have been paid had been received by defendant, where there was evidence of such payment and the presentation of the bills therefor to the defendant. Christie v. Missouri Pacific R. Co., 2 I. C. R. 22.

(b) A carrier which has conformed to the ruling of the Commission should not be prosecuted for alleged violation of law in that respect, which occurred before such ruling was made and under a construction of the law then approved by the carrier's counsel. Slater v. Northern P. R. Co. (Com.), 2 I. C. R. 243.

(c) On a motion for the issue of a distress warrant to compel an appearance of the defendant railroad company, which was considered as a motion to quash the indictment as to said company, HELD, that a railroad corporation was not subject to an indictment under the Interstate Commerce Act. U. S. v. Mich. Central R. Co., 3 I. C. R. 287.

(d) Section 860 of the Revised Statutes does not supply a complete protection from all the perils against which the constitutional prohibition was designed to guard, and is not a full substitute for that prohibition. Counselman v. Hitchcock, 3 I. C. R. 317.

(e) No statute which leaves the party or witness subject to prosecution after he answers the criminating question put to him, can have the effect of supplanting the privilege conferred by the Constitution of the United States. Counselman v. Hitchcock, 3 I. C. R. 317.

(f) A claim of exemption from discovery on the ground that it would fix a penal liability upon the party cannot be sustained where a prosecution for the penalty is already barred by the Statute of Limitations. Manchester L. R. Co. v. Concord R. Co. (N. H.), 3 I. C. R. 319.

(g) While under the Fifth Amendment of the Constitution of the United States a person cannot be compelled to disclose facts before a court or grand jury which might subject him to a criminal prosecution or his property to forfeiture, yet the protection of section 860, U. S. Rev. Stat., is co-extensive with it, and the witness is entitled to no privilege under the law. Re Counselman v. 3 I. C. R. 326.

(h) Habeas corpus will not be granted in favor of one who is held for contempt of court in refusing to answer questions put to him by a grand jury in an investigation of a complainant against another, when such answers or admis-

sions could never be used against him or his property in any subsequent proceeding. Re Counselman 3 I. C. R. 326.

(i) If a witness cannot claim the privilege for himself he cannot for another. The Interstate Commerce Act contains nothing upon which an officer of a railroad company can base a refusal to produce papers on the ground that it would tend to criminate the company. Re Peasley 3 I. C. R. 333.

(j) Writ of habeas corpus will not issue in favor of one who is an officer of a railroad company, to wit: vice-president and treasurer, and who is under arrest for contempt in refusing to answer questions put to him by or before the grand jury or to produce papers and documents of his company and under his control, ordered by subpoena duces tecum and by order on arrest for contempt, on the ground that such answers and production would tend to incriminate himself and his company, the investigation being based upon no charges against himself and his own testimony showing that they would not incriminate him. Re Peasley 3 I. C. R. 333.

(k) In an investigation of a criminal charge against an agent of a railroad company for violation of the Interstate Commerce Act, if it appear that the testimony and production of papers might incriminate himself,he cannot claim privilege of immunity under the Fourth and Fifth Amendments to the Constitution of the United States. Re Peasley 3 I. C. R. 333.

(l) The privilege given by U. S. Const. 5th amend., that no person shall be compelled in any criminal case to be a witness against himself, extends to a proceeding before a grand jury. Counselman v. Hitchcock (U. S. Sup. Ct.), Following cases in 3 I. C. R. 816, Reversing Re Counselman, 3 I. C. R. 326 and Overruling Re Peasley, 3 I. C. R. 333.

(m) The provision of U. S. Rev. Stat. § 860, that the evidence of a person shall not be used against him in any proceeding for a crime or penalty or forfeiture, does not take away the constitutional privilege of a person that he shall not be compelled in any criminal case to be a witness against himself. Counselman v. Hitchcock (U. S. Sup. Ct.), 3 Inters. Com. Rep., 3 I. C. R., 816, Reversing Re Counselman, 3 I. C. R., 326, and also Overruling Re Peasley, 3 I. C. R., 333.

(n) A statutory enactment must afford absolute immunity against future prosecution for the offense to which a criminating question relates, in order to supplant the constitutional privilege of a person to refuse to be a witness against himself. Counselman v. Hitchcock (U. S. Sup. Ct.), 3 Inters. Com. Rep., 3 I. C. R., 816, Reversing Re Counselman, 3 I. C. R., 326, and also overruling Re Peasley, 3 I. C. R., 333.

(o) In an investigation by a grand jury of alleged violations of the Act of Congress to Regulate Commerce of Feb. 4, 1887, against a railway company, a person engaged in commission business is privileged, under U. S. Const. 5th amend. from answering as a witness as to whether he had obtained a rate of transportation of grain on any railroad coming from a point outside of the State, less than the tariff or open rate, and questions of a similar character, if he declines to answer on the ground that his answer might tend to criminate him. Counselman v. Hitchcock (U. S. Sup. Ct.), 3 Inters. Com. Rep. 3 I. C. R., 816, Reversing Re Counselman, 3 I. C. R., 326, and Also Overruling, Re Peasley, 3 I. C. R. 333.

(p) An agreement by a common carrier to give one shipper a favor and advantage over others by a rebate is illegal at common law. Fitzgerald v. Grand Trunk R. Co., 3 I. C. R. 633.

(q) A witness is protected by the constitutional provision from being compelled to disclose the circumstances of his offense, or the sources from which or the means by which evidence of its commission, or of his connection with it, may be obtained or made effectual for his conviction. Counselman v. Htichcock, 3 I. C. R. 816.

(r) Section 800 of the Revised Statutes, which provides that the evidence of a person shall not be used against him in any proceeding for a crime or penalty, or forfeiture, does not take away his privilege, given by the Constitution, that he shall not be compelled in any criminal case to be a witness against himself. Counselman v. Hitchcock, 3 I. C. R. 816.

(s) In an investigation by a grand jury of alleged violations of the Act of Congress to Regulate Commerce of February 4th, 1887, against a railway company, a person engaged in commission business is privileged, under the Fifth Amendment to the Constitution, from

answering as a witness as to whether he had obtained a rate of transportation of grain on any railroad company from a point outside of the State, less than the tariff or open rate, and questions of a similar character, if he declines to answer on the ground that his answer might tend to criminate him. Counselman v. Hitchcock, 3 I. C. R. 816.

(t) The privilege given by the Fifth Amendment to the Constitution that no person shall be compelled in any criminal case to be a witness against himself extends to a proceeding before a grand jury. Counselman v. Hitchcock, 3 I. C. R. 816.

(u) In view of the constitutional provision, a statutory enactment, to be valid, must afford absolute immunity against future prosecution for the offense to which the question relates. Counselman v. Hitchcock, 3 I. C. R. 816.

(v) To impeach a witness the evidence must reflect the opinions of the people in the community in which he lives. United States v. Howell, 4 I. C. R. 818.

(w) The testimony of defendants is to be considered in the light of their relation to the case. United States v. Howell, 4 I. C. R. 818.

ALL OTHER CITATIONS

Kennedy v. United States, 275 Fed. 182.

§29. Province of Court.

IMPORTANT CASES SINCE 1908

(a) In a prosecution under the Elkins Act against a shipper for the acceptance of a concession, it is for the court, and not for the jury, to determine whether documents filed with the Interstate Commerce Commission are sufficiently definite to establish the rate in question between the points in question. Standard Oil Co. of New York v. U. S., 179, Fed. 614, 624.

§30. Province of Jury.

CASES 1887-1908

(a) Although a conviction may be had on the testimony of accomplices, if it produces on the minds of the jury a full and complete conviction of its truthfulness, it is a prudential rule that such witnesses should be corroborated by circumstances or otherwise as to some material point of their testimony. United States v. Howell, 4 I. C. R. 818.

IMPORTANT CASES SINCE 1908

(b) It is questionable whether charges in a criminal prosecution, the effect of which is to submit to a jury the determination of the question of comparison of rates upon shipments of anthracite coal with those of bituminous coal, and to permit it to pass upon questions of reasonableness of rates and all the circumstances affecting differences in rates and practices at different periods of time and under different circumstances not covered by any tariff can be sustained. It is doubtful whether these questions are not primarily for the determination of the Interstate Commerce Commission, rather than for the determination of a common-law jury in a criminal trial. United States v. P. & A. Railway & Navigation Co., 228 U. S. 87, 33 Sup. Ct. 443, 57 L. Ed. 742; Minnesota Rate Case, 230 U. S. 352, 33 Sup. Ct. 729, 57 L. Ed. 1151, 48 L. R. A. (N. S.), 1151, Ann. Cas. 1916A, 18; Loomis v. Lehigh Valley R. Co., 240 U. S. 43, 36 Sup. Ct. 228, 60 L. Ed.—, opinion by Mr. Justice McReynolds, January 24, 1916. United States v. Philadelphia & R. Ry. Co., 232 Fed. 946, 952.

ALL OTHER CITATIONS

U. S. v. P. & R. Ry. Co., 184 Fed. 543, 545; U. S. v. Bethlehem Steel Co., 184 Fed. 546; U. S. v. Lehigh Valley Ry. Co., 184 Fed. 546; Merchants' and Miners' Transp. Co. v. U. S., 199 Fed. 902, 904.

§31. Conviction and Verdict.

CASES 1887-1908

(a) A conviction for criminal violation of the Interstate Commerce Act, which prohibits undue or unreasonable preferences or advantages, cannot be sustained upon the finding of a jury that a certain charge was an unreasonable preference, if no standard of comparison is established by which such unreasonableness is shown with definiteness and certainty. Tozer v. United States of America, 4 I. C. R. 245.

(b) A reasonable doubt which will require acquittal must be a real and substantial one, and not a mere conjecture or a surmise as to the possibility of innocence. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(c) To sustain a conviction the proof must be sufficient to establish all the material allegations in issue, so that reasonable men upon a matter of importance or concern would be satisfied of

their being true. United States v. Howell (D. C. W. D. Mo.), 4 I. C. R. 818.

(d) Rebate not unjust discrimination. —Showing merely a rebate or variation from the usual rate in force is not sufficient to sustain an indictment under the Interstate Commerce Act for unjust discrimination. United States v. Hanley, 7 I. C. C. App IX.

IMPORTANT CASES SINCE 1908

(e) In a prosecution under the Elkins Act against a carrier for making concessions to a shipper, each count of an indictment consisting of many counts charged that defendant had made a concession as to the carload shipment mentioned in the count. The evidence indicated that the concession had been made on all the shipments during the period in question by one settlement, made by defendant, in which it simply canceled all the demurrage charges standing against the shipper, and that the amount of charges so canceled was large enough to cover the sum total of all the concessions alleged to have been made on all of the cars mentioned in the different counts. HELD, a verdict finding defendant guilty of all the counts should be sustained. U. S. v. Phil & R. Ry. Co., 184 Fed. 543, 545; U. S. v. Bethlehem Steel Co., 184 Fed. 546; U. S. v. Lehigh Valley Ry. Co., 184 Fed. 546.

X. PENALTIES.

§32. Excessive Fine.

IMPORTANT CASES SINCE 1908

(a) In an indictment under the Elkins Act against the Standard Oil Co. of Indiana for accepting and receiving a concession, a fine of $29,240,000, imposed by the trial court on the basis of one offense for every carload shipped, is excessive, where the defendant had not before been convicted of the same offense, where its assets were not in excess of $1,000,000, and where the trial court considered the Standard Oil Co. of New Jersey the real offender in imposing the sentence. Standard Oil Co. of Indiana v. U. S., 164 Fed. 376, 386.

(b) The trial court, in deciding what penalty to impose for a carrier's failure to charge $60 demurrage on 12 cars, for which it was convicted, could consider any discrimination disclosed, for which there should be no conviction till the Interstate Commerce Commission had passed on it, or even if it did not violate the letter of any demurrage or other tariff. Michigan Cent. R. R. v. United States, 246 Fed. 353.

XI. STATE REGULATION.

§33. In General.

ALL CITATIONS

Adams Express Co. v. Charlottesville Woolen Mills, (Va. 1908), 63 S. E. 8, 9.

XII. ALLIED OFFENSES.

See Interstate Commerce §1.

§34. In General.

CASES 1887-1908

(a) Collecting and receiving freight charges does not subject one who had nothing to do with fixing the rates to indictment under the long and short haul clause of the Interstate Commerce Act, although the rates are within prohibitions of that Act. United States v. Mellen, 4 I. C. R. 247.

(b) An alleged violation of the Anti-Trust Act of Congress must be clearly within its provisions, as the statute is a criminal one. United States v. Trans-Missouri Freight Asso. (C. C. App. 8th C,), 4 I. C. R. 443.

(c) Woodcock, ruffled grouse, or quail need not have been killed for the purpose of conveying them out of the State in order to make it an offense under Gen. Stat. § 2546, to have such birds in possession with intent to procure their transportation out of the state. State of Conn. v. Geer., 3 I. C. R. 732.

(d) Opposition to the arrest of persons who have wilfully obstructed or retarded the mails, by such a number of persons as would constitute a general uprising in that particular locality, and as threatens for the time being the civil and political authority, constitutes an insurrection. Re Charge to Grand Jury (No. 2), (D. C. N. D. Ill.), 4 I. C. R. 781.

(e) To constitute an insurrection against the United States, it is not necessary that there should be blood shed, or that its dimenisons should be so portentious as to insure probable success; but it is necessary that the rising should be in opposition to the execution of the laws of the United States, and should be so formidable as for the time being to defy the authority of the United States. Re Charge to Grand Jury (No. 2), (D. C. N. D. Ill.), 4 I. C. R. 781.

(f) Men who gather together to resist the civil or political power of the United

States or to oppose the execution of its laws, in such force that the civil authorities are inadequate to put them down, and a considerable military force is needed to accomplish that result, become, with every person who knowingly incites, aids or abets them ,with whatever motives, insurgents. Re Charge to Grand Jury (No. 2), (D. C. N. D. Ill.), 4 I. C. R. 781.

(g) Insurrection is a rising against civil or political authority,—the open and active opposition of a number of persons to the execution of law in a city or state. Re Charge to Grand Jury (No. 2) (D. C. N. D. Ill.), 4 I. C. R. 781.

(h) One who by speech, writing, or other inducements assists in setting on foot an insurrection or carrying it along, or who gives it aid or comfort, is guilty of a violation of law. Re Charge to Grand Jury 4 I. C. R. 781.

(i) Wilful failure of railroad companies to carry the mails is within U. S. Rev. Stat. § 3995, making it an offense to unlawfully and willfully retard or obstruct the passage of the mail, although their employes refuse to move trains having certain sleeping cars thereon, where the situation is of an extraordinary character, and the interruption to commerce has been serious and long continued and the employes are willing to move trains without such cars. Re Charge to Grand Jury 4 I. C. R. 784.

(j) Imprisonment for six months was imposed as a punishment for contempt of court in interfering with the operation of a railroad by a receiver, where, after the service of the restraining order, the defendant continued in his unlawful course, and aggravated his contempt by speeches to the employes of the receiver. Thomas v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 788.

(ja) All persons combining to carry out the rule of the Brotherhood of Locomotive Engineers which requires employees on one road to refuse to handle property belonging to a connecting road on which a strike of engineers is pending are, in case such roads are subject to the interstate commerce law, punishable under U. S. Rev. Stat. §5440, relating to conspiracies to commit offenses against the United States, if any one of them does an act in furtherance of the combination. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 522.

IMPORTANT CASES SINCE 1908

(k) A shipment of alcohol, which had been loaded into a car consigned to another state and was on the track of a belt line, which performed only switching services in delivering to the carrier which was to haul it to destination, was already in "interstate shipment," within Act Feb. 13, 1913, relating to larceny of goods in interstate commerce. Sharp v. United States, 280 Fed. 86.

(l) A shipment originating in one state and consigned to a point in the same state, but moving in its course through another state, constitutes an "interstate shipment," within the meaning of the Act Feb. 13, § 1 providing for punishable of larceny of goods in interstate commerce. Yohn v. United States, 280 Fed. 511.

(m) In actions by government against stockyards company for violations of Twenty-Eight Hour Law (Comp. St. §§8651-8654), evidence not showing that defendant knew or could have known for what period of time the cattle had been held in the cars by connecting carriers before delivery to defendant without having been unloaded for food, water, and rest, and showing that defendant handled the shipments after they came into its hands with all possible diligence, was insufficient to show that defendant knowingly and willfully violated the act. United States v. Union Stockyards Co. 291 Fed. 366.

Co., (Ga., 1922), 112 S. E. 389.

§35. False Accounts.

IMPORTANT CASES SINCE 1908

(a) The Interstate Commerce Act makes it a criminal offense for any person to make a false entry in any book of account or in any record or memorandum kept by a carrier whether such record is prescribed by the Interstate Commerce Commission or not. Kennedy v. United States, 275 Fed. 182, 183.

§35a. Violation of Section 1.

CASES 1887-1908

(a) Officers of an interstate railroad company may be indicted under the Interstate Commerce Act, § 4, for fixing and charging a local freight rate upon the same kind of merchandise under substantially similar circumstances and conditions, greater in amount between two points on the main line than that fixed between one of them and a point also on the main line lying in the same direction but farther away than the other. United States v. Mellen (D. C. D. Kan.), 4 I. C. R. 247.

(b) Collecting and receiving freight charges does not subject one who had nothing to do with fixing the rates, to indictment under the long and short haul clause of the Interstate Commerce Act, although the rates are within the prohibitions of that Act. United States v. Mellen (D. C. D. Kan.), 4 I. C. R. 247.

IMPORTANT CASES SINCE 1908

(c) The car clerk of a carrier entrusted with the duty of certifying whether shipments arriving at its terminals are order notify or could be delivered without surrender of the bill of lading, and who makes out false manifests by which order notify cars are entered otherwise and conspires with the consignee by which the latter obtains order notify cars without surrendering the bill of lading, and who makes such entries in his own memorandum in his office to enable such consignee in getting these cars without paying the drafts and producing the bills of lading, such fraud is properly found guilty under section 20, paragraph 7 of the Interstate Commerce Act of wilfully making false entries, and wilfully neglecting to make full, true and correct entries of facts appurtaining to the carriers business. Kennedy v. United States, 275 Fed. 182.

§36. Theft.

IMPORTANT CASES SINCE 1908

(a) Act Feb. 13, 1913, §1, making it an offense against the United States to steal "goods or chattels moving as * * * an interstate or foreign shipment of freight or express," is complementary to the general regulation of railroads, and covers such commerce as the Interstate Commerce Act itself covers, which includes a shipment between points in the same state. United States v. Yohn, 275 Fed. 232.

CROSS COUNTRY COMPETITION

See Evidence §14 (1½); Long and Short Hauls §7½; Wagon Competition.

CUBA

IMPORTANT CASES SINCE 1908

(a) The Commission has no jurisdiction over traffic from a point in the United States to a point in Cuba. Hill v. N., C. & St. L. Ry., 44 I. C. C. 582, 588.

CUMMINS AMENDMENT

See Loss and Damage I; §2½; Released Rates.

CURRENCY

IMPORTANT CASES SINCE 1908

(a) While media of exchange in Canada and in United States carry same designations and are intended to represent substantially same purchasing value, tariffs of carriers engaged in transportation of passengers and property between the two countries, publishing charges therefor in amounts specified in dollars and cents, mean only lawful money of United States, when filed with this commission. Koine v. M. C. R. R. Co., 83 I. C. C. 407, 408.

(b) Commission can not undertake to pass upon proposed rules concerning payment of charges in United States currency and prepayment of charges on shipments into Canada is so far as they affect charges for transportation beyond borders of United States. Payment of Charges in United States Currency, 59 I. C. C. 263. Boston Wool Trade Asso. v. A., T. & S. F. Ry. Co., 83 I. C. C. 445, 449.

CUSTOM

See Blanket Rates §5.

CUSTOM BROKERS

IMPORTANT CASES SINCE 1908

(a) Complainants, customs brokers at Newport, Vt., attacked the refusal of the carrier to allow the customs duties paid through them, together with their brokerage fees, to be "expensed forward" on the waybills to ultimate consignee, as subjecting them to unjust discrimination. The carrier's agent at Newport was also a customs broker. If the shipper named him as broker, the carrier permitted the customs duties and broker's fees to be "expensed for-

ward" to the ultimate consignee. If the shipper, however, named some other broker as his agent, the carrier refused to expense forward these charges. HELD that the practice complained of resulted in preference of shippers who made use of the services of the carrier's agent as a customs broker and prejudice to shippers who employed other customs brokers. Reparation denied. Emery & Co. v. B. & M. R. R., 47 I. C. C. 200.

(b) Where a carrier paid to the United States customs authorities a duty on goods after delivery had been made to consignee, carrier was a mere volunteer, and cannot recover from consignee the amount paid. American Ry. Exp. Co. v. Heilbrunn, 198 N. Y. S. 801.

(c) Where carrier paid or promised the customs authorities to pay the duty to prevent the goods from being held by the government officials at the point of entry, carrier is entitled to reimbursement from consignees. American Ry. Exp. Co. v. Heilbrunn, 198 N. Y. S. 801.

(d) Where goods had passed the point of entry without payment of duty, consignee, and not carrier, was liable for duties thereafter imposed. American Ry. Exp. v. Heilbrunn, 198 N. Y. S. 801.

(e) In action by carrier against consignee for duty on goods, which carrier had paid after delivery to consignee, an allegation that "plaintiff was compelled to pay and did pay the said amount to the United States customs authorities" held a conclusion of law. American Ry. Exp. Co. v. Heilbrunn, 198 N. Y. S. 801.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission; Jurisdiction of Commission.

CASES 1887-1908

(a) While it is held by the Supreme Court in Interstate Commerce Commission v. Cincinnati, N. O. & T. P. R. Co. 167 U. S. 479, 42 L. ed. 243, 17 Sup. Ct. Rep. 896, that the Commission has no power to prescribe rates, "maximum, minimum, or absolute," the Commission may order the carriers to "desist from the continuance of an unlawful practice." (Interstate Commerce Commission v. East Tennessee, V. & G. R. Co. 85 Fed. Rep. 110). The Commission may therefore after investigation find a particular rate to be unlawful and prohibit the exaction of that rate, or find the time allowed for loading or unloading unlawful, or, in other words, unreasonably small, and forbid the charging of demurrage at the expiration of that time and before the expiration of a reasonable time. Pa. Millers States Asso. v. Phila. & R. Ry. Co., 8 I. C. C. 53.

(aa) The rule of §4 of the law, forbidding a greater charge for a shorter than for a longer haul, based on distance relates to actual transportation charges, and not to demurrage charges, which are in the nature of charges for storage in the cars of the carrier. Pennsylvania Millers' State Asso. v. Philadelphia & R. R. Co., 8 I. C. C. 531.

(b) The Commission is without authority to fix rules or regulations for reciprocal demurrage. Mason v. C. R. I. & P. Ry. Co., 12 I. C. C. 61.

IMPORTANT CASES SINCE 1908

(c) It is well settled that the Commission may require the carriers to maintain reasonable demurrage charges which are in part compensation to the carriers for the use of their equipment and in part penalties imposed on shippers for detention of cars. American Wholesale Lumber Ass'n v. Director General, 66 I. C. C. 393, 396.

(d) The Interstate Commerce Commission, and not a court, is the tribunal to which complaint should be made of any unreasonableness in a local tariff of demurrage charges filed with it. Chesapeake & Ohio Coal & Coke Co. v. Toledo & O. C. Ry., 245 Fed. 917.

(e) Under the rule established by the Interstate Commerce Commission, demurrage charges for the detention of cars must be exacted and collected by the carrier in accordance with the tariffs on file, and where certain exceptions or exemptions are specified therein, no others can be permitted. The validity of such rule as to demurrage charges upon interstate traffic, adopted and applied by the Interstate Commerce Commission, is not open to question in state courts. Swift & Co. v. Hocking Valley Ry. Co., 93 Ohio St. 143, 112 N. E. 212, L. R. A. 1917E, 916, approved and followed. Anthony Carlin Co. v. Hines, (Ohio 1923), 140 N. E. 99.

II. RIGHT TO ASSESS.

§2. In General.

CASES 1887-1908

(a) If demurrage charges, when added to transportation charges, result in greater aggregate charges in certain cases than in other cases involving longer hauls, these may constitute undue preference as between different localities, under § 3. Pennsylvania Millers' State Asso. v. Philadelphia & R. R. Co., 8 I. C. C., 531.

(b) If demurrage charges are made to commence before the expiration of a reasonable time for loading or unloading, this may be a violation of the provision of § 1 of the law, which directs that "charges made for any service rendered or to be rendered in the transportation of property, or in connection therewith, or for the receiving, delivering, storage or handling of such property, shall be reasonable and just." Pennsylvania. Miller State Asso. v. Philadelphia .R R. Co., 8 I. C. C. 531.

(c) Complainant attacked demurrage charges assessed on hay from Terre Haute, Ind., to points in the southeast. The only testimony introduced by complainant was that it was unreasonable for the defendants to charge them $1.00 per day demurrage at the same time only being charged 20 cents per day by the car owner for the use of the car. If the reasonableness of the demurrage charge depended upon the fair rental value of a freight car the Commission would be disposed to hold with the complainants. It is the duty of the consignee to receive his freight within a reasonable time and if he neglects to do so the liability of the railroad company as a common carrier ceases and it becomes simply a warehouseman. It is not only proper but highly essential that railroads should make and enforce uniformly such reasonable demurrage requirements as will insure the prompt receipt by the consignee of his freight. The demurrage charge which is imposed for that purpose is not based upon the fair rental value of a car; it is rather in the nature of a penalty. The Commission could not hold upon the testimony in this case that $1.00 per day is an unreasonable charge and while a more general investigation might alter that opinion, it is the present impression that it is just and reasonable for the purpose intended. HELD, complaint dismissed. T. M. Kehoe & Company v. C. & W. C. R. Co., 11 I. C. C. 166.

(d) It is not only proper but highly essential that railroad companies should make and enforce uniformly such reasonable demurrage requirements as will insure the prompt receipt by the consignee of his freight. The demurrage charge which is imposed for that purpose is not, however, based upon the fair rental value of the car; it is rather in the nature of a penalty. Kehoe v. C. & W. C. R. Co., 11 I. C. C. 166, 170.

IMPORTANT CASES SINCE 1908

(e) Carriers are justified in establishing car service rules which will insure the prompt release of equipment; demurrage charges represent in part compensation to the carrier for the use of its equipment, and in part a penalty imposed upon shippers for the detention of cars; carriers are not obliged to provide storage in cars, but if they do so they are entitled to reasonable compensation for the service; a consignee has no legal right to use a car as a warehouse; the business of a railroad is transportation, not storage; storage at destination is a service not embraced in the rate, and for which additional compensation may be exacted; it is to the interest of both carriers and shippers that cars be promptly released; and an obligation rests upon the carrier to so conduct its business that all of its patrons shall be accorded the fullest and freest use of its equipment. Pittsburgh & Ohio Min. Co. v. B. & O. R. R. Co., 40 I. C. C. 408, 409.

(f) The Commission has found that demurrage was properly assessed against the shipper where detention occurred through no fault of the carrier,

even though the shipper was not at fault, as in case of nonarrival of an expected vessel. American Smelting & Refining Co. v. Director General, 69 I. C. C. 229, 232.

(g) The clearing of carriers terminals is the primary object of a storage charge, and a charge which goes no further than is necessary to accomplish this end is not unreasonable from the mere fact that it is higher than would be just if the value of the storage service were the only element to be considered. Dashields & Co. v. Director General, 73 I. C. C. 225, 227.

(ga) Demurrage is not an appropriate charge by which to obtain compensation for switching services. L. E. & Ft. W. R. R. Co., 78 I. C. C. 475, 491.

(h) The primary purpose of imposing demurrage is to promote the prompt release of cars in the general interest of the public. Hawkins & Sons v. Director General, 80 I. C. C. 225, 226.

(i) That shipments to a consignee are unauthorized, and that the consignee does everything in its power to prevent the shipments, does not justify its refusal to pay demurrage charges, if it has accepted and unloaded the cars. Davis v. Timmonsville Oil Co., 285 Fed. 470.

(j) Demurrage is in part penalty for detention of carriers' equipment and to be effective as such must be controlled by tariffs in effect contemporaneously with such detention. Carolina Portland Cement Co. v. Director General, as Agent, 83 I. C. C. 388, 391.

(k) The primary purpose of imposing demurrage is to promote the prompt release of cars in the general public interest. McGarry & Company v. Wabash R. R., 88 I. C. C. 301, 302.

§2¼. Commandeering of Vessels.

IMPORTANT CASES SINCE 1908

(a) Tack plate shipped from Vandergrift, Pa., to Baltimore, Md., for export, but due to vessel for which originally intended being commandeered by one of the nations then at war, was reconsigned to New York, N. Y., or Philadelphia, Pa., and exported from those ports. HELD: Domestic demurrage charges accruing at Baltimore found not unreasonable following Lowry Lumber Co., 58 I. C. C. 113, and Heid Brothers, 55 I. C. C., 416. British United Shoe Machinery Co. (Ltd.), v. P. R. R. Co., 66 I. C. C. 661.

ALL OTHER CITATIONS

American Smelting & Refining Co. as Agent, 69 I. C. C. 229.

§2½. Dangerous Commodity.

See Explosives.

IMPORTANT CASES SINCE 1908

(a) If it is shown that consignees can in normal times unload a dangerous commodity within the prescribed free time, there is presented reason why the commodity should be unloaded within that time. International Agrl. Corpn. v. A. & W. P. R. R. Co., 32 I. C. C. 199, 201.

§3. Discrimination.

See Discrimination.

IMPORTANT CASES SINCE 1908

(a) But it has been held that demurrage charges occasioned by detention of a car of barrel heading at Cincinnati, O., awaiting payment of freight charges thereon prior to a switching movement, not found to have been unlawful or unreasonable. Hollingshead & Blei Co. v. P. Co., 25 I. C. C. 38.

(b) Demurrage charges of $1 per car per day held not unreasonable where the carrier's equipment was used for storage purposes. Thompson v. A. T. & S. F. Ry. Co., 25 I. C. C. 174, 178.

(c) Traffic conditions throughout the United States do not differ to such an extent as to necessitate a diversity in demurrage rules. Michigan Mfrs. Asso. v. P. M. R. R. Co., 31 I. C. C. 329, 331.

(d) To allow the assessing of demurrage on inbound shipments to depend upon the furnishing of cars for outbound movement, a separate transaction, would open the way of abuses not necessary in order

to protect a shipper from unlawful acts of the carrier. Armour Grain Co., v. Director General, 57 I. C. C. 398, 404.

ALL OTHER CITATIONS

Lynah & Read v. B. & O. R. R. Co., 18 I. C. C. 38, 44; Friend Paper Co. v. C. C. C. & St. L. Ry. Co., 18 I. C. C. 178, 179; Galveston Commercial Asso. v. A. T. & S. F. Ry. Co., 25 I. C. C. 216, 227, 232; Benisch Bros. v. L. I. R. R. Co., 25 I. C. C. 439; American Hay Co. v. C. V. Ry. Co., 29 I. C. C. 659; Industrial Railways Case, 29 I. C. C. 212, 213, 237; Anderson-Tulle Co. v. M. L. & T. R. R. & S. S. Co., 30 I. C. C. 140; Advance Lumber Co. v. A. B. & A. R. R. Co., 40 I. C. C. 82, 83; Pittsburgh & Ohio Mining Co. v. B. & O. R. R. Co., 40 I. C. C. 408, 410; N. Y. & N. J. Produce Co. v. N. Y. N. H. & H. R. R., 51 I. C. C. 399; Armour Grain Co. v. Director General, 57 I. C. C. 389, 408.

§3½. Embargo as Reason.

See Embargoes.

IMPORTANT CASES SINCE 1908

(a) Demurrage does not accrue, under a general demurrage tariff, against a car which has been offered for reconsignment to an embargoed point upon the general principle that demurrage is assessable for detention for which the shipper is directly responsible and can avoid or abate while an embargo is placed by reason of the carriers' disability. Higgins Lumber & Export Co. v. N. O. G. N. Ry., 51 I. C. C. 214, 215.

(b) Demurrage charges found illegal due to the destination being embargoed, where the tariff made no restrictions against reconsignment to embargoed points, or for detention charges on shipments so reconsigned. Reparation awarded. Ferguson Lumber Co. v. Director General, 55 I. C. C. 335.

(c) Demurrage accruing on a shipment held by initial carrier on its rails at request of shipper after having been refused by connecting line because of embargo at billed destination, found lawfully assessed as shipper could have avoided demurrage by promptly unloading after being notified of existing embargo and advice given that shipment could not move in accordance with instructions. La Fayette Box Board & Paper Co. v. Director General, as Agent, 59 I. C. C. 105.

(d) Where an embargo in effect prohibits movements to a point except upon special permits and carrier accepts shipments from connections in addition to those for which permits were issued, and complainants are unable to unload within free time, demurrage accruing is not unreasonable or otherwise unlawful. Timken Roller Bearing Co. v. W. & L. E. Ry. Co., 59 I. C. C. 149.

(e) The forwarding of cars to an embargoed point does not of itself operate to relieve a consignee from demurrage charges. John E. Murray v. Director General, 69 I. C. C. 477, 479.

(f) Demurrage does not accrue, under a general demurrage tariff, against a car which has been offered for reconsignment to an embargoed point upon the general principle that demurrage is assessable for detention for which the shipper is directly responsible and can abate, while an embargo is placed by reason of the carriers disability. But if the carrier specifically provides in its tariff that it will not reconsign to an embargoed point it does not hold itself out to perform such service while an embargo is in effect, and the shipper must either resort to a service that the carrier does hold itself out to perform, such as reconsignment to a point not embargoed, or must hold the car at the expense of demurrage, a possibility which he assumed under the published tariffs when the car left point of origin. John E. Murray v. Director General, 69 I. C. C. 477, 482.

(g) Intrastate shipments were held on tracks of delivering carrier which refused to perform switching service because of an embargo at complainant's plant. HELD: Demurrage charges assessed found illegal as the applicable tariff did not provide for the assessment of demurrage until cars were placed accessible for unloading. Newton Oil Mill v. Dir. Gen., as Agent, 74 I. C. C. 113.

(h) Under the Hepburn Act of 1906, amending the Interstate Commerce Act, a carrier can not at the request of a consignee who is under contract to receive shipments declare an embargo and refuse to furnish cars for shippers; that if it temporarily does so and then removes the embargo, the latter act is but a return to its duty under the act; and failure to notify consignee of such removal does not relieve the latter from liability for demurrage provided by the published tariff. Menasha Co. v. Chicago & Northwestern Ry., 241 U. S., 55. New-

ton Oil Mill v. Director General, as agent, 74 I. C. C. 113, 115.

(i) An interstate carrier can not at the request of a consignee who is under contract to receive shipments declare an embargo on the shipments and refuse to furnish cars for the shippers; that if it temporarily does so and then removes the embargo, the latter act is but a return to its duty under the act; and that failure to notify the consignee of such removal does not relieve the latter from liability for demurrage provided by the published tariff. Newton Oil Mill v. Director General, 74 I. C. C. 113, 115.

(j) Upon shipper's order, without specifying destination of loaded movement, car delivered and loaded. Embargo prevented movement of car, and Federal regulation prohibited return of contents to shipper's plant. Shipper unable to dispose of shipment locally because of contract for entire output. Car remained on sidetrack and demurrage charges accrued. HELD: Partial interference of Federal regulations with disposition of contents of car does not constitute ground for ordering refund of demurrage. Brennan Packing Co. v. Director General, as Agent, 77 I. C. C. 307.

(k) Cars were ordered by shipper without specifying destination of shipments. Embargo having been placed on traffic to intended destination, empty cars remained on sidetrack at shipper's plant and demurrage charges accrued. HELD: Cars were ordered by shipper, and carrier was under no obligation to remove them unless instructed to do so. No such instructions having been given, demurrage charges were applicable during time cars were held by shipper. Brennan Packing Co. v. Director General, as Agent, 77 I. C. C. 307.

(l) Due to embargo impelled by strike conditions on trunk line connections defendant short line declared embargo and notified shippers accordingly. Subsequent to such notice, complainant ordered cars from defendant and loaded them, after which they were removed by defendant to its hold tracks where they remained until its connections would accept them. Demurrage assessed during this period found applicable and not unreasonable. Cars were placed for loading at instance of complainant and apparently for its convenience. United Paperboard Co. v. M. & E. R. R. Co., 80 I. C. C. 640.

(m) Shipment moved under permit during existence of embargo. Prior to arrival at original billed destination reconsignment requested and denied. Shipment arrived at original billed destination where demurrage accrued and subsequently upon instructions from shipper was forwarded to destination requested in reconignment instructions. HELD: Following Skilton case, 56 I. C. C., 251, and Wool case, 53 I. C. C., 183, demurrage charges, and combination rates to extent they exceeded joint rates to ultimate destination, found illegal. Effective reconsignment tariff did not prohibit reconsignment to embargoed points, and fact that shipment moved into embargoed territory under permit did not make tariff inapplicable. Reparation awarded. American Lumber & Mfg. Co. v. G. R. R. 80 I. C. C. 759.

(n) Upon completion of loading, complainant tendered bill of lading to carrier showing as destination embargoed point. Carrier refused to accept shipment because of embargo, and demurrage charges accrued pending ultimate movement to another destination. Contention that carrier should have informed complainant of existence of embargo before car was spotted for loading, not sustained. Complainant did not avail itself of means of ascertaining embargo situation prior to tendering shipment to carrier, and in absence of inquiry with respect thereto, or of knowledge by carrier of intended destination, no duty rested upon carrier to notify complainant of embargo until tender of shipment. Demurrage charges found not unreasonable or otherwise unlawful. Kaw Boiler Works Co. v. Director General, as Agent, 83 I. C. C. 399.

(o) The obligation to accept articles tendered for transportation is governed by the general principles of law, while the obligation to reconsign is determined by rules lawfully on file with the Commission. The Commission has repeatedly held that when tariffs contain no restriction against reconsignment to embargoed points, demurrage charges may not be assessed for the car detention resulting therefrom. Krauss Lumber Co. v. Director General, 87 I. C. C. 707, 708.

R. R., 88 I. C. C. 21; Empire Lumber Co. v. Director General, 88 I. C. C. 424.

§4. Failure of Consignee to Accept.

See Infra §9½; Consignee; Consignor; Demurrage §9½.

IMPORTANT CASES SINCE 1908

(a) Demurrage on coal consigned to a railroad consignee, which accrued on account of that carrier's embargo, is not necessarily unlawful. Crescent Coal & Mining Co. v. B. & O. R. R. Co., 23 I. C. C. 81.

(b) The shipper or consignee who, at a time of demand for transportation which taxes the facilities of the carriers, delays cars and occupies tracks beyond the free time contemplated in the freight rate, inflicts loss not only upon the carrier, but upon other shippers or receivers who desire to use the carrier's facilities. In re Advances in Demurrage, 25 I. C. C. 314, 315.

(c) When the consignee is responsible for the detention en route, his shipments should be placed under the regular demurrage regulations or other charges should be assessed to compensate the carriers for the detention of the equipment and the expense incurred incident thereto. Iron Ore Rate Cases, 41 I. C. C. 181, 206.

(d) Tariff provided that "Notice shall be sent or given consignee in writing, or as otherwise agreed to," but made no provision for notice to consignor when shipment refused at destination. Order-notify consignee notified by telephone and in person, and when it became apparent that he was not going to accept shipment consignor was notified by letter and disposition orders were given. Demurrage accruing found lawfully assessed. Hewitt-Lea-Funck Co. v. Director General, as Agent, 61 I. C. C. 49.

(e) Demurrage and storage charges accruing on unclaimed order notify shipments, due to refusal of carrier to comply with shipper's instructions to place in public warehouse without surrender of bill of lading and payment of accrued charges, found not unreasonable or unlawful as there was no specific tariff provision requiring carrier to place shipment in public storage and carrier was legally bound to collect such charges in accordance with the applicable tariff rules and regulations. Vim Motor Truck Co. v. Director General, as Agent, 64 I. C. C. 588.

(f) Demurrage charges at Detroit, Mich., computed from time of placement on complainant's tracks when cars could not be spotted for unloading because of complainant's inability to receive at unloading point, found applicable and not

unreasonable or otherwise unlawful. Sibley Lumber Co. v. Director General, as Agent, 77 I. C. C. 415.

(g) If the consignee failed to receive or remove a shipment the railroad was bound to exercise reasonable care for its safety and preservation until it could be legally sold in satisfaction of accrued charges. The carrier, however, is under duties other than those which it owes to a particular shipper. It owes a duty to the community, which cannot be efficiently and properly performed if its cars and terminal facilities are cluttered with uncalled for freight. This fact is important in fixing terminal rates. The rate must be large enough to yield reasonable compensation for the service rendered—for the use of cars, tracks and storage space; but to this must be added an amount sufficient to stimulate and even coerce, the speedy removal of freight after the carriage is complete. Hence a demurrage charge has been held to be in part compensation and in part penalty to secure the release of equipment and tracks. Horton v. Tonopah & Goldfield R. Co., 225 Fed. 406, 410 .

(h) That a carrier, having tendered certain cars of cotton seed oil to a consignee, who was unable to receive them because of want of unloading facilities, failed to make present demand for payment of demurrage charges while the cars remained on its tracks, did not create an estoppel against the Director General of Railroads operating the carrier to bring action against the consignee to recover them, since as a carrier could not lawfully waive the charges directly, it could not do so by indirection; mistake, inadvertence, honest agreement, or good faith alike being, under such circumstances, unavailing. Davis v. Timmonsville Oil Co., 285 Fed. 470.

(i) The term "unclaimed" implies, in the absence of an actual refusal, the failure of the consignee of the shipment to claim or accept it; that the mere advice to the carrier that it expects to accept sometime is not the equivalent of claiming the shipment, which would contemplate a demand for delivery and a readiness to pay the charges. Person v. I. C. R. R., 88 I. C. C. 21, 23.

(j) The term "unclaimed" in the demurrage tariff implies, in the absence of an actual refusal, the failure of the consignee of the shipment to claim or accept it and that mere advice to the carrier that it expects to accept sometime is not equivalent of claiming the shipment, which would contemplate a demand for delivery and readiness to pay the charges. Marfield Grain Co. v. A. & W. Ry., 88 I. C. C. 125, 128.

§5½. Heater Cars.

See Heater Cars.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked the charges maintained for detention at Providence, R. I. of Eastman heater cars and lined box cars during the winter months as unreasonable and discriminatory. The charges, after the two-day free demurrage period, were $1.00 per car per day for two days, and $2.00 per car per day thereafter, in addition to demurrage at $1.00 per day. Irregularity in original shipment and delay in unloading resulted in delay averaging 4.44 days per car. HELD, that carriers had justified the charges assailed, which were neither unreasonable nor discriminatory. Complaint dismissed. Providence Fruit & Produce Exch. v. M. C. R. R., 36 I. C. C. 307.

§5¾. Late Diversion Orders.

See Reconsignment §5½.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked the demurrage charged on 3 carloads of lumber forwarded from certain points in Louisiana and held in transit at Ramsey, Ill., for reconsignment, as unreasonable and illegal. Reconsignment orders were furnished within the free time allowed by the tariff for that purpose, directing shipment to Toronto, Ont., but as Toronto was at that time under a freight embargo, the carrier refused to reconsign though the tariff made no provision for the imposition of demurrage charges for detention of cars reconsigned to embargoed points. HELD, that the reconsignment should have been executed at once in accordance with the tariff and that the collection of demurrage was unreasonable and illegal. Reparation awarded. Higgins Lumber & Export Co. v. N. O. G. N. Ry., 51 I. C. C. 214.

(b) Demurrage accruing due to failure of complainant to give disposition orders in answer to telegraphic request after arrival of car at originally billed destination, found not unreasonable or otherwise unlawful. Lowry Lumber Co. v. B. & M. R. R., 60 I. C. C. 739.

§6. One Shipment in Two Cars.

See Bills of Lading §5; Cars and Car Supply §7; Follow-Lot Shipments.

IMPORTANT CASES SINCE 1908

(a) Under a tariff rule which provides for the carload rate on any shipment which is more than one carload and less than two, under certain conditions, if the shipment is sent forward in two cars under a single bill of lading and it should happen that one car should be delayed so that it might be held for some time at destination awaiting the arrival of the other, demurrage charges will not accrue until the entire shipment covered by the bill of lading is delivered. Scudder v. T. & P. Ry. Co., 21 I. C. C. 60, 61, 62.

(b) But it has also been held in cases where delivery of less than an entire shipment is tendered, consignee has alternative of either releasing equipment by unloading portion offered for delivery or of paying charges prescribed for its detention. Darling & Co. v. P. C. C. & St. L. Ry. Co., 37 I. C. C. 401, 402.

ALL OTHER CITATIONS

Kay Co. v. D. & R. G. R. R. Co., 21 I. C. C. 238, 239; Hartford Canning Co. v. C., M. & St. P. Ry. Co., Unrep. Op. 288; Minter & Co. v. A. C. L. R. R. Co., Unrep. Op. A-635; Red Cedar Shingle Mfrs. Asso. v. M. & St. L. R. R. Co.,

Unrep. Op. A-880; Roy & Roy Mill Co. v. B. & M. R. R., 44 I. C. C. 523, 524.

§7. Order-notify Shipments.

See Bills of Lading V.

IMPORTANT CASES SINCE 1908

(a) In a typical case complainant had shipped to it canned tomatoes in carloads from Troutville, Va., to Birmingham, Ala., under an "order-notify' bill of lading containing the provision that "the surrender of this original order bill of lading, properly indorsed, shall be required before the delivery of the property." Upon arrival at destination consignee was given notice, but did not surrender the bill of lading for four days. Demurrage tariffs contained a provision that forty-eight hours' free time "when cars are held for loading or unloading, and but twenty-four hours free time "when cars are hel l for reconsignment or switching orders." HELD, demurrage was collectible after the expiration of twenty-four hours, because the free time for unloading was still allowable after the car had been placed in position for unloading at complainant's warehouse. Roden Grocery Co. v. A. G. S. R. R. Co., 21 I. C. C. 469.

(b) The placing of a car containing an order-notify shipment on a team track and the giving of notice to the consignee amounts to a discharge of the carrier's obligation in the matter of delivery, at least until the bill of lading is surrendered. Roden Grocery Co. v. A. G. S. R. R. Co., 21 I. C. C. 469, 471.

(c) Demurrage charges assessed on order-notify shipments found not unreasonable where cars were held pending receipt of other disposition orders and surrender of bills of lading and not for unloading on public team tracks, thus requiring an additional switching movement within the switching limits. Carrier was justified in declining to accept dsposition orders until bills had been surrendered or other satisfactory assurance given as complainant's title depended upon possession of the bills of lading properly indorsed. Alpirn v. Director General, as Agent, 62 I. C. C. 486.

(d) Order notify shipment went forward as straight shipment consigned to complainant, through carrier's error; complainant having no office at destination point. Several days after arrival, error discovered and correct consignee notified by delivering carrier. Consignee did not object to delay in delivery, but ultimately refused shipment, complainant afterward ordering shipment reconsigned to itself at another point. HELD: Proximate cause of accrual of demurrage, reconsignment, and charges for subsequent movement, was rejection of shipment by consignee and not error of defendants. Clark Co. v. N. Y. C. R. R. Co., 81 I. C. C. 500.

ALL OTHER CITATIONS

Harlow, Trustee, v. W. S. Ry. Co., 26 I. C. C. 511; Arnold & Co. v. T. & P. Ry. Co., 69 I. C. C. 81.

§7½. Penalty Charges.

IMPORTANT CASES SINCE 1908

(a) Penalty charges of $10 per car per day on lumber held for reconsignment beyond 48 hours after 7 a. m. of day following notice of arrival found not unreasonable or otherwise unlawful in the past. However, under present conditions with a great number of idle freight cars, and an entire absence of congestion throughout the country, the charge is, and while present conditions continue will be, unreasonable. American Wholesale Lumber Asso. v. Director General, as Agent, 66 I. C. C. 393.

ALL OTHER CITATIONS

Hollingshead Co. v. N. Y. C. R. R. Co., 73 I. C. C. 640; Central Wisconsin Supply Co. v. C., C. C. & St. L. Ry. Co., 74 I. C. C. 485; Lake Erie & Ft. Wayne R. R. Co., 78 I. C. C. 475, 488, 489.

§8. Pending Dispute or Demanding Advanced Charges.

See Infra §9.

CASES 1887-1908

(a) Defendant's railroad connects at Janesville, Wisconsin, with the Chicago, Milwaukee & St. Paul Railway. Complainant is a merchant doing business at that point and having coal yards on the line of the latter road, but receiving shipments from points on the line of the defendant road, and his financial responsibility is not questioned in this proceeding. Carriers operating in that section of the country are members of a car service association, which has established a rule requiring the payment of demurrage charges when cars are retained by shippers more than forty-eight hours after receiving notice that such cars are in position to reload. HELD, the action of the defendant in refusing to switch cars to complainant unless he would

agree to pay on advance any demurrage charges that might be assessed: whether enforceable or not was illegal. Reparation awarded. Macloon v. Chicago & Northwestern R. Co. 3 I. C. R. 711.

(aa) Defendants' established charge of $1 per day for car demurrage, HELD upon the record to be just and reasonable. T. M. Kehoe & Co. v. Charleston & W. C. R. Co., 11 I. C. C. 166.

IMPORTANT CASES SINCE 1908

(ab) Where the reasonableness of established rates is disputed the complainant is not entitled to a refund of demurrage charges which have accrued because of his refusal to accept delivery pending the settlement of the dispute. But if the delivering carrier demands more than the lawfully established rate the consignee is released from the obligation to pay demurrage while the dispute continues and reparation may be awarded to the extent of the demurrage charges so paid. Peller v. Penn. R. R. Co., 40 I. C. C., 84, 85.

(b) However it also has been held that demurrage charges on lumber consigned to Norfolk, Va., for "Belt Line delivery," but held short of destination by line-haul carrier for payment of freight charges and disposition orders before turning over to switching line, found unlawful. Cars were not delivered to the Belt Line to whom disposition orders were given and line-haul carrier failed to make inquiry of such Belt Line in respect thereto. Reparation awarded. Excelsior Shook & Lumber Co. v. S. A. L. Ry. Co., 66 I. C. C. 241.

(c) Where no rule is published requiring payment of transportation charges prior to turning shipments over to a delivering line, shippers are not on notice of any such practice or requirement. A shipper does all that is required when he notifies the delivering line shown in the billing, of such disposition of the cars as is desired, and to escape responsibility for failure to effect delivery called for, the line-haul carrier must clearly and unequivocally show that the delivering line had knowledge of the arrival of the cars and that they were being held for its account. Excelsior Shook & Lumber Co. v. S. A. L Ry. Co., 66 I. C. C., 241, 243, 244.

(d) Demurrage charges accruing during pendency of dispute as to the legal rate may be waived. Birmingham Commission Co. v. Director General, 74 I. C. C. 693, 694.

(e) Following Conf. Ruling 32, shipper released from the obligation to pay demurrage charges which accrued during the pendency of a dispute as to the legal rate. Birmingham Commission Co. v. Director General, as Agent, 74 I. C. C. 693, 694.

(f) Car moved with charges "collect." Before arrival at destination, consignor paid charges at origin point, but carrier failed to notify agent at destination of such payment, resulting in accrual of demurrage. HELD: Freight charges were prepaid in ample time for agent at destination to have been notified of this fact prior to arrival of car, and it was delivering carrier's refusal to release car until freight charges had been paid a second time, which resulted in accrual of demurrage. Refund directed. Central Wisconsin Supply Co. v. C., M. & St. P. Ry. Co., 80 I. C. C. 763.

(g) Where there is a dispute between the railroad company and the consignee of a car of goods consigned to the consignee, as to the amount of freight due by the consignee thereon, and the railroad company offers to deliver the car to the consignee on payment of the amount of freight admitted by him to be due, the consignee, in order to relieve himself of liability for delay in receiving and unloading the car, must pay the freight in accordance with the company's offer and a tender thereof by him to the company conditioned upon a promise by it not to thereafter attempt to collect from him any additional freight will not relieve him from liability for demurrage in event the company declines to make the promise and he, for that reason, declines to receive and unload the car. Lexington Compress & Oil Mill Co. v. Yazoo & M. V. R. Co., (Miss. 1923), 95 Sou. 92.

Co., 59 I. C. C. 715; A. B. Alpirn v. Director General, 62 I. C. C. 486.

§8½. Pooled Shipments.

See Pooling.

IMPORTANT CASES SINCE 1908

(a) The pool agreement provided that the demurrage assessed against each pool would be prorated among the members upon basis of the tonnage loaded into vessels. Later the demurrage on soft coal shipments was prorated on the basis of the tonnage standing to the credit of the various members of the pool. In some instances the demurrage charges thus apportioned against certain shippers were in excess of those which would have accrued in the absence of the pooling arrangements, and it is contended that such charges are not legally collectible from such shippers. When shippers became parties to the pools they lost their identity from a demurrage standpoint, and so far as the defendants are concerned they need not look beyond the billed consignee, the exchange, in determining the amount of the charges due. Wholesale Coal Trade Association of New York v. Director General, 58 I. C. C. 15-26.

ALL OTHER CITATIONS

Penick & Ford (Inc.), v. Director General, 61 I. C. C. 173, 176.

§9. Prior to Actual Delivery.

See Infra §12.

IMPORTANT CASES SINCE 1908

(a) Demurrage does not accrue, under a general demurrage tariff, against a car which has been offered for reconsignment to an embargoed point upon the general principle that demurrage is assessable for detention for which the shipper is directly responsible and can abate, while an embargo is placed by reason of the carriers' disability. But if the carrier specifically provides in its tariff that it will not reconsign to an embargoed point it does not hold itself out to perform such service while an embargo is in effect and the shipper must either resort to a service that the carrier does hold itself out to perform, such as reconsignment to a point not embargoed, or must hold the car at the expense of demurrage, a possibility which he assumed under the published tariffs when the car left point of origin. Reconsignment Case, 47 I. C. C. 590, 634.

(b) Demurrage does not accrue under a general demurrage tariff, against a car which has been offered for reconsignment to an embargoed point upon the general principle that demurrage is assessable for detention for which the shipper is directly responsible and can avoid or abate, while an embargo is placed by reason of the carrier's disability. Higgins Lumber & Export Co. v. N. O. & N. R. R., 51 I. C. C. 214, 215.

(c) It is a part of the implied contract duty of the carrier to place a car on the consignee's private track if he has one, and until it does so it has not performed its contract, and no freight or demurrage charges, although previously earned, are collectible. The contract of transportation by a common carrier includes placing the cars conveniently for loading and unloading. The incidental consignee can require the car to be placed at a convenient point for unloading and a reasonable opportunity therefor. When the consignee has his own track, and requires the car to be placed thereon for unloading, it is the duty of the transportation company to comply with

his requirement. In New York Central & Hudson River Railroad Company v. General Electric Company, 167 App. Div. 726, at page 732, 153 N. Y. Supp. 478, at page 482, it was said by this court, speaking through Mr. Justice Woodward: "We believe it may be laid down broadly that transportation by railroad of carload lots, under present day conditions, requires the convenient placing of the car for loading, and an equally convenient placing of the car for unloading, and that the mere question of whether the tracks are upon the property of the shipper or upon the right of way of the transportation company is of no consequence upon this point. Primarily it is the duty of the transportation company to afford sidings and a convenient place of loading or unloading, and a proper placing of the cars. If the shipper furnishes the sidings, it does not relieve the transportation corporation of the duty of conveniently placing the cars." Even if demurrage has accrued the carrier can not insist on its payment, or enforce its lien therefor until it has performed its contract by depositing on the track of the consignee the car, which until so deposited has not fully arrived at its destination. Lee v. Erie R. R. Co., 158 N. Y. S. 730, 733.

(d) Cars of coal consigned to Conneaut Harbor, O., on Lake Erie were held at Albion about 14 miles inland, due to congestion of freight there, and pending delivery to the consignee, HELD, that demurrage could not be charged on the cars held at Albion as they were held short of destination, in the absence of a tariff approved by the Interstate Commerce Commission authorizing such charge, and circumstances justifying it. Bessemer & L. E. R. Co. v. Ford Collieries Co., (Pa. 1922), 116 Atl. 802.

(e) Where a carrier under a rule of the Interstate Commerce Commission entitling it to demurrage on cars of coal held at a certain harbor at the terminus of its line "or intermediate storage yards for transshipment," sues for demurrage on cars consigned to such place, but held in transit at storage yards 14 miles therefrom, it must plead and prove such a rule, and that consignee did not have facilities at the dock to receive the freight during the time for which demurrage was claimed, demurrage ordinarily not beginning to accrue until after freights reached destination. Bessemer & L. E. R. Co. v. Ford Collieries Co., (Pa. 1922), 116 Atl. 802.

McGoldbrick Lumber Co., (Wash. 1922), 204 Pac. 1059; Farrin

Lumber Co. v. Director General, 68 I. C. C. 127; Vickers Petroleum Company v. Sand Springs Ry., 87 I. C. C. 676.

§9½. Refused Shipments.

See Demurrage §4.

IMPORTANT CASES SINCE 1908

(a) Upon arrival of shipment defendant wired complainant that consignee had refused delivery, and was advised to store. Defendant did not store promptly. HELD, demurrage should have terminated upon receipt of notice to store, and charges for storage under car demurrage rules the same as if the freight had remained in the car, found illegal. Piqua Milling Co. v. E. R. R., 55 I. C. C. 239.

§10. Private and Trap Cars.

See Private Cars; Trap Cars.

CASES 1887-1908

(a) Right to exact demurrage charges on cars used in transporting complainant's traffic while the cars are standing on a siding owned and operated by defendant, which was constructed by it for the sole use of complainant, is not affected by the fact that the cars are owned by the latter. Cudahy Packing Co., v. C. & N. W. Ry. Co., 12 I. C. C. 446

(b) Defendant's right to exact demurrage charges from complainant on cars used by defendant in transporting complainant's traffic while the cars are standing on a siding owned and operated by defendant, which was constructed by it for the sole use of complainant, is not affected by the fact that the cars are owned by the latter. Cudahy Packing Co. v. Chi. & Northwestern Ry. Co., 12 I. C. C. 446.

(c) Complainant attacked as unreasonable demurrage charges assessed on cars owned by complainant while on side track used by complainant. Complainant, at Deadwood, S. D., is on a spur track about 170 feet in length, which was constructed by defendant for the accommodation of complainant and which is maintained entirely at the expense of the railroad company. No other shipper desires to or could conveniently make use of this spur track, it really being a part of defendants facilities at Deadwood. Complainant desires to retain its refrigerator cars upon this spur track both before and after they are unloaded for an indefinite time without the payment of demurrage. The demurrages rules of defendant are duly filed and published. The fact that the track was constructed and maintained entirely at defendant's expense for the exclusive use of complainant would be no reason why the complainant should be relieved from payment. The construction and maintenance of this track is rather in the nature of a gift to the complainant, and certainly could not be made the basis of any exception in its favor. The more serious question is whether the Cudahy Company should be charged demurrage upon its own cars while standing upon this track. The purpose of demurrage is to compel the prompt unloading and release of cars, and this is not only for the purpose of securing the use of the equipment, but also of relieving the track upon which that equipment must stand. Indeed, the congestion of the terminal is often a more serious matter for the railway than the mere loss of the use of the car. It would appear reasonable, therefore, that railways should be allowed to charge demurrage upon private cars when standing upon the tracks of the railway, AND THE COMMISSION SO HOLDS. Cudahy Packing Company v. C. & N. W. Ry., 12 I. C. C. 446.

(d) The purpose of a demurrage charge is to compel the prompt unloading and release of cars, and this is not only for the purpose of securing the use of the equipment, but also of relieving the track upon which that equipment must stand. It would appear reasonable, therefore, that railways should be allowed to charge demurrage upon private cars when standing upon the tracks of the railway. Cudahy Packing Co. v. C. & N. W. R. Co., 12 I. C. C. 446, 447.

IMPORTANT CASES SINCE 1908

(e) Private cars standing on tracks of owners shall not be subject to demurrage charges. In re Private Cars, 50 I. C. C. 652, 705, 710.

(f) But private cars standing on the private tracks of owners are not subject to demurrage charges. Western Petroleum Refiners Association v. A. & R. R. R., 66 I. C. C. 58, 59.

(g) The provision in the "Uniform Demurrage Code" permitting a railroad to make a demurrage charge against the private cars of the shipper after they have been delivered to him and are standing on his private tracks, is sustainable as a reasonable regulation to prevent a shipper from withdrawing such cars from service and thereby disturbing the car

supply of the carriers, which have relied upon the private cars as a part of their equipment. Proctor & Gamble Co. v. U. S., 188 Fed. 221, 228, sustaining 19 I. C. C. 556; reversed on other grounds, 225 U. S. 282, 32 Sup. Ct. 761, 56 L. ed. 1091. Hooker Knapp, 225 U. S. 302, 32 Sup. A. 769, 56 L. ed. 1099.

(h) Where private cars are still in railroad service while under lading and on a switch track owned by the railway the "transportation," within the meaning of the Act to Regulate Commerce, has not ended. It cannot be said that a charge for detention of a private car and use of a railroad track under such circumstances is unreasonable. Even before the adoption of the Uniform Demurrage Code such a charge had been upheld by the Interstate Commerce Commission. Cudahy Packing Co. v. Chicago & N. W. R. R., 12 Inters. Com. Rep. 446. Swift & Co. v. Hocking Valley Ry., 37 Sup. Ct. 287, 290, 291.

(i) A private switch track, which however is connected with the main line of a trunk line carrier, and is at all times under the control of the railway company, is not a "private track," and private cars on such track are in railroad service and subject to demurrage. Swift & Co. v. Hocking Valley Ry., 37 Sup. Ct. 287, 243 U. S. 281, 61 L. Ed. 122.

(j) Within a freight tariff provision making subject to demurrage charges private tracks of the owners of the cars, even when engaged in transportation of commodities produced by their owners, if they are then "in railroad service," such cars of defendant on a switch track, which under its contract with plaintiff railroad is to be considered as that of the railroad, are "in railroad service," and subject to such charges; they not only standing to interfere with the use of the track by the railroad allowed by the contract, but the railroad's obligation with respect to them not having ceased, in that it was obliged to haul them to the initial point, and pay wheelage thereon to defendant. St. Louis, I. M. & S. Ry. Co. v. National Refining Co., 226 Fed. 357, 358.

ALL OTHER CITATIONS

In Re Demurrage Charges on Privately Owned Cars, 13 I. C. C. 378, 381: Cambria Steel Co. v. B. & O. R. R. Co., 15 I. C. C. 484, 495; Proctor & Gamble v. C. H. & D. Ry. Co., 19 I. C. C. 556, sustained, 188 Fed. 221, 228, reversed on other grounds, 225 U. S. 282, 32 Sup. Ct. 761, 56 L. ed. 1091; Central Commercial Co. v. G. & S. I. R. R. Co., 23 I. C. C. 532; Lewis Mfg. Co. v. D. & R. G. R. R. Co., 32 I. C. C. 488, 489; Swift & Co. v. Hocking Valley Ry. Co. (Ohio 1915), 112 N. E. 212, 213; Woolson Spice Co. v. P. Co., 39 I. C. C. 583, 584, 585; National Refining Co. v. St. Louis, I. M. & S. Ry., 237 Fed. 347, 350; Pittsburgh C. C. C. & St. L. Ry. Co. v. Freedom Oil Works, 247 Fed. 573, 577; Swift & Co. v. Hocking Valley R. R., 37 Sup. Ct. 287, 243 U. S. 281, 61 L. Ed. 175.

§10½. Reasonableness.

CASES 1887-1908

(a) If the time allowed at Philadelphia, or other terminals, for loading or unloading is reasonable and that allowed at interior points is unreasonably small, then an undue prejudice to interior points in violation of section 3 of the law might result; and, if demurrage charges are made to commence before the expiration of a reasonable time for loading or unloading, this may be a violation of the provision of section 1 of the law, which directs "that charges made for any service rendered or to be rendered in the transportation of passengers or property, or in connection therewith, or for the receiving, delivering, storage, or handling of such property, shall be reasonable and just." Pa. Millers' State Asso. v. Phila. & R. Ry. Co., 8 I. C. C. 531.

IMPORTANT CASES SINCE 1908

(b) Demurrage charges should be prescribed sufficiently high to prevent congestion or to compensate carriers for such congestion. Mobile Chamber of Commerce v. M. & O. R. R. Co., 32 I. C. C. 272, 281.

(c) A demurrage charge in part represents compensation to the carrier for service and in part a penalty to prevent the undue detention of cars. Considered primarily as a penalty, charge of $2 can not be regarded as unreasonable. Wholesale Coal Trade Asso. v. Director General, as Agent, 58 I. C. C. 15, 29.

(d) The mere fact that in exceptional instances demurrage charges on cars held for loading but not used are greater than charges which would accrue for detention and transportation if loaded and switched to a destination a short distance beyond the loading point does not prove that the rule or charges thereunder are

unreasonable. Chattanooga Sewer Pipe & Fire Brick Co. v. B. Ry. Co. of C., 51 I. C. C. 447, 448.

(e) A penalty charge should not be so high as to work an undue hardship upon the shipper who must occasionally pay it, yet it should be sufficient in amount to accomplish the purpose for which it is intended. American Wholesale Lumber Assn. v. Director General, 66 I. C. C. 393, 397.

(f) Complainant attacked charges collected for storage from Dec. 15, 1919, to Feb. 29, 1920, at Bolton Station, Baltimore, Md., of fruits and vegetables arriving over the lines of the Pennsylvania as unjust, unreasonable and unduly prejudicial. About 70 per cent of the fruits and vegetables destined to Baltimore move by rail, practically all in carloads and over the Pennsylvania to its Bolton station. Prior to Feb. 15, 1919, the storage charge was 0.5c per 100 pounds for each day after 48 hours free time. On that date, this charge was increased to 2c per 100 pounds for each of the first five days after 48 hours free time, and 3c per 100 pounds for each day thereafter. Bolton station is a facility used by the carrier as an incident to its transportation service. Complainants shipments were stored in or on railroad premises. HELD, charges attacked not unreasonable or otherwise unlawful, complaint dismissed. Dashields & Co. v. Director General, 73 I. C. C. 225.

(g) The action of a terminal carrier, after it knew that the shipper was unlikely to give any orders for the disposition of the shipment, in keeping the goods on a flat car at a demurrage charge of $1 per day for 86 days was unreasonable and unnecessary, and it should have unloaded the shipment and released the car after a demurrage charge of not over 26 days. No. Pac. Ry. v. Pleasant River Granite Co., (Me. 1917), 102 Atl. 298.

§10⅝. Strikes.

See Strikes.

IMPORTANT CASES SINCE 1908

(a) The Commission has uniformly held that strikes which prevent shippers from loading or unloading cars afford no basis for relief from demurrage charges. Wholesale Coal Trade Assn. v. Director General, 58 I. C. C. 15,33.

ALL OTHER CITATIONS

Lehigh Valley Coal Sales Co. v. Director General, as Agent, 58 I. C. C. 76; Schaefer v. L. V. R. R. Co., 66 I. C. C. 549.

III. PUBLICATION AND TARIFFS.

See Storage §3; Tariffs.

§10¾. In General.

IMPORTANT CASES SINCE 1908

(a) The Commission is in duty bound to give full effect to every applicable tariff provision in determining whether demurrage charges in question accrued. United States v. D. & R. G. R. R. Co., 41 I. C. C. 712, 713.

(b) Demurrage can not be assessed unless specially provided for in tariffs. Schuhle's Pure Grape Juice Co. (Inc.), v. Director General, as Agent, 63 I. C. C. 129, 132.

ALL OTHER CITATIONS

New Orleans Storage Rules and Regulations, 28 I. C. C. 605, 607; Miller & Co. v. P. M. R. R. Co., Unrep. Op. A309; General Equipment Co. v. A. C. L. R. R. Co., 37 I. C. C. 620, 621; Higgins Lumber & Export Co. v. N. O. G. N. R. R., 51 I. C. C. 214; National Tube Co. v. P. C. C. & St. L. R. R. Co., 61 I. C. C. 590, 598; Sinclair Refining Co. v. Schaff, 275 Fed. 769; Southern Ry. Co. v. Buckeye Cotton Oil Co., (Miss., 1921), 89 Sou. 228; Davis v.

Greensboro Warehouse & Storage Co. (N. C., 1923), 120 S. E. 462.

§11. Obligation to File.

IMPORTANT CASES SINCE 1908

(a) Where a carrier provides in its tariff for reconsignment without any requirement for prepayment of freight or guaranty of the same, it may not lawfully charge demurrage for time during which it holds the shipment while parleying with its connections as to advancement of its freight charges. Beekman Lumber Co. v. St. L. S. W. Ry. Co., 14 I. C. C. 532, 534.

(b) Demurrage assessed without tariff authority on car detained at intermediate point through no fault of shipper, wrongfully imposed. Germain Co. v. N. O. & E. R. R. Co., 17 I. C. C. 22; Monroe & Sons v. Mich. Cent. R. R. Co., 17 I. C. C. 27.

(c) Where demurrage charges are imposed for detention of cars at a point other than that specified in the bill of lading, there must be definite tariff authority therefor. U. S. v. D. & R. G. R. R. Co., 18 I. C. C. 7, 9.

(d) It has been uniformly held by the Commission that a shipper or consignee may not be required to pay a demurrage charge, unless the carrier's tariffs provide for the same in clear and specific form and manner. Crescent Coal & Mining Co. v. B. & O. R. R. Co., 20 I. C. C. 559, 569.

(e) Demurrage charges assessed on fuel oil, in tank-car loads, held at Chicago, Ill., pending litigation respecting the right of possession thereof, found not to have been authorized by the defendant carrier's tariff and therefore were illegal and reparation awarded. Great Northern Refining Co. v. I. C. R. R. Co., 53 I. C. C. 431.

(f) Demurrage can not be assessed unless specifically provided for in the tariffs. Schuhle Pure Grape Juice Co. v. Director General, 63 I. C. C. 129, 132.

(g) Demurrage is a terminal charge for transportation within the meaning of section 6 of the Act of 1887, as amended by the Act of 1889, and of the Act of 1906, which requires the filing with the Interstate Commerce Commission and printing and keeping open for public inspection of schedules showing all the rates, fares, and charges for transportation. Lehigh Valley R. R. Co. v. U. S., 188 Fed. 879, 885.

(h) So terminal charges being part of transportation and demurrage charges being included in the term "terminal charges," the failure by a carrier to observe demurrage tariffs filed and published by it and the soliciting and receiving of concessions with respect to demurrage charges are misdemeanors for which a prosecution will lie under the Elkins Act of February 19, 1903, and the Hepburn Act of June 29, 1906. Lehigh Valley R. R. Co. v. U. S., 188 Fed. 879, 886.

(i) And where demurrage charges have been duly filed and published with the Interstate Commerce Commission, the carrier and the shipper can not by agreement between themselves cancel such charges on the ground that the carriers' tracks were torn up and the shippers' tracks were in bad condition, thereby causing delays, or on the ground that such charges were discriminatory between competing shippers, and where the carrier and shipper knowing the published demurrage charges cancel the same, they are criminally liable under the Interstate Commerce Act as amended by the Elkins Act of February 19, 1903, and the Hepburn Act of June 29, 1906. Lehigh Valley R. R. Co. v. U. S., 188 Fed. 879, 887.

(j) Demurrage charges should not have been assessed, under rule that carload freight for delivery to terminal carriers in Chicago switching district will not be delivered until freight charges are paid where joint through rate is in effect. Miller & Co. v. P. M. R. R. Co., Unrep. Op. A309.

ALL OTHER CITATIONS

U. S. v. D. & R. G. R. R. Co., 18 I. C. C. 7, 9; Peale, Peacock & Kerr v. Central R. R. Co. of New Jersey, 18 I. C. C. 25, 33; Tioga Coal Co. v. G. R. I. & P. Ry. Co., 18 I. C. C. 414, 415; Beekman Lumber Co. v. Louisiana Ry. & N. Co., 19 I. C. C. 343, 347; Crutchfield & Woolfolk v. S. P. Co., 24 I. C. C. 651, 655; General Equipment Co. v. A. C. L. R. R., 37 I. C. C. 620; Middle West Coal Co. v. C. & O. Ry. Co., 41 I. C. C. 723; Herb Bros. & Martin v. P. C. C. & St. L. Ry., 42 I. C. C. 583; Holland Aniline Co. v. P. M. Ry., 55 I. C. C. 617; Roessler & Hasslacher Chemical Co. v. Director General, 56 I. C. C. 441; Delp Grain Co. v. Director General, 59 I. C. C. 755.

IV. DEMURRAGE RULES.

§12. Construction in General.

IMPORTANT CASES SINCE 1908

(a) The primary object of demurrage regulations is to release cars after a certain period, not to reward a shipper for releasing them in less than that period. Peale, Peacock & Kerr v. C. R. R. Co. of N. J., 18 I. C. C. 25, 32.

(b) In the framing of demurrage regulations the object sought is the prompt release of cars. It is not intended that they should be so liberal as to defeat the end sought to be attained, but their purpose is to stimulate a shipper to aid the carrier in serving all shippers. Peale, Peacock & Kerr v. C. R. R. Co. of N. J., 18 I. C. C. 25, 36.

(c) The average agreement provided for termination "if payment unnecessarily delayed or declined." By reason of a flood at Dayton, embargo was placed. When embargo lifted, cars were bunched and could not be unloaded within free time. Demurrage accrued and payment refused, whereupon agreement was terminated. HELD, as rules made no provision for detention on account of bunching resulting from an act of God, charges lawfully accrued and carrier justified in terminating agreement. Davis Sewing Machine Co. v. P. C. C. & St. L. R. R., 51 I. C. C. 191.

(d) Demurrage charges assessed on order-notify shipments found not unreasonable where cars were held pending receipt of other disposition orders and surrender of bills of lading and not for unloading on public team tracks, thus requiring an additional switching movement within the switching limits. Carrier was justified in declining to accept disposition orders until bills had been surrendered or other satisfactory assurance given as complainant's title depended upon possession of the bills of lading properly indorsed. Alpirn v. Director General, as Agent, 62 I. C. C. 486, 488.

(e) Demurrage and storage charges on cars specifically ordered to public delivery tracks but held in storage yard because public delivery tracks occupied, found to have been illegally assessed. Tariffs made no provision for constructive placement of cars ordered to public delivery tracks and there were no other tracks available to consignee upon which delivery could have been made as contemplated by the tariff rules. Refund directed. Schuhle's Pure Grape Juice Co. (Inc.) v. Director General, as Agent, 63 I. C. C. 129.

(f) Shipment arrived and was unloaded and stored on ground at carrier's yards. Demurrage assessed after expiration of free time pending written request to unload, as provided in tariff. Contention that assessment of demurrage charges when shipment was stored on ground was unreasonable and that storage charges should have applied, not sustained, following Kidston & Co., 74 I. C. C. 135. International Steel Corp. v. P. R. R. Co., 77 I. C. C. 381.

(g) Demurrage charges at Detroit, Mich., computed from time of placement on complainant's tracks when cars could not be spotted for unloading because of complainant's inability to receive at unloading point, found applicable and not unreasonable or otherwise unlawful. Sibley Lumber Co. v. Director General, as Agent, 77 I. C. C. 415.

(h) Assessment by line-haul carriers of demurrage on cars delivered or placed for loading at complainant's plant at Pittsburgh & Ohio Valley Ry., herein found a common carrier subject to the act, computed from time cars are placed on Valley's interchange tracks until returned thereto, found unlawful. Demurrage rules and charges of the Valley found applicable. Carnegie Steel Co. v. Director General, as Agent, 80 I. C. C. 269, 274.

(i) Following Birmingham Southern case, 61 I. C. C., 551, assessment of demurrage under uniform demurrage code against Valley & Siletz R. R. Co., for use or detention of foreign cars on its line found unreasonable and basis for payment prescribed. Valley & Siletz R. R. Co. v. S. P., 80 I. C. C. 724.

(j) Where storage tracks of a railroad for cars billed to Chicago for reconsignment are at Hammond, Ind., a considerable distance from the terminals of the company nearer the center of the city, but convenient to the Belt Line by which cars can be transported to any desired new destination, and the holding on such tracks of cars consigned is in accordance with contracts which had existed for more than twenty years, the contention that the cars have not reached their destination so as to be subject to the demurrage charge is frivolous. Berwind-White Coal Mining Co. v. C. & E. R. R., 35 Sup. Ct. Rep., 131, 132, 235 U. S. 371, 59 L. Ed.

(k) Tariff containing provision that carload freight for delivery on connecting lines which performs a switching service only will not be delivered to such connecting line until all charges are paid, found unreasonable and reparation awarded. Iglehart v. P. R. R. Co., Unrep. Op. A228.

ALL OTHER CITATIONS

C. 501; Bartlesville Zinc Co. v. Director General, 74 I. C. C. 26; F. M. Sibley Lumber Co. v. Director General, 77 I. C. C. 415; General Petroleum Corp. v. Director General, as Agent, 80 I. C. C. 53; Demurrage Rules on Coal and Coke, 89 I. C. C. 230.

§12½. Act of God.

IMPORTANT CASES SINCE 1908

(a) Cars delivered to a shipper for loading and unloading do not cease to be held for those purposes from the fact that the time of holding is extended by an act of God. Mount Hood R. R. Co. v. Director General, as Agent, 60 I. C. C. 116, 118.

(b) The duty of an interstate shipper to load cars within the free time given by the tariffs, and the obligation to pay demurrage for their detention, are, in considering the effect of an act of God, to be classified with those imposed by law, and where a storm which destroyed a bridge on a logging road and prevented the return of cars taken over it for loading within the free time was of such extraordinary character that it should be called an act of God, it relieved the shipper for liability for demurrage. Southern Ry. Co. v. White, 284 Fed. 560.

§13. Average Demurrage Plan.

See Average Demurrage Plan.

IMPORTANT CASES SINCE 1908

(a) Substitution of detention has been amply provided for in every instance where the average agreement is in effect. Meeker v. C. R. R. Co. of N. J., 46 I. C. C. 657, 658.

(b) One of the purposes of the average agreement is, by credits for cars promptly released, to take care of detention caused by bunching and weather interference. Davis Sewing Machine Co. v. P. C. C. & St. L. R. R., 51 I. C. C. 191, 193.

(c) The Cummins amendment to the Act to Regulate Commerce cited as prohibiting any limitation of liability on the part of a carrier, has no application to a question of average demurrage agreement providing that a shipper electing to take advantage of the average agreement is not exempted from payment of demurrage caused by bunching of cars. E. E. Delp Grain Co. v. Hines, 55 I. C. C. 175, 176.

(d) Practice of trunk lines in assessing demurrage predicated upon the time of placement upon interchange tracks and individually applying the average rule, instead of using as a basis the time of placement on the loading and unloading tracks and applying the average rule to the combined cars of all lines, found unduly prejudicial. Reparation awarded. Empire Steel & Iron Co. v. Director General, 56 I. C. C. 158, 190, 191.

(e) The average agreement, so called, is merely a reaffirmation of a continuing obligation resting under the act on the part of the consignor or consignee to observe demurrage regulations and to pay demurrage charges. If it were not entered into the consignor or consignee would be required, under the act, to pay the higher demurrage charges legally assessable under the so-called demurrage plan. Demurrage charges are in the nature of a penalty, and are not fairly comparable with ordinary contracts. Lehigh Valley Coal Sales Co. v. Director General, 58 I. C. C. 76, 80.

(f) The average rule refers specifically only to detention of cars held by shippers or receivers for loading or unloading, and complainant contends that the rule does not authorize the assessment of the charges, as the cars were not held for those purposes. But the cars which are delivered to a shipper for loading or unloading do not cease to be held for those purposes within the meaning of the rule from the fact that the time of holding is extended by an act of God. Mount Hood Ry. Co. v. Director General, 60 I. C. C. 116, 118.

(g) The assessment of average demurrage is a concession from the straight demurrage charge and is a privilege or option extended on the part of the carrier. Penick & Ford v. Director General, 61 I. C. C. 173, 177.

(h) Where, pursuant to the provisions of such tariff schedules so filed, an "average agreement" is entered into by the carrier and a consignee, whereby demurrage charges for the detention of cars by such consignee are computed at the end of each calendar month and credits for cars promptly released by the consignee are offset against debits for those detained, which agreement further provides that the consignee should not be entitled to the benefit of certain exemptions from demurrage charges specified in the tariff, including detention caused by weather conditions preventing unloading of cars, and by reason of bunching of cars in delivery to the consignee due to the neglect of any railroad company, the consignee is not relieved from paying demurrage upon cars detained by him beyond the allotted time resulting from a delivery of cars in accumulated numbers, which bunching of cars was caused "by conditions created by heavy snowfall, severe storms, and protracted intensely cold weather;" such conditions not having been specified as a ground of exemption therefrom in such agreement, read in connection with such tariff schedules. Anthony Carlin Co. v. Hines, (Ohio 1923), 140 N. E. 99.

(i) In suit to recover demurrage, where defendant's bookkeeper, who had complete charge of disposition of incoming freight, entered into an average demurrage agreement with plaintiff and executed it in defendant's name per himself, and it could be found from the evidence that the bookkeeper was either authorized to make the agreement or his act was afterwards ratified by defendant, defendant's request for binding instructions was properly overruled. Davis v. Carroll-Porter Boiler & Tank Co., (Pa. 1923), 119 Atl. 742.

Co., Ct. 532; Wholesale Coal Trade Asso. v. Director General, as Agent, 58 I. C. C. 15, 29, 30; New York Board of Trade v. Director General, 59 I. C. C. 205, 210; National Tube Co. v. P. C. C. & St. L., 61 I. C. C. 590; Union Bag & Paper Co. v. Director General, as Agent, 61 I. C. C. 424, 427, 431; Southern Ry. Co. v. Buckeye Cotton Oil Co., (Miss. 1921), 89 Sou. 228; Atlantic Bitulithic v. M. P. & Ry., 87 I. C. C. 687.

§14. Bunching.

IMPORTANT CASES SINCE 1908

(a) There is nothing unreasonable or unlawful about a tariff rule which provides that in the event of the carrier's bunching a shipper's cars and delivering them in excess of the shipper's facilities and ability to load or unload, demurrage will not accrue. American Creosoting Works v. I. C. R. R. Co., 15 I. C. C. 160, 164.

(b) Unreasonable delays in transportation should not cause demurrage to accrue. Lynah & Read v. B. & O. R. R. Co., 18 I. C. C. 38, 46.

(c) The fact that two carloads are shipped on one day and one the next from the same point of shipment to the same destination, and one car arrives on one day and two on the subsequent day, does not constitute bunching within the meaning of the demurrage rules. Northern Wisconsin Produce Co. v. M. St. P. & St. Ste. M. Ry. Co., 21 I. C. C. 197, 198.

(d) Demurrage charges on carloads of zinc ore at Jersey City, N. J., not exported because of war conditions, not found unreasonable. New Jersey Zinc Co. v. C. R. R. Co. of N. J., 36 I. C. C. 289.

(e) Demurrage rules under which demurrage accrued on three carloads of castings and lumber at East Moline, Ill., not found unreasonable, there being no showing that it was practicable for complainant to finish unloading within the free time allowed; although defendant did not deny that its tracks were congested, or that some of the delay in constructing additional tracks was avoidable on its part. Deere & Co. v. C. M. & St. P. Ry. Co., 40 I. C. C. 533, 534.

(f) Complainant attacked demurrage charges on 78 cars moving interstate to Lockport, N. Y., and offered for delivery and delivered at that place by the Erie between Nov. 16 and Dec. 31, 1918, as unreasonable due to the failure of defendant to place the cars in order of arrival. Actual placement was accomplished when defendant placed the cars for unloading by certain doors of complainants buildings on its switch. When on constructive placement cars were held on defendants nearby switches. They were all actually placed for unloading during December, 1918. Demurrage charges were correctly computed. It appears that complainant did not desire to have shipments placed on its siding except upon specific request from it. When the shipments arrived defendants car clerk notified complainant by telephone of arrival and also sent written notice. No car was switched to actual placement except on direction from the complainant and complainants direction for such placement usually specified the number of the car it wished placed. It is not shown that any direction of complainant for the placement of cars was not executed as given. HELD, demurrage charges lawfully assessed, complainant dismissed. Upson Co. v. Erie Railroad, 69 I. C. C. 483.

(g) Under provision of a demurrage tariff for extra free time in case of bunching, as the direct result of the act or neglect of the carriers, bunching as the result of the consignee's previous fault in not accepting will not avail. Michigan Cent. R. R. v. United States, 246 Fed. 353.

(h) A private switch track is "full" within the meaning of a provision in the carrier's rules relating to car service and

demurrage charges that "the delivery of cars to private tracks shall be considered to have been placed on the tracks designated, or, if such track or tracks be full, when the road offering the cars would have made delivery had the condition of such tracks permitted," where, although such switch track would hold more cars, there were upon it all the cars that the consignee, as it used the track, could handle and unload, and the consignee did not ask for more. Menasha Paper Co. v. C. & N. W. Ry. Co., 36 Sup. Ct. 501; 241 U. S. 55; 60 L. ed. 885.

(i) Coal was bunched in transit, due to flood conditions. Demurrage collected while awaiting reconsignment was not unreasonable. Reeves Coal Co. v. L. & N. R. R. Co., Unrep. Op. 2110.

Director General, 69 I. C. C. 501; Allied Machinery v. Director General, as Agent, 81 I. C. C. 204.

§14¼. Constructive Placement.

IMPORTANT CASES SINCE 1908

(a) Demurrage tariff provided for constructive placement when delivery can not be made "on account of act or neglect of consignee or inability of consignee to receive," and that in such circumstances "delivery will be considered to have been made when cars were tendered." HELD: Unless actual tender is made or consignee has informed carrier that no more cars can be received, rule requires carrier to place cars to full extent of consignee's physical capacity to receive them. Union Bag & Paper Co. v. Director General, as Agent, 61 I. C. C. 424, 426.

(b) Complainant attacked certain demurrage charges collected on carloads held short of destination under constructive placement at various points more or less distant from Fenimore, N. Y. Original decision 61 I. C. C. 424. The case was reopened. If in this case the evidence shows that the complainant could have received and unloaded more cars had they been actually instead of constructively placed, it follows that the demurrage debits and the resulting charges must be adjusted accordingly. HELD, the large accumulation of cars on constructive placement was directly due to the fire and resulting chaotic conditions within the plant up to August 9th; and that for period subsequent to that date defendant was justified in assuming that complainants unloading capacity was no greater than that demonstrated by its daily performances during the period in question. HELD, the demurrage charges contemplated by the former finding were lawfully assessed and collected. The demurrage rules provide that the placing of recent arrivals ahead of previous arrivals will be construed as a railroad error. The report in this respect will therefore be modified, and defendant should refund the amount in excess of the demurrage which would have accrued but for such error. Union Bag & Paper Corp. v. Director General, 69 I. C. C. 711.

(c) Constructive placement of a car is a fiction. It is effective only under the conditions prescribed in the demurrage code, which conditions were made and published by the carriers. They must accordingly find a way to determine in each case whether, when they place a car constructively, such placement is due to the act, neglect, or inability of the consignee to receive it. Union Bag & Paper Corp. v. Director General, 69 I. C. C. 711, 714.

(d) Following Union Bag & Paper Corp., 61 I. C. C., 424, 69 I. C. C., 711, in computing demurrage on shipments constructively placed, consignee should be allowed credit for the time necessary to transport cars from point of constructive placement to point of final placement. International Paper Co. v. Dir. Gen., as Agent, 74 I. C. C. 34, 37.

(e) Failure of carrier to give written

notice of constructive placement, as provided in the demurrage rules, found not the proximate cause of delay in receiving and unloading cars. Severe weather and labor troubles resulted in accumulation of cars at plant of complainant who had actual notice of such constructive placement and acquiesced in the absence of written notice. Since there was substantial, if not literal, compliance with the rules, demurrage charges found not illegally assessed. International Paper Co. v. Dir. Gen., as Agent, 74 I. C. C. 34, 37.

(f) Where cars are constructively placed and written notice thereof is given by defendant, in conformity with the governing tariffs, the free time on such shipments should be computed from the first 7 a. m. after notice is furnished instead of the first 7 a. m. after arrival of the cars at point of constructive placement. International Paper Co. v. Director General, as Agent, 74 I. C. C. 37.

(g) Demurrage charges assessed on shipments constructively placed at points on connecting lines, due to inability of consignee to accept delivery are not unreasonable or unlawful. Newton Oil Mill v. Director General, 74 I. C. C. 113, 115.

(h) Notices of arrival of bituminous coal at Allentown, Pa., were promptly mailed by carrier. Cars were held under constructive placement, written notices of which were sent but receipt thereof denied. Complainant's officers were in daily communication with carrier's yardmaster, who in telephone conversations gave them notice of number of cars on hand. Demurrage charges assessed found not unreasonable or unlawful, except to extent they exceeded those which would have accrued if shipments had been actually placed in order of arrival as provided in the demurrage tariff. Lehigh Silk Dyeing Co. v. Director General, as Agent, 77 I. C. C. 39.

(i) Upon reconsideration, finding in former report, 74 I. C. C., 34, modified to hold that certain shipments referred to therein as actually placed should be treated as constructively placed, and that demurrage charges assessed were not unreasonable or otherwise unlawful. Complainant had actual notice of constructive placement and acquiesced in absence of written notice. International Paper Co. v. Director General, as Agent, 80 I. C. C. 135.

ALL OTHER CITATIONS

Union Bag & Paper Co. v. Director General, as Agent, 61 I. C. C. 424, 427; Alpirn v. Director General, 62 I. C. C. 486, 488; Upson Co. v. E. R. R. Co., 69 I. C. C. 483; Baltimore Trust Co. v. Director General, as Agent, 74 I. C. C. 22; Newton Oil Mill v. Director General, 74 I. C. C. 113, 115; International Paper Co. v. Director General, as Agent, 74 I. C. C. 135; Chicago, St. P. M. & O. Ry. Co. v. New Dells Lumber Co., (Wis., 1924), 197 N. W. 713 (State Shipment).

§14½. Congestion or Delay Because of War.

See Demurrage §16.

IMPORTANT CASES SINCE 1908

(a) The word "tendered" as used in constructive placement provision of demurrage tariff construed to require that shipments be tendered for delivery at billed destination, or, at most, at a point reasonably adjacent to such destination. Union Bag & Paper Corp. v. Director General, as Agent, 61 I. C. C. 424, 427.

(b) Vessel on which space engaged commandeered by Government while shipments in transit. While effort was being made to secure space on other vessels, shipments unloaded and stored in order to release equipment. Demurrage and storage charges assessed found not illegal, unreasonable, or unduly prejudicial, as governing tariff did not limit the causes which may contribute to failure of a vessel to make its scheduled sailing. Dodge Bros. v. Director General, as Agent, 62 I. C. C. 689.

(c) Contention that shipments were detained at port as result of action of government in commandeering vessels on which space was engaged, and that no demurrage should have been assessed during time when the lines of defendant carriers were being operated by a federal agency, not sustained, as governing tariff did not limit the causes which may contribute to failure of a vessel to make its scheduled sailing. Dodge Bros. v. Director General, as Agent, 62 I. C. C. 689, 690, 691.

ALL OTHER CITATIONS

Adam v. I. C. R. R. Co., 41 I. C. C. 685; Kansas City Southern Ry. Co., v. Fort Smith Compress Company, (Ark. 1919), 210 S. W. 147; United Shoe Machinery Corporation v. Pa. R. R., 55 I. C. C. 253; James S. Kirk & Co. v. C. & N. W., 60 I. C. C. 491.

§14¾. Deviation from Route.

IMPORTANT CASES SINCE 1908

(a) The fact that the carrier deviated from the route designated in the bill of lading did not relieve the shipper from demurrage charges imposed by the tariff for failure to unload within the prescribed time after arrival at destination. Minneapolis, St. P. & S. S. M. Ry. Co. v. Reeves Coal Co., (Minn. 1921), 181 N. W. 335, 345.

(b) Under railroad's rules, made part of agreement between carrier and consignee, HELD that, where consignee's regular unloading track was occupied by loaded cars used for ballast purposes during a flood, carrier could make constructive placement by actually delivering the incoming cars at other points in consignee's yards instead of giving notice, but that the option belonged to it and not to the consignee. Chicago, St. P., M. & O. Ry. Co. New Dells Lumber Co. (Wisc., 1924), 197 N. W. 713. (State Shipment.)

§15. Free Time.

CASES 1887-1908

(a) It is held that 48 hours is an unreasonably small allowance of time for unloading where any portion of it has to be consumed in attending to the preliminaries necessarily antecedent to the actual process of unloading, and it is ordered that as to grain, flour, hay, and feed consigned to and deliverable at interior points in the territory of the Philadelphia Car Service Association, the defendants cease and desist from charging demurrage until the expiration of a reasonable time for unloading after the cars have been placed for unloading and notice of such placing has been given the consignee or other proper party. It is further held that 48 hours will be a reasonable time for the actual unloading. Pa. Millers State Asso. v. Phila. & R. Ry. Co., 8 I. C. C. 531.

(b) Complainant attacked as unjust and unreasonable and unduly discriminatory car service rules providing at interior points $1.00 per car for each day or fraction of a day said car may be detained over 48 hours in unloading or loading, while on cars loaded with coal, coke, pig iron or iron ore, delivered at interior points, 72 hours are allowed for loading or unloading, 96 hours at Philadelphia. There is no violation of section 2 of the act shown in this case in the application of the rule allowing 96 hours for unloading cars at Philadelphia; neither is there any violation of that section in the facts, that on all other commodities beside those to which the 96 hour rule is applied, only 48 hours are allowed at Philadelphia and on coal, coke, pig iron, and iron ore 72 hours are allowed at interior points, while only 48 hours are allowed on other traffic at interior points. Section 2 prohibits unjust discrimination in the transportation of a like kind of traffic and does not apply where the traffic is of different kinds of classes not competitive with each other. HELD, 48 hours is an unreasonably small allowance of time for unloading where any portion of it has to be consumed in attending to the preliminaries necessarily incident to the actual process of unloading, and it is ordered that as to grain, flour, hay, and feed consigned to and deliverable at interior points in the territory of the Philadelphia Car Service Association, the defendants cease and desist from charging demurrage until the expiration of a reasonable time for unloading after the cars have been placed for unloading and notice of such placing has been given the consignee or other proper party. HELD, further, 48 hours will be a reasonable time for the actual unloading. Pennsylvania State Millers' Asso. v. P. & R. R. Co., 8 I. C. C. 531.

IMPORTANT CASES SINCE 1908

(c) The public is entitled to a reasonable time in which to load or unload, which should not be shortened because of adverse weather conditions. Murphy Bros. v. N. Y. C. & H. R. R. Co., 21 I. C. C. 176, 177.

(d) The transportation rate contemplates a certain free time within which to unload. In re Advances in Demurrage Charges, 25 I. C. C. 312, 314.

(e) It is a uniform rule that in reckoning free time for the purpose of assessing demurrage charges, Sunday and legal holidays shall be excluded. New Orleans Storage Rules and Regulations, 28 I. C. C. 605, 607.

(f) In the computation of free time, when a car is ordered forward for unloading on or before 6 o'clock in the evening of a given day, the time shall be computed as though the car were unloaded during that day. Anderson-Tully Co. v. M. L. & T. R. R. & S. S. Co., 30 I. C. C. 140, 143.

(g) Tariff rule governing demurrage charges on frozen shipments under which consignee is given a maximum free time

of four days, regardless of how difficult it may be to unload, found not unreasonable as applied to shipments of sand and gravel. Missouri Valley Asso. of Sand & Gravel Producers v. A. V. I. Ry. Co., 73 I. C. C. 615.

(h) On cars actually placed, free time was computed from the first 7 a. m. after arrival instead of from the first 7 a. m. after they were placed on complainant's tracks. No notice of constructive placement was given as provided in the demurrage rules. Demurrage charges, assessed on the theory that cars were on complainant's tracks, when as a matter of fact, they were on carrier's tracks, found illegal. Reparation awarded. International Paper Co. v. Director General, as Agent, 74 I. C. C. 34, 35, 37.

(i) Where cars constructively placed and written notice thereof is given by defendant, in conformity with the governing tariffs, the free time on such shipments should be computed from the first 7 a. m. after notice was furnished instead of the first 7 a. m. after arrival of the cars at point of constructive placement. International Paper Co. v. Dir. Gen., as Agent, 74 I. C. C. 34, 37.

(j) Contention that the giving of notice of arrival on a legal holiday operated to postpone the running of free time, not well founded where there was nothing in the applicable tariffs which prohibited the giving of such notice on a holiday. Foxley Stave & Lumber Co. v. L. & N. R. R. Co., 74 I. C. C. 43, 44.

(k) Free time began from the first 7 a. m. after actual or constructive placement of cars over complainant's coal pockets, and that such cars were released when unloaded and tendered by complainant to the Terminal Co. and any charges collected on time computed differently is erroneous. Scranton & Lehigh Coal Co. v. L. V. R. R. Co., Unrep. Op. A459.

ALL OTHER CITATIONS

Murphy Bros. v. N. Y. C. & H. R. R. R. Co., 17 I. C. C. 457, 460; New Orleans Board of Trade v. I. C. R. R. Co., 17 I. C. C. 496, 502; Peale, Peacock & Kerr v. C. R. R. Co. of N. J., 18 I. C. C. 157; Crow's Nest Oass Coal Co. v. G. N. Ry. Co., 32 I. C. C. 479, 480; C. Reiss Coal Co. v. A. A. R. R., 38 I. C. C. 337; Dinsmore & Co. v. P. B. & W. R. R. Co., 40 I. C. C. 618; Natl.-League of Commission Merchants v. G. T. Ry. of Can., 41 I. C. C. 745; Edwards & Bradford Lum. Co. v. A. A. R. R., 42 I. C. C. 9; Wattles-Fisher Coal Co. v. A. A. R. R. Co., 42 I. C. C. 186; Newman Lumber Co. v. N. O. & N. E. R. R., 47 I. C. C. 33; New York Harbor Storage, 47 I. C. C. 141, 159; Export Freight Free Time, 47 I. C. C. 162, 177; Hite and Rafetto v. Cent. R. R. of N. J., 52 I. C. C. 344; Regulations for Payment of Rates and Charges, 59 I. C. C. 456; Baltimore Trust Co. v. Director General, as Agent, 74 I. C. C. 22. American Lumber & Export Co. v. Director General, as Agent, 78 I. C. C. 48, 49; West Virginia Pulp & Paper Co. v. Director General, as Agent, 78 I. C. C. 57.

§15½. Legal Rate.

See Legal Rates.

IMPORTANT CASES SINCE 1908

(a) Carloads of lumber were shipped from various interstate points to Goldfield and Tonopah, Nevada. While in transit, the demurrage charges applicable at these points were advanced. The carloads were unclaimed at destination and were assessed demurrage charges on the advanced basis whereas the shipper claimed the demurrage in effect when the shipments originated should have been assessed. There was no agreement that the lumber, or any portion thereof, after it arrived at its destination, should remain in the custody of the railroad company for any fixed period, or, in fact, for any period whatever beyond a reasonable time for delivery. HELD, the schedule was in the nature of an offer to store goods at a certain rate. Until the offer is accepted in some way, there is no binding contract. If the fact that the 18 cars were left in the custody of the company after the expiration of the free time for unloading be construed as an acceptance of the demurrage rates set out in the schedules, still it was not an acceptance for any definite period, and the demurrage

charges should lawfully be assessed at the increased rate. Horton v. Tonopah Goldfield R. Co., 225 Fed. 406, 411, 412.

ALL OTHER CITATIONS

Carnegie Steel Co. v. Director General, as Agent, 80 I. C. C. 269, 274; Webb Fuel Co. v. Director General, as Agent, 81 I. C. C. 631.

§16. Placement or Arrival Notices.

See Notice.

IMPORTANT CASES SINCE 1908

(a) Notice of arrival does not constitute constructive placement where the car is not held by the carrier on account of the consignee's inability to receive it. Northern Wisconsin Produce Co. v. M. St. P. & St. Ste. M. Ry. Co., 21 I. C. C. 197, 198.

(b) The tariff should provide for computing the time from the first 7 a. m. after placement of car and after day on which notice of arrival is given. Murphy Bros. v. N. Y. C. & H. R. R. R. Co., 33 I. C. C. 355, 356.

(c) Consignee failed to receive mailed notice; but carrier's duty was performed when letter was placed in the mail, and demurrage on car of scrap iron was proper. Ohio Iron & Metal Co. v. E., J. & E. Ry. Co., 34 I. C. C. 75.

(d) Written notice of constructive placement of cars on storage track given for certain cars. Demurrage charges assessed on cars as to which no notice of arrival was given held to have been unlawful. Reparation awarded. American Radiator Co. v. L. V. R. R., 44 I. C. C. 361, 362.

(e) No notice either as to arrival or placement of cars was received by complainant, demurrage charges therefore unlawfully assessed. Reparation awarded. American Radiator Co. v. L. V. R. R., 44 I. C. C. 361, 363.

(f) The purpose of a notice of arrival of a shipment is to apprise the consignee that a car has reached destination or a recognized hold point and is being held for delivery or awaiting disposition orders. Obviously the notice should be clear and definite. The consignee should be given all necessary information. On the other hand, if the notice does not sufficiently apprize him of the situation, he should seek further enlightenment from the carrier. Steinhardt & Kelly v. Erie R. R., 52 I. C. C. 304, 305.

(g) What constitutes "substantial compliance" with the requirements of a tariff as to notice to the consignee of arrival of shipment in a particular case is a question not free from difficulty. It would seem that in its determination the Commission must be guided to some extent by the circumstances surrounding the transaction and that no hard and fast rule can be laid down. Unlike freight charges, demurrage charges are in the nature of a penalty and are imposed not for the benefit of a carrier, but in order to promote the free movement of cars in the public interest. It would be manifestly unjust to the public, where the information contained in an arrival notice, in connection with that already possessed by the consignee, was all that it needed or desired to transact business in the customary way, to hold that such consignee could, several years later, set up the insufficiency of the notice as a ground for the refund of demurrage charges legally applicable for detention due to the consignee. Steinhardt & Kelly v. Erie R. R., 52 I. C. C. 304, 306.

(h) Legally applicable demurrage charges found to have been lawfully assessed as mailing of notice of arrival by defendant to consignee at address indicated on bill of lading was in full compliance with tariffs. Lowry Lumber Co. v. Director General, 57 I. C. C. 139.

(i) Bill of lading contained instructions as to party to be notified at reconsignment point together with notation "to be reconsigned to Lansing," but did not name party to whom notice should be sent at latter point. Carrier reconsigned the shipment to ultimate destination where demurrage accrued. HELD: carrier at fault in accepting and moving shipment under ambiguous instructions contained in the bill of lading and demurrage charges illegally assessed. Reparation awarded. Gill-Andrews Lumber Co. v. Director General, 57 I. C. C. 493.

(j) Where shipment is consigned to a firm unknown in the locality and proof of receipt by delivering carrier of mailed instructions for reconsignment is not established, although such notice received by another carrier not a party to the transaction, demurrage lawfully accrues. Wheeler Co. v. N. Y. C. R. R. Co., 59 I. C. C. 161.

(k) A notice in writing is highly desirable as evidence of the fact that notice was given, and tends to promote the orderly conduct of business and prevent unlawful concessions and discrim-

inations that would result from a lax enforcement of the "weather" rule. Virginia Iron, Coal and Coke Co. v. Director General, as Agent, 61 I. C. C. 200, 201.

(l) Where the failure to observe a provision in a demurrage tariff is not the proximate cause of the accrual of demurrage, the Commission has not always insisted that a literal compliance with its terms is necessary. The Commission has held more than once that if a shipper has knowledge of the arrival of his car, either by oral advice from the carrier or otherwise, he can not be heard to say that demurrage will not accrue because he has received no written notice thereof as provided in the demurrage tariff. Virginia Iron, Coal & Coke Co. v. Director General, 69 I. C. C. 501, 502.

(m) Immediately upon arrival of shipments, written notice of arrival was given and cars were placed on storage tracks within complainant's plant, where they were held for varying periods. Under an arrangement with carrier cars were subsequently placed at unloading points within the plant under direction of complainant's yard foreman. HELD: Demurrage charges assessed as though delivery had been made when cars were placed on storage tracks found legally applicable and not unlawful. Bartlesville Zinc Co. v. Director General, as Agent, 74 I. C. C. 26.

(n) Failure of defendant to give written notice of constructive placement, as provided in the demurrage rules, found not the proximate cause of delay in receiving and unloading cars. Severe weather and labor troubles resulted in accumulation of cars at plant of complainant who had actual notice of such constructive placement and acquiesced in the absence of written notice. Since there was substantial, if not literal, compliance with the rules, demurrage charges found not illegally assessed. International Paper Co. v. Director General, as Agent, 74 I. C. C. 34, 37.

(o) Contention that the giving of notice of arrival on a legal holiday operated to postpone the running of free time, not well founded where there was nothing in the applicable tariffs which prohibited the giving of such notice on a holiday. Foxley Stave & Lumber Co. v. L. & N. R. R. Co., 74 I. C. C. 43, 44.

(p) Notices of arrival of bituminous coal at Allentown, Pa., were promptly mailed by carrier. Cars were held under constructive placement, written notices of which were sent but receipt thereof denied. Complainant's officers were in daily communication with carrier's yardmaster who in telephone conversation gave notice of number of cars on hand. Demurrage charges assessed found not unreasonable or unlawful, except to extent they exceeded those which would have accrued if shipments had been actually placed in order of arrival as provided in the demurrage tariff. Lehigh Silk Dyeing Co. v. Director General, as Agent, 77 I. C. C. 39.

(q) Demurrage charges at Detroit, Mich., computed from time of placement on complainant's tracks when cars could not be spotted for unloading because of complainant's inability to receive at unloading point, found applicable and not unreasonable or otherwise unlawful. Sibley Lumber Co. v. Director General, as Agent, 77 I. C. C. 415.

(r) The Commission has found that the mailing of an arrival notice to the consignee at the destination shown in the bill of lading is a full compliance with the tariff, and that the free time begins to run in accordance with the tariff provisions from the time of such notice, regardless of general instructions with reference to the mailing of notices to a point other than the destination of the shipment. American Lumber & Export Co. v. Director General, 78 I. C. C. 48, 49.

(s) Under the demurrage tariffs a carrier's duty as to notification is fully performed when it places in the mail a notice properly addressed to consignee. Sullivan Lumber Co. v. Director General, 78 I. C. C. 393, 394.

(t) Where the failure to observe the provision in a demurrage tariff is not the proximate cause of the accrual of demurrage, the Commission has not always held that a literal compliance with its terms is necessary. The Commission has held more than once that if a shipper has knowledge of the arrival of his car, either by oral advice from the carrier or otherwise, he can not be heard to say that demurrage will not accrue because he received no written notice thereof as provided in the demurrage tariff. The Commission sees no reason why the converse should not govern. Hawkins & Sons v. Director General, 80 I. C. C. 225, 227.

(u) In the absence of anything in a tariff of demurrage charges, or the statute under which it is issued requiring the carrier to give notice of arrival of cars, absence of such notice does not affect the time when demurrage charges commence, notwithstanding notices are usually given on the day of arrival, as matter of courtesy or custom. Chesapeake & Ohio Coal & C. Co. v. Toledo & O. C. Ry., 245 Fed. 917.

(v) Where the unloading conveyor of an oil company had broken down, so that it was unable to unload shipments of cotton seed on the special delivery track, and the carriers immediately on arrival of certain cars of cotton seed oil consigned to the company, notified it by mail, giving the name of the railroad to which the cars belonged, their number, point of shipment, the name of the consignor, and the date of arrival, the failure of the notice to state also that the railroad was unable to make physical delivery of the car at the consignee's siding, because the track was blocked with other cars, did not invalidate the notice as notice of "constructive placement," required by Demurrage Rules, rule 5, §A, so as to constitute a defense in an action against the consignee for demurrage charges; the consignee already having the information omitted from the notice. Davis v. Timmonsville Oil Co., 285 Fed. 470.

(w) Consignee cannot complain that none of the notices served on him regarding the arrival of cars were in the form prescribed by the rules relating to constructive placement, which provide that notices should be in writing, and contain point of shipment, car's initials and numbers, and the contents, when the form of notice used was received by defendant without objection, and there was no request for additional information, and the bills first sent under that form of notice were paid. Davis v. Carroll Boiler & Tank Co., (Pa. 1923), 119 Atl. 742.

§16½. Penalty Charge.

IMPORTANT CASES SINCE 1908

(a) Complainant attacked car service charges collected for the detention at Solvay, N. Y., in December 1920 and January 1921, of two carloads of cooperage stock shipped from Pelham, Ala.,

to Solvay and forwarded thence to Syracuse, N. Y., as unjust, unreasonable and unlawful to extent such charges exceeded ordinary demurrage charges, and that the penalty charge of $10 per day should not have been applied. Shipments were placed on a siding of defendant which connects with an interchange track of the Solvay Process Co., the consignee whence the latter removed them to its plant. Later, both cars were returned by the consignee, without having been unloaded, to the track of defendant, with the information that it refused to receive the contents of the cars. On the same date defendant notified the complainant by telegram of the rejection and on Jan. 21, 1921, upon instructions from complainant, the cars were moved by defendant to King's Warehouse at Syracuse for storage. Complainant does not attack any of the charges except the penalty charge which applies on cars loaded with lumber and certain products thereof held for reconsignment. Both the demurrage and the reconsignment tariffs make a distinction between reconsignment and reshipment. The application of the so-called reconsignment charge under rule 12 of the reconsignment tariff is not determinative of whether or not the reforwarding constitutes a reconsignment or a reshipment. The transaction here considered came within the terms of rule 12, but the charge of $7 per car was not collected, resulting in undercharge. Whatever grounds the reconsignment tariff may afford for controversy as to what constitutes a reconsignment thereunder, it is clear that the movement from Solvay to Syracuse was under a new contract and at a new rate, and hence within the definition of reshipment contained in the demurrage tariff. HELD, penalty charged attacked illegally collected, reparation awarded. J. D. Hollingshead Co. v. N. Y. C. R. R., 73 I. C. C. 640.

§17. Railroad Errors or Omissions.

IMPORTANT CASES SINCE 1908

(a) Where a shipper has been compelled to pay demurrage charges through carrier's error, the resulting damage must be borne by the carrier responsible for the error. Conf. Ruling 220 (f). Amer. Cement Plaster Co. v. Ft. W. & D. C. Ry. Co., 58 I. C. C. 435, 436.

(b) Where a shipper is compelled to pay demurrage charges through the fault of one of the transporting carriers, such charges must be refunded. Reeves Coal & Dock Co. v. Director General, 63 I. C. C. 387, 388.

(c) A clause in a demurrage tariff which says that no demurrage charges shall be assessed for railroad errors or omissions refers to railroad errors or omissions occurring after the cars are placed. Michigan Cent. R. R. v. United States, 246 Fed. 353, 358.

§18. Reciprocal Demurrage.

CASES 1887-1908

(a) The Commission is without authority to fix rules or regulations for reciprocal demurrage. J. B. Mason v. C. R. I. & P. Ry., 12 I. C. C. 61, 62.

IMPORTANT CASES SINCE 1908

(b) The liability of carriers for general damages growing out of their failure to furnish cars is determinable by the courts. The law does not require them to define their liability by tariff publication and the Commission has no jurisdiction to require carriers to establish reciprocal demurrage regulations. Deposit for Live Poultry Car Ordered, 66 I. C. C. 653, 656.

§18¼. Switching Reclaims.

IMPORTANT CASES SINCE 1908

(a) The per diem agreement is not a proper basis for settlement by an industrial railway for the use or detention upon its line of foreign cars. Lake Erie & Fort Wayne R. R. Co., 63 I. C. C. 122.

ALL OTHER CITATIONS

Wholesale Coal Trade Assn. v. Director General, as Agent, 58 I. C. C. 15, 33; Lehigh Valley Coal Sales Co. v. Director General, as Agent, 58 I. C. C. 76; Birmingham Southern R. R. Co. v. Director General, as Agent, 61 I. C. C. 551.

§18½. Uniform Demurrage Code.

See Per Diem Charges.

IMPORTANT CASES SINCE 1908

(a) The existence of merely unique or exceptional transportation conditions in certain localities furnishes no ground for exceptions being made to the uniform demurrage code in favor of such localities, unless it appear that unlawful discrimination would otherwise result against such localities if exceptions were not made. Michigan Mfrs. Asso. v. P. M. R. R., 31 I. C. C. 329, 336.

(b) The primary purposes of the uniform demurrage code were to promote prompt release of loaded cars and prompt loading of empty cars, to prevent unreasonable detention of equipment. Lowry Lumber Co. v. Director General, 58 I. C. C. 113, 114.

(c) Following Birmingham Southern case, 61 I. C. C., 551, assessment of demurrage under uniform demurrage code against the Valley & Siletz R. R. Co., for use or detention of foreign cars on its line found unreasonable and basis for payment prescribed. Valley & Siletz R. R. Co. v. S. P. Co., 80 I. C. C. 724.

ALL OTHER CITATIONS

Michigan Mfrs. Asso. v. P. M. R. R. Co., 31 I. C. C. 326, 329; Birmingham Southern R. R. Co. v. Director General, 61 I. C. C. 551.

§19. Weather Interference.

IMPORTANT CASES SINCE 1908

(a) In a typical case due to inability to unload frozen shipments of ore, cars accumulated on tracks at complainant's plant resulting in further deliveries not being accepted when tendered, and cars were constructively placed at various points along carrier's line. HELD, following Pennsylvania R. R. Co. v. Kirtaning Iron & Steel Mfg. Co., 253, U. S., 319, demurrage found illegally assessed and unreasonable. Wharton Steel Co. v. Director General, as Agent, 59 I. C. C. 613.

(b) Shippers are entitled to a reasonable free time for loading or unloading cars, and the principle has long been recognized that demurrage should not be imposed for delays occasioned by weather interference. Virginia Iron, Coal & Coke Co. v. Director Geenral, 61 I. C. C. 200, 201.

(c) When a shipment is tendered for delivery in a frozen condition and for that reason can not be unloaded within the prescribed free time, it is not unreasonable to require that due notice to that effect be given in order that the carrier may have the necessary information upon which to base its demurrage charges and to be afforded opportunity to take proper steps to expedite unloading. Manifestly a notice in writing is highly desirable as evidence of the fact that notice was given, and also tends to promote the orderly conduct of business and to prevent unlawful concessions and discriminations that would result from a lax enforcement of the "weather" rule. Virginia Iron, Coal & Coke Co. v. Director General, 61 I. C. C. 200, 201.

(d) Complainant attacked the frozen lading rule published in demurrage tariffs as unjust and unreasonable as applied to sand and gravel. Under the old rule when sand was frozen in transit and arrived at destination in that condition, the consignee was able to extend the free

time during the entire period required to unload by serving notice on the agent of the carrier and making reasonable effort to unload. Under the present rule, if the lading was frozen at the time of placement, the consignee is given a maximum free time of four days, regardless of how difficult it may be to unload. The rule in question is now a part of the uniform demurrage code generally applicable throughout the entire country, and, at time of hearing, had not been effective during a winter season. The evidence presented in this record does not justify a condemnation thereof. HELD, rule attacked not unreasonable, complaint dismissed. Missouri Valley Sand & Gravel Producers v. A. V. I. Ry. Co., 73 I. C. C. 615.

(e) Tariff rule governing demurrage charges on frozen shipments under which consignee is given a maximum free time of four days, regardless of how difficult it may be to unload, found not unreasonable as applied to shipments of sand and gravel. Missouri Valley Asso. of Sand & Gravel Producers v. A. V. I. Ry. Co., 73 I. C. C. 615.

(f) Tariff provided that written notice be furnished by consignee to carrier's agent within the free time, of frozen condition of lading. Shipments delivered with lading frozen and such notice not served on carrier's agent, who had actual notice of frozen condition of shipments. HELD: Failure to serve written statement did not increase period of detention, require performance of any additional service by carrier, or cause it to take any different course in dealing with situation. Demurrage charges assessed found unreasonable and reparation awarded. Hawkins & Sons v. Director General, as Agent, 80 I. C. C. 225.

(g) Contention that demurrage rule requiring written notice of frozen lading to be furnished to carrier's agent should be uniformly enforced, regardless of agent's knowledge concerning certain shipments in absence of such written notice, and that to do otherwise would open door for allowance of concessions and working of unjust discriminations, not sustained. While failure to adhere strictly to letter of rule may be result of collusive arrangements amounting to unlawful discrimination under section 2 of the act, possibility of such arrangements would not be avoided by strict adherence nor is such possibility an answer to complaint of shipper under section 1. Hawkins & Sons v. Director General, as Agent, 80 I. C. C. 226.

(h) Demurrage rules governing shipments of ore and other commodities frozen in transit found not unreasonable. Under ordinary conditions there would seem to be no question as to reasonableness of rules assailed, and circumstances set forth by complainants, namely, unusual conditions of weather and transportation generally, do not furnish justification for their condemnation. Cambria Steel Co. v. Director General, as Agent, 80 I. C. C. 633.

Director General, as Agent, 69 I. C. C. 501; McGarry & Company v. Wabash R. R., 88 I. C. C. 301.

§20. Advance in Demurrage During Transit.

IMPORTANT CASES SINCE 1908

(a) Demurrage charges increased after shipment had left point of origin, and upon arrival at destination, increased charges assessed. HELD, off-track storage not in transit, track storage, and demurrage are controlled by tariffs in effect contemporaneously with the accrual of these services; off-track storage in transit, by tariffs in effect upon date of shipment. United Shoe Machinery Corp. v. Director General, 55 I. C. C. 253, 256.

ALL OTHER CITATIONS

Toledo & O. C. Ry. v. C. & O. Coal & Coke Co., 238 Fed. 629, 632; Chesapeake & Ohio Coal & Coke Co. v. Toledo & O. C. Ry., 245 Fed. 917; United Shoe Machinery Corporation v. Pa. R. R., 55 I. C. C. 253, 256; Lowry Lumber Co. v. Director General, 57 I. C. C. 145.

V. REPARATION.

See Reparation. Routing and Misrouting

§21. In General.

IMPORTANT CASES SINCE 1908

(a) The full amount of demurrage charges which a shipper is compelled to pay through the fault of a carrier must be borne by the carrier whose agent is responsible for the error. Middle West Coal Co. v. C. O. Ry., 41 I. C. C. 723, 724.

(b) A carrier failed to transmit routing instructions and correct car number, resulting in demurrage and switching charges. Reparation awarded. Schuh-Mason Lumber Co. v. M. & O. R. R., 46 I. C. C. 365, 367.

(c) After court proceedings instituted for collection of certain demurrage charges, complaint filed before the Commission alleging such charges unreasonable. HELD, upon a complaint to secure a ruling upon reasonableness of such charges, and to obtain relief from payment of same, legal proceedings therefore having been instituted, the Commission may inquire into the reasonableness and determine that issue, but questions of fact to be determined by the court. Charges not found unreasonable. Heid Bros. v. E. P. & N. E. R. R., 55 I. C. C. 416.

(d) The erroneous information alleged to have been given by the Erie's agent, upon which complainant relies in support of its claims against that carrier, affords no basis for relief from the Commission. Cleveland Cooperage Co. v. Director General, 57 I. C. C. 423-425.

(e) Claim for reparation on account of demurrage accruing on cars loaded with oats, detained by reason of carrier's default in its contract to furnish water for operation of elevator, not within Commission's jurisdiction. Dougherty & Co. v. Director General, 58 I. C. C. 589, 590.

(f) Complainant attacked charges assessed on hollow building tile stored on the right of way of the C. & N. W., at Boone, Iowa, as unreasonable. Original decision found in 60 I. C. C. 418, wherein reparation was awarded to extent they exceeded the applicable demurrage and track storage rules. Director General petitioned for rehearing. HELD, previous order affirmed. Kalamazoo Tank & Silo Co. v. Director General, 69 I. C. C. 701.

(g) Where the consignee voluntarily paid demurrage for two years, he could not recover at common law, and therefore can recover only under the Interstate Commerce Act, if at all, either by an application to the Commission or a suit in the federal courts. Hunter v. N. Y. N. H. & H. R. R., 166 N. Y. Supp. 237.

ALL OTHER CITATIONS

St. Louis Southwestern Ry. Co. v. Arkadelphia Milling Co. (Ark. 1915), 180 S. W. 200, 201; Wattles-Fisher Coal Co. v. A. A. R. R. Co., 42 I. C. C. 186; Edwards & Bradford Lumber Co. v. A. A. R. R. Co., 42 I. C. C. 9; In re Arlington Hotel Co., 98 Atl. (Del. 1916), 186; Detroit, G. H. & M. Ry. Co. v. Owosso Sugar Co., (Mich. 1916), 159 N. W. 378; Schuh-Mason Lumber Co. v. M. & O. R. R., 46 I. C. C. 365, 368; International Salt Co. of New York v. S. A. L. Ry., 46 I. C. C. 478, 479; Bertles & Bertles v. M. C. R. R., 48 I. C. C. 463; Difenderfer Lumber Co. v. M. A. & E. Ry. Co., 53 I. C. C. 571, 573; Waters v. Becker, (Wis. 1921), 186 N. W. 167; Allied Machinery Co. v. Director General, as Agent, 81 I. C. C. 204; Pacific Grain Co. v. Director General, as Agent, 81 I. C. C. 679, 681.

§22. Actions at Law.

See Actions at Law.

IMPORTANT CASES SINCE 1908

(a) Where the railroad company's tariffs on file with the Interstate Commerce Commission provided for every essential element of its claim for demurrage, and the statement of claim set out the articles and rules of the coal exchange in whose care the shipment was consigned merely to show that defendants as members of the exchange, and through it as their agent brought themselves within the terms of the tariff, an objection that the rules of the coal exchange were not filed with the Interstate Commerce Commission is not tenable. Norfolk & W. Ry. Co. v. Emmons Coal Mining Co., 287 Fed. 168.

(b) An objection to a provision of a

carrier's tariff substituting the date on which a car should be released from the date when its equivalent is unloaded, so as to cause a car, when unloaded, to be charged with demurrage after its actual release, goes not only to the reasonableness of the tariff but its discriminating effect, and is not for the court to determine. Norfolk & W. Ry. Co. v. Emmons Coal Mining Co., 287 Fed. 168.

(c) In an action by the United States Railroad Administration against the shipper for demurrage, unloading, storage charges and war taxes incidental thereto on three cars of lumber tendered by defendant to plaintiff in shipments, but refused on the ground that a War Department embargo existed against the shipment, it was error to direct the jury to find that plaintiff lawfully refused to accept the shipments, since C. S. §564, requires finding by the jury without expression of opinion from the court where the evidence is permissible of more than one construction, or is such that different inferences may be drawn therefrom, the evidence in the case being in conflict as to whether an embargo claimed to exist was applicable to the shipments tendered. Davis v. Hilton Lumber Co. (N. C. 1923), 117 S. E. 50.

(d) In a suit for demurrage, where plaintiff's witness, being shown carbon copies of original notices delivered to defendant, stated that the originals had been sent to defendant by him, an objection thereto was inopportune, as plaintiff had the right to thus lay the ground for later offering the papers, at which time, if the best evidence rule applied, the objection would have been proper. Davis v. Carroll-Porter Boiler & Tank Co., (Pa. 1923), 119 Atl. 742.

(e) In suit for demurrage, where there was evidence covering the claim as to some of the cars for which plaintiff had a right to recover, defendant's request for binding instruction was properly overruled, and judgment n. o. v. was properly denied. Davis v. Carroll-Porter Boiler Tank Co., (Pa. 1923), 119 Atl. 742.

(f) Where the initial carrier of a shipment of coal quoted the same rate charged by other carriers, but on arrival at destination it was found that its tariff rate was somewhat higher and the consignee refused to accept the coal, but the carrier kept the coal in the cars for several months and then sold it, the trial judge's finding that ten days was a reasonable time for unloading and storing the coal, and that demurrage could only be charged for that period, HELD warranted. Waters v. Becker, (Wisc. 1921), 186 N. W. 167.

ALL OTHER CITATIONS

Mt. Clemens Sugar Co. v. Grand Trunk Ry., (Mich. 1918), 166 N. W. 531; Louisville & N. R. Co. v. Camody, (Ala. 1919) 82 So. 648; Kansas City Southern Ry. Co. v. Ft. Smith Compress Co. (Ark. 1919), 210 S. W. 147; Payne v. White House Lumber Co. (Tex. 1921), 231 S. W. 417; Northern Pac. Ry. Co. v. Department of Public Works (Wash., 1923), 217 P. 13.

VI. LIABILITY TO PAY.

§23. In General.

IMPORTANT CASES SINCE 1908

(a) Where the only evidence that shipper had any authority to ship is a telegram sent by consignee purporting to countermand the order, shipper wired consignee to "unload the car and send me what you think is right," and consignee refused the shipment, consignee is not liable for demurrage. Davis v. Allen (S. C. 1923), 117 S. E. 547.

(b) Where consignee countermanded the order on November 15th, carrier did not secure control of goods until November 20th, bill of lading was not issued until November 20th, and consignee refused the goods, consignee was not liable for demurrage. Davis v. Allen (S. C. 1923), 117 S. E. 547.

(c) Where a railway, at defendant's request, placed its cars on its siding, to be loaded with lumber by the owner thereof, and the lumber is loaded thereon, but no shipping directions are given by either the owner of the lumber or by the defendant, in consequence whereof the cars are permitted to remain on the siding and demurrage charges accrue therefor, the party at whose instance they were placed there is responsible for the demurrage charges, and recovery may be had on the common counts in assumpsit. And such right of recovery is not affected by the fact that the loaded lumber does not conform to the contract made between the vendor and purchaser. Davis v. Lawrence Oil & Gas Co. (W. Va. 1923), 117 S. E. 692.

(d) A carrier can not assess demurrage on a shipment of hay, assembled because the consignee held the car while he sorted out wet hay, which was dam-

aged because the carrier furnished a leaky car, rendering it necessary to rehandle the hay. Davis v. Clement Grain Co. (Tex. 1923), 251 S. W. 545.

I. ESTABLISHMENT AND CONTROL

See Control and Regulation.

§½. Jurisdiction of Commission.

See Interstate Commerce Commission I.

CASES 1887-1908

(a) The Interstate Commerce Commission cannot inquire whether railroad companies act wisely or unwisely, fairly, or unfairly, between themselves in making rates, forming lines, and establishing differentials; but its inquiry is limited to the question whether the situation created by the companies violates the Act to Regulate Commerce. New York Produce Exch. v. Baltimore & O. R. Co., 7 I. C. C. 612.

(b) Railway companies may make whatever rates, form whatever lines, and establish whatever differentials they deem best for the purpose of securing and conducting transportation, provided the just interests of the public are not sacrificed thereby, and whether in so doing they act wisely or unwisely, fairly or unfairly between themselves, is not for the Commission to determine; the jurisdiction of the Commission is confined to inquiring whether the situation which the carriers have created is in violation of the act. New York Produce Exchange v. B. & O. R. Co., 7 I. C. C. 612, 658.

IMPORTANT CASES SINCE 1908

(c) Differential adjustments can be prescribed only where unlawful discrimination is found and unlawful discrimination between different producing points competing in a common market can not be found unless the same carrier serves the common market and controls the rates to it from the different producing points, or where the traffic moves a part of the way to the common market over the rails of the same carrier. The only way to establish differentials where entirely independent carriers serve a common market from competing producing points would be to fix maximum rates from some of the producing points and minimum rates from

the others, and the latter is not within the authority of the Commission. Galloway Coal Co. v. A. G. S. R. R., 40 I. C. C. 311, 315.

ALL OTHER CITATIONS

Board of Trade of Chicago v. I. C. R. R. Co., 26 I. C. C. 545, 551; R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 358.

§1. In General.

IMPORTANT CASES SINCE 1908

(a) Differentials can not always with propriety be computed upon a fixed rate per mile. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 128.

(b) Under the generally recognized bases of making freight rates the differential to intermediate or near by territory should be greater than to destinations farther distant, irrespective of the increase in the length of the haul from the group of origin brought about by the extension and enlargement of the group. Distance, however, is not the only transportation factor to be considered in fixing the measure of a differential. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 129.

(c) In the making of rates to local or noncompetitive points the differentials above the rates to the basing points should bear some reasonable relation to the total distances. Mayfield & Graves County Commercial Club v. Illinois Central R. R. Co., 49 I. C. C. 419, 420.

(d) One of chief purposes of a differential is to stabilize rate relationships between competing producing points or markets. Stability is of peculiar importance to a highly competitive commodity like coal. Fixed or stable differentials on coal are the rule and the commission has repeatedly rejected proposals to establish percentage differentials between competing coal fields. Ohio-Michigan Coal Cases, 80 I. C. C., 663, 685.

St. P. & S. St. M. Ry., 26 I. C. C. 104, 105; Barnard Co. v. C M. & St. P. Ry. Co., 26 I. C. C. 91, 93; Indianapolis Freigh Bureau v. C. C. C. & St. L. Ry. Co., 26 I. C. C. 53, 54; Commercial Club of Duluth v. B. & O. R. R. Co., 27 I. C. C. 639, 656, 657; Holland Blow Stave Co. v. A. C. L. R. R. Co., 27 I. C. C. 488, 492; Gottron Bros .Co. v. G. & W. R. R., 28 I. C. C. 38, 42; Wabash R. R. Co. v. Priddy (Ind. 1923), 101 N. E. 724 727; Wisconsin & Ark. Lumber Co. v. St. L. I. M. & S. Ry. Co., 33 I. C. C. 33, 36; Daly Coal Co. v. C. & A. R. R. Co., 33 I. C. C. 467, 468; Cottonseed Products to Texas, 48 I. C. C. 297; Southwestern Class Case, 48 I. C. C. 379, 395; Reduced Rates from New York Piers 81 I. C. C. 312, 329; Western Coal Rates, 80 I. C. C., 383, 419.

§2. Relation of Classification.

See Relative Rates.

CASES 1887-1908

(a) Complainant attacked as unlawful rates on wheat and other kinds of grain from Iowa, Minnesota and South Dakota to Milwaukee as compared with rates on like grain to Minneapolis, and of unlawfully higher rates on wheat than on flour from some of the shipping points. HELD, that in many instances, and in varying degrees at different points, the differentials in grain rates to Milwaukee above rates in force to Minneapolis from shipping points on and south of the Southern Minnesota Division of the C. M. & St. P., give Minneapolis undue and unreasonable preference and advantage. That just and reasonable differentials in such rates would be obtained by applying the interstate distance tariff of the C. M. & St. P. R. Co., or the C. & N. W. Ry. to the short line

mileage from the several points of shipment to Minneapolis and Milwaukee. That just and reasonable rates to Milwaukee would be made by adding such differentials to rates from time to time in force to Minneapolis and any higher rates to Milwaukee would be relatively unreasonable and unjust to that city. That charging any higher rate on wheat than on flour between the same points and on the same line is unjust discrimination and unlawful. Chamber of Commerce of Milwaukee v. C. M. & St. P. R. Co., 7 I. C. C. 481.

IMPORTANT CASES SINCE 1908

(b) In numerous cases involving rates from the midcontinent field the Commission has required the establishment of rates on fuel, gas and other low-grade oils 5 cents less than on refined oils. Empire Refineries v. Director General, as Agent, 73 I. C. C. 207, 209; Davenport Commercial Club v. Director General, as Agent, 73 I. C. C. 251, 255.

(c) Rates on anthracite coal from Crested Butte district in Colorado to interstate destinations found unduly prejudicial to traffic in anthracite coal and unduly preferential of traffic in bituminous coal to extent they exceed by more than 50 cents the rates on bituminous lump coal to same destinations. Western Coal Rates, 80 I. C. C. 440.

ALL OTHER CITATIONS

Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 23 I. C. C. 195, 202; American Insulated Wire & Cable Co. v. C. & N. W. Ry. Co., 26 I. C. C. 415, 416; Board of Trade of Chicago v. I. C. R. R. Co., 26 I. C. C. 545.

II. APPLICATION.

§2½. In General.

See Application of Rates.

CASES 1887-1908

(a) Mathematical precision in the adjustment of rates is not always attainable nor necessary, and if the differences are not in fact unreasonable it can not be material whether they are arrived at by one mode or another; and while the custom of arbitraries or fixed differences may not be an ideal method, it is simpler than fluctuating percentages, and so long as it is fair and equitable it is amenable to no valid objection. Boston Chamber of Commerce v. L. S. & M. S. R. R. 1 I. C. C. 754, 762.

(aa) It is neither sound in principle nor equitable in practice for railway lines to create artificial differences in market conditions by an arbitrary differential in rates, whereby the product of one section of the country is assigned to one market, and the product of another section of the country to another market. Re Export Rates from Points East and West of Miss. River., 8 I. C. C. 185.

IMPORTANT CASES SINCE 1908

(b) Adjustments which arbitrarily fix the rates on one commodity a uniform differential over those on another, without regard to distance, are unscientific and must result in some degree of injustice. Fruits and Vegetables, 43 I. C. C., 291, 332.

(c) In figuring joint rates between standard lines and lines authorized to charge higher rates, which may be designated differential lines, there should be applied the standard single-line scale for the total distance plus the joint line differential. To the rate so arrived at there should be added that portion of the amount of increase (to attain the higher rate) of the standard joint line rate which the mileage over the differential line is of the total length of the haul. Natchez Chamber of Commerce v. L. & A. Ry., 52 I. C. C. 105, 129.

(d) The propriety of a difference in treatment of differentials between contiguous points on long and short haul traffc has been recognized by the Commission. The reason for this is that on the long haul traffic the volume of the rate is permitted by the distance to increase to a point where the additional cost of the service represented by the differential can be spread thinly over the line haul and finally absorbed without unduly encroaching upon the line haul revenues, whereas on short haul traffic the distance is not such as to permit of a sufficient increase in the volume of the rate to warrant that absorption. St. Louis Chamber of Commerce v. B. & O., 57 I. C. C. 639, 647.

(e) No general program of maintaining differentials can be made effective coincident with increases herein approved without materially delaying their effective date, and to maintain differentials by applying percentage increases to basing rates and adding thereto existing differentials can not be done without materially lessening the additional revenue to be derived by the carriers, as generally differentials are added to, rather than deducted from, base rates. Increased Rates, 1920, 58 I. C. C. 220, 245, 248.

(f) Common principle of rate making, although not always allowed, that differentials should diminish with increasing distance and vanish when mileage on which differential is based becomes inconsiderable in proportion to total mileage to destination. Western Coal Rates, 80 I. C. C. 383, 413.

(g) The adjustment of rates is an element that must be considered in judging reasonableness of differential adjustment as between two competitive fields in relative distances to common markets. Western Coal Rates, 80 I. C. C. 419.

(h) The commission has adhered to the principle of preserving fixed differentials between coal-producing districts, regardless of changes in level of rates. Ohio-Michigan Coal Cases, 80 I. C. C. 663, 684.

ALL OTHER CITATIONS

C. 585, 590; Coal to South Dakota, 46 I. C. C. 628, 639, 640; Weis-Peterson Box Co. v. M. & O. R. R., 46 I. C. C. 693, 698, 702; State of Iowa v. Wabash Ry., 46 I. C. C. 703, 710; R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 332; Lumber from the Southeast, 50 I. C. C. 191, 193; Memphis Southwestrn Investigation, 55 I. C. C. 515, 539; Rates on Grain and Grain Products, 56 I. C. C. 133, 140; Switching Charges to and from South Tacoma, 61 I. C. C., 128, 129; Swift Lumber Co. v. F. & G. R. R. Co., 61 I. C. C. 485, 487; Lake Superior Paper Co. v. Director General, 64 I. C. C. 33; Salem Glass Works v. Director General, as Agent, 68 I. C. C. 643; Ohio-Michigan Coal Cases, 80 I. C. C. 663, 684, 685; Rio Grande Chamber of Commerce v. St. L., B. & M. Ry. Co., 81 I. C. C. 703.

§3. C. L. and L. C. L. Shipments.

See Classification §5.

IMPORTANT CASES SINCE 1908

(a) The arbitrary or differential at opposite cities at Ohio River crossings is generally less on carload than on less-than-carload traffic. Henderson Commercial Club v. I. C. R. R. Co., 42 I. C. C. 196, 199.

ALL OTHER CITATIONS

Duncan & Co. v. N. C. & St. L. Ry. Co., 16 I. C. C. 590, 595.

§4. Through Shipments.

See Thru Routes and Joint Rates.

CASES 1887-1908

(a) Upon complaint by dealers at Mankato, Minn., that rates from Chicago to Mankato should be no higher than to Waterville, Minneapolis and points allowed like rates. HELD, that in view of the circumstances and conditions existing, a somewhat higher charge to Mankato is not unlawful, but that a difference of twenty per cent or more on the respective classes, charged when the complaint was filed, is excessive, and that a difference of ten per cent on the several classes is reasonable and should not be exceeded. The Manufacturers' & Jobbers' Union v. Minn. & St. L., 3 I. C. R. 115.

(b) Complainants attacked as unreasonable and discriminatory rates from Chicago and other western points to Boston, produced by adding to rates from the same points to New. York a socalled arbitrary or differential of 10c on first class, 6c on second class, 5c on other classes. HELD, arbitraries exacted unreasonable to extent they exceeded 10 per cent over the rates to New York. Toledo Produce Exchange v. L. S. & M. S. R. Co., 3 I. C. C. 830.

(c) Unreasonable disparity between the aggregate rates on hauls of different length to a common destination, whether by one carrier or by more than one jointly, resulting in undue advantage to one locality or business or disad-

vantage to another, is unlawful. Colorado Fuel & Iron Co. v. S. P. Co., 6 I. C. C. 488, 514.

(d) Upon complaint brought in behalf of New York City, and alleging that differentials, allowed by the defendant carriers on grain, flour and provisions from Chicago and other western points, of 2 cents to Philadelphia and 3 cents to Baltimore below the rates to New York, are unlawful under section 3 of the Act to Regulate Commerce. HELD, that the differentials are legitimately based upon the competitive relations of the carriers, that it does not appear upon the present record that the carriers have exceeded the limit within which they are free to determine for themselves, and, accordingly, that the differentials complained of do not result in unlawful preference or advantage to Philadelphia or Baltimore over the City of New York. New York Produce Exchange v. Baltimore & O. R. Co., 7 I. C. C. 613.

(e) Defendants' rates for transporting lumber in carloads to points on the New York & Long Branch Railroad are made by adding to the rate to New York, N. Y., an arbitrary charge of 5 cents per 100 pounds when the shipping point is Saginaw, Mich., but only 2 cents per 100 pounds when the shipping point is Buffalo, N. Y. Water competition between Buffalo and New York affects the rates to New York, but it justifies no wider difference in the rates from Saginaw and Buffalo to these interior destinations than exists in the rates from these shipping points to New York. HELD, that the discrimination is undue and in violation of the Act to Regulate Commerce. Mershon, S. P. & Co. v. Central R. Co. of N. J. et al, 10 I. C. C. 457.

(f) Complainants alleged that defendants, having in effect on sugar in carloads from New Orleans, rates per hundred pounds which were 25 cents to Wichita and 20 cents to Kansas City and other Missouri River points, increased those rates to 47 cents to Wichita and 32 cents to Missouri River points, thereby increasing the differential as between Wichita and Kansas City from 5 cents to 15 cents per hundred pounds, and that the new rates were, as against Wichita, unjust and unreasonable in themselves and relatively; and it was further alleged that new advanced rates from other points of origin imposed the same differential as between Wichita and Kansas City, and that, as against Wichita, those rates were also unlawful. Wichita and Kansas City compete for the sale of sugar in common competitive territory. The competitive conditions applying in the transportation of this traffic to Wichita and Kansas City are stated and found not to justify the 15-cent differencial against Wichita, and the existing rates to Wichita are excessive. HELD: 1. That the rate of 47 cents on sugar from New Orleans to Wichita is unreasonable; 2. That the present differential of 15 cents applied at Wichita above Kansas City on shipments of sugar from the Atlantic Seaboard and New Orleans subjects Wichita to undue discrimination; and such differential should not be more than 8 cents per 100 pounds; 3. That as to traffic passing through Wichita to Kansas City the rule laid down in Johnston-Larimer D. Co. v. A. T. & S. F. Ry. Co., 6 I. C. C. Rep. 586, forbidding any higher charge to Wichita than to Kansas City on shipments from Galveston, is, in the light of decisions of the United States Supreme Court, no longer applicable, and defendants operating lines through Wichita to Kansas City are not prohibited from charging a higher rate on sugar to Wichita than to Kansas City so long as the Wichita rate is reasonable. Lehman-Higginson G. Co. et al. v. A. T. & S. F. R. Co. et al., 10 I. C. C. 461.

(g) It was contended by New York and Boston that the differentials favoring Baltimore and Philadelphia on freight articles from the west to Baltimore, Philadelphia, and Boston should be abolished. The differentials below or above the rates to New York are as follows; Export traffic, 3 cents less to Baltimore and 2 cents less to Philadelphia, except on grain, iron, and steel articles, which are 1½ cents less to Baltimore and 1 cent less to Philadelphia, with the same rates to Boston as to New York on this traffic. On ex-lake grain received at Buffalo, Fairport, and Erie, there is, pending the disposition of this case, a differential in favor of Baltimore of 4-10 of a cent per bushel below the New York rate, but no differential in favor of Philadelphia. HELD, that the differential per 100 pounds on flour, all-rail and lake and rail, should be reduced to 2 cents at Baltimore and 1 cent at Philadelphia, and that the existing differential on ex-lake grain should be reduced to 3-10 of a cent per bushel and be allowed both to Baltimore and Philadelphia; that other-

wise the present export differentials should remain in force. Re Differential Freight Rates to and From North Atlantic Ports, 11 I. C. C. 13.

(h) The present charges on corn products and corn from Missouri River points to the Pacific Coast terminals constitute undue, unreasonable, and unlawful discrimination against corn products and producers thereof at places on the Missouri River, to the extent that such rate on corn products is more than 5 cents above the rate on corn. In the Matter of Re Rates on Corn and Corn Products from Missouri River Points to Points in Washington, Oregon and California, 11 I. C. C. 212.

(i) The present difference in through rates per 100 pounds on grain, flour, and feed, carloads, from Chicago and other western points to Mount Holly and Pemberton, N. J., is 5 cents, Mount Holly taking the rate to New York, and Pemberton, 6 miles east, the New York rate plus 5 cents. Prior to February, 1903, the Mount Holly rate was the New York rate plus 3 cents, and for a long period the differential against Pemberton in favor of Mount Holly was 2 cents. The Mount Holly rate was reduced on account of developed water competition. Under the 5-cent differential complainant could save 2½ cents per 100 pounds by shipping to Mount Holly and teaming to Pemberton. Since the hearing the Pennsylvania Railroad Company has put in a tariff naming a reconsignment charge on the traffic of 2½ cents (50 cents per ton) from Mount Holly to Pemberton. HELD, that the present through rate to Pemberton as compared with the rate to Mount Holly is excessive and subjects complainant and Pemberton itself to unreasonable prejudice and disadvantage, that the through rate to Pemberton should not exceed the New York rate plus 2 cents per 100 pounds, and should not be at any time more than 2 cents above the rate to Mount Holly. Eber De Cou. v. Penn. Railroad Co., 12 I. C. C. 160.

IMPORTANT CASES SINCE 1908

(j) In making joint through rates on long distance traffic to local or non-competitive points, differentials above rates to basing points should bear some reasonable relation to total distances involved. Board of Trade of Carrollton v. C. of G. Ry. Co., 28 I. C. C. 154, 165.

(k) No general program of maintaining differentials can be made effective coincident with the increases herein approved without materially delaying their effective date, and to maintain differentials by applying the percentage increases to basing rates and adding thereto existing differentials can not be done without materially lessening the additional revenue to be derived by the carriers, as generally differentials are added to, rather than deducted from, base rates. Increased Rates, 1920, 58 I. C. C. 220, 245.

ALL OTHER CITATIONS

Windsor Turned Goods Co. v. C. & O. Ry. Co., 18 I. C. C. 162, 163; Huges Creek Coal Co. v. K. & M. Ry. Co., 31 I. C. C. 10, 14; Vulcanite Portland Cement Co. v. C. R. R. Co. of N. J., 46 I. C. C. 483, 487; St. Louis Chamber of Commerce v. Director General, 59 I. C. C. 586.

III. PURPOSE.

§5. To Equalize Conditions.

See Equalization of Rates §2.

CASES 1887-1908

(a) It is neither sound in principle nor equitable in practice for railway lines to create artificial differences in market conditions by an arbitrary differential in rates whereby the product of one section of the country is assigned to one market and the product of another section of the coutry is assigned to another market. In the Matter of Export Rates from Points East and West of the Mississippi River, 8 I. C. C. 185, 210.

IMPORTANT CASES SINCE 1908

(b) Where rates from various fields in a coal belt are so correlated that to change one may disturb the entire adjustment, the Commission cannot undertake to pass upon the reasonableness of one of the rates involved without considering its relation to the rates from the other coal fields. Victor Mfg. Co. v. S. Ry. Co., 21 I. C. C. 222, 226.

(c) Where, because of difference in distance, rates herein are different from a junction point of a carrier's own main line or branches, the differential should not be higher from points beyond from which the traffic moves through that junction, than at such junction point. Commercial Club of Superior v. G. N. Ry. Co., 24 I. C. C. 96, 120.

(d) While something may be said in support of a differential relation which gives each line a fair chance at the tonnage, nothing can be said for a differential relation which permits some

routes to grow with the business of the country and keeps others practically at a standstill. Rates via Rail-and-Lake Routes, 37 I. C. C. 302, 316.

(e) The only way to establish differentials where entirely independent carriers serve a common market from competing producing points would be to fix maximum rates from some producing points and minimum rates from others, and the latter is not within the Commission's authority. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C. 311, 315.

(f) A suitable differential to a line requiring a differential is one determined upon the character and service of the route as well as from a consideration of what in the judgment of the carrier would give to such a line an equitable share of the business. U. S. War Department v. A. & S. Ry., 77 I. C. C. 317, 323.

(g) One of chief purposes of a differential is to stabilize rate relationships between competing producing points or markets. Stability is of peculiar importance to a highly competitive commodity like coal. Fixed or stable differentials on coal are the rule and the Commission has repeatedly rejected proposals to establish percentage differentials between competing coal fields. Ohio-Michigan Coal Cases, 80 I. C. C. 663, 685.

IMPORTANT CASES SINCE 1908

(a) The advanced differential of 5c over Galveston on through rail and water rates on rice and rice products from Houston, Tex., to New York, Boston, Baltimore, Philadelphia and Providence, via Galveston, is not discriminatory when compared with corresponding rates from New Orleans, Galveston or other Texas points, or as compared with corresponding rates on other commodities from Houston, the Commission finding that this differential is a low rate made in an effort to comply with an order of the Commission, and with the bona fide purpose of correcting a discrimination in the manner best calculated to put the rates from all Texas milling cities in fair relation to each other. Chamber of Commerce of Houston, Tex. v. G. H. & S. A. Ry. Co., 23 I. C. C. 214.

(b) One of the chief purposes of a differential is to stablize rate relationships between competing producing points or markets. Stability is of peculiar importance to a highly competitive commodity like coal. Fixed or stable differentials on coal are the rule and the Commission has repeatedly rejected proposals to establish percentage differentials between competing coal fields. Ohio-Michigan Coal Cases, 80 I. C. C. 663, 685.

IV. REASONABLENESS AND DISCRIMINATION.

See Discrimination; Reasonableness of Rates

§8. In General.

See Classification §17.

CASES 1887-1908

(a) Complainant attacked rates charged on grain from Farmington, Northfield, Dundas Fairbault and Owatonna, Minn., to points in Iowa, Wisconsin and Illinois as unjust and unreasonable. The C. M. & St. P., runs from a point in Dakota territory through Minneapolis and St. Paul to Chicago. Between Minneapolis and Milwaukee defendant has two routes, one by way of Red Wing and other towns, called the River Division, and being the shorter route; the other by way of Northfield, Fairbault and other towns, called the Iowa and Minnesota Division. The through rate on wheat from Dakota

to Milwaukee and Chicago is 25c, with privilege of milling in transit on both divisions. The rate on wheat from said western territory to Minneapolis and St. Paul when consigned there, and most, if not all of which is carried by other roads, is 17½c. The rate on the River division from Minneapolis to Milwaukee and Chicago, and from all intermediate points is 7½. The rate on wheat on the Iowa and Minnesota division from Minneapolis and intermediate towns is 15c, except from Farmington, which is 13½c. The rate on other commodities is the same by both routes. The fact that the rate on wheat on the Iowa and Minnesota divisions is double the rate enjoyed by neighboring towns on the other division works practically to their disadvantage and prejudice. HELD, the complaint is well founded; that the rate on wheat on that division is relatively too high; that while a reasonable differential may be allowed on that division, on account of greater distance and probable larger expense of transportation and the greater stringency of the competitive forces on the River division, the difference above the present rate on the River division should not exceed 2½c. It is not a sufficient compliance with the Law that rates are reasonable in themselves, but they should be so relatively reasonable as to protect communities and business against unjust discrimination. When the same carrier operates parallel lines and for any cause accepts low rates on one line, it should furnish sufficient corresponding advantages to the patrons of the other line to prevent undue prejudice and disadvantage, and to preserve the substantial equality contemplated by the statute. Boards of Trade Union v. C. M. & St. P. R. Co., 1 I. C. C. 608.

(aa) In view of the longer haul to Boston than to New York, the greater cost of transportation to Boston, the very much greater volume of business to and from New York, the competition by water transportation by the lakes, Erie Canal and Hudson River, and also by several rival railroad lines, and the geographical and commercial advantages of New York, the differentials on Boston local rates of ten cents per hundred pounds on the first and second classes of mechandise and five cents per hundred pounds on the four other classes between New York and Boston on traffic originating west of Buffalo have not been shown to be unjust and unreasonable or to constitute unjust discrimination against Boston. Boston Cham. of Com. v. Lake Shore & M. S. R. Co., 1 I. C. R. 754.

(b) Complainant attacked as unduly preferential and unreasonable rates from St. Louis, Mo., to Lincoln, Neb., compared with the rates to Omaha, Neb. The reason why the rates from St. Louis to Lincoln are higher than the rates to Omaha is that the rates from Chicago are also higher by precisely the same figures, uniform working rates between the two sections having by agreement been carried out by all lines. The differentials are given to Omaha on St. Louis business because of the short line to that point made by the Wabash, and for the purpose of a rule applicable to all Missouri River points they approximate equity. The M. P., having met the Wabash rate at Omaha, is not necessarily required to give Lincoln the same terms, although the distance is a trifle less and Lincoln is the center of a thriving trade. The M. P. gives Lincoln equal rates with Omaha upon all business coming from a direction where there is no competition by a shorter route. The rate from St. Louis to Lincoln is not of itself unreasonable, and the general scheme on which the rates are made throughout the vast territory covered by the roads that have been united in the existing traffic requires that the existing difference between Omaha and Lincoln should be preserved upon traffic from St. Louis as well as from Chicago, and the fact that a low rate from St. Louis is forced upon the M. P. by competition at Omaha is not to be taken advantage of to compel a corresponding reduction upon its Lincoln branch. No substantial damage is suffered by Lincoln inasmuch as the distributing rates from Lincoln are so arranged, in comparison with those from Omaha, that the difference in the rates to these points is equalized. HELD, rates attacked not unduly preferential, complaint dismissed. Lincoln Board of Trade v. M. P. R. R., 2 I. C. C. 98.

(c) The differentials are given to Omaha on St. Louis business because of the short line to that point made by the Wabash, and for the purpose of a rule applicable to all Missouri River points they approximate equity. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. C. 98.

(d) The rate from St. Louis to Lincoln is not of itself unreasonable, and

the general scheme on which rates are made throughout the vast territory covered by the roads that have been united in the existing traffic requires that the existing difference between Omaha and Lincoln should be preserved upon traffic from St. Louis as well as from Chicago; and the fact that a low rate from St. Louis is forced upon the Missouri Pacific by competition at Omaha is not to be taken advantage of to compel a corresponding reduction upon its Lincoln branch. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. R. 98.

(da) On complaints of unreasonable and discriminating rates from Chicago and other western points to Boston, produced by the addition to rates from the same points to New York of a so-called arbitrary or differential of 10 cents on first class articles, 6 cents on goods of the second class and 5 cents on the other classes of freight, and which also involved the propriety of combination rates through intermediate points, the divisions of through rates between the carriers, and the relation of lighterage charges in New York harbor to the rates in question; HELD, That the question involved herein is the through rate as affected by the arbitrary differential, and divisions of the through rate accruing to the different roads need not be considered, nor are possible rate combinations properly comparable with the through rate, except for limited purposes. That it can make no difference to the shipper or the public how carriers adjust between themselves the expense of lighterage paid out of the through rate to New York. That the arbitrary differentials now charged are unlawful and should hereafter be made by adding a percentage to the New York rate on shipments included in the six classes of freight from Chicago and points east thereof and west of Buffalo to Boston and other New England points, and that the defendants and other carriers interested be allowed twenty days to show cause by answer why order should not issue commanding them to desist from charging said arbitrary differentials and requiring said rates to Boston and New England points to be made by adding to the New York rate an increase of ten per cent thereof, and if no such answer be filed that such order be issued forthwith. Toledo Produce Exchange v. Lake Shore & M. S. R. Co. 3 I. C. R. 830.

(db) An arbitrary differential added to the rates from Chicago to New York to make the rate to Boston was held improper, and a percentage was ordered to be substituted, instead of the arbitrary sum. Toledo Produce Exch. v. Lake Shore & M. S. R. Co. (Com.) 3 I. C. R. 830.

(e) While existing differentials which result in higher freight rates from Cincinnati than from Louisville to "Montgomery Territory" and "Southwestern Territory" may, as a whole, discriminate against Cincinnati, the inequality arises, if it exists, through combinations of rates to Cincinnati and Louisville from territory north of the Ohio River with rates from those points south; there is no showing whether the fault lies with rates north or south of the river, and neither of the carriers operating north of the river is a party to this proceeding. It fairly appears, on the other hand, that if such differentials were entirely abolished, the rates from a large section north of the Ohio would be against Louisville. The Complainant asks in its petition that the higher rates from Cincinnati than from Louisville be prohibited; readjustment of present rates, and only the fact of distance is presented as a basis for determining whether the higher rates from Cincinnati are unjust or what rates would be just. HELD, that the complaint be dismissed without prejudice. Freight Bureau of Cincinnati v. Cincinnati, N. O. & W. P. R. Co., 7 I. C. C. 180.

(f) Water competition between Charleston and Savannah compels a rate of 80 cents per ton on fertilizer carried by rail between those cities. Rates from Savannah to points in Georgia are fixed by the Georgia Railroad Commission. Water competition exists also between Savannah and Charleston and Jacksonville, Fla. By that mode of carriage the rate from both cities to Jacksonville is the same, and subsequently the same also to points reached by rail from Jacksonville, as against the all-rail lines to those points. Circumstances over which a defendant all-rail line to Montgomery and other points in Alabama has no control also affect fertilizer rates from Savannah and Charleston to such Alabama points in some degree. HELD, upon all the facts, (1) that defendants' present differential of 50 cents more per ton from Charleston than from Savannah to points in Georgia other than common points is not unreasonable or prejudicial to Savannah, (2) that charging the same

rate from Savannah and Charleston over the defendant all-rail lines to points in Florida in competition with ocean and rail competition from Savannah and Charleston is not unlawful, (3) that a lower differential as between Savannah and Charleston on fertilizer to points in Alabama reached by the Alabama Midland Railway than the differential established as between those cities on fertilizer to points in Georgia does not appear justified, and that sufficient difference is not made in rates to some stations in Florida; and that defendants are advised to adjust such rates in accordance with suggestions stated, with leave to complainants to apply for an order if such adjustment is not made. Savannah Bureau of F. & Trans. v. Charleston & S. R. Co., 7 I. C. C. 458.

(g) A differential of 50 cents more per ton from Charleston than from Savannah to joints in Georgia, other than common points, is not unreasonable or prejudicial to Savannah. Savannah Bureau of F. & T. v. Charleston & S. R. Co., 7 I. C. C. 458.

(h) A lower differential as between Savannah and Charleston on fertilizer to points in Alabama reached by the Alabama Midland Railway than the differential established between those cities on fertilizer to points in Georgia is not justified. Savannah Bureau of F. & T. v. Charleston & S. R. Co., 7 I. C. C. 458.

(i) On complaint of unlawful rates charged by defendants on wheat and other kinds of grain from points of shipment in Iowa, Minnesota, and South Dakota to Milwaukee, as compared with rates on like grain to Minneapolis, and of unlawfully higher rates on wheat than on flour from some of the shipping points. HELD, that in many instances, and in varying degrees at different points the differentials in grain rates to Milwaukee above rates in force to Minneapolis from shipping points on and south of the Southern Minnesota Division of the C. M. & St. P. Ry. give Minneapolis undue and unreasonable preference and advantage, and subject Milwaukee to undue and unreasonable prejudice and disadvantage. That just and reasonable differentials in such rates would be obtained by applying the interstate distance tariff of the C. M. & St. P. Ry., or the C. & N. W. Ry., to the shortline mileage from the several points of shipment to Minneapolis and Milwaukee. That just and reasonable rates to Milwaukee would be made by adding such differentials to rates from time to time in force to Minneapolis, and any higher rates to Milwaukee would be relatively unreasonable and unjust to that city. That charging any higher rate on wheat than on flour between the same points and on the same line is unjust discrimination and unlawful. Chamber of Commerce v. Chicago, M. & St. P. Ry. Co., 7 I. C. C. 481.

(j) A differential of 2 cents to Philadelphia and 3 cents to Baltimore below the rates to New York from Chicago and other western points on grain, flour, and provisions cannot, without reference to the actual operation of such differentials, be held to create an undue or unreasonable preference against New York when it is considered that the latter city is some distance further from Chicago than the others and that its ocean facilities greatly surpass those of the other cities. New York Produce Exch. v. Baltimore & O. R. Co., 7 I. C. C. 612.

(k) Railway companies may make whatever rates, form whatever lines, and establish whatever differentials they deem best for the purpose of securing and conducting transportation, provided the just interests of the public are not sacrificed thereby, and whether in so doing they act wisely or unwisely, fairly or unfairly between themselves, is not for the Commission to determine; the jurisdiction of the Commission is confined to inquiring whether the situation which the carriers have created is in violation of the Act to Regulate Commerce. New York Produce Exchange v. Baltimore & O. R. Co., 7 I. C. C. 613.

(l) Upon complaint brought on behalf of New York City, and alleging that differentials allowed by defendant carriers on grain, flour and provisions from Chicago and other western points, of 2c to Philadelphia and 3c to Baltimore below the rates to New York, are unlawful under section 3 of the act. HELD, that the differentials are legitimately based upon the competitive relations of the carriers, that it does not appear upon the present record that the carriers have exceeded the limit within which they are free to determine for themselves, and, accordingly, that the differentials complained of do not result in unlawful preference or advantage to Philadelphia or Baltimore over New York. Complaint dismissed. New York Produce Exchange v. B. & O. R. Co., 7 I. C. C. 612.

(la) A difference in rate between Kansas points and destinations in Texas, of 7 cents per 100 pounds against corn meal and in favor of corn, unjustly discriminates against Kansas millers; and the differential should not exceed 3 cents, which would cover the difference of cost in service, and is sufficient in view of the difference in value, greater liability to injury and other conditions surrounding the transportation of such commodities. Board of R. Comrs. v. Atchison, T. S. F. R. Co., 8 I. C. C. 304.

(m) The present Hampton rates are in violation of both the 4th and 3d sections of the Act to Regulate Commerce, but that Hampton rates may properly be made higher than the Palatka rates by the differentials now existing between the Palatka and Jacksonville rates. Board of Trade v. Nashville, C. & St. L. Ry. Co., 8 I. C. C. 503.

(n) Myrick and Rich Hill, Mo., are located on different branches of defendant's system, and Myrick is 43 miles nearer than Rich Hill to all points on defendants lines in Kansas and Nebraska terminating at Hoxie, Lenora and Smith Center, Kans., and Prosser, Crete, Lincoln and Omaha., Neb. Defendant's rates on coal from Myrick, Mo., are 15 cents per ton lower than from Rich Hill, Mo., to Kansas City and Atchison, but beyond Atchison to numerous points on said Kansas and Nebraska lines this differential disappears, and in many cases lower rates are in force from Rich Hill than from Myrick. HELD, that complainant's demand for a differential north and west of Atchison, as well as to Atchison and points south therof, should be sustained to the extent of a differential of 10 cents in favor of Myrick as far north as Nebraska City Junction and as far west as Greenleaf, Kans., and of 5 cents beyond such points to the termini of defendant's said lines. McGrew. v. Missouri Pac. Ry. Co., 8 I. C. C. 630.

(na) Complainant's demand for a differential in rates on coal from Myrick, Mo., to points north, west, and south of Atchison, as well as to Atchison itself, should be sustained to the extent of a differential of 10 cents in favor of Myrick as far north as Nebraska City Junction and as far west as Greenleaf, Kan., and of 5 cents beyond such points to the termini of defendant's line. McGrew v. Missouri P. R. Co., 8 I. C. C. 630.

(o) Complainant attacked rates on coal from Myrick, Mo., to Kansas City, Atchison and points north and west as unreasonable. Myrick and Rich Hill, Mo., are located on different branches of defendant's system, and Myrick is 43 miles nearer than Rich Hill to all points on defendant's lines in Kansas and Nebraska, terminating at Hoxie, Lenora and Smith Center, Kas., and Prosser, Crete, Lincoln and Omaha, Neb. Defendant's rates on coal from Myrick, Mo., are 15c per ton lower than from Rich Hill, Mo., to Kansas City and Atchison but beyond Atchison to numerous points on said Kansas and Nebraska lines this differential appears, and in many cases lower rates are in force from Rich Hill than from Myrick. HELD, complainants demand for a differential north and west of Atchison, as well as to Atchison and points south therof, should be sustained to the extent of a differential of 10c in favor of Myrick as far north as Nebraska City Junction and as far west as Greenleaf, Kas., and of 5c beyond such points to the termini of defendant's said lines. Defendant may properly make a distinction in classification and apply a lower rate on steam coal, and complainant is not damaged by defendant's failure to publish a rate upon mine run, nut, mill or slack from Myrick since the Myrick mine produces nothing which could be shipped under that name. McGrew v. M. P. R. Co., 8 I. C. C. 630.

(p) Upon complaint that a rate of 75c per 100 pounds on cotton from Dallas, Texas, to New Orleans, La., is unreasonable and should not exceed 55c, it appeared that such rate also applied as a common point rate from substantially all the cultivated portion of Texas, and that reduction of the rate from Dallas would involve corresponding reductions from nearly the whole state; that the rate to New Orleans is determined by adding a differential of 10c to the rate to Galveston, and that such differential is reasonable; that the Texas Railroad Commission fixes the Galveston rate and has reduced such rate from 65c to 60c during the pendency of this proceeding, such action resulting, under maintenance of the differential. in like reduction of the rate to New Orelans; that about 65 per cent of Texas cotton passes through Galveston and about 25 per cent through New Orleans, and reducing only the New Orleans rate would result in diverting more of the traffic from Galveston. HELD, that while the rate from Dallas to New Orleans does not

appear to be altogether reasonable, the Commission is not satisfied, in view of the control exercised and the action taken by the Texas Commission, that it ought to interfere with the present adjustment. Complaint dismissed. Dallas Freight Bureau v. T. & P. R. Co., 8 I. C. C. 33.

(q) The rates for the shipment of lumber in carloads from points in West Virginia and southwestern Virginia to New York City, over the N. & W. Railroad to Hagerstown and thence via the P. R. R. to destination, and over the N. & W. to Shenandoah Junction and thence via the B. & O. R. R., are unreasonable and unjust, where they are made up by adding to those of the N. & W. to Hagertown and Shenandoah Junction a specific or arbitrary of 13 cents per 100 pounds charged by the Pennsylvania, and Baltimore & Ohio respectively. and the specific rate was advanced from 12 to 13 cents in 1893, and the N. & W. charges were generally increased in 1899 and 1900 about 1½ cents per 100 pounds, while much lower rates on competing lumber are maintained from neighboring points in the same shipping section to New York by the B. & O., and by the C. & O. Ry. connecting with the B. & O. at Staunton and the P. R. R. at Washington, and the present rates by the N. & W. yield higher rates per ton mile than those of the C. & O. line. National Wholesale Lumber Dealers' Asso. v. Norfolk & Western R. Co., 9 I. C. C. 87.

(qa) Although the dissimilarity of circumstances and conditions justifies the defendant in charging a higher rate on lumber from Fountain Head, Gallatin, St. Blaise, and Pilot Knob to Louisville same line from Nashville, a difference of than for the longer distance over the 1 cent in the rates is sufficient to offset the difference in circumstances and conditions, any great difference in the rates renders the rate from the intermediate points relatively unreasonable. S. Marten v. Louisville & Nashville R. Co. 9 I. C. C. 581.

(r) Defendant charges on lumber to Boston and Boston points a higher rate from Sheridan, Ind., a non-competitive point on its road, than from Indianapolis, Ind., although the latter is the longer distance point by its line, which runs north from Indianapolis through Sheridan to Michigan City, Ind., and connects at various points with lines to Boston and other eastern localities. Indianapolis is a competitive point and numerous lines run from that city both east and west. The short lines from Sheridan to the east are through Indianapolis, and by those lines Sheridan is a longer distance point. Indianapolis takes 93 per cent of Chicago rates to the east, and Sheridan, though claimed by complainant to be in 93 per cent territory, is charged 100 per cent, or Chicago rates, by the defendant. The rates to Boston and Boston points at the time of complaint were 27 cents per hundred pounds from Sheridan and 25 cents from Indianapolis; but since they have been reduced 26½ and 24½ cents, respectively. The circumstances and conditions governing the traffic from Sheridan are substantially and materially different from those applying on the traffic from Indianapolis. HELD, that no undue discrimination results to Sheridan because by defendant's indirect route the rate is 2 cents less from Indianapolis than it is from Sheridan. G. C. Pratt Lumber Co. v. Chicago, I. & L. R. Co., 10 I. C. C. 29.

(ra) No undue discrimination results to Sheridan by reason of the fact that the rate from that place to Boston is 2 cents per 100 lbs. more than from Indianapolis to Boston, although the latter is the longer distance point by the defendant's line, which runs north from Indianapolis through Sheridan, connecting at various points with lines to Boston; as Indianapolis is a competitive point, and the short lines from Sheridan to the east are through Indianapolis, and by those lines Sheridan is a longer distance point. G. C. Pratt Lumber Co. v. Chicago, I. & L. R. Co., 10 I. C. C. 29.

(rb) An undue discrimination is made by the defendants in fixing their rates for transporting lumber to points on the New York & Long Branch Railroad by adding to the rate to New York city an arbitrary charge of 5 cents per 100 lbs. when the shipping point in Saginaw, Mich., but only 2 cents per 100 lbs. when the shipping point is Buffalo, N. Y. Water competition between Buffalo and New York affects the rates to New York, but it justifies no wider difference in the rates from Saginaw and Buffalo to their interior destinations than exists in the rates from these shipping points to New York. Mershone S. P. & Co. v. Central R. Co. 10 I. C. C. 456.

(rc) The competitive conditions applying in the transportation of sugar to

Wichita and Kansas City do not justify the 15 cent differential against Wichita; such differential should not be more than 8 cents per 100 lbs. Lehman-Higginson Grocery Co. v. Atchison, T. & S. F. R. Co. 10 I. C. C. 460.

(s) Complainant attacked defendants rate on sugar in carloads from New Orleans, La., of 25c to Wichita, Kas., and 20c to Kansas City, Mo., and other Missouri River points, increased to 47c to Wichita and 32c to Missouri River points, thereby increasing the differential as between Wichita and Kansas City from 5c to 15c, and that the new rates were, as against Wichita, unjust and unreasonable in themselves and relatively; and it was further alleged that new advanced rates from other points of origin imposed the same differential as between Wichita and Kansas City, and that as against Wichita, those rates were also unlawful. Wichita and Kansas City compete for the sale of sugar in common competitive territory. The competitive conditions applying in the transportation of this traffic to Wichita and Kansas City are stated and found not to justify the 15c differential against Wichita and the existing rates to Wichita are excessive. HELD, rate of 47c on sugar from New Orleans to Wichita, unreasonable. That the present differential of 15c applied at Wichita above Kansas City on sugar from the Atlantic seaboard and New Orleans subjects Wichita to undue discrimination, and such differential should not be more than 8c per 100 pounds. That as to traffic passing through Wichita to Kansas City the rule laid down in 6 I. C. C. 586, forbidding any higher charge to Wichita to Kansas City on shipments from Galveston, is, in the light of decisions of the Supreme Court, no longer applicable, and defendants operating lines through Wichita to Kansas City are not prohibited from charging a higher rate on sugar to Wichita than to Kansas City so long as the Wichita rate is reasonable. Lehman-Higginson Grocer Co. v. A. T. & S. F. R. Co., 10 I. C. C. 460.

(t) The Commission instituted investigation as to differential freight rates to and from North Atlantic ports. Rates on freight articles from the west to Baltimore, Philadelphia and Boston are adjusted according to the following differentials below or above the rates to New York; Domestic, 3c less to Baltimore and 2c less to Philadelphia, 7c first class to 2c on sixth class, more to Boston. Export traffic, same as domestic traffic to Baltimore and Philadelphia, except on grain and iron and steel articles, which are 1½c less to Baltimore and 1c less to Philadelphia; same rates to Boston as to New York on this traffic. On ex lake traffic received at Buffalo, Freeport and Erie, there is, pending the disposition of this case, a differential in favor of Baltimore of 4-10 of a cent per bushel below the rate to New York, but no differential in favor of Philadelphia. It was contended by New York and Boston that the differentials favoring Baltimore and Philadelphia should be abolished. Domestic traffic was excluded from consideration. HELD, that the differential on export on flour, all rail and lake and rail, should be reduced to 2c at Baltimore and 1c to Philadelphia. That the existing differential on ex lake grain should be reduced to 3-10 of a cent per bushel and be allowed both to Baltimore and Philadelphia. That otherwise the present export differentials should remain in force. In the matter of differential rates, 11 I. C. C. 13.

(ta) Rates on freight articles from the West to Baltimore, Philadelphia and Boston are adjusted acording to the following differentials below or above the rates to New York: Domestic traffic—3 cents less to Baltimore and 2 cents less to Philadelphia; 7 cents, first class, to 2 cents, sixth class, more to Boston. Export traffic—same as domestic traffic to Baltimore and Philadelphia, except on grain and iron and steel articles, which are 1½ cents less to Baltimore and 1 cent less to Philadelphia; same rate to Boston as to New York on this traffic. On ex-lake grain received at Buffalo, Fairport and Erie, there is, pending the disposition of this case, a differential in favor of Baltimore of 4-10 of a cent per bushel below the rate to New York, but no differential in favor of Philadelphia. It was contended by New York and Boston that the differentials favoring Baltimore and Philadelphia should be abolished. Upon voluntary submission of the controversy to the Commission by all parties, domestic traffic was excluded from consideration. For reasons stated no opposition is expressed concerning the relative rates on import traffic. With respect to export differentials,—HELD: 1. That the differential per 100 pounds on flour, all-rail and lake and rail, should be reduced to 2 cents at Baltimore and 1 cent at Philadelphia. 2. That the existing differen-

tial on ex-lake grain should be reduced to 3-10 of a cent per bushel and be allowed both to Baltimore and Philadelphia. 3. That otherwise the present export differentials should remain in force. In the Matter of Differential Rates 11 I. C. C. 13.

(tb) The exaction of first-class rates on cotton-piece goods between Missouri River points and Denver, in view of the long-prevailing differentials in other parts of the country, and other existing conditions, is unjust and unreasonable. Kindel v. Boston & A. R. Co. 11 I. C. C. 495.

(tc) Reasonable and just rates on potatoes in carloads from Mankato and Good Thunder to Washington and Scranton would be 39 cents to Scranton and 38 cents to Washington, and said rates would be 4 cents above the rates from St. Paul; and defendant is also recommended to put in corresponding rates from Mankato and Good Thunder to the various eastern destinations. Hoerr v. Chicago, M. & St. P. R. Co. 11 I. C. C. 547.

(u) Complainant attacked as unreasonable rates on potatoes combination, carloads, from Good Thunder and Mankato, Minn., to Washington, D. C. In October 1902, complainant shipped a carload of potatoes from Good Thunder, Minn., to Washington on which the rate was 46c, and another carload of potatoes from Mankato, Minn., to Scranton, Pa., on which the rate was 50.2c. As there were no through rates in force, the Good Thunder shipment was moved at the combination of rates to and from Chicago, there being an overcharge on the Mankato shipment above the rate of 47c. In 1889 the Soo Line put in through rates on potatoes from St. Paul and Minneapolis to New York, Philadelphia and Boston of 40c, which were met by the American Lines. In June, 1898, all lines put in force a rate of 37c to New York, 40c to Boston, 35c to Philadelphia, and 34c to Baltimore. These rates were not effective from Mankato or from Good Thunder. By most lines the St. Paul and Minneapolis rates to the eastern points mentioned applied as maximum rates to intermediate points. From September 1900 to April 1903, the C. G. W. had in force a rate on potatoes from Mankato to eastern seaboard destinations 2c higher than from St. Paul and apparently this rate was also used over the C. & N. W. Complainant can not handle potatoes at Mankato or Good Thunder for these eastern destinations under the Chicago rate combination. At the time of the shipments above specified complainant was shipping over the Great Western and Northwestern at 2c above the St. Paul rate. Though the through rates from St. Paul are the result of competition, they have been long in force as normal rates, are reasonable and just, and as high as could properly be applied to this traffic. HELD, rates attacked unreasonable to extent they exceeded 4c above the rate from St. Paul, reparation awarded. Hoerr v. C. M. & St. P. R. Co., 11 I. C. C. 547.

(ua) The rate on pine lumber from southern Georgia points to Chattanooga, Tenn., is 2 cents per one hundred pounds higher than to Dalton, Ga.; but on shipments to Cincinnati, Ohio, Chattanooga takes a 2-cent lower rate than Dalton. There is also a dressing-in-transit privilege at Dalton, for which 2 cents per one hundred pounds additional are charged. The lumber shipped out of Chattanooga is mostly hardwood; the southern pine lumber brought to that point being practically consumed there. HELD: That under all the circumstances the lumber rate from Walton to Cincinnati is not so discriminative or exorbitant as to justify disturbance at this time. Farrar v. Southern R. Co. 11 I. C. C. 632.

(v) Complainant attacked as unreasonable a class rate of $3.80 per ton charged on brick, carloads, from Frederick, Md., to Elberon, N. J., 236 miles. There was at the time a rate of $1.75 in effect from Frederick to Jersey City, N. J. Subsequently a commodity rate of $2.75 was established. The customary method in making rates to Elberon is to add to the Jersey City rate an arbitrary of 5c per 100 pounds, which method was used in the establishment of the rate of $2.75. HELD, rate attacked unreasonable to extent it exceeded $2.75 per ton. Reparation awarded. Frederick Brick Works v. Northern Central Ry., 12 I. C. C. 14.

(w) Complainant attacked as unjust and unreasonable rates on flour and other grain products from Blackwell, Okla., on the Frisco to various points in Oklahoma, and other states via the Frisco to a junction point with the M. K. & T., and thence by said line to destination. The defendant has established a distance tariff for the transportation

of these commodities between points upon its own line, and these rates apply on its local shipments from the junction point to the destination of the traffic. It provides, however, by a tariff schedule, that upon traffic received from connections it will exact an arbitrary of 5c per 100 pounds over and above its regular local rate. This arbitrary was published for the purpose of enabling mills upon its own line to sell to territory served by its line, so that it may enjoy the entire haul on that business. HELD, arbitrary of 5c per 100 pounds unreasonable, reparation awarded. Blackwell Milling & Elevator Company v. M. K. & T. Ry., 12 I. C. C. 24.

(x) Complainant attacked class rates charged on cotton piece goods, carloads, from East St. Louis, Ill., to Wichita, Kas., and from East St. Louis to Kansas City and from Kansas City to Wichita as unjust and unreasonable. The real question involved is the differential in rates from eastern points to Kansas City and Wichita, which is 57c via all rail and 44 cents via rail and water routes in favor of Kansas City, the rail and water routes being via Galveston, Tex., and two of the lines passing through Wichita to Kansas City. The rate of 35c East St. Louis to Kansas City, is not excessive. The rate of 66c Kansas City to Wichita is extremely high for the distance of 222 miles; but it would not benefit complainant at Wichita and might result to its disadvantage, and would involve a ruling either that rating cotton piece goods as first class in the western classification is wrong or that the class rates between the Missouri River and Chicago are too high. No reason appears why the classification should be changed or the class rates reduced at this time. The rates from the east and the differential mentioned are not the subject of complaint, and the water and rail lines are not parties hereto. HELD, complaint dismissed without prejudice to other proceedings. Johnson Latimer Dry Goods Co. v. Wabash R. R., 12 I. C. C. 52.

(y) The Missouri, Kansas & Texas Railway and its connections meet the present rate of the Rock Island system on coal from the McAlester and Sans Bois fields, Indian Territory, to Enid, Oklahoma Territory, the Rock Island being the short line, but it does not follow merely because of competition by the Rock Island that the Missouri, Kansas & Texas line must meet that rate or any rate that the Rock Island may be required by law to make effective, nor does it follow that on coal shipped to Enid from the Lehigh and Henryetta fields, in Indian Territory, the rates must be 15 cents per ton less than those from the Sans Bois or McAlester districts, because under present rates and for competitive reasons that differential is now applied. Johnston v. St. L. & S. F. R., 12 I. C. C. 73.

(z) Grain, flour and feed, carloads, from Chicago and other western points to Pemberton, N. J., of five cents per hundred above New York rate, held excessive. De Cou v. Pennsylvania R. Co., 12 I. C. C. 160.

(aa) Complainant attacked commodity rates on grain, flour and feed from Chicago to Pemberton, N. J., compared with rates to Mount Holly, N. J. The present difference in through rates on grain, flour and feed from Chicago to Mount Holly and Pemberton is 5 cents, Mount Holly taking the rate to New York and Pemberton, 6 miles east, the New York rate plus 5c. Prior to February 1903, the Mount Holly rate was the New York rate plus 3c, and for a long period the differential against Pemberton in favor of Mount Holly was 2c. The Mount Holly rate was reduced on account of developed water competition. Under the 5c differential complainant could save about 2½c by shipping to Mount Holly and teaming to Pemberton. Since the hearing the Pennsylvania has put in a tariff naming a reconsignment charge on the traffic of 50c per ton from Mount Holly to Pemberton. HELD, the present through rate to Pemberton as compared with the rate to Mount Holly is excessive and subjects complainant and Pemberton itself to unreasonable prejudice and disadvantage, that the through rate to Pemberton should not exceed the New York rate plus 2c per 100 pounds, and should not be at any time more than 2c above the rate to Mount Holly. Eber De Cou. v. Pennsylvania R. R., 12 I. C. C. 160.

(bb) Complainant attacked as unreasonable class rates and rates on various commodities from interstate points to Roswell, Artesia, Hagerman and Carlsbad, N. M. Roswell is distant from Amarillo 206 miles, Carlsbad 72 miles south of Roswell and Hagerman and Artesia are between. These points are usually grouped. The rates to Roswell are materially higher from all directions than those to Amarillo or Pecos for cor-

responding distances. The rates to Amarillo are on the Burnt District basis, somewhat higher than to Texas common points. The short distance from all the points named to Roswell is through Amarillo, and practically all traffic between Roswell and the outside world moves via that point. It has seemed to the Commission that the most feasible way of adjusting these rates would be by the addition of certain arbitraries to the Amarillo rates. HELD, class rates attacked unreasonable to extent they exceed 35c first class over the rates to Amarillo. Roswell Commercial Club v. A. T. & S. F. Ry., 12 I. C. C. 339.

IMPORTANT CASES SINCE 1908

(cc) A suitable differential to a line requiring a differential is defined as one determined upon the character and service of the route as well as from a consideration of what in the judgment of the carriers would give to such a line an equitable share of the business. Rates via Rail-and-Lake Routes, 37 I. C. C. 302, 315.

(dd) Nothing can be said for a differential relation which permits some routes to grow with the business of the country and keeps others at a standstill. Rates via Rail-and Lake Routes, 37 I. C. C. 302, 316.

(ee) Differential adjustments can be prescribed only where unlawful discrimination is found and unlawful discrimination between producing points competing in a common market can not be found unless the same carrier serves the common market and controls rates to it, or where the traffic moves a part of the way over the rails of the same carrier. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C. 311, 315.

(ff) Wider differentials between the rates on bituminous coal from the Ohio group and the Crescent groups to "affected" territory than obtains from the same groups to "non-affected" territory, is justified by dissimilar circumstances and conditions. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 144.

(gg) Conditions which led to the establishment of port differentials had not even a remote connection with the factors which determined the outline of the groups in C. F. A. territory or the percentage assigned to them. Michigan Percentage Cases, 47 I. C. C. 409, 452.

(hh) The mere fact that the arbitrary might have been increased under General Order 28 at the time of its promulgation does not necessarily now justify the rate proposed. The burden still lies with the respondents to justify the proposed increased rate. Switching charge to and from South Tacoma, 61 I. C. C. 128, 129.

(ii) It is a common principle of rate making, although not always followed, that differentials should diminish with increasing distance and vanish when the mileage on which the differential is based becomes inconsiderable in proportion to the total mileage to destination. West Coal Rates, 80 I. C. C. 383, 413.

(jj) Element that must be considered in judging reasonableness of a differential adjustment as between two competitive fields is relative distances to common markets. Western Coal Rates, 80 I. C. C. 419.

(kk) Frequently the Commission will adhere to the principle of preserving fixed differentials between coal-producing districts, regardless of changes in level of rates. Ohio-Michigan Coal Cases, 80 I. C. C. 684.

(ll) The commission has found reasonable a difference of 10 cents per net ton in the c. l. rate on crushed stone and sand in favor of shipper where latter furnished cars. Lehigh Portland Cement Co., 58 I. C. C., 429, and Stewart Sand Co., 68 I. C. C., 111. Olympic Portland Cement Co. v. Director General, as Agent, 83 I. C. C. 402, 406.

(mm) A differential adjustment is the result of a combination of the group and distance methods of making rates. Evidence which merely serves to disclose the typical features of such an adjustment as to certain points of origin is of little value in considering the issues. Davis Fire Brick Co. v. B. & O. R. R., 87 I. C. C. 523, 525.

§8½. Between Commodities.

IMPORTANT CASES SINCE 1908

(a) Fact that in the Midcontinent Oil Case, 36 I. C. C. 109, and in subsequent cases which have followed it, a differential of 5 cents was established between the rates on crude and refined oils does not warrant the conclusion that this should be the differential under all circumstances, and particularly where the rates are larger in amount. Utah State Automobile Asso. v. A. T. & S. F. Ry. Co., 66 I. C. C. 8, 17.

(b) Following Arkansas Jobbers & Mfrs. Asso., 59 I. C. C. 662, rates on coarse grain 10 per cent less than those on wheat prescribed. Arkansas Jobbers & Mfrs. Asso. v. Director General, 66 I. C. C. 475, 479.

(c) Rates on printing and writing paper, and on paper articles grouped therewith, found unreasonable to the extent they exceed by more than 10 to 33 1-3 per cent, respectively, the corresponding rates on newsprint paper. Minnesota & Ontario Paper Co. v. N. P. Ry. Co., 66 I. C. C. 571, 575, 583.

ALL OTHER CITATIONS

Mixed Shipments of Lumber, Sash and Doors, 78 I. C. C. 103; Parkersburg Rig & Reel Co. v. M. K. & T. Ry. Co., 78 I. C. C. 238; Iowa Malleable Iron Co. v. Director General, as Agent, 78 I. C. C. 667, 670; Empire Refineries (Inc.) v. Director General, as Agent, 83 I. C. C. 223; Moline Oil Co. v. Director General, 83 I. C. C. 227; Empire Refineries v. A., T. & S. F. Ry. Co., 83 I. C. C. 706.

V. REPARATION.

See Reparation.

§9. In General.

IMPORTANT CASES SINCE 1908

(a) Complainants seeking reparation because of undue prejudice proceeded upon theory that they were damaged in amount measured by former differentials which they enjoyed under competing cities, notwithstanding assertion that competitors' prices were based upon lower production costs and that in meeting them they were compelled to shrink their profits, sometimes more than the amount of the differentials. HELD, Theory contrary to binding rule in International Coal Co. Case, 230 U. S. 184, which requires affirmative proof of fact and amount of damage Kerr & Co. v. S. S. Ry. Co., 62 I. C. C. 296, 302.

ALL OTHER CITATIONS

Commercial Club of Omaha v. A. & S. R. Ry. Co., 27 I. C. C. 302, 314; Thomas Iron Co. v. Director General, 57 I. C. C. 505; O. E. Burnx and F. H. Knapp v. B. S. & K. R., 62 I. C. C. 345; Waco Chamber of Commerce v. Director General, 73 I. C. C. 708; Atlantic Refining Co. v. Director General, 74 I. C. C. 8.

VI. PROCEDURE.

See Procedure Before Commission.

§10. In General.

IMPORTANT CASES SINCE 1908

(a) Where insufficient carriers are named the Commission cannot undertake to settle so broad a question as that of

the differential relation of Omaha and Kansas City. Omaha Grain Exchange v. C. R. I. & P. Ry. Co., 28 I. C. C. 680, 681, 687.

(b) Comparison of related rates by Commission in determining reasonableness of rates criticized by complainants as "adjusting of differentials." That such a method may be employed in any proceeding before the Commission regarding the reasonableness of a rate can not be validly questioned. Wickwire Steel Co. v. N. Y. C. & H. R. R. R. Co., 30 I. C. C. 415, 423.

(c) Exhibit comparing differentials, although of little or no practical help, held properly admissible in evidence. Cast-Iron Pipe from North Carolina Points, 38 I. C. C. 183, 186.

(d) Distance is not the only transportation factor to be considered in fixing the measure of a differential. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 129.

ALL OTHER CITATIONS

Union Tanning Company v. Director General, 57 I .C. C. 354; Thomas Iron Co. v. Director General, 57 I. C. C. 505; United Verde Extension Mining Co. v. Director General, 57 I. C. C. 625.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Construction of the Act.

See Act to Regulate Commerce II.
CASES 1887-1908

(a) Act to Regulate Commerce; rates for transportation of interstate traffic. The first section of the Act provides that all charges for services, rendered by common carriers subject to the provisions of the Law, "shall be reasonable and just," and prohibits and declares unlawful, "any unjust and unreasonable charge." This is the sole requirement of the Law, upon the subject of rates, which common carriers subject to the provisions of the Law may demand for the transportation of interstate traffic. Kentucky & Indiana Bridge Co. v. Louisville & Nashville R. Co., 2 I. C. R. 351.

(b) Undue discrimination, within the meaning of the Interstate Commerce Act, § 3, has reference to rates as well as to facilities afforded to shippers. United States v. Tozer, 2 I. C. R. 597.

(c) "Any undue or unreasonable preference or advantage," within the meaning of the Act to Regulate Commerce, §3, includes every form of unjust discrimination, not only in rates, but also in the conveniences and facilities supplied to shippers in any of the details of the carrying service. Re Morris' Petition (C. C. N. D. N. Y.), 2 I. C. R. 617.

(d) If a person, locality or traffic has been subjected by an act of the carrier to a disadvantage not imposed by impelling and controlling considerations for which the carrier is not responsible, the Commission is of the opinion that the statute applies, notwithstanding this act of the carrier working the wrong is not limited in terms to particular persons or particular description of traffic. Bates v. Pennsylvania Co., 2 I. C. C. 715, 719.

(e) No device, such as payment of unreasonable rent for use of cars furnished by shippers, can be practiced to evade the duty of equal charges for equal service. Rice v. Cincinnati, W. & B. R. Co., (Com.), 3 I. C. R., 481; Rice v. Western N. Y. & P. R. Co., (Com.), 3 I. C. R. 162.

(f) The common carriers named and referred to in the last clause of section 3 of the Act to Regulate Commerce are such as are subject to the provisions of that Statute. Copeheart & Smith v. Louisville & Nashville R. Co., 3 I. C. R. 278.

(g) Railway companies are bound under the Interstate Commerce Act only to give the same terms to all persons alike under the same conditions and circumstances; and any fact which produces an inequality of condition and a change of circumstances justifies an inequality of charge. Interstate Commerce Commission v. Baltimore & O. R. Co. (U. S. Sup. Ct.), 4 I. C. R. 92.

(h) In order to constitute an unjust discrimination under the Interstate Commerce Act, § 2, the carrier must charge or receive directly from one person a greater or less compensation than from another, or must accomplish the same thing indirectly by means of a special rate, rebate, or other device, but in either case it must be for a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions. Interstate Commerce Commission v. Baltimore & O. R. Co. (U. S. Sup. Ct.) 4 I. C. R. 92.

(i) The Interstate Commerce Act does not recognize indefinite or uncertain transportation charges, the idea of unequal compensation for like service, or discrimination in the treatment of persons similarly situated, and is repugnant to every requirement of that law, and a party to an interstate shipment cannot be excluded by the carrier from privileges afforded to other patrons in the same locality because of his refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should acompany the demand. Phelps & Company v. The Texas & Pacific Railway Company, 4 I. C. R. 363.

(j) If railway companies engaged in the transportation of traffic from one territory voluntarily enter into an association with railway companies engaged in the transportation of similar traffic from another territory to a common market, for the purpose, among others, of a mutual adjustment of rates over their respective lines, and in pursuance of this purpose as members of such association agree to and maintain rates over their own lines higher than are reasonable and the relation thus established between the rates from the two territories, respectively is unjustly prejudicial to the former and unduly preferential to the latter, this is a violation of the first paragraph of section 3 of the Act to Regulate Commerce, for which, whether or not there be a joint liability under said Act of the two systems of carriers, there is

at least a several liability on the part of those serving the territory injuriously affected. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 592, 609.

(k) Under the 7th section of the act, the question of unjust discrimination may arise, and under the 3d section, the question of undue preference may arise. And in determining a question under either or both of those sections, it may often, if not always, become necessary to contrast the rates to other places and persons; because those sections involve the question of relative rates, with all their elements. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(l) The 3d section forbids any undue and unreasonable preference or advantage. The mere circumstance that there is, in a given case, a preference or an advantage, does not, of itself show that such preference or advantage is undue or unreasonable. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(m) There is nothing in the act which defines what shall be held to be due or undue, reasonable or unreasonable. Such questions are not of law, but of fact; and those facts and matters which carriers, apart from any question arising under the statute, would treat as calling, in given cases, for a preference or advantage, are facts and matters which must be considered in forming judgment whether such preference or advantage is undue or unreasonable. Interstate Commerce Commission v. Alabama, M. R. Co., 5 I. C. R. 685.

(n) When the section says that no locality shall be subjected to any undue or unreasonable prejudice or disadvantage, it does not mean that regard is to be had only to the welfare of the locality or community where the traffic originates, or where the goods are shipped on the cars. The welfare of the locality to which the goods are sent is also to enter into the question. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(o) The Interstate Commerce Act does not recognize indefinite or uncertain transportation charges; the idea of unequal compensation for like service, or discrimination in the treatment of persons similarly situated is repugnant to every requirement of that law, and a party to an interstate shipment cannot be excluded by the carrier from privileges afforded to other patrons in the same locality because of his refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should accompany the demand. Phelps & Co. v. Texas & Pacific Railway Co., 6 I. C. C. 36.

(p) If railway companies engaged in the transportation of traffic from one territory voluntarily enter into an association with railway companies engaged in the transportation of similar traffic from another territory to a common market, for the purpose, among others, of a mutual adjustment of rates over their respective lines, and in pursuance of this purpose as members of such association agree to maintain rates over their own lines higher than are reasonable, and the relation thus established between the rates from the two territories, respectively, is unjustly prejudicial to the former and unduly preferential to the latter, this is a violation of the first paragraph of section 3 of the Act to regulate commerce, for which, whether or not there be a joint liability under said Act of the two systems of carriers, there is at least a several liability on the part of those serving the territory injuriously affected. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co. et al., 6 I. C. C. 197.

(q) The requirement of the agreement of the Southern Railway & Steamship Association that its members apply "full local rates upon all traffic subject to the Association Agreement coming from or going to" connecting lines which do not maintain Association rates, while to traffic from other connecting lines conforming to such rates full local rates are not applied, is repugnant to that clause of § 3 of the Act to regulate commerce which forbids carriers to "discriminate in their rates and charges between connecting lines." Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., et al, 6 I. C. C. 197.

(r) The central idea of the Act is equality. The thing aimed at is to prevent discrimination. The carrier must not discriminate in any form, whether between individuals, commodities or localities. Matter of alleged unlawful rates and practices. 7 I. C. C. 240, 253.

(s) It must be remembered that not every inequality in rates constitutes a violation of the law. Discrimination is

forbidden only when it is unjust. Preferences and prejudices are not prohibited unless they are undue. The language of the statute implies that there may be discriminations which are not unjust and preferences which are not undue. Commercial Club of Omaha v. C. & N. R. Co., 7 I. C. C. 386, 404.

(t) Railway companies are not prohibited by section three of the act from preferring one locality over another unless the preference is undue or unreasonable, but a preference which is without legitimate excuse is, in and of itself, undue and unreasonable. New York Exchange v. B. & O. R. Co., 7 I. C. C. 612, 658.

IMPORTANT CASES SINCE 1908

(u) It is the object of the Interstate Commerce Act and the Elkins Act to prevent favoritism by any means or device whatsoever and to place all shippers upon equal terms. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 289.

(v) The fact that a rate is per se reasonable does not prove that it may not be unlawful on other grounds. If rates are relatively unjust, so that an undue preference accrues under them to one person or locality, or an undue prejudice results to another person or locality, the law is violated, although the higher rates are not in themselves unreasonable. Bennett & Son v. C. & O. Ry. Co., 38 I. C. C. 310, 313.

(w) Section 2 expressly prohibits a carrier from charging a greater or less compensation for a like and contemporaneous service dependent upon the individual served. Bartlett Hayward Co. v. B. & O. R. R. Co., 40 I. C. C. 151, 155.

(x) The provisions of the Act against unjust discrimination speak to the carriers of the country individually and with respect to those things for which they are individually responsible, and not to the carriers as parts of a single great system. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C., 311, 315.

(y) Although the Act has been amended and revised many times during the past 30 years, section 3 has remained unchanged since its enactment in 1887. R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 362.

(z) Section 3 is broad enough to include any undue prejudice to one description of traffic, including interstate commerce, and undue preference of another description of traffic, that interferes with the free movement of such interstate commerce, whatever form the discrimination may take. R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 363.

(aa) What constitues undue and unreasonable prejudice and disadvantage is a question of fact and not of law. R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 364.

(bb) The purpose of section 2 of the Act is to enforce equality as between shippers and to prohibit any rebate or other device by which two shippers, shipping over the same line, the same distance, under the same circumstances of carriage, are compelled to pay different prices therefor. Pac. Lumber Co. v. N. W. P. R. R., 51 I. C. C. 738, 760.

(cc) Section 2 is primarily directed against discrimination between shippers located in the same community. Pac. Lumber Co. v. N. W. P. R. R., 51 I. C. C. 738, 760.

(dd) It is immaterial in this connection whether the complainant is a weak or strong line; that is not an essentially determinative factor in deciding discrimination. On the contrary, the Act to regulate commerce was primarily designed to protect the weak in the right of equal treatment under like circumstances, which might otherwise be denied them. The public is not ordinarily interested in, injured by, or benefited from a difference in divisions between connections, but the connecting line is subjected to discrimination if the circumstances and conditions in regard to or are like those obtaining in respect of another connection and the rates or charges it receives are different from those of that other connection. There is nothing here to offset the likeness in circumstances and conditions of carriage as between complainant as a connecting line and each of the defendants as connecting lines of each other. The mutuality of reciprocal advantages at other points as between defendants does not change the substantial likeness of the traffic interchanged between complainant and each of the defendants and that interchanged between defendants. Western Pacific R. R. v. S. P. Ry., 55 I. C. C. 71, 79.

(ee) Paragraph 4, Section 15, of the act reiterates in effect what is stated in section 3, but in it Congress has gone further than declaring that there shall

be no undue or unreasonable advantage, preference, or prejudice as between persons and localities, as in section 3, and has forbidden and declared unlawful any undue, unreasonable, or unjust discrimination against interstate or foreign commerce. Intrastate fares within Illinois, 59 I. C. C. 350, 361.

(eea) Undue prejudice under section 3 of the act ordinarily requires prejudice suffered by one party to be source of positive advantage to one alleged to be preferred and that a competitive relationship exist between parties or commodities concerned. Boston Wool Trade Asso. v. B. & A. R. R. Co., 78 I. C. C. 178, 183.

(eeb) In initiation of rates, and until they are proven unduly prejudicial in an appropriate proceeding, there is nothing in the regular statute to prevent the carrier from carrying nut coal between points on its own line on slack coal basis, or to require it to make same screen regulations as obtain at mines served by different carriers. Slack Coal from Arkansas Oklahoma Mines, 80 I. C. C. 194, 203, 204.

(ff) Paragraph (1) of section 3 of the act forbids giving to persons, firms, or localities any undue or unreasonable preference or advantage, or their subjection to any undue or unreasonable prejudice or disadvantage. Miller Paper Co. v. P. R. R. Co., 80 I. C. C. 314, 316.

(gg) The Interstate Commerce Act, does not denounce every discrimination, preference, and prejudice, but only those that are undue or unreasonable, and the question whether a discrimination, preference, or prejudice is unreasonable is for the Commission. Mfrs. Co. v. United States, 38 Sup. Ct. 383.

(hh) On contention that maintenance of admittedly prejudicial rules has not adversely affected prejudiced points, HELD: Section 3 of the act provides that it shall be "unlawful" for any common carrier subject to the act to subject any person, company, firm, corporation, or locality, or any particular description of traffic, to any undue prejudice. Mere fact that prejudiced point has continued to participate in traffic does not make undue prejudice any the less unlawful. Sioux City Live Stock Exchange v. Co., St. P., M. & O. Ry. Co., 83 I. C. C. 243, 245.

(ii) Prior to Transportation Act Feb. 28, 1920, carriers were at liberty to establish or maintain even unreasonably low rates, provided they were not discriminatory. Keogh v. Chicago & N. W. R. Co. (1922), 43 Sup. Ct. 47.

(jj) Whether preference or discrimination is undue, unreasonable, or unjust, under Interstate Commerce Act, §§2, 3, is ordinarily left to the Interstate Commerce Commission for decision, and the determination is to be made as a question of fact on the matter provided in the particular case. Nashville, C. & St. L. Ry. v. State of Tenn., (1923), 43 Sup. Ct. 583.

(kk) While every rate which gives preference or advantage to certain persons, commodities, localities, or traffic is discriminatory, only such discrimination as is unreasonable, undue, or unjust is unlawful, under Interstate Commerce Act, §§2, 3. Nashville, C. & St. L. Ry. v. State of Tenn. (1923), 43 Sup Ct. 583.

(ll) A difference in rates may constitute unjust discrimination, under Act to Regulate Commerce, §3, though the higher rate is inherently reasonable and the lower rate is not unreasonably low; the difference being illegal, unless justified by the cost of the respective services, or other transportation conditions. United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

(mm) Mere "discrimination" does not render a rate illegal under Act to Regulate Commerce, §3, but the discrimination to violate such statute must be unjust when measured by the transportation standard; that is, the difference in rates, to be illegal, must not be justified by the cost of the respective services, by their values, or by other transportation conditions. United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

Co., 80 I. C. C. 317; Central R. Co. of New Jersey v. United States, 42 Sup. Ct. 80; Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

§1a. Section 2.

CASES 1887-1908

(a) Section 1 requiring charges to be reasonable, and section 2, forbidding unjust discrimination, apply when exceptional charges are made under section 4, as they do in other cases. Re Southern R. & S. Asso. (Re Louisville & Nashville R. Co.), 1 I. C. R. 278.

(b) The term "a like kind of traffic," as it occurs in the Act to Regulate Commerce, §2, in respect to discrimination by carriers, does not mean traffic that is identical, but it means traffic that is of "a like kind" with other freight in the

elements of a fair and just classification for the purpose of arriving at a just and reasonable rate, and a rate that will avoid unjust discrimination and unlawful preference. New York Bd. of Trade & Transp. v. Pennsylvania R. Co. (Com.) 3 I. C. R. 417.

(c) The provision of the third section of the Act to Regulate Commerce prohibiting carriers from making or giving any undue or unreasonable preference or advantage to any particular person, firm, company, corporation or locality, or any particular description of traffic, in any respect whatsoever, not only applies to relative rates on one description of traffic shipped to or from competing localities, but also to relative rates on differently described articles which are competitive in the same markets; and when carriers have established rates on articles of competitive traffic which are relatively reasonable and fair, they cannot arbitrarily select particular articles of such traffic and materially raise or lower rates so established thereon without violating that provision of the Statute. Squire & Co. v. Mich. Central R. Co., 3 I. C. R. 515.

(d) Disadvantage to the shipper of one product can hardly be predicated upon charges for transporting another product differing essentially in character from the former and widely dissimilar in the demands which it supplies. In such cases the rates themselves are insufficient to convict the carrier of unlawful discrimination; but the amount actually charged on one commodity may be of great importance in determining whether the charge on another commodity is reasonable or otherwise, especially when both have numerous points of resemblance in respect to the cost and hazard of transportation. Rice v. Cincinnati, W. & B. R. Co., 3 I. C. R. 841.

(e) Section 2 of the act forbidding unjust discriminations, applies even in cases where a departure from the long and short haul rule of the statute is shown to be authorized, and the right, if established, of making the greater charge for the shorter haul, does not justify a disparity in rates so great as to result in unjust discrimination. Raworth v. N. P. R. Co., 3 I. C. C. 857, 863.

(f) In order to constitute an unjust discrimination under section 2, of the Interstate Commerce Act, the carrier must charge or receive directly from one person a greater or less compensation than from another, or must accomplish the same thing indirectly by means of a special rate, rebate or other device; but, in either case, it must be for a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions. Interstate Commerce Commission v. Baltmiore & O. R. Co., 4 I. C. R. 92.

(g) A rate on a particular class of goods which is unreasonable or discriminatory in itself, is not justifiable on the ground that the same rate is given another (and in this case a competitive) class of goods and as applied to the latter is liberal and advantageous. Potter Manufacturing Co. v. Chicago & G. T. R. Co., 4 I. C. R. 223.

(h) The fact that a lower rate is charged from a more distant point by reason of a competing route, which exists thence, is one of the circumstances which may be taken into account, under the provision of the 2d and 3d sections of the Act to Regulate Commerce. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(i) The principal purpose of the 2d section is to prevent unjust discrimination between shippers. It implies that in deciding whether differences in charges, in given cases, were or were not unjust, there must be a consideration of the several questions whether the services rendered were "like and contemporaneous," whether the kinds of traffic were "like," and whether the transportation was affected under "substantially similar circumstances and conditions." Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(j) Section 2 of the act prohibits unjust discrimination between individuals through charging different rates for like service under substantially similar circumstances and conditions, and does not prevent a railroad company from absorbing a terminal charge on livestock in one market and exacting such a charge for terminal service in another city which is reached by a different line. Cattle Raisers' Asso. of Texas v. Ft. W. & D. C. R. Co., 7 I. C. C. 513, 540.

(k) Section 2 of the Act does not deal with preference between localities.—Section 2 deals with preferences as between shippers, and not as between lo-

calities; and it is conceded to be wholly inapplicable to this case. Interstate Commerce Commission v. Western & Atlantic R. R. Co., 8 I. C. C. App XIII.

(l) Reasonableness no defense to charge of unjust discrimination.—Liability of a carrier for unjust discrimination between shippers under the Interstate Commerce Act, § 2, does not depend upon the reasonableness or justice of the charge named to the shipper complaining. The test of reasonableness in charges for interstate commerce is the schedule of rates of the carrier at the time in force. Kinnavey v. Terminal R. Asso. of St. L., 8 I. C. C. App. XXVI.

(m) The phrase "under substantially similar circumstances and conditions," in section 2 of the Act to regulate commerce, refers to the matter of carriage, and it is not permissible, under that section, for two or more carriers to establish a joint through rate less than the sum of their locals, which is applicable only to a particular shipper or class of shippers, while denying such lower rate to other shippers of like traffic between the same points of origin and destination. Capital City Gas Co. v. Central Vermont R. Co., 11 I. C. C. 104.

IMPORTANT CASES SINCE 1908

(n) While absence of competition does not prevent a finding of unjust discrimination under section 2, to sustain such a finding it must appear that the transportation services are like and contemporaneous and are performed under substatially similar circumstances and conditions, and that the property transported is like traffic. But it is the line haul to which section 2 primarily relates, and if the movement is either over a different line, or, if over the same line, for a substantially different haul, the transportation service is substantially dissimilar. Tidewater Oil Co. v. Director General, as Agent, 62 I. C. C. 226, 227.

(o) Potato starch and potato flour found to be like kinds of traffic within the meaning of that term as employed in section 2 of the act, and rates on potato starch found unjustly discriminatory to extent they exceeded the rates between the same points on potato flour. Nagase & Co. v. Director General, as Agent, 62 I. C. C. 422, 424.

(p) In order to constitute an unjust discrimination under section 2, the carrier must charge or receive directly from one person a greater or less compensation than from another, or must accomplish the same thing indirectly by means of a special rate, rebate or other device; but in either case it must be for a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances and conditions. East Springfield Citizens Club v. American Railway Express Co., 68 I. C. C. 482, 483.

(q) The unjust discrimination prohibited by section 2 of the act is in movements over the same roads or road, and not over different roads or partly over the same road and partly over different roads. Providence Fruit & Produce Exchange v. Rhode Island Co., 69 I. C. C. 422, 424.

(r) The phrase "under substantially similar circumstances and conditions," in section 2 of the act, "refers to matters of carriage, and does not include competition," which is "extraneous to the transportation." Rates on Bunker Coal, 73 I. C. C. 62, 74.

(s) Deliveries of coal to industries or team tracks within a terminal district, found to be two classes of movements not made "under substantially similar circumstances and conditions" of carriage. Rates on Bunker Coal, 73 I. C. C. 61, 75.

(t) Allegation relating to section 2 of the act will not be considered, where there is no showing of discrimination between shippers in same community. Dean Mill Co. v. M. P. R. R. Co., 80 I. C. C. 174.

(u) Rates on compo-board found not unreasonable as compared with rates on beaver board, Cornell board, and other wall boards, but unduly prejudicial to extent they exceed rates on wall boards made of fiber board or pulp-board. Nonprejudicial basis of rates prescribed and reparation denied. Green Lumber Co. v. A. A. R. R. Co., 80 I. C. C. 185.

Rhode Island Co., 69 I. C. C. 422, 424; Rates on Bunker Coal, 73 I. C. C. 61, 62, 74, 75; Standard Brick Co. v. G., F. & A. Ry. Co., 74 I. C. C. 553; Western Coal Rates, 80 I. C. C. 383, 440.

§2. Jurisdiction of Commission.

See Interstate Commerce Commission I.

CASES 1887-1908

(a) It is impossible to exercise a jurisdiction such as is conferred by the 3rd section by any process of mere mathematical or arithmetical calculation. A much broader view must be taken, and it would be hopeless to attempt to decide a case by any attempted calculation. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(b) To justify interference by the Interstate Commerce Commission with the adjustment of rates as between rival localities, it must appear that the preference and advantage to the one, and the corresponding prejudice and disadvantage to the other, are so appreciable and established with such a degree of certainty as to be justly declared unreasonable. Commercial Club v. Chicago & N. W. R. Co., 7 I. C. C. 386.

(c) The Commission is authorized by the Act to regulate commerce, after investigation, to order carriers to cease and desist from subjecting any particular person, locality, or description of traffic to undue or unreasonable prejudice or disadvantage in any respect whatsoever, and its jurisdiction extends to a case of alleged unlawful prejudice and disadvantage to shippers of outbound package freight through enforcement by carriers of a regulation providing for the earlier closing of depots used for the reception of such freight. Cincinnati Chamber of Commerce and Merchants' Exchange v. Baltimore & O. S. W. R. Co., 10 I. C. C. 378.

(d) Discrimination in according facilities, within jurisdiction of Commission to forbid and to award reparation. Rogers & Co. v. P. & R. Ry. Co., 12 I. C. C. 308.

(e) The Commission has jurisdiction to forbid discrimination and to award reparation for the detriment directly and proximately resulting from it. E. L. Rogers & Company v. P. & R. Ry., 12 I. C. C. 309, 311.

(f) Discrimination unlawful only when unreasonable. Rates not unduly discriminatory can only be reduced by the Commission when, in its opinion, shown to be unreasonable in themselves. Commercial & Industrial Ass'n of Union Springs v. L. & N. R. R. Co., 12 I. C. C. 372.

(g) Where undue discrimination is not shown, the rates complained of can only be reduced by the Commission when in its opinion they are shown to be unreasonable in themselves. C. & I. Asso. of Union Springs v. L. & N. R. Co., 12 I. C. C. 372.

IMPORTANT CASES SINCE 1908

(h) The Commission has ample authority to deal with unlawful practices that result in unjust discrimination or undue prejudice in their effect on interstate traffic or on interstate shippers, and this authority it is its duty to exercise whether the practices grow out of contracts or otherwise. Hocking Domestic Coal Co. v. K. & M. Ry., 44 I. C. C. 392, 399.

(i) Although the rate structure will undoubtedly become more logical and more stable as the rates approach more nearly in each instance to the cost of service, the Commission cannot condemn a rate solely because it is not constructed on that principle, unless it be clearly shown that the resulting discrimination is undue; and whether or not it is undue can best be determined by a careful consideration of the history of the rate, the reason for its establishment, the nature of the traffic, the competition between shippers and communities, and all other pertinent evidence. The New York Harbor Case, 47 I. C. C. 643, 736.

(j) The Commission has the authority and it is its duty to reach all unlawful discriminatory practices resulting in favoritism and unfair advantages to particular shippers or carriers. Prescott & Northwestern R. R. v. M. P. R. R. R., 68 I. C. C. 487, 490.

(k) It is not only within its power, but the law makes it the duty of the Commission to make orders which shall nullify practices resulting in rebating or preferences, whatever form they take and in whatever guise they may appear. Prescott & Northwestern R. R. v. M. P. R. R., 68 I. C. C. 487, 490.

(l) Where it is possible for a delivering carrier to put an end to undue prejudice by the exercise of its power to refuse to enter into any joint or proportional rate which is preferential, and when the fact of undue prejudice is established, it is within the power of the Commission to put an end to it. Peters Cartridge Co. v. Director General, 73 I. C. C. 311, 314.

(m) Whether any undue, unreason-

able, or unjust discrimination against interstate commerce, or other violation of the act exist is for the Commission to decide upon the record. Klamath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 212.

(ma) Jurisdiction of commission over intrastate rates subsequent to Federal control is prescribed by sections 3 and 13 of the act. The commission has no jurisdiction except where they are shown to be prejudicial to interstate commerce, and long and short-haul provision of section 4 authority to pass upon measure of such does not apply thereto. Producers Refining Co. v. M. K. & T. Ry. Co., 80 I. C. C. 339, 340.

(n) The power of the Commission to establish through routes and joint rates does not depend upon finding carriers guilty of discrimination. In addition to other powers enumerated in Sec. 15 and in Sec. 1, it is also said that the Commission may also, after hearing, with or without complaint, establish through routes and joint rates; and also give it power to a certain point to correct unjust practices. St. Louis Southwestern Ry. Co. v. United States, 234 Fed. 668, 679.

(o) In determining whether the Commission exceeded its authority under §3 of the Act to Regulate Commerce, it is essential to consider the character of the service required. Section 3 was a part of the original act, and remains unchanged, but there are certain amendments to the act which are to be read in connection with §3 as if they were originally incorporated within the act. Blair v. Chicago, 201 U. S. 400, 475, 50 L. ed. 801, 832, 26 Sup Ct. Rep. 427. The act as amended June 29th, 1906, defines what is meant by common carrier engaged in transportation by railroad which are brought within the control of the act, and a railroad is defined to include all switches, spurs, tracks, and terminal facilities of every kind, used or necessary in the transportation of persons or property designated in the act, and also all freight depots, yards, and grounds used or necessary in the transportation or delivery of any kind of said property. Not only does the act define railroads, but it specifically defines what is meant by transportation, which is made to include "cars and other vehicles and all instrumentalities and facilities of shipment or carriage, irrespective of ownership or of any contract, express or implied, for the use thereof, and all services in connection with the receipt, delivery, elevation, and transfer in transit, ventilation, refrigeration, or icing, storage, and handling of property transported." It is made the duty of every carrier "subject to the provisions of this act to provide and furnish such transportation, upon reasonable request therefor, and to establish through routes and just and reasonable rates applicable thereto;" and on June 18, 1910, it was additionally provided that the carrier should "provide reasonable facilities for operating such through routes and to make reasonable rules and regulations with respect to the exchange, interchange, and return of cars used therein, and for the operation of such through routes, and providing for reasonable compensation to those entitled thereto." Pennsylvania Co. v. United States, 35 Sup Ct. 370, 373; 236 U. S. 351; 59 L. ed. 616.

(p) Under the Interstate Commerce Act the Interstate Commerce Commission can remove discrimination practiced by a combination of connecting carriers as well as that by an individual railroad. Central R. Co. of New Jersey v. United States, 42 Sup. Ct. 80.

(q) The Interstate Commerce Commission must determine, at least in the first instance, whether a rate is discriminatory. Keogh v. Chicago & N. W. Ry. Co., 43 Sup. Ct. 47.

(r) Where through rate charged by railroad from certain points within blanket territory was lower than rate charged from another point within such territory on an independent short line, the Interstate Commerce Commission could require the railroad to desist from unjust discrimination, though the point from which the higher rate was charged was not on its own line; the railroad being in a position to remove the discrimination by increasing the lower rate. United States v. Illinois Cent. R. Co. 44 Sup Ct. 189.

§2½. State and Interstate Rates.

See Intrastate Rates and Regulation §4½.

IMPORTANT CASES SINCE 1908

(a) Under Interstate Commerce Act, § 13, pars. 3 and 4, and section 15a as enacted by Transportation Act of 1920, §§ 416 and 422, respectively, requiring the Commission to establish rates which will enable the carriers as a whole or in groups to earn a fixed return upon the valuation of their porperty used in the commerce, the provision declaring that rates fixed by state authority which discriminate against interstate or foreign commerce are unlawful, and authorizing the Commission to fix rates in that event, gives the Commission authority to prescribe all intrastate rates within a state whose statutes have fixed rates which are sustantially less than those required to produce the required return, so that the interstate rates necessary to give the carriers their return would have to be increased proportionally. Railroad Commission of Wisconsin v. Chicago, B. & O. R. Co., 42 Sup. Ct. 232.

(b) The provisions of Interstate Commerce Act, § 15a, as enacted in Transportation Act of 1920, § 422, authorizing the Interstate Commerce Commission to prescribe certain rates in the exercise of its power to prescribe changes and reasonable rates, does not authorize the Commission to change all of the intrastate rates, but leaves its authority limited to such of those rates as caused the discrimination. Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

(c) An order by the Interstate Commerce Commission raising the intrastate rates to a level of the interstate structure, which is merely incidental to the regulation of interstate commerce and necessary to its efficiency in view of the fact that commerce is a unit and does not regard state lines, does not violate the specific proviso of the original Interstate Commerce Act repeated in the amending acts that the Commission is not to regulate traffic wholly within a

state. Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

(d) Since the language of the Transportation Act is clear in giving the Interstate Commerce Commission power to prescribe intrastate rates if the rates fixed by the state discriminate against interstate or foreign commerce, the committee reports and explanatory statements in Congress prior to the passage of the bill showing that it was not intended to confer on the Commission power to remove discrimination involved in a general disparity between interstate and intrastate rates, will not be considered, since the legislative history of an act is admissible as an aid to construction only to solve doubt, not to create it. Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

(e) The Transportation Act of 1920 gives the Interstate Commerce Commission power to remove a general disparity between intrastate and interstate rates which operates as a real discrimination against, and obstruction to, interstate commerce, but does not give the Commission unified control of interstate and intrastate commerce, nor deprive state authorities of discretion to deal with intrastate rates as between themselves on the general level which the Interstate Commerce Commission has found to be fair to interstate commerce. Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

(f) Section 13 of the act provides that whenever any regulation or practice made or imposed by State authority is brought in issue, and commission finds that such regulation or practice results in undue preference or prejudice as between persons or localities in intrastate commerce on one hand and persons or localities in interstate commerce on the other, the commission "shall prescribe the * * * regulation, or practice thereafter to be observed, in such manner as * * * will remove such * * * prejudice * * *." Sioux City Live Stock Exchange v. C., St. P., M. & O. Ry. Co., 83 I. C. C. 243, 246.

ALL OTHER CITATIONS

Nebraska Rates, Fares and Charges 81 I. C. C. 290, 292.

II. DETERMINATION OF DISCRIMINATION.

§3. In General.

See Allowance §7

CASES 1887-1908

(a) Defendant railway company has two lines of nearly equal length, one starting from Providence and the other from East Providence, which unite at Valley Falls, whence the main line runs into Massachusetts. The rate charged by defendant on coal shipped at Providence is the same as on coal shipped at East Providence as far as Valley Falls and the next station, but beyond that point the rate on coal from Providence is ten cents per gross ton more than on coal from East Providence. HELD, (a) That this is an unjust discrimination; that if it is fair and reasonable for the defendant to make the charge to Valley Falls from the two termini the same, there can be no justification for making different rates to stations beyond, based on the fact that the coal comes from one terminus rather than from the other. (b) That the evidence fails to support the contention of defendant that the extra rate upon coal received at Providence is only a fair equivalent for the additional cost of handling it there. (c) That under all the circumstances it is not admissible for defendant to impose upon its patrons at Providence, whose investments were made before the East Providence line was constructed, an additional charge because of the inconvenience attending the transaction of its business at that station and for which they are in no way responsible. Providence Coal Co. v. Providence & W. R. Co. 1. I. C. R. 363.

(b) A railroad company has no right by any discrimination not grounded in reason, to put any single dealer, whether a large dealer or a small dealer, to any destructive disadvantage. Providence Coal Company v. P. & W. R. Co., 1 I. C. C. 363, 367.

(ba) The means, occupation or purpose of parties are not proper considerations upon which to found discriminations among them. Smith v. N. P. R. R. 1 I. C. C. 611, 621.

(bb) But rates and charges not unreasonably high of themselves, can be so adjusted in their relations to each other as to give the undue preference and produce the unreasonable disadvantage which the third section of the Act makes unlawful, and if the railway company in establishing its charges on

the different divisions and branches of its roads, so adjusts them as to divert trade and business to one locality, which naturally under an equitable adjustment of charges would go to another, HELD, such unreasonable preference for one place and disadvantage to another, are not excused or made lawful by the fact that some of such rates are not entirely voluntary, but the result of competition with other carriers. Raymond v. C. M. & St. P. R. R., 1 I. C. C. 627, 629.

(bc) Discrimination must consist in the doing for or allowing to one party or place what is denied to another; it can not be predicated on action which in itself is impartial. Crews, Danville Chamber of Commerce v. R. & D. R. R. Co., 1 I. C. C. 703, 712.

(bd) Where a complaint is made by a shipper that an unjust discrimination was perpetrated by a railroad company against him at a particular time named, to rebut the inference arising from the circumstances, calling for explanation, among other evidences, the carrier may show that during a long course of business neither it nor any of its agents have ever shown any unfriendly spirit whatever toward the shipper; and that on the contrary its agents, immediately before the matter complained of, made extra exertions in good faith to serve the shipper in obtaining cars for him from the connecting line to whom the shipper had to look for such cars. In the absence of some rule and custom of business placing such duty on the carrier to notify the shipper, without any inquiry on the part of the latter of the fact that he can there obtain cars for the movement of his freight, it is the duty of the shipper, by reasonable inquiry made to the proper agent of the railroad company, to obtain this information for himself. HELD, no case of preference or unjust discrimination is made out by the evidence. Complaint dismissed. Riddle Dean & Co. v. B. & O. R. R., 1 I. C. C. 778, 784.

(c) Discrimination must consist in the doing for or allowing to one party or place what is denied to another; it cannot be predicated on action which in itself is impartial. Crew v. R. & D. R. R. Co., 1 I. C. R. 703.

(d) A common carrier may contract to ship freight at a lower rate than the published tariff, but he cannot contract to deny the same reduced rate to other shippers. Christie v. Missouri P. R. Co., (Mo.), 2 I. C. R. 22.

(e) To render a preference of one over another unlawful, under the Act to Regulate Commerce, it is not necessary that it should be accomplished by any "device;" and it is equally true that the ingenuity of man cannot invent a "device" for the perpetration of an unlawful preference on the part of a carrier engaged in interstate commerce, without incurring the penalties prescribed by the Statute. Scofield v. Lake Shore & Michigan Southern R. Co., 2 I. C. R. 67.

(f) In the determination of a complaint of undue preference against Lincoln, Nebraska, in favor of Omaha, in rates from St. Louis, the comparative length of the two pieces of road, the grades, crossings, and bridges, the interest upon the cost, and the facilities with which trains may be handled, must be considered, besides the mere volume of business. Lincoln Board of Trade v. Missouri P. R. Co., (Com.), 2 I. C. R. 98.

(g) All discriminations and preferences by one carrier between others are not forbidden or made unlawful by the Interstate Commerce Act, but only such as are unjust or undue or unreasonable. Kentucky & I. Bridge Co. v. Louisville & N. R. Co. (C. C. D. Ky.), 2 I. C. C. 351. Overruling decision of the Interstate Commerce Commission in the same case, 2 I. C. R. 102.

(h) A uniform rate upon milk destined for New York city from all stations within 200 miles upon railroads running through the southern counties of New York, west of the Hudson River to Jersey City, is not an unjust discrimination in favor of more distant shipping points, as against those nearer the common terminus. Howell v. New York, L. E. & W. R. Co. (Com.), 2 I. C. R. 162.

(i) Under the Act to Regulate Commerce shippers are not to be be put in a position of subserviency to common carriers, nor required to ask for rates, but are entitled to equal and open rates at all times. Re Tariffs of the Trans-Continental Lines, 2 I. C. R. 203.

(j) Taking and billing freight between two points at lower rates if it is destined to another point beyond the original destination is giving an illegal preference. Northwestern Iowa Grain & Stock Shippers Asso. Chicago & N. W. R. Co. (Com.), 2 I. C. R. 431.

(k) In determining the question of undue prejudice from a rate, distance is only one of the factors, and other material facts, such as character and quality of the commodity, cost of production, extent and nature of the competition in the business itself and by other transportation lines, and the interests of the public in the use of the commodity and its market cost, are to be considered. Imperial Coal Co. v. P. & L. E. R., 2 I. C. C. 436, 443.

(l) Actual undue prejudice or damage of which the rate is the cause must result to the more favorable situated producers, to render a group rate unlawful. Imperial Coal Co. v. Pittsburgh & L. E. R. Co. (Com.), 2 I. C. R. 436.

(m) Unlawful discrimination is not established by proof that a rate of freight on cotton from Vicksburg to eastern points is given to one different from that given to another, when it also appears that such rate is only a part of a uniform through rate from a point beyond. Cowan v. Bond, 2 I. C. R. 542.

(n) In proceedings to determine whether there has been discrimination in favor of a certain shipper, it is sufficient to show the rates actually charged, as differing from the public schedule of the rates charged to the public in general, for a reasonable length of time. Innumerable shipments in detail for many years are immaterial. Rice v. Cincinnati, W. & B. R. Co. (Com.), 2 I. C. R. 584.

(o) Mere inequality between the rate charged a shipper and the published tariff rates does not constitute unjust discrimination, within the meaning of Colo Const. art. 15, § 6, prohibiting "undue or unreasonable discrimination." Bayles v. Kansas P. R. Co. (Colo.), 2 I. C. R. 643.

(p) Carriers must respect the interests of those who may have occasion to employ their services, and conform their charges to the rules of relative equality and justice. Thurber v. New York C. & H. R. R. Co. (Com.), 2 I. C. R. 742.

(q) The elements of distance, of difference in character of tariff, and of dissimilar transportation conditions, as grounds for distinction in rates, are as clearly recognized as the right of a carrier to compensation for his services. Some discrimination for adequate cause is lawful. The discrimination must not be unjust nor the advantage undue, and the respective rates must not be relatively unreasonable. It is the extent of the discrimination that may be unreasonable and unjust, and not always the mere fact of a difference. Thurber v. N. Y. C. & H. R. Co., 2 I. C. C. 742, 752.

(r) The general rule contemplated by the statute of equitable graded charges on like traffic with reasonable reference to the amount of the service, is just in itself, and commonly most beneficial both to the carriers and to the public, and is not only to be departed from when justified by exceptional conditions, and in such instances no longer than the conditions require. Lehmann Higginson & Co. v. S. P. Co., 3 I. C. C. 80, 92.

(s) When a carrier engages in transportation for which, by reason of competitive conditions, or for purposes of its own, it receives low rates from some patrons and at some localities, it accepts the legal obligation to give impartial service to other patrons and at other localities that sustain similar relations to the traffic. The Manufacturers' & Jobbers Union v. Minn. & St. L. R. Co., 3 I. C. R. 115.

(t) Discrimination against Chicago in rates from the west upon live hogs as compared with packing-house products is not justified by the claim that a higher rate of speed is necessary for carrying hogs and also a greater risk and expense, where the evidence does not sustain these claims. Chicago Bd. of Trade v. Chicago & A. R. Co. (Com.), 3 I. C. R. 233.

(u) The small dealer is entitled to just and reasonable rates on his product, as much as many and large dealers, and any discrimination between them in rates based upon the idea that the one class of persons make many shipments while the other makes but few is unjust and unreasonable. It is a discrimination in favor of one kind of traffic as against another in the vital matter of rates, and is unlawful. Harvard Company v. Pennsylvania Co., 3 I. C. C. 257, 262.

(v) Discrimination in the making of contracts by a carrier for the carriage of goods, without partiality, is inoffensive. Partiality exists only in cases where advantages are equal and one party is unduly favored at the expense of another who stands upon an equal footing. Cleveland, C. C. & I. R. Co. v. Closser (Ind.), 3 I. C. R. 387.

(w) If railroad companies and those

who directed and control their roads were limited to the business of transportation it would take away from both the opportunity to unlawfully prefer themselves as shippers. Disinterested and impartial control is essential to prevent illegal favoritism, and abuse of the privileges with which carriers are invested for the benefit of the public. Coxe Bros. & Co. v. L. V. R. R. Co., 3 I. C. C. 460, 474.

(x) When it is made to appear upon investigation that any common carrier is unjustly discriminating against any person, company, or firm, subjecting them to unreasonable disadvantage, or doing anything in violation of the Act, the remedy which the act provides is that such carrier be required to cease and desist from such violations. Coxe Bros. & Co. v. L. V. R. R. Co., 3 I. C. C. 460, 475.

(y) A carrier in its relations to the public acts within defined limitations. It must observe the rules of fair dealing, and not subject any part of the public with which it deals to undue prejudice. Its franchise is, in a sense, a trust to be used for the proper and impartial benefit of the public. Shamberg v. D. L. & W. R. R. Co., 3 I. C. C. 502, 514.

(z) Carriers may lawfully accept the same aggregate, though less profitable, rates for longer distances, provided they do not "subject any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage." James & M. Buggy Co. v. Cincinnati, N. O. & T. P. R. Co. (Com.), 3 I. C. R. 682.

(aa) No device for evading the law could be more unfair or offensive than a manipulation of rates on similar, but noncompeting commodities, which had the effect of securing to a shipper, largely interested in both, an illegal advantage over a rival dealing in one. Rice v. C. W. & B. R. Co., 3 I. C. C. 842, 849.

(bb) A carrier cannot justify a discrimination in rates merely upon the ground that, unless it is given, the traffic obtained by giving it would go to a competing carrier. Interstate Commerce Commission v. Texas & P. R. Co., (C. C. S. D. N. Y.), 4 I. C. R. 114.

(cc) The fact that the rate from Cincinnati to Social Circle is greater than the joint tariff rate from Cincinnati to Augusta, constitutes no "undue or unreasonable prejudice or disadvantage" against Social Circle, and no "undue or unreasonable preference or advantage" in favor of Augusta Railway companies are only bound to give the same terms, to all persons alike, under the same conditions and circumstances; and any fact which produces an inequality of condition, and a change of circumstances, justifies an inequality of charge. Augusta and Social Circle are not "under the same conditions and circumstances." Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 4 I. C. R. 332.

(ee) The facts, that one city is much larger and has more important and extensive business interests than another and has been treated by the carriers in making rates to surrounding points as a "trade center," is no justification for a continuation of discriminatory rates in favor of such city. The object of the Act to Regulate Commerce was to eradicate the existing system of rebates and unjust discriminations in favor of particular localities, special enterprises and favored individuals. Board of Trade v. Alabama Midland, 4 I. C. R. 348.

(ff) Unjust discrimination as between localities or individuals cannot in the nature of things be essential to the business prosperity of the carrier, and it is no valid objeciton to the correction of unlawful rates to one point that it involves a like correction as to other points. Board of Trade of Troy, Ala., v. A. M. R. Co., 4 I. C. C. 348, 362.

(gg) A railroad company cannot appropriate the grievance of a traffic or locality,, under the Interstate Commerce Act, § 3, prohibiting preference by a carrier to persons, firms, or corporations, and to localities and traffic, and complain on account of it. Oregon Short Line & U. N. R. Co. v. Northern P. R. Co. (C. C. App. 9th C.), 4 I. C. R. 718.

(hh) A person who receives cotton at Mobile from any particular point on the Alabama rivers, whether it comes by boat or wagon or any other way, and desires to ship it from Mobile to New Orleans by a railroad line, is entitled to have it shipped at the Mobile rate, as much as any person who receives his cotton from any other point or who may have bought it at Mobile; and it is no objection to such right that it would give every town located on such rivers equal facilities and advantages with those of Mobile, as that is the purpose of the In-

terstate Commerce Act. Bigbee & W. Rivers Packet Co. v. Mobile & O. R. Co. (C. C. S. D. Ala.), 4 I. C. R. 829.

(ii) Unjust discrimination as between localities or individuals cannot, in the nature of things, be essential to the business prosperity of the carrier, and it is no valid objection to the correction of unlawful rates to one point that it involves a like correction as to other points. Board of Trade of Troy, Ala. v. Ala. Mid. Ry. Co. et al., 6 I. C. C. 2.

(jj) That railroad investments may be as secure as other property, the reasonable rates should be liberal until earnings are sufficient large for a fair return on actual expenditure. Newland v. Northern P. R. Co., 6 I. C. C. 131.

(kk) The nearer of two competing points cannot be denied at least equal rates with the more remote, in fixing reasonable rates for shipments, where neither the cost, the value of the service, nor other conditions of transportation favor the latter. Hill v. Nashville, C. & St. L. R. Co., 6 I. C. C. 343.

(ll) That one town is able, under existing rates to and from such town, to compete with an adjacent town on practically even charges for the aggregate in and out transportation is no excuse for injustice in the rates to the former town as compared with the latter. Daniels v. Chicago R. I. & P. R. Co., 6 I. C. C. 458.

(mm) When rates are relatively unjust, so that undue preference is afforded to one locality or undue prejudice results to another, the law is violated and its penalties incurred, although the higher rate is not in itself excessive, and such a rule is especially applicable where a given relation in rates, long continued and concededly equitable, is suddenly and almost completely reversed, merely because other carriers to the longer distance point have disregarded their legal duty. Board of Trade of Lynchburg v. Old Dominion S. S. Co., 6 I. C. C. 632.

(nn) The interstate commerce law is violated and its penalties incurred where rates are relatively unjust so that undue preference is afforded to one locality or undue prejudice results to another, although the higher rate is not in itself excessive,—especially where a given relation in rates which has been long continued and is conceded to be equitable is suddenly reversed merely because other carriers to the longer distance point have disregarded their legal duties. Lynchburg Bd. of Trade v. Old Dominion S. S. Co., 6 I. C. C. 632.

(oo) The practice, if lawful, of giving to one city on shipments from one direction rates not higher than on similar shipments to a nearer point, furnishes no warrant for giving the latter place rates no higher than those to the former from points in another direction much nearer the latter place, where the circumstances and conditions in the two cases are essentially dissimilar. Commercial Club v. Chicago R. I. & P. R. Co., 6 I. C. C. 647.

(pp) Unreasonable disparity of the aggregate rates on hauls of different lengths to a common destination, whether by one carrier or by several jointly, is unlawful where it results in undue advantage to one locality or business or disadvantage to another. Colorado Fuel & Iron Co. v. Southern P. Co., 6 I. C. C. 488.

(qq) Inequality in treatment of shippers and localities is indefensible where it has no other justification than the diversion by the carrier of through traffic from a shorter route over which it participates in carriage, so as to secure for itself greater aggregate revenue through a long haul by a different route, over which it is also engaged in transportation. Colorado Fuel & Iron Co. v. Southern P. Co., 6 I. C. C. 488.

(rr) Rates charged by defendants for the transportation of freight articles from Cincinnati, Ohio, and Louisville, Ky., to Griffin, Ga., are materially higher than their rates on like traffic carried from Cincinnati and Louisville through Griffin to Macon, Ga., and Griffin and Macon are competing localities. HELD, upon the facts that Griffin is entitled to Macon rates from Louisville and Cincinnati, and that charging any higher rate to Griffin is an unjust discrimination under section 3 of the Act to Regulate Commerce. Brewer & Hanleiter v. Louisville & N. R. Co., 7 I. C. C. 224.

(ss) The right of railroad companies to earn a proper return upon their investment is subject to the limitation of the Interstate Commerce Act forbidding discrimination between localities, and charging more for a short than for a long haul. Brewer v. Louisville & N. R. Co., 7 I. C. C. 224.

(tt) While transportation charges should be liberal until the earnings are

sufficient for a fair return on actual investment it does not follow that rates long maintained and grossly discriminative should be continued on exacted year by year. Cary v. Eureka R. Co., 7 I. C. C. 286.

(uu) To justify interference by the Commission with the adjustment of rates as between rival localities it must appear that the preference and advantage to the one, and the corresponding prejudice and disadvantage to the other, are so appreciable, and established with such a degree of certainty, as to be justly declared unreasonable. Commercial Club of Omaha v. Chicago & N. R. Co., 7 I. C. C. 386.

(vv) The public right to a just relation of rates between rival communities arises from the statute which forbids discriminating charges, and that right cannot be abridged or enlarged by agreements of carriers with each other, nor by promises made to shippers. Commercial Club of Omaha v. Chicago & N. W. R. Co., 7 I. C. C. 386, 401.

(ww) Higher rates charged by defendants from New Orleans to LaGrange than for longer distances from New Orleans to Hogansville, Newnan, Palmetto to Fairburn, on like traffic carried under similar conditions and circumstances, and at less cost for the transportation service to LaGrange, are unreasonable and unjust to complainant, and subject him and other dealers at La Grange, their traffic, and, as a locality, the city of La Grange itself, to undue and unreasonable prejudice and disadvantage, and give undue preference and advantage to the localities of Hogansville, Newnan, Palmetto and Fairburn, traffic thereto, and dealers and merchants doing business therein, in violation of sections 1 and 3 of the act. Calloway v. Louisville & Nashville R. Co., 7 I. C. C. 431.

(xx) A preference by railroad companies, without legitimate excuse, of one locality over another, is of itself an undue and unreasonable preference within the prohibition of the Act to Regulate Commerce, § 3. New York Produce Exch. v. Baltimore & O. R. Co., 7 I. C. C. 612.

(yy) Railway companies are not prohibited by section three of the Act from preferring one locality over another unless the preference is undue or unreasonable, but a preference which is without legitimate excuse is, in and of itself, undue and unreasonable. New York Produce Exchange v. Baltimore & O. R. Co., 7 I. C. C. 613.

(zz) Discrimination to be unjust must be unlawful.—There can be no unjust discrimination in rates of which commissions and courts can take cognizance, unless it is also an unlawful one. Brewer & Hanlieter v. Central of Georgia Ry. Co., 7 I. C. C. App. III.

(3a) Discrimination must consist in the doing for or allowing to one party or place what is denied to another; it can not be predicated on action which in itself is impartial. Martin v. C. B. & Q. R. R., 2 I. C. C. 32, 37.

(3b) Discrimination in rates in favor of one locality against another necessarily gives the merchants of the former an advantage, and works a prejudice to those of the latter, in competition, where both compete for business in the same territory. Phillips, Bailey & Co. v. Louisville & N. R. Co., 8 I. C. C. 93.

(3c) Where the merchants of two localities compete for business in the same territory, discrimination in rates in favor of the one and against the other locality necessarily gives the former an advantage and works a prejudice to the latter in that competition. Phillips Bailey & Company v. L. & N. R. Co., 8 I. C. C. 93, 106.

(3d) The maintaining of higher rates by the Central of Georgia Railway Company and the Georgia & Alabama Railway Company from Nashville, Cincinnati and Chattanooga to Dawson than to Albany confers an undue advantage upon the latter over the former point, in violation of the Interstate Commerce Act, § 3. Board of Trade of Dawson v. Central of Georgia R. Co., 8 I. C. C. 142.

(3e) The Central of Georgia Railway Company gives an undue preference to Eufaula over Dawson, in violation of the Interstate Commerce Act, § 3, by maintaining higher rates from New York and other eastern points to the latter than to the former point. Board of Trade of Dawson v. Central of Georgia R. Co., 8 I. C. C. 142.

(3f) Neither of two railroad companies whose lines touch the same two points, there being no other competitor at either of such points, can justify a higher rate of freight to one point than to the other, under substantially the same commercial conditions, upon the ground that the other makes a similar

discrimination. Board of Trade of Dawson v. Central of Georgia R. Co., 8 I. C. C. 142.

(3g) The Central of Georgia Railway Company and the Georgia & Alabama Railway Company are not entitled, so long as the present system of rate-making is adhered to, to maintain higher rates from New York and other eastern points, from Nashville, Cincinnati, Chattanooga, or New Orleans, to Dawson than are maintained to Americus. Board of Trade of Dawson v. Central of Georgia R. Co., 8 I. C. C. 142.

(3h) A higher rate from an intermediate locality to a common destination constitutes a prejudice to that locality and shippers and traffic therefrom, and a preference to the more distant locality and shippers and traffic therefrom, which, if found to be without sufficient excuse, must be held unreasonable and undue and therefore in contravention of the 3d section. Re Alleged Violations of Act to Regulate Commerce, 8 I. C. C. 290.

(3i) A railroad is not justified in discriminating against a community or an individual by the fact that the person or locality so discriminated against is not directly injured. The law declares that under like circumstances and conditions every individual, every commodity and every community shall be treated alike, and the fact that they are not is a violation of law. The denial of a legal right is itself an injury. Kindel et al v. Atchison, T. & S. F. R. Co., 8 I. C. C. 608.

(3j) Competition not sufficient to warrant discrimination in rates.—Competition in transportation does not prevent "substantially similar circumstances and conditions," within the meaning of the Kentucky Constitution and statutes, but those words relate to the actual cost of transportation. Louisville & Nashville R. R. Co. v. Commonwealth of Ky., 8. I. C. C., App. LXXIII.

(3k) An adjustment of freight rates from Chicago, St. Louis, and other related points, on shipments to Wilmington, N. C., is unreasonable, and subjects the latter city to undue disadvantages, where it operates largely to deprive Wilmington, in its competition for trade in common territory with Norfolk and Richmond and other Virginia cities, of the benefits of those primary markets, and limits Wilmington to such intermediate points of supply as Cincinnati and Louisville, from which points the rate relations appear to be fair and reasonable. Wilmington Tariff Asso. of North Carolina v. Cincinnati, Portsmouth & Va. R. Co., 9 I. C. C. 118.

(3l) Preferences existing under relative rates to competing localities must be shown to result from wrongful action of the carrier before it can be required under the Act to Regulate Commerce to readjust the rates in question. Wilmington Tariff Asso. v. C. P. & V. R. Co., et al., 9 I. C. C. 118.

(3la) No unjust discrimination against complainant shippers in favor of other shippers is shown by evidence that, during the anthracite coal strike, defendant railroad companies gave a preference to bituminous coal, and also to live stock and perishable freights, which caused delay in the transportation of complainant's hay, where only two cars "slipped through" to destination, after the receipt and before the delivery of complainant's car, showing that the embargo was practically maintained and enforced. S. S. Daish & Sons v. Cleveland, A. & C. R. Co. 9 I. C. C. 513.

(3m) A discrimination under the third section to be undue must ordinarily be such that the prejudice arising out of it against one party is a source of advantage to the other. Railroad Commission of Kentucky v. L. & N. R. Co., 10 I. C. C. 173, 190.

(3n) Every shipper is legally entitled to fair opportunity and treatment in the use of the carrier's utilities, and any discrimination which in a substantial degree deprives shippers of such use must be considered unjust, unless forced by justifying conditions. In such a case the burden of proof is upon the complainant for the purpose of showing discrimination, and then upon the carrier to show that the discrimination was justified. Richmond Elevator Co. v. Pere Marquette R. Co., 10 I. C. C. 629.

(3o) Carriers must conduct and manage their business under the requirements and prohibitions of the regulating statute, and undue discriminations can not be justified by the fact of long standing agreements with favored mine operators and other shippers, nor is it a defense to the charge of discrimination that the facilities provided the favored persons may be withdrawn at the will of the one who grants them. Red Rock

Fuel Company v. B. & O. R. R., 11 I. C. C. 438, 452.

(3p) In unjust discriminatoin cases the difference in cost of manufacture to the competing shippers offers no ground of itself to the carriers nor to the Commission for adjustment of rates. A. J. Phillips Co. v. G. T. W. Ry., 11 I. C. C. 659, 664.

(3q) Not all discriminations, but only those which are unreasonable, are unlawful. C. & I. Asso. of Union Springs v. L. & N. R. R. Co., 12 I. C. C. 372.

IMPORTANT CASES SINCE 1908

(3r) A carrier cannot lawfully so group its mines with respect of rates as to unduly discriminate against any locality. The duty imposed by law is to give equal treatment to all shippers who are in a position to demand it, and this includes the right to reach competitive markets on relatively equal terms. Where the same carrier serves two districts which by their location, the character of their output, and distance from markets, are in substantially similar circumstances and conditions, it cannot lawfully prefer one to the other in any manner whatsoever. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 292.

(3s) It is not for the Commission, in a search for justification of an award consented to by the carrier, to inquire in respect to every such transaction as to whether or not actual preference or prejudice has resulted in harm to any particular person. It would be a vain attempt in many cases to undertake to ascertain with reasonable certainty just what has resulted, and who has been injured by transactions of the kind. The lawmakers, assuming that such practice would naturally result in many instances in favoritism and irreparable wrong, have enacted the law which adjudges the practice itself to be wrong and forbids it. Armour Car Lines v. S. P. Co., 17 I. C. C. 461, 463.

(3t) Where one railroad is owned by another, although operated entirely separately, the Commission is supposed to regard the two railroads as one in determining whether the rates established by them unduly discriminate between different sections. Receivers' & Shippers' Ass'n of Cincinnati v. C. N. O. & T. P. Ry. Co., 18 I. C. C. 440, 457.

(3u) Carriers may not select certain points of production on their lines and give to them the benefit of rates that permit meeting competition of producers located upon other lines, and deny similar treatment to other producing points upon their lines that are similarly situated and as to which the same and long-established general basis of rates applies. Milburn Wagon Co. v. L. S. & M. S. Ry. Co., 22 I. C. C. 93, 100.

(3v) A railroad is justified, under the law, in discriminating in favor of one city as against another, if they are so differently circumstanced that at one point transportation forces are brought into play which are not or cannot be exercised at another point; but a carrier is not justified in deliberately adopting a policy of preference toward one city as against another. Only the preference or advantage that is due is justifiable, and that advantage which is bestowed upon a city by the mere policy of the carrier and not by reason of actual difference in conditions is undue. In Re Application of S. P. Co., 22 I. C. C. 366, 375.

(3w) All rules, regulations and charges affecting the ultimate cost of transportation must be made with reasonable regard for the nature of the commodity transported and without undue discrimination as between localities or shippers, though it has been held that the minimum cannot be fixed with regard to the needs and desires of purchasers of products. Sunderland Bros. Co. v. St. L. & S. F. R. R. Co., 23 I. C. C. 259, 262.

(3x) There may be a violation of section 3 for reasons other than those covered by section 4. Mayor & Council of Boston v. A. C. L. R. R. Co., 24 I. C. C. 50, 51.

(3y) The financial inabilty of carrier is no answer to a charge of undue prejudice. Mayor & Council of Boston v. A. C. L. R. R. Co., 24 I. C. C. 50, 52.

(3z) The acceptance by a railroad of a given division of a joint rate only on traffic transported via railroad-owned lake steamship lines does not constitute the discrimination against connecting carriers prohibited by section 3. Flour City S. S. Co. v. L. V. R. R. Co., 24 I. C. C. 179, 189.

(4a) There may be a violation of section 4 under a state of facts not constituting a violation of section 3. Kellogg Toasted Corn Flake Co. v. M. C. R. R. Co., 24 I. C. C. 604, 605.

(4b) Where dual rates: (1) An open

rate, and (2) a lower rate when the coke was for use in blast furnaces—were maintained to Chicago, Ill., only the open rate to Carondelet, Mo.; held not a violation of section 2. St. Louis Blast Furnace Co. v. V. Ry. Co., 25 I. C. C. 183.

(4c) While market competition should be considered in determining a question of undue prejudice under section 3, it is no defense to a charge of undue prejudice to urge that market competition compels the low rate at the favored point when similar conditions exist at the point discriminated against. North Fork Cannel Coal Co. v. A. A. R. R. Co., 25 I. C. C. 241, 246.

(de) Section 2 of the Act prohibits charging to one a greater or less compensation than is charged to another for a like and contemporaneous service under substantially similar circumstances and conditions. In re Advances in Demurrage Charges, 25 I. C. C. 314, 323.

(4f) While rates in distant sections of the country may be considered in passing upon the reasonableness of rates under section 1, especially if they are shown to be made under substantially similar condtiions of competition and transportation, they form no basis for a finding of discrimination under section 3, unless responsibility for such rates and the higher rates under attack is shown to rest with the same carrier or carriers. Hennepin Paper Co. v. N. P. Ry. Co., 27 I. C. C. 699.

(4g) Carriers cannot so adjust rates as to build up one port and close or prevent the opening of others. Aransas Pass Channel & Dock Co. v. G. H. & S. A. Ry. Co., 27 I. C. C. 403, 415.

(4h) Time has an undoubted weight in rate changing matters. It may often be controlling when a rate in daily use has been accepted by shippers for some years without criticism or complaint, especially in the case of a relation of rates under which different communities have competed with one another for some years. But time cannot be permitted to rob a group of communities of their right to relief from what, in view of changed conditions, would be a manifest rate discrimination if further continued. The Mississippi River Case, 28 I. C. C. 47, 55.

(4i) The third section of the Act forbids the giving of undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality; and while this section does not carry the phrase embodied in section 2, "under substantially similar circumstances and conditions," which is the same as that eliminated from section 4 by the amendment of June 18, 1910; nevertheless, it contains words of wider scope "in any respect whatsoever;" and as a matter of practical application the thought, if not the words, "under substantially similar circumstances and conditions," must be present to the mind in considering under section 3 what preferences or advantages are due or reasonable, or are undue or unreasonable. Board of Trade of Carrollton, Ga. v. C. of Ga. Ry. Co., 28 I. C. C. 154, 167.

(4j) Section 2 embodies the phrase, "under substantially similar circumstances and conditions," but this might be included in words "in any respect whatsoever," contained in section 3. Board of Trade of Carrollton v. C. of G. Ry. Co., 28 I. C. C. 154, 157, 168.

(4k) A fundamental maxim of rate-making is that the rate per ton-mile shall decrease as the distance increases. This is undoubtedly a rate-making maxim which ordinarily is and ought to be applied where conditions admit. It is not, however, a rule of such universal or imperative application that every shipper is as a matter of right entitled to the benefit of it, nor can it be said that to disregard this rule creates of necessity a discrimination. While the through rate should be less than the sum of the intermediates, nevertheless the mere existence of that rate adjustment does not of itself make out a case which calls for correction. It is necessary to go further and to show either that the rates are unreasonable or that some harmful discrimination results. Boston Chamber of Commerce v. A. T. & S. F. Ry. Co., 28 I. C. C. 230, 232.

(4l) When it is shown that industries have been established at favored points solely by reason of fares accorded them, the inference is inevitable that the denial of such rates to the other points has resulted in their being avoided by investors in the location of industrial enterprises, and a situation of discrimination is disclosed. Santa Rosa Traffic Assn. v. S. P. Co., 29 I. C. C. 65, 66.

(4m) A competitive relation must generally exist between commodities before there can be an undue prejudice between

them. Chicago Board of Trade v. A. T. & S. F. Ry. Co., 29 I. C. C. 438, 443.

(4n) Section 3 of the Act applies as well in a proceeding when one of the hauls is intrastate as when both are interstate. Pacific Coast Gypsum Co. v. O.-W. R. & Co., 30 I. C. C. 135, 139.

(4o) To refuse to eliminate a special privilege of many years' standing would be to perpetuate unjust discrimination. Merchants' & Mfrs. Asso. v. B. & O. R. R. Co., 30 I. C. C. 388, 394.

(4p) Though it be conceded that discrimination exists against a city in favor of another city or cities, it does not necessarily follow that the discrimination is due to unlawfulness in the rates to the first city. Chamber of Com., Washington- D. C., v. B. & O. R. R. Co., 30 I. C. C. 446, 452.

(4q) Where undue discrimination against one point or community and in favor of another is alleged, and it is shown that the carrier is not engaged in the transportation to or from the point or community said to be favored and has no voice in the making of the rates to or from such point, the charge of discrimination is not sustained. N. Y. Produce Exchange v. N. Y. C. & H. R. R. R. Co., 32 I. C. C. 212, 216.

(4r) Where a carrier establishes a certain rate for the transportation of coal and at the same time establishes and charges a higher rate for the transportation of the same commodity, because it is loaded and transported in a gondola car of the hopper bottom type the sides of which exceed 52 inches in height, it is held that this constitutes an unreasonable and unlawful regulation and restriction upon such traffic and the shippers thereof. C. G. Blake Co. v. M. St. P. & S. S. M. Ry., 32 I. C. C. 270, 271.

(4s) While carriers may determine and direct their respective business policies, even these are comprehended within the Act when they result in unjust discrimination. Anson, Gilkey & Hurd Co. v. S. P. Co., 33 I. C. C. 332, 340.

(4t) A carrier may unjustly discriminate against a point by participation in joint rates thereto or therefrom, although its line does not reach that point. By participating in joint rates each carrier in a measure becomes responsible for the actions of the other participating carriers, and the joint transportation via the different lines is an arrangement under which each of the carriers participating therein, is, in fact, serving any point to or from which the joint rate applies. If a carrier by participation in joint rates serves a point beyond its line, it certainly may compete with another carrier operating to that point. S. P. Co. Ownership of Oil Steamers, 34 I. C. C. 77, 80.

(4u) Uniform rates and practices may be discriminatory in absence of uniform circumstances and conditions. Lighterage and Storage Regulations at New York, 35 I. C. C. 47, 53.

(4v) Furnishing financial aid, to coal company constitutes unlawful discrimination against other shippers who are competitors. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 240.

(4w) A carrier which is also a dealer and is in possession of a public franchise has opportunity to use its great power as a common carrier to discriminate against certain shippers with whom it is a competitor. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 254.

(4x) The commission should not lightly, nor upon grounds which do not seem convincing, find that rate differences which may be capable of explanation or defense upon a complete record are tantamount to undue discrimination, especially where such finding would result in what may be an unnecessary disruption of a rate fabric established for intrastate traffic. Record held open to permit further hearing on issue of alleged unjust discrimination against LaCrosse, Wis. LaCrosse Shippers' Asso. v. C. & N. W. Ry. Co., 38 I. C. C. 453, 463.

(4y) It has often been held by the Commission and the courts that not every discrimination is forbidden by the statute, but only those that are unjust and therefore unreasonable. Meridian Grain & Elev. Co. v. A. & V. Ry., 38 I. C. C. 478, 480.

(4z) Carriers can not so adjust their relations with connections as to unduly prefer shippers via one connection over those shipping via another. Akron, Canton & Youngstown Ry. v. B. & O. R. R., 44 I. C. C. 305, 307.

(5a) Undue prejudice and disadvantage against a distributing point can not be predicated merely upon the fact that the combination of inbound and outbound rates exceeds the combination

available via a competitive distributing point. Wichita Wholesale Furniture Co. v. A. T. & S. F. Ry., 44 I. C. C. 339, 343, 344.

(5b) The fact that milk may cost more and in other ways may be more difficult for dealers to secure from comparatively near-by points, is no justification for the carriers to maintain unduly preferential rates from distant points. Rates on all traffic should be relatively reasonable from all points. While the service with respect to milk and cream traffic is special in the matter of equipment, speed, safe carriage, prompt delivery, and refrigeration, when necessary, the service is regular and specified equipment and crews can be constantly employed with all the economy resulting from such conditions. Milk and Cream Rates to New York City, 45 I. C. C. 412, 424.

(5c) Any adjustment of rates that results in the imposition of comparatively high rates for short distances, and comparatively low rates for long distances, takes from the producer within the short distance territory whatever advantage he is entitled to because of his proximity to the consuming market, and gives a producer who has no advantage of location access to the market on a basis of rates which unduly prefers him within the meaning of the Act. Milk and Cream Rates to New York City, 45 I. C. C. 412, 424, 425.

(5d) Under substantially similar transportation conditions the Commission has never held that a carrier has the right to discriminate against one point in favor of another because a shipper located at the former has a natural advantage over his competitor located at the latter. Cornell v. L. V. R. R. Co., 57 I. C. C. 157, 161.

(5e) Although the rate structure will undoubtedly become more logical and more stable as the rates approach more nearly in each instance to the cost of the service, the Commission can not condemn a rate solely because it is not constructed on that principle, unless it is clearly shown that the resulting discrimination is undue; and whether or not it is undue can best be determined by a careful consideration of the history of the rate, the reason for its establishment, the nature of the traffic, the competition between shippers and communities, and all other pertinent evidence. Inland Empire Shippers League v. Director General, 59 I. C. C. 321, 339.

(5f) Different rates for similar distances, the same rate blanketed over lines constituting substantial portions of entire hauls, lesser rates on higher grade commodities, higher rates over interstate than over intrastate routes, all are indicia of an unduly prejudicial rate adjustment. South Dakota R. R. Commrs. v. Director General, 73 I. C. C. 347, 356.

(5g) Unlawful discrimination against interstate commerce can not be found upon the mere assertion or admission of its existence by a carrier. Whether any undue, unreasonable, or unjust discrimination or other violation of the act exists is for the commission to decide upon the record. Klamath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 212.

(5h) Contention that in determining alleged prejudicial relationship between points there can not be considered rates on commodities of which there is no substantial movement. HELD: Whether or not there is an actual movement of each and every commodity considered from a point does not conclusively establish the existence or nonexistence of undue prejudice against that point, for the reason that the absence of actual movement may be attributable wholly to the prejudicial rate adjustment. Memphis-Southwestern Investigation, 77 I. C. C. 473, 483.

(5ha) Undue prejudice under section 3 of the act ordinarily requires prejudice suffered by one party to be the source of positive advantage to one alleged to be preferred and that a competitive relationship exists between the parties or commodities concerned. Boston Wool Trade Asso. v. B. & A. R. R. Co., 78 I. C. C. 178, 183.

(5i) A finding of unjust discrimination or undue prejudice must rest upon established facts and may not be predicated upon general representations. Kirbey Bonner Lumber Co. v. Director General, 78 I. C. C. 333, 336.

(5ia) Mere showing that rates from one point in a territory are higher than rates, blanketed or not, from other points in that territory, whether maintained by same or different carriers, does not establish undue prejudice or preference. State of Idaho ex rel. v. O. S. L. R. R. Co., 83 I. C. C. 4.

(5ib) Prejudice to be undue under section 3 must ordinarily be such that the

prejudice suffered by one person shall be a source of positive advantage to another and that a competitive relation shall exist between the persons or commodities affected. Garratt Callahan Co. v. A. C. L. R. R., 88 I. C. C. 103, 106.

(5ic) For undue prejudice to exist the parties alleged to be prejudiced and those alleged to be preferred generally must be upon a competitive basis. Barber Asphalt Co. v. L. & N. R. R., 88 I. C. C. 307, 309.

(5id) Ownership alone of capital stock in one corporation by another does not create an identity of corporate interest between the two companies, or render the stock holding company the owner of the property of the other, or create a relation of principal and agent or representative between the two; but held that a mere fiction of corporate entity could not justify what otherwise would be an unlawful discrimination. Barber Asphalt Co. v. L. & N. R. R., 88 I. C. C. 307, 310.

(5j) The determination whether in particular instances there has been an undue or unreasonable prejudice or preference is a question of fact. Interstate Commission v. Alabama Ry., 168, U. S. 144, 170, 18 Sup. Ct. 45, 42 L. Ed. 414. It necessarily follows that the court in determining whether the conclusions of the Commission as to the discriminatory and preferential practices is supported by the evidential facts set forth in the report, is to be governed by the same considerations as those hereinabove set forth in reference to its conclusion as to the reasonableness or unreasonableness of rates. And, as in the case of rates prescribed by the Commission, the court cannot interfere with practices established by it, "unless it is made plainly to appear that those ordered are void." L. & N. R. Co. v. United States, 216 Fed. 673, 682, 683.

(5k) It may be true, and there are decisions to the effect, that undue discrimination between two localities is not shown by difference of distance alone, or difference in rates alone, or by the mere fact that the difference in rates operates to the disadvantage of one locality as against another. St. Louis Southwestern Ry. Co. v. United States, 234 Fed. 688, 677.

(5l) If carriers find it necessary for competitive or other reasons to make comparatively low rates from certain points to certain destinations, they do so under the obligation imposed by law that the rates shall not be unduly preferential to one shipper, to the prejudice and disadvantage of another shipper who is entitled to equal rates. Gulf Lumber Co. v. M. L. & T. R. R. & S. S. Co., Unrep. Op. A-574.

(5m) Undue discrimination cannot be said to lie merely in the maintenance of different rates on articles of different grades or values, nor in withholding from a given point not similarly affected by transportation conditions rates which are acorded to other points. Scully Syrup Co. v. P. R. R. Co., Unrep. Op. A-360.

§3½. Previous Decision of Commission. See Previous Decision of Commission.

IMPORTANT CASES SINCE 1908

(a) Following Security Mills & Feed Co., 62 I. C. C., 657, rates applicable on velvet-bean meal from points on the Central of Georgia in Alabama and Georgia to Chattanooga, Tenn., found not unreasonable, but found unduly prejudicial to extent they exceed, on a distance basis, the rates to Nashville, Tenn., and to extent they are higher in relation to the rates on cottonseed meal to Nashville. Nonprejudicial basis of rates prescribed and reparation denied. Monarch Mills v. C. of G. Ry. Co., 73 I. C. C. 425.

§4. Similar Conditions.

See Equalization of Rates §3; Evidence §56; Through Routes and Joint Rates §8.

CASES 1887-1908

(a) There is no unjust discrimination in charging more to Boston than to New York in rates from Chicago. Boston Chamber of Commerce v. Lake Shore & Mich. Southern R. Co. 1 I. C. R. 754 Export Trade of Boston, Re, 1 I. C. R. 18, 23, 25; Fitchburg R. Co., 1 I. C. R. 26.

(b) A higher rate on coal from Providence than from East Providence is an unjust discrimination, and under the circumstances it is not permissible to make an additional charge because of inconvenience attending transaction of business at East Providence. Providence Coal Co. v. Providence & Worcester R. Co., 1 I. C. R. 316, 363.

(c) Where the rate from Opelika to Savannah via Columbus & Georgia Central is fifty-two cents per 100, while the rate to the same point by the same system from both Montgomery and Columbus is but forty-five cents, and Opelika can obtain no other rate to New Orleans at all on cotton, although it has good and ample facilities for the handling of cotton, and the rate on cotton from Montgomery to New Orleans is forty-five cents per 100, and the local rate charged Opelika, on cotton, to Montgomery is twenty-seven cents, making seventy-two cents to New Orleans, thus cuting off that market, leaving Savannah as the only outlet—an order was made requiring defendants to cease and desist from such denial, the Commission finding from the evidence that through rates and through bills of lading on cotton offered for shipment at Opelika for New Orleans are unjustly and unreasonably refused by the defendant, the Western Railway of Alabama, while given by said road on other commodities, and at other points similarly situated, and while said defendant's connecting lines making the route to New Orleans are ready and willing to unite therein, and finding also, that Opelika is by such action of the defendant subjected to undue and unreasonable prejudice and disadvantage in violation of the provisions of the third section of the Act to Regulate Commerce. It is no defense against the issuing of such an order that some undisclosed connection of the defendant once made an offer of rebates to the merchants of Opelika for the purpose of getting the business away from what the defendant considered, its "ordinary and proper channel to New Orleans," it not being averred that the lines to New Orleans will not now unite in making the usual through rates and no reason whatever being stated why through rates and through bills of lading on cotton are not given over the line which forms the aforessaid "ordinary and proper channel." Harwell v. Columbus & Western R. R. Co., 1 I. C. R. 631.

(d) The spirit and purpose of the Act requires that where the circumstances and conditions will fairly admit of it the charges to all points for a like service should be made relatively equal; further, that a carrier is not compellable by law to give to merchants of a town on its line the privilege of shipping their goods from the point of purchase to their own locality and again from thence to the place at which the goods may be sold by them at the same rate which would have been charged had there been but one shipment from the point of purchase to the point of ultimate delivery. Martin v. C. B. & Q. R. R., 2 I. C. C. 32, 37.

(e) One locality is by law entitled to rates which shall not give an undue preference to any other locality; but its right in that regard is not increased, nor is the equal right of a competing locality dismissed, by municipal subscriptions which were advanced for the building of the road. Lincoln Board of Trade v. Burlington & Mo. River R. Co., 2 I. C. R. 95.

(f) The practice of making a uniform

rate upon milk destined for the daily consumption of the New York City market, from all stations within a distance of about 200 miles upon railroads running through the southern counties in the State of New York, west of the Hudson River to Jersey City, is not under the circumstances and demands of the traffic, an unjust discrimination in favor of the more distant shipping points, as against those nearer the common terminus. Howell v. New York, Lake Erie & Western R. Co., 2 I. C. R. 162.

(g) A tariff naming a rate from one locality lower than that enjoyed by its neighbor, when the circumstances are the same, tenders a preference or advantage to the first; and when any shipper is damaged by the exaction of an additional burden the preference becomes undue and unreasonable, unless it can be justified upon some sound and substantial ground. Re Tariffs of the Trans-Continental Lines, 2 I. C. R. 203.

(gi) Discriminations are made and undue advantages are given by special tariffs giving commodity rates to the east from certain preferred points and on certain commodities, and to certain named shippers, and in applying class rates to others similarly situated. Re Tariffs of the Trans-Continental Lines, 2 I. C. R. 203.

(h) A rate of ninety cents a ton on coal shipped to Lake Erie, for a district covering a radius of forty miles around Pittsburgh, Pennsylvania, embracing a large number of mines of substantially like cost of production and like character of coal, has prevailed since the Act to Regulate Commerce took effect. The coal from the different mines is in competition at Lake Erie, and is transported over several different and competing lines of railroad, all carrying at the same rate. The coal from the district is also in competition with similar coal from the Hocking Valley district in Ohio, and from other districts. The complainants' mines are near the center of the district, and some mines in competition with them are at a greater distance from the lake, varying from twenty miles to forty-three miles. On all the facts of the case, HELD, that the rate in itself not being unreasonable it does not appear that it subjects the complainants to undue prejudice, or that it gives an unreasonable preference to the more distant mines. Imperial Coal Co. v. Pittsburgh & L. E. R. Co., 2 I. C. R. 436.

(i) Unreasonable preference or advantage, or undue or unreasonable prejudice or disadvantage, involves the question whether the service was rendered under substantially similar circumstances and conditions. More traffic furnished by one than by the other does not render them dissimilar; and it is for the jury to say whether a difference of 12 cents per 100 pounds between a local rate of a carrier and its proportion of a through rate including another road was unreasonable. United States v. Tozer, 2 I. C. R. 540.

(j) Unlawful discrimination is not established by proof that a rate of freight on cotton from Vicksburg, Mississippi, to eastern points, given to one, is different from that given to another, when it also appears that such rate is only a part of a uniform through rate from a point beyond. Cowan v. Bond (C. C. S. D. Miss.), 2 I. C. R. 542.

(k) Equality in charges is required under circumstances and conditions substantially similar, and relative equality is necessary in the degree of similarity. Manufacturers & J. Union v. Minneapolis & St. L. R. Co. (Com.), 3 I. C. R. 115.

(l) The law in plainest terms forbids carriers to make or give undue preferences or advantages. This is a fundamental principle of transportation, and the equality of treatment intended by it is the underlying and paramount feature of the act. Shamberg v. D. L. & W. R. R. Co., 3 I. C. C. 502, 512.

(m) The proposition of the law seems to be that, where the circumstances and conditions of two localities are substantially similar there shall be no advantage or preference given to one which is not also freely offered to the other. To give an advantage or preference, under such circumstances, to one place would be undue, or in other words, would be giving to the favored locality an advantage, which did not of right belong to it, and producing an undue prejudice against the other locality. Anthony Salt Co. v. M. P. R. Co., 4 I. C. C. 33, 37.

(n) Complainant attacked as relatively unreasonable rates on lumber from Eau Claire, Wis., to various points on the Missouri River as compared with rates to the same points from LaCrosse, Wis., Winona, Minn., and various other lumber producing points. HELD, that the case must mainly be determined by comparing

the rate in question with the rates from neighboring towns, similar in size, situation and volume of competing traffic, and at approximately the same distance from common markets; that the rate complained of subjects Eau Claire to undue prejudice and disadvantage, and is unlawful; and that such rate should not exceed the rate from LaCrosse and Winona by more than 2 cents per 100 pounds, when, the rate from those points is not over 11 cents, nor by more than 2½ cents above the present rate of 16 cents from LaCrosse and Winona. Eau Claire Board of Trade v. C. M. & St. P. R. Co., 4 I. C. C. 65.

(o) Rates on wheat from points in North and South Dakota to Minneapolis as compared with the rate charged over considerably greater distances from the same points to Duluth and adjacent Lake Superior ports subject Minneapolis millers to undue and unreasonable prejudice and disadvantage. Defendants ordered to adjust their rates on wheat from said ports to Minneapolis and Duluth upon the basis of distance over nearest practicable routes. Chamber of Commerce of Minneapolis v. Great Northern R. Co., 4 I. C. R. 230.

(p) Complainant attacked rates on wheat from points in North and South Dakota to Minneapolis, Minn., as compared with the rates charged over considerably greater distances from the same ports to Duluth and adjacent Lake Superior ports as unreasonable and discriminatory. HELD, rates attacked subjected Minneapolis to undue prejudice and defendants ordered to adjust their rates to Minneapolis and Duluth on the basis of distance over nearest practicable routes. Chamber of Commerce of Minneapolis v. G. N. R. Co., 4 I. C. C. 230.

(q) No dissimilarity in circumstances or conditions justifying a discrimination in rates exists between a shipment of cotton from Mobile to New Orleans by a person who receives it by vessel from Demopolis, Alabama, and a person who receives it from any other part of Alabama or by rail, where there is no question of a proportion of rates under a joint traffic arrangement. Bigbee & W. Rivers Packet Co. v. Mobile & O. R. Co., (C. C. S. D. Ala.), 4 I. C. R. 829.

(r) Rates in force from Pueblo to San Francisco prohibit the movement of iron and steel articles from the former place to the latter, while greatly lower rates from other and far more distant points prevail on such traffic to San Francisco, and the carrier's cost of transportation is much less from Pueblo than from such more distant points of shipment: HELD, upon all the facts and circumstances in the case, that such rates from Pueblo are unreasonable and unjust, and subject complainant, the localities in the state of Colorado where its industry is carried on, and its traffic in iron and steel articles to San Francisco, to undue and unreasonable prejudice and disadvantage, and result in giving undue preference and unreasonable advantage to other shippers in the United States of iron and steel over the defendant roads to San Francisco. Colorado Fuel & Iron Co. v. Southern Pacific Co., 6 I. C. C. 488.

(s) A party to an interstate shipment cannot be excluded by the carrier from privileges afforded to other patrons in the same locality because of this refusal to pay excessive freight charges, even though an agreement to subsequently refund the excess should accompany the demand. Phelps v. Texas & P. R. Co., 6 I. C. C. 36.

(t) The relative equality enjoined by the statute requires substantial modification of the present disparity in rates from Chicago to Sioux City and Sioux Falls, and under present conditions such disparity in rates from Duluth to Sioux City and Sioux Falls should be discontinued. Daniels v. Chicago, R. I. & P. R. et al., 6 I. C. C. 458.

(ta) Rates for the transportation of cotton piece goods, molasses, sugar, rice, or coffee from Galveston, Houston, or other shipping points in Texas to Wichita Kansas, which are higher via defendants lines than rates on said commodities, respectively, from the same point of shipment to Kansas City and other "Missouri river points,"—HELD, to be in violation of the provisions of the Act to Regulate Commerce requiring reasonable and just transportation charges, and forbidding undue or unreasonable prejudice or disadvantage to any person, firm, corporation, or locality, or particular description of traffic, in any respect whatever. HELD, further, That such higher rates to Wichita than to Kansas City or other "Missouri river points" via the lines of the Atchison, Topeka & Santa Fe Railroad Company, and the Chicago Rock Island & Pacific Railway Company,

are in contravention of the fourth section of the Act to Regulate Commerce. Johnston-Larimer Dry Goods Co. v. A., T. & S. F. R. Co., 6 I. C. C. 568.

(u) The granting to one locality and denying to another, under substantially similar circumstances, of the privilege of stoppage in transit at an intermediate point in cases of shipment under a through bill of lading for a through rate to try the market, and of reshipping to the original destination at the balance of the through rate if the market is unsatisfactory, is an unjust discrimination against the second place. Commercial Club v. Chicago, R. I. & P. R. Co., 6 I. C. C. 647.

(v) It is a violation of the Interstate Commerce Act, §§1, 2, 3, for the Louisville & N. R. Co. to charge higher rates from New Orleans to LaGrange than for longer distances to Hogansville, Newman, Palmetto, or Fairburn on like traffic carried under similar conditions and circumstances, as such rates subject dealers at LaGrange and the city itself to undue and unreasonable prejudice and disadvantage, and give undue preference and advantage to the other localities and the dealers and merchants doing business therein. Calloway v. Louisville & N. R. Co., 7 I. C. C. 431.

(w) Where the merchants of two localities compete for business in the same territory, discrimination in rates in favor of the one and against the other locality necessarily gives the former an advantage and works a prejudice to the latter in that competition. Phillips, Bailley & Co. v. Louisville & Nashville R. Co. 8 I. C. C. 93.

(x) Upon complaint that defendants violate the Act to Regulate Commerce by charging higher freight rates to Dawson, Ga., than to Eufaula, Ala., and Americus and Albany, Ga., towns in the section of country surrounding Dawson, and after giving full and due consideration to the conditions and circumstances, including situation of the localities, possible transportation via the Chattahoochee River, railway competition and the competition of markets, and the basing-point system of rate making as practiced in the South,—HELD: (1) That it is undue preference for the Central of Georgia Railway Company to charge any higher rates on freight from New York or other eastern cities to Dawson than those which are maintained from the same points of shipment to Eufaula. (2) That it is undue preference for the Central of Georgia Railway Company or the Georgia & Alabama Railway Company to charge any higher rates on freight from Nashville, Cincinnati and Chattanooga to Dawson than those in effect from the same points to Albany. (3) That it is undue preferenc for the Central of Georgia or Georgia & Alabama to charge any higher rates on freight from New Orleans to Dawson than those which are in force from New Orleans to Americus or Albany. (4) That so long as the southern basing-point system of rate making is adhered to, it is undue preference for the Central of Georgia or the Georgia & Alabama to charge any higher freight rates to Dawson than those which may be in effect to Americus from any of the points of shipment above mentioned. Board of Trade of Dawson v. Central of Ga. Ry., 8 I. C. C. 142.

(y) The maintenance of higher rates from New Orleans to Dawson than to Americus or Albany, by the Central of Georgia Railway Company and Georgia & Alabama Railway Company, gives an undue preference to the latter points over the former point. Board of Trade of Dawson v. Central of Georgia R. Co., 8 I. C. C. 142.

(z) Common carriers are bound by every principle of justice and of law to accord equal rights to all shippers who are entitled to like treatment, both in the receiving of supplies and the shipment of their products, and a carrier who under any pretext whatsoever grants to one shipper an advantage which it denies another violates the spirit and thwarts the purpose of the law. Castle v. Baltimore & O. R. Co., 8 I. C. C. 333.

(aa) Inequality of charge is justified by dissimilarity of conditions.—Railway companies are only bound to give the same terms to all persons alike, under the same conditions and circumstances; and any fact which produces an inequality of condition and a change of circumstances justifies an inequality of charge. Citing: Interstate Commerce Commission v. Baltimore & O. R. Co., 145 U. S. 283, 36 L. ed. 706, 4 Inters. Com. Rep. 92. Interstate Commerce Commission v. Western & Atlantic R. R. Co., 8 I. C. C. App. XIII.

(bb) Freight rates on sugar from New Orleans to Tifton, Ga., are unjust and unduly prejudicial to Tifton, where they exceed the same rates on the same

commodity from New Orleans to Valdosta, Ga., the longer distance point, via Tifton, where the circumstances and conditions at Tifton are substantially similar to those at Valdosta. Mayor and Council of Tifton, Ga. v. Louisville & Nashville R. Co., 9 I. C. C. 160.

(cc) The rates from Chicago to Norfolk, Neb., are unjust and unreasonable, and should not exceed those in force from Chicago to Columbus, Neb., and the rates from Duluth to Norfolk should not exceed the rates in force from Duluth to Emerson, Neb., added to the present local rate in effect from Emerson to Norfolk. Johnson v. Chicago, St. Paul, Minneapolis & Omaha R. Co., 9 I. C. C. 221.

(dd) Defendant's lumber rates to Wichita are not unreasonable and unjust as compared with those in effect to Kansas City, Omaha, and Lincoln, where competitive conditions exist at such places which produce low rates to those points from the lumber territory in question, and which competitive conditions do not exist at Wichita. Mayor and City Council of Wichita, Kansas, v. Chicago, Rock Island & Pacific R. Co., 9 I. C. C. 569.

(ee) A charge of a higher rate on lumber from western points to Wichita Kansas, than for the longer distance through Wichita to Topeka, Kan., violates the Interstate Commerce Act, where the circumstances and conditions at Topeka do not differ from those at Wichita. Mayor and City Council of Wichita, Kansas v. Chicago, Rock Island and Pacific R. Co., 9 I. C. C. 569.

(ff) As a general rule, subject to certain exceptions, Denver must receive the same treatment that is accorded to cities of the Middle West and Missouri River territory in making trans-continental rates. Kindel v. Atchison, T. & S. F. R. Co., 9 I .C. C. 606.

(gg) Defendants are not justified in maintaining rates from the Pacific Coast which are lower to Missouri River points than to Denver, upon seashells, vanilla beans, whalebone, whale oil foots, hair, copper, cement, glue, honey, mohair, hides, wool, sealskins, goatskins, sheepskins, and skins of various fur-bearing animals. Kindel v. Atchison T. & S. F. R. Co., 9 I. C. C. 606.

(hh) Under present rate conditions the Cannon Falls shipper is subjected to disadvantage as follows: First: The combination of rates on rye and other coarse grain from Cannon Falls to Minneapolis and Minneapolis to Chicago is ½ cent less than the straight rate from Cannon Falls to Chicago, and this is without justification. Second: The favorable location of Cannon Falls with reference to Minneapolis and Duluth and the competitive advantage to which the Cannon Falls dealer is entitled by reason of the route via Duluth, are neutralized to an extent by manipulation of billing at Minneapolis whereby Cannon Falls grain sold in Minneapolis can be reconsigned to Duluth under a substituted billing and the balance of a through rate, relating in a less total charge from Cannon Falls to Duluth than the charge on a through shipment from Cannon Falls to Duluth. Third: The rate on rye, barley and other coarse grain from Cannon Falls to Louisville or East St. Louis is wrongfully higher than the rate on wheat between the same points. Cannon Falls Farmers' Elev. Co. v. C. G. W. R. Co., et al., 10 I. C. C. 650.

(ii) Defendant carries coal to Baltimore destined finally to "points outside the Capes" (largely to New England seaboard points) and shipments of the same coal may also be made to Norfolk, an Atlantic seaport. The rate to Baltimore on coal reshipped to "outside the Capes" points is forced by the competition of lines from other mines, and under such rate defendant secures a large annual tonnage via its line to the port of Baltimore. The rate to Baltimore on coal for Norfolk is the local rate to Baltimore. If the shipments to Norfolk and points outside the Capes be regarded as through shipments, on what are in essence through rates, the competition stated might justify a higher rate to Baltimore when the final destination is Norfolk than when it is a point outside the capes; but if this coal is all purely local to Baltimore, there is much doubt whether, as a matter of law, defendant can charge for the haul to Baltimore more in one case than in the other. Similar question involved in another pending proceeding and decision reserved upon that branch of this case. HELD: That this constitutes wrongful prejudice and unjust discrimination, and that while defendant continues to give a rate less than its local to Baltimore on coal destined to "outside the Capes points," it cannot lawfully deny the same rate on coal forwarded by water from Baltimore to Norfolk. Complainant granted rep-

aration. City Gas Co. v. Baltimore & O. R. Co., 11 I. C. C. 371.

(jj) Upon complaint that defendants violate the Act to Regulate Commerce by charging higher rates on canned goods, grain, flour, hay, and packing house products from Cincinnati, Ohio, and Memphis, Tenn., to Helena and McRae, Ga., than to Cordele and Fitzgerald, Ga., towns in the section of country surrounding Helena and McRae, after giving due consideration to the circumstances and conditions, including situation of localities, railway competition, competition of markets, and the basing-point system of rate making as practiced in the South, HELD: That, upon the record made in this case, the situation of Helena and McRae is not so similar to that of Cordele as to require the application of Cordele rates to the first-named places, but that the rates in question from Cincinnati and Memphis to Helena and McRae are unreasonable and unjust and should not exceed those now in effect to Fitzgerald from such points of origin. Davenport v. Southern R. Co., et al, 1 I. C. C. 650.

IMPORTANT CASES SINCE 1908

(kk) A water port is entitled to whatever advantage it can obtain through transportation by water, but its location does not entitle it to lower rates by rail, and although such preference may be lawfully accorded by a carrier in the protection of its own interests, it should not be required, except in cases where manifest wrong would otherwise result. Darling & Co. v. B. & O. R. R. Co., 15 I. C. C. 79. 87.

(ll) Every locality competing in a common market is entitled to rates which are relatively reasonable and just in comparison with rates from other localities served by the same carrier. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 294.

(mm) When unjust discrimination against one point and undue preference in favor of another are alleged, because of lower rates to the latter, and equality of rates is demanded as a cure for such unjust discrimination against the former, it must be shown that the circumstances and conditions at each of the points are substantially similar, and that the lower rates at the one point were the result of the voluntary action of the carriers at that point. Bainbridge Board of Trade v. L. H. & St. L. Ry. Co., 15 I. C. C. 586, 593.

(nn) Because of additional expense, a higher rate for delivery in one part of town than in another may not be unlawful. Pierce v. P. & L. E. R. R. Co., 23 I. C. C. 89, 90.

(oo) Where a railroad company participates in the carrying trade of a certain city and controls the rates applied to that trade, it is no defense to a charge of undue prejudice in rates to that city to say that its rails do not extend to such city. Chamber of Commerce of Newport News v. S. Ry. Co., 23 I. C. C. 345, 353.

(pp) It is no defence to a charge of undue preference against one point in favor of others, to urge that competition exists at the favored points, when similar conditions obtain at the point discriminated against. Mfrs. & Mchts.' Assn. v. A. & A. R. R. Co., 24 I. C. C. 331, 336; in re Advances on Barley, 24 I. C. C. 664, 670; Board of Trade of Morristown v. A. C. L. R. R. Co., 24 I. C. C. 372, 377; Mayor and Council of Boston v. A. C. L. R. R. Co., 24 I. C. C. 50.

(qq) Two manufacturers located at the same point, and both dependent upon the same mines and the same carriers for their coal supply, are ordinarily entitled to equal rates, irrespective of the character, use or disposition of their products. A lower rate to one than to the other cannot be justified merely upon the absence of competition in the sale of their products. Union Tanning Co. v. S. Ry. Co., 25 I. C. C. 112, 114.

(rr) To permit one shipper to grind ore and ship it from the grinding point at the balance of the import rate while denying this privilege to other shippers constitutes undue prejudices. In re Advances on Manganese Ore, 25 I. C. C. 663, 669.

(ss) Where the short-line carrier makes a rate other carriers must meet it if they are to participate in the traffic. The sway of such competition is none the less because the rate made by the short line is lower than the rate permitted by a state commission for the same haul. But it is also true that where the carriers themselves have established that rate to points which, in relation to other points, are similarly situated and competitive, such rate can hardly be deemed unreasonably low, and should be considered in determining

whether the rates to such other points are unreasonably high. Coffeyville Merc. Co. v. M. K. & T. Ry., 33 I. C. C. 122, 124.

(tt) When it appears that the favored point secures an advantage through the granting to it of a privilege not compelled by competition and that there is no substantial dissimilarity of conditions, transportation or otherwise, surrounding the transportation to the favored and to the complaining cities, a showing of the rate situation, from which it is evident that the prejudice and disadvantage are real and substantial, is as convincing a showing of a violation of section 3 as it is generally practicable to make. Duncan & Co. v. N. C. & St. L. Ry., 35 I. C. C. 477, 483.

(uu) The mere maintenance of higher rates to one point than to another is not an unjust discrimination; it is only when general conditions of transportation and the general circumstances surrounding traffic are substantially similar and such a rate relationship adversely affects the commerce of one point and thereby materially benefits the commerce of the other point that it may be said to involve the preferences and discriminations prohibited by law as between different communities served by the same carriers. City of Astoria v. S. P. & S. Ry. Co., 38 I. C. C. 16, 24.

(vv) Where the complainant shows that the rates from competing points of origin are lower than those under attack, and makes out a prima facie showing of substantial similarity in operating conditions, it becomes the duty of the carrier to explain the discrimination. Oklahoma Cottonseed Crushers' Assn. v. M. K. & T. Ry. Co., 39 I. C. C. 497, 501.

(ww) Where the same carrier or carriers serve two shippers, who, by their location, the character of their output, and distance from markets are in substantially similar circumstances and conditions, the serving carrier or carriers cannot lawfully prefer one to the other in any manner whatsoever. In re Private Cars, 50 I. C. C. 652, 692.

(xx) Nothing that has resulted from the control of the defendant carriers by the federal government is warrant for a continuance of an unlawful adjustment of rates and charges, but on the contrary the operation of all railroads under federal control as a unified and coordinated national system serves only to emphasize the impropriety of according to some shippers advantages that are denied to others under substantially similar conditions. Southern Rice Growers Asso. v. T. & N. O., 53 I. C. C. 197, 206.

(yy) Where transportation conditions are substantially similar, the Commission has never held that a carrier has the right to discriminate against one point in favor of another because a shipper located at the former has a natural advantage over its competitor located at the latter. Cornell v. L. V. R. R. Co., 57 I. C. C. 157, 161.

(zz) Where rates are higher, distance considered, than those generally prevailing from near-by points to the same destinations or to points in that vicinity, over the same or other routes, whether they are unreasonable or unduly prejudicial can not be determined from that standpoint alone, but consideration must be given to all the circumstances and conditions surrounding the traffic. National Fireproofing Co. v. Director General, as Agent, 62 I. C. C. 49, 55.

(3a) Discrimination occurs when a difference is made between connecting lines similarly situated. A difference founded on actual dissimilarities in the service or in the convenience of interchange, and adapted to the difference in circumstances, is not discrimination. York Mfrs. Assn. v. P. R. R. Co., 73 I. C. C. 40, 46.

(3b) Rates may not be made solely with regard to the resultant ability of shippers to meet commercial competition. If carriers elect to reduce rates in order to enable shippers to find a market for their products in a particular field, they must, under the law, accord equal opportunity to competing shippers at other points who are dependent upon them for transportation. Pig Iron from Southern Producing Points, 74 I. C. C. 330, 334.

(3c) Under section 2 of the Act forbidding a discrimination in rates between shippers for a haul under "like circumstances and conditions," the circumstances and conditions meant are those which arise within the field of haulage, and not those which exist outside. Penn. R. R. Co. v. International Coal Mining Co., 173 Fed. 1, 5.

(3d) Undue prejudice may result from the relationship of two rates each of which lies within the zone of reasonable-

ness. Lackawanna Steel Co. v. Pennsylvania R. R., 88 I. C. C. 759, 762.

C. 523; Interstate Sugar Co. v. D. & R. G. R. R., 81 I. C. C. 432.

§4½. Special Rates.

See Classification §17, §18; Evidence §12.

CASES 1887-1908

(a) Unlawfulness under the second section of the act is the doing of a service by a carrier in the manner forbidden by the statute, and if no such service has been done a contravention of the act has not occurred. Griffee v. B. & M. R. R. R. 2 I. C. C. 194, 195.

(aa) Special tariffs giving different rates to places named and those not named, to manufactured articles named and those not named, to jobbers at places named and those not named, and to manufacturers and jobbers and other dealers, discriminate and give undue advantages. Re Tariffs of Transcontinental Lines (Com.), 2 I. C. R. 203.

(b) The carriers are the common servants of all shippers, and are bound to serve them all reasonable and without unjust discrimination but it is not the duty of carriers to disregard distance or natural advantages of location, and equalize access to markets for all engaged in a common business though differently situated. No producer or shipper has an exclusive right to supply a market, and the interests of consumers and of the general public may justi-

fy carriers in enlarging the field from which the demand for a commodity may be supplied on terms of equality for transportation. That is only a recognition of the principle that the general interests are paramount to individual or local interests. Imperial Coal Co. v. P. & L. E. R. Co., 2 I. C. C. 436, 441.

(c) The difference in the quantity of shipments is an insufficient and unwarrantable reason for discrimination in rates. United States v. Tozer (D. C. E. D. Mo.), 2 I. C. R. 540.

(d) Where a carrier by its published general tariff charges the general public from and to all points upon a large portion of its lines certain rates upon a class of freight, and at the same time publishes and puts into force a special tariff by which it charges a class of persons named, from and to the same points on its lines, less than one half in amount of the rates on the same class of freight that it charges the general public in its general tariffs, such a discrimination is v. I. C. R. R., 2 I. C. C. 804, 805.
unjust and is violative of the act. Elvey

(e) Discrimination in freight rates from Chicago to New York cannot be accomplished by a railroad company either (a) by applying a twenty-two-cent through rate to freight originating west of Chicago on roads not in the arrangement and to which is paid more than its pro rata share of such rate to New York, or (b) by applying such rate to grain in store, by paying a "draw back" or "expense bill" based upon the fiction that the grain was still in transit on the twenty-two-cent rate, thus bringing the shippers' rate from Chicago to New York down to eighteen and two-tenths cents instead of the regular twenty-two cent rate. U. S. v. Mich. Central R. Co., 3 I. C. R. 287.

(f) It is unjust discrimination to base the rate of freight charges to several shippers upon the quantity shipped. Kinsley v. Buffalo, N. Y. & P. R. Co. (C. C. W. D. Pa.), 3 I. C. R. 318.

(fa) The term "a like kind of traffic," as it occurs in section 2 of the Act to Regulate Commerce, and as used in this report and opinion, does not mean traffic that is identical, but it means traffic that is of "a like kind," with other freight in the element of a fair and just classification for the purpose of arriving at a just and reasonable rate and a rate that will avoid unjust discrimination and unlawful preference. N. Y. Board of Trade & Transportation v. Pa. R. Co., 3 I. C. R. 417.

(g) An allegation of unjust discrimination resulting from shipments of oil in tank cars owned by the shipper and low return rates on cotton-seed oil and turpentine in the same tanks, in connection with mileage paid for use of tank cars, cannot be sustained without evidence showing mutuality of interest between the two classes of shippers or the payment of excessive car mileage. Rice v. Cinn., W. & B. R. Co., 3 I. C. R. 841.

(h) Unless within the authorized exceptions to the general rule of the statute, discriminations in charges upon like shipments of the same commodities, based solely upon the purpose or "business motive" of the shipper, are unlawful, whether affected directly or indirectly by methods of classification. Duncan v. Atchison, T. & S. F. R. Co., 6 I. C. C. 85.

(i) Whether an agreement entered into by a carrier mainly for the purpose of developing its milk traffic, and under which compensation is afforded to the other contracting party equal to a considerable share of the gross receipts from such traffic, involves extravagant expenditure of revenue and is disadvantageous to the carrier, is matter for it to determine; but extraordinary or unnecessary cost of operation or management cannot be permitted to excuse unreasonable or unjust rates, discriminations, preferences, or prejudices. Milk Producers' Proctective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

(j) Notice by a carrier of special rates to other shippers entitled thereto by difference of conditions need not be given to regular shippers in order to protect the carrier from the charge of unreasonable discrimination. The court says that differences in freight rates on coal to manufacturers and to mere dealers are and have been for many years in universal practice and not a single case other than this has as yet reached the courts of last resort in England or in the United States questioning the entire legality and propriety of such differences, and that circumstance is ample proof that both the professional and the lay mind have assented to the practice. A. M. Hoover et al. v. Penn. Ry. Co., 7 I. C. C. App. II.

(k) Preferential rates on coal to manufacturer lawful.—Giving lower rates for

transportation of coal to a manufacturing company than to a coal dealer is not undue or unreasonable discrimination in violation of the Pennsylvania Constitution, where the manufacturing company consumes the coal in creating products which furnish a large amont of additional transportation to the carrier, and especially where the coal carrier was bound to give such company the lower rate by a contract made years before the coal dealer began business. A. M. Hoover et al. v. Penn. Ry. Co., 7 I. C. C. App. II.

(l) A manufacturing company violates its right to accept lower rates for the transportation of coal than are given to a coal dealer if it sells coal even to its own employees; and the carrier on notice of such sales must charge such company the same rates that are charged to coal dealers. A. M. Hoover et al v. Penn. Ry. Co., 7 I. C. C. App. II.

(m) Defendants make two rates on grain and sixth class merchandise from Chicago to Boston. If the commodity is for local consumption the rate is 2 cents above the rate to New York; but if the commodity is to be exported the Boston rate is the same as the New York rate. The export traffic is delivered to the ocean carrier at East Boston, which is a few miles more distant than Boston from Chicago, and the export rate, which is essentially the inland carrier's division of a through export rate, applies in fact only to East Boston. The domestic rate to Boston is substantially as fixed by the Commission in Kemble v. Lake Shore & Michigan Southern R. Co. 3 Inters. Com. Rep. 830 I. C. C. Rep. 166. Whether, as a matter of fact, the domestic rate to Boston is unreasonably high, or whether the export rate through Boston unduly discriminates against Boston, are questions which were involved in cases heretofore decided by the Commission; and their reconsideration in this case is not warranted by any facts developed at the hearing. HELD, That the fourth section is not violated by the lower export rate to East Boston than the domestic rate for the shorter distance to Boston, and that the petition should be dismissed. Kemble, v. Boston & Albany R. R. Co., 8 I. C. C. 110.

(n) An undue discrimination is made by the defendants in fixing their rates for transporting lumber to points on the New York & Long Branch Railroad by adding to the rate to New York city an arbitrary charge of 5 cents per 100 lbs. when the shipping point is Saginaw, Mich., but only 2 cents per 100 lbs. when the shipping point is Buffalo, N. Y. Water competition between Buffalo and New York affects the rates to New York, but it justifies no wider difference in the rates from Saginaw and Buffalo to these interior destinations than exists in the rates from these shipping points to New York. Mershon S. P. & Co. v. Central R. Co., 10 I. C. C. 456.

(o) Defendants' joint rate of 90 cents per ton on bituminous coal from Norwood, N. Y., to Montpelier, Vt., when intended for "railroad supply," and their combination rate of $1.85 per ton, applied on such coal carried between the same points and used for manufacturing or any other industrial or domestic use, constitute unlawful discrimination. Capital City Gas Co. v. Central Vermont R. Co., 11 I. C. C. 104.

(p) If a special rate be granted to a commodity or locality reasonable in itself and profitable to the carrier, it may become a discrimination as against other points or other commodities not so favored. Kindel v. B. & A. R. Co., 11 I. C. C. 495, 507.

(q) The rate per 100 pounds on cement plaster, in carloads, from Quanah, Tex., to St. Louis, Mo., 728 miles, is 18 cents, and to Kansas City, Mo., 571 miles it is 13 cents, while on cement plaster, in carloads, from Cement, Okla., to St. Louis, 602 miles, a rate of 10 cents, and to Kansas City, 445 miles, a rate of 8 cents are maintained. On complaint that these rates unlawfully discriminate against complainant's plaster shipped from Quanah, it appeared that the St. Louis & San Francisco Railroad Company made the rates from Cement to enable plaster from that point to compete with other plasters in the St. Louis and Kansas City markets, that the cost of transportation is not greater over the line from Quanah to Cement than from Cement to St. Louis, and that defendants would make the same profit if they hauled Quanah plaster at the same rate per ton per mile that is applied from Cement. The rate from Quanah is over the connected lines of defendants, but the St. Louis, San Francisco & Texas Railway Company is controlled by the St. Louis & San Francisco Railroad Company, and both are operated as one system. HELD: (1) That a railroad company cannot arbitrarily determine that a particular mill shall compete in a certain market with other localities and that other mills

on its lines shall not so compete, particularly where the discrimination is not justified by operating conditions. (2) That the rates from Quanah to St. Louis and Kansas City are unlawful, that a rate per 100 pounds not exceeding 10¼ cents from Quanah to Kansas City and not exceeding 12 cents from Quanah to St. Louis should be maintained by defendants so long as the rates per 100 pounds to Kansas City and St. Louis from Cement are 8 and 12 cents, respectively, and that in case of change in said rates from Cement the rate from Quanah to Kansas City shall not be more than 128 per cent of the rate from Cement to Kansas City, and the rate from Quanah to St. Louis shall not be more than 120 per cent of the rate from Cement to St. Louis. (3) That complainant is entitled to recover from defendants the sum of $121.55, with interest from August 28, 1906, as reparation for unjust and unreasonable charges on specified shipments made under the rates complained of in this case. Texas Cement Plaster Co. v. St. Louis & S. F. R. Co., 12 I. C. C. 68.

(r) Defendants' rates on cotton-piece goods from New England mills through Pacific coast points to the Orient is $11.25 for 40 cubic feet of measured space, equivalent to about 85 cents per 100 pounds; their rates on the same article from southern mills over the same route is $1.25 per hundred pounds. HELD, upon complaint that this adjustment is unreasonable in itself and also discriminates against southern mills in favor of New England mills, that the complaint is not sustained. Enterprise Manufacturing Company v. Georgia R. R. Co. et al., 12 I. C. C. Rep. 130, cited and approved. China & Japan Trading Co. v. Ga. R. R. Co. et al., 12 I. C. C. 236.

IMPORTANT CASES SINCE 1908

(s) Policy of state commission in removing undue prejudice against interstate commerce to select lowest interstate rate that can be readily found and which may move some traffic and measure it with the entire body of intrastate rates, if carried to its logical conclusion, would be so destructive of existing rate structures and of sound and well-established principles and methods of ratemaking that to state it is to condemn it. Kansas Rates, Fares, and Charges, 64 I. C. C. 679, 681.

(t) Allegation relating to section 2 of the Act not considered, there being no showing of discrimination between shippers in same community. Dean Mill Co. v. M. P. R. R. Co., 80 I. C. C. 174.

(u) A competitive relationship among shippers is not essential to a finding of unjust discrimination and competition between carriers does not justify an otherwise unlawful discrimination under section 2 of the Act. Barber Asphalt Co. v. L. & N. R. R., 88 I. C. C. 307, 309.

(v) Preferential treatment of a class of traffic, ordinarily harmless may become undue, because, under the special circumstances, it results in prejudice, or disadvantage to some other person, commodity, or locality, or to interstate commerce. Nashville, C. & St. L. Ry. v. State of Tenn., 43 Sup. Ct. 583.

§4¾. State Rates.

See Supra §2½; State Rates and Regulation

IMPORTANT CASES SINCE 1908

(a) The language used in section 3 is broad enough to cover every discrimination growing out of the relation between intrastate and interstate commerce which injuriously affects the latter. Intrastate Rates within Illinois, 59 I. C. C. 350, 362.

(b) The Transportation Act of 1920 is not unconstitutional when construed to authorize the Interstate Commerce Commission to prescribe intrastate rates to bring them up to the general level of interstate rates necessary to give the carriers the return specified by that act, since Congress in the exercise of its affirmative power in developing interstate commerce can impose any reasonable condition on any use in intrastate

commerce it deems necessary and advisable. Railroad Commission of Wisconsin v. Chicago, B. & Q. R. Co., 42 Sup. Ct. 232.

Co., 83 I. C. C. 145; Sioux City Live Stock Exchange v. C., St. P. M. & O. Ry. Co., 83 I. C. C. 243, 246.

§5. Test of Discrimination.

CASES 1887-1908

(a) The duties of a common carrier are bounded by its rights and powers. Where there is no right or power to render a particular service there can be no duty in that respect. And there can not be unjust discrimination, nor undue preference or prejudice, in refusing a service that it has no right by statute or contract to perform. Alford v. C. R. I. & P. R. Co., 2 I. C. C. 771, 775.

(b) Exact mathematical equality between all localities is not attainable. Some slight differences in the immense complication of localities and of roads are inevitable, and if these differences are substantially reasonable there is no unjust discrimination. Lehmann Higginson & Co. v. S. P. Co., 3 I. C. C. 80, 92.

(ba) It is unjust discrimination to base the rate of freight charges to several shippers upon the quantity shipped. Kinsley v. Buffalo, N. Y. & Pa. R. Co., 3 I. C. R. 318.

(c) The welfare of the communities occupying the localities where goods are delivered is to be considered, as well as that of the communities which are in the locality of the place of shipment, in considering the question of undue preference or advantage between localities. Texas & P. R. Co. v. Interstate Commerce Commission, 5 I. C. R. 405.

(d) The question whether a preference by railroad companies in freight rates charged in favor of certain localities as opposed to others is undue or unreasonable within the Act to Regulate Commerce, § 3, is one of fact in each individual case. New York Produce Exch. v. Baltimore & O. R. Co., 7 I. C. C. 612.

(e) Defendants exact higher rates for transporting cattle and hogs than for transporting live-stock products to Chicago from points west, northwest and southwest thereof, including Missouri River points and South St. Paul, Minn. Upon all the facts and circumstances. HELD: (1) That such discrimination is not justified by difference in cost of transportation or otherwise, and subjects the traffic in cattle and hogs at Chicago and other points, and those interested therein, to undue and unreasonable prejudice and disadvantage, and gives to the traffic in the products of hogs and cattle, and to shippers and localities interested in such traffic, undue and unreasonable preference and advantage, in violation of the Act to Regulate Commerce. Chicago Board of Trade v. C. & A. R. Co., (4 I. C. C. Rep. 158) reaffirmed and the principle therein announced extended to the transportation of cattle and their products. (2) That the desire of a carrier to secure additional business for its line of road does not justify a change in the relation of rates resulting in a higher rate upon cattle and hogs, the raw material, than upon live-stock product, the manufactured article, where, as in this case, the articles are in sharp competition with each other in markets of purchase and sale, where it appears that upon other lines and in other sections rates are generally no higher, and in many instances much lower, on the traffic prejudiced than on that favored by the change, and where numerous and important industries, which have been built up and maintained under the former adjustment, and those interested in such industries, will be injuriously affected by the action taken. Chicago Live Stock Exchange v. C. G. W. R. Co., et al., 10 I. C. C. 428.

(f) Not all discriminations, but only those which are unreasonable, are unlawful. Commercial and Industrial Asso. of Union Springs, A. A. v. L. & N. R. R., 12 I. C. C. 372.

IMPORTANT CASES SINCE 1908

(g) Not all discriminations are unlawful, but only such as are undue or unreasonable; if based on reason and good cause, discriminations cannot be condemned as unreasonable. The evidence and effectiveness of competition between carriers, whether by rail or water, whether subject to the Act or not, and competitions of markets, or the absence of such competition, are, among other things, pertinent to the question of similarity of circumstances and conditions involved in the ultimate question of fact under sections 3 and 4, and as to whether the discrimination complained of is or is not undue or unreasonable. Discriminations in sections 3 and 4 of the Act, in so far as they result from the bona fide action of a carrier in meeting circumstances and conditions not of its own creation, and which are reasonably necessary, do not of necessity fall under the condemnation of the law. Pittsburgh Plate Glass Co. v. P. C. C. & St. L. Ry. Co., 13 I. C. C. 87, 99.

(h) The carrier may not determine by rate adjustments the markets to which grain will move. Under reasonable and non-discriminatory rates, the producers dealers in, and consumers of the grain have the right to select the markets to which they will ship it, at which they will handle it, and the routes via which it shall move. Commercial Club of Superior, Wis., v. G. N. Ry. Co., 24 I. C. C. 96, 109.

(i) It would be unjust discrimination against a junction-point mine not to give recognition to its natural advantages. In re Mine Ratings, 25 I. C. C. 286, 298.

(j) The test of discrimination is the ability of one of the carriers participating in two through routes to put an end to the discrimination by its own act. Elevation Allowances at St. Louis and E. St. Louis, 30 I. C. C. 696, 699.

(k) Not all discriminations are unlawful, but only such as are undue or unreasonable; if based on reason and good cause, discriminations cannot be condemned as unreasonable. Louisiana Sugar Planters' Asso. v. I. C. R. R. Co., 31 I. C. C. 311, 318.

(l) A carrier is not guilty of unjust discrimination because its rates for particular kinds of traffic to a common point of delivery are not as low as the rates of other carriers from other territories of origin. Consumers Co. v. C. & N. W. Ry., 36 I. C. C. 259, 261.

(m) It has long been a settled doctrine that the mere maintenance of higher rates to one point than to another is not an unjust discrimination within the meaning of the Act; it is only when the general conditions of transportation and the general circumstances surrounding the traffic are substantially similar and such a rate relationship adversely affects the commerce of one point and thereby materially benefits the commerce of the other point that it may be said to involve the preferences and discriminations prohibited by law as between different communities served by the same carriers. City of Astoria v. S. P. & S. Ry., 38 I. C. C. 16, 24.

(n) In the last analysis the test of unjust discrimination as between rates from two competing points is to be found in an examination of the rates applicable from those points rather than in the differing principles by which those rates may be made. Where, however, it is apparent that to withhold arbitrarily from one or two points similarly situated the principle of rate making which is accorded to the other results in a less favorable adjustment than would otherwise be accorded, the failure to apply the same principle to both is unjustly discriminatory. The Missouri River-Nebraska Cases, 40 I. C. C. 201, 259.

(o) Differences between rates on wheat and flour from points in Utah and Idaho to points in Nevada and California challenged as a "protective tariff" framed for benefit of California millers as an "iron wall" so constructed as to exclude Utah and Idaho millers from the California markets. Allegation of prejudice sustained. Utah-Idaho Millers and Grain Dealers Asso. v. D. & R. G. R. R. 44 I. C. C. 714, 720, 721.

(p) The Commission must, to make a finding of discrimination, be shown the fact of discrimination, not merely the difference in ratings without the cause and reason for the difference. Uniformity is desirable and in some instances it is necessarily required; but its absence does not prima facie connote illegality, as differences in transportation conditions may, and frequently do, require a deviation from uniformity in particular instances to accomplish the legality and reasonableness of rates which the law exacts. Natl. Confectioners' Asso. v. A. & R. R. R., 49 I. C. C. 566, 576.

(q) Ordinarily discrimination under section 3 to be undue must be such that it is a source of disadvantage to one party and of benefit to another and generally there must be a competitive relation between the persons, localities or

commodities concerned. Omaha Livestock Exchange v. C. M. & St. P. Ry., 69 I. C. C. 690, 694.

(r) The parallel between preferences and prejudices in respect of rates is manifestly close with preferences and prejudices in respect of service; indeed, with a low-grade commodity such as coal, it often happens that an inequality with respect to car distribution, controlling, as it does, quantity of production possible, is much more important to shipper than amount of transportation charge he pays. Assigned Cars for Bituminous Coal Mines, 80 I. C. C. 520, 556.

C. 420; Cincinnati Grain & Hay Exchange Co. v. A. & R. Ry. Co., 80 I. C. C. 114; Wood Iron and Steel Co. v. P. R. R. Co., 83 I. C. C. 503, 507.

III. JUSTIFICATION.

§5½. In General.

CASES 1887-1908

(a) In determining the question of undue prejudice from a rate, distance is only one of the factors, and other material facts, such as character and quality of the commodity, cost of production, extent and nature of the competition in the business itself and by other transportation lines, and the interests of the public in the use of the commodity and its market cost, are to be considered. Imperial Coal Co. v. Pittsburgh & L. E. R. Co., 2 I. C. R. 436.

(b) The other issue upon which this case was tried, namely, that an unlawful preference was shown to the Standard Oil Trust and the companies, firms and associations affiliated to the said Standard Oil Trust by the all-rail carriers in making low rates for them and for their benefit to certain California points where there were receiving tank stations erected by the said Standard Oil Trust and its affiliated companies, firms and associations, and then by shipment afterwards from said receiving tank stations to adjacent localities on low rates made for short local hauls in California, whereby an unlawful preference was shown to said Trust and its affiliated firms, companies and associations, is not sustained by the evidence in this proceeding. Rice v. Atchison, Topeka & Santa Fe Ry. Co., 3 I. C. R. 263.

(c) Common carriers may, within the limits of fairness and impartiality, consult their own interests in making contracts for the carriage of goods. Cleveland, C. C. & I. R. Co. v. Closser, 3 I. C. R. 387.

(d) An agreement by a common carrier to give one shipper a favor and advantage over others by a rebate is illegal at common law. Fitzgerald v. Grand Trunk Co., 3 I. C. C. 633.

(da) LaCrosse is on a direct route from points on defendant's Southern Minnesota division to Milwaukee or Chicago, and Minneapolis is not, but the short line distances from points on that division are considerably less to Minneapolis than to LaCrosse. Defendant's charges on wheat from Southern Minnesota division points to LaCrosse and Minneapolis are the same, and its rates on flour from those cities to Milwaukee or Chicago are also the same; but LaCrosse has milling or transit rates which are less than the sum of such locals, while at Minneapolis shipments to and from the mills are made under established in and out charges. Transit rates at LaCrosse on wheat from points on said division to Milwaukee or Chicago bear the same relation to wheat rates from such points that the rates on wheat in and on flour out of Minneapolis bear to grain rates from points on defendant's more northerly Hastings & Dakota division. Alterations in any of defendant's flour rates from Minneapolis are followed by corresponding changes in transit rates at LaCrosse. The legality of milling in transit rates is not involved, and what, if any, prejudice results to complainant under transit milling at LaCrosse and regular in and out rates at Minneapolis, is not shown. HELD, That no undue prejudice results at LaCrosse or the complaining miller in that city from milling rates enforced by defendant at LaCrosse or the relations of such rates to those established by defendant from Minneapolis. Listman Mill Co. v. Chicago, M. & St. P. R. Co., 8 I. C. C. 47.

(db) The present adjustment of rates

on freight traffic from Chicago, St. Louis and other related points of shipment to Wilmington, N. C., operates largely to deprive that city in its competition for trade in common territory with Norfolk and Richmond and other Virginia cities of the benefits of those primary markets and to limit Wilmington to such intermediate points of supply as Cincinnati and Louisville, from which points the rate relations appear to be fair and reasonable, and this subjects Wilmington to disadvantages which are in substantial degree undue and unreasonable and for which the defendant carriers are to that extent responsible. Wilmington Tariff Asso. v. C. P. & V. R. Co., et. al. 9 I. C. C. 118.

(e) Defendant's rates from Memphis to points in Arkansas as compared with the Arkansas Commission mileage rates, including those applying from Little Rock and Pine Bluff, Arkansas, constitute a discrimination for which it is doubtful whether defendant can be held responsible. Re Freight Rates between Memphis and Points in Arkansas, 11 I. C. C. 180.

(f) The uncompressed cotton rates from points north of Fair Oaks favor Memphis by 5 cents per hundred pounds, as against Cairo or St. Louis. The rates on compressed cotton to Boston from Cairo and St. Louis place Memphis at a disadvantage of 3 cents in the Boston market as compared with St. Louis, and 1 cent as compared with Cairo. HELD, that, considering the relative distances from most points north of Fair Oaks to Cairo especially, if not to St. Louis, the difference of 5 cents in favor of Memphis from the originating stations in Arkansas is perhaps not unjust. Re Freight Rates between Memphis and Points in Arkansas, 11 I. C. C. 180.

(g) Defendant transports coal from Pennsylvania mines to Baltimore, which may be carried from Baltimore by water to Norfolk and to various other points on Chesapeake Bay, termed in its tariffs "points inside the Capes." The rate to Baltimore on coal reshipped by water to "inside the Capes points" is materially less than its rate to Baltimore on coal reshipped by water to Norfolk. HELD, that this constitutes wrongful prejudice and unjust discrimination, and that while defendant continues to give a rate less than its local to Baltimore on coal destined to "inside the Capes points," it cannot lawfully deny the same rate on coal forwarded by water from Baltimore to Norfolk. City Gas Co. v. Baltimore & O. R. Co., 11 I. C. C. 371.

(h) A difference in charge by defendant on coal carried from Pennsylvania mines to Baltimore for local consumption, and on coal carried on its Curtis Bay or Locust Point docks in Baltimore is based upon dissimilar circumstances and conditions, and is not unlawful. City Gas Co. v. Baltimore & O. R. Co., 11 I. C. C. 371.

(i) Carriers must conduct and manage their business under the requirements and prohibitions of the regulating statute, and undue discriminations cannot be justified by the fact of long-standing agreements with favored mine operators and other shippers; nor is it a defense to the charge of discrimination that the facilities provided the favored persons may be withdrawn at the will of the one who grants them. Red Rock Fuel Co. v. Baltimore & O. R. Co., 11 I. C. C. 438.

(j) The circumstances and conditions governing hay traffic from Columbus and Pataskala, O., appear to have been substantially dissimilar at a time when a lower rate from Columbus than from Pataskala to Greenville and Wilmington was in force; and complainant's demand for reparation based upon the rate then in force from Columbus is not sustained. Dewey Bros. Co. v. Baltimore & O. R. Co., 11 I. C. C. 475.

(k) Cleveland and Charleston, Tenn., take the Chattanooga rate on lumber to Cincinnati, but the conditions at these points are not the same as at Dalton, and no wrongful discrimination results from the existing adjustment of rates. Farrar v. Southern R. Co., 11 I. C. C. 632.

(l) In unjust discrimination cases, the difference in cost of manufacture to the competing shippers offers no ground, of itself, to the carriers or to the Commission for adjustment of rates. A. J. Phillips Co. v. Grand Trunk Western R. Co., 11 I. C. C. 659.

(m) It appears that defendant's rates on woodenware are higher from Menasha, Wis., to North Pacific coast terminal points than from such pacific coast terminals to Missouri River and Mississippi River points and to Chicago common points, including Menasha. Upon complaint that such rate adjustment results

in unreasonable rates from Menasha and undue preference to Pacific coast woodenware shipments, HELD: (1) That there is no sufficient basis in the record for a conclusion that the rates involved are unreasonably excessive; (2) that existing disparities in the rates eastbound and westbound on the traffic in question constitute undue discrimination against complainant, but this record furnishes no sufficient basis for such specific order respecting the exact adjustment of the rates on the different articles involved as would fulfill the requirements of the law as to justice and equality; and (3) that no order will be made at this time, but it is expected that defendants will so readjust the rates as to remove the undue discrimination. Menasha Wooden Ware Co. v. Atchison, T. & S. F. R. Co., 11 I. C. C. 666.

IMPORTANT CASES SINCE 1908

(n) Where there is no competition between an intermediate and a farther-distance point, and the rate to the intermediate point is not shown to be unreasonable, there is no violation of section 3, though the farther-distant point enjoys a lower rate. Kellogg Toasted Corn Flake Co. v. M. C. R. R. Co., 24 I. C. C. 604, 605.

(o) A carrier cannot serve one community at the expense of another or build a rate wall around one point to advance the interests of a competing point. Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 26 I. C. C. 53, 58.

(p) Discrimination cannot be justified merely on ground of difference in amount of traffic to different points. Beach v. A. A. R. R. Co., 26 I. C. C. 410, 412.

(q) That certain cities happen to be assembling points cannot give to those points a better freight rate than is enjoyed by towns beyond. Iowa State Board of R. R. Comm'rs. v. A. E. R. R. Co., 28 I. C. C. 193, 200.

(r) If undue prejudice exists it must be found primarily in the case of the shipper, community or description of traffic which is thus affected; but when different shippers are charged the same rates for services the value of which to them is the same, it is difficult to say how any such prejudice can exist. Transportation and traffic conditions may well be considered after the existence of prejudice is found. They may then properly bear on the question whether that prejudice is undue. American Round Bale Press Co. v. A. T. & S. F. Ry. Co., 32 I. C. C. 458, 463.

(s) Mutually beneficial reciprocal arrangements are not a justification for discrimination. C. M. & St. P. Ry. v. G. N. Ry., 49 I. C. C. 302, 307.

(t) Rules governing the relations between common carriers can not be pleaded as justification for unreasonable or prejudicial rates or practices. Merchants Exchange of St. Louis v. T. R. R. Asso. of St. Louis, 50 I. C. C. 474, 476.

(u) No possible justification can be found under a unified and coordinated national control for a different treatment when shipments are destined to points on lines other than the Santa Fe. Kaw River Sand & Material Co. v. A. T. & S. F. Ry., 51 I. C. C. 350, 354.

(v) Undue prejudice and disadvantage against a distributing point cannot be predicated merely upon the fact that the combination of inbound and outbound rates through that point exceeds the combination available through a competitive distributing point. Advantages of location, competitive conditions, the volume and flow of traffic, and numerous other considerations must be given due weight in determining the adjustment of rates in and out of different jobbing points. What was said with respect to distributing points applies equally to assembling points. Johnson v. A. T. & S. F. Ry., 51 I. C. C. 356.

(w) Fact that a city is a thriving jobbing center, and in spite of rate differences does business in a territory in competition with other cities, does not deprive it of the right to have rates that are not unduly prejudicial in favor of those competing cities. Meridian Traffic Bureau v. S. Ry. Co., 60 I. C. C. 5, 11.

(x) And the fear of the carrier that a large part of the tonnage would be lost to it and routed via another line if it were to comply with the Commission's order for removal of undue prejudice, affords no justification for the maintenance of the unreasonable or unduly prejudicial rates found to exist. Empire Steel & Iron Co. v. Director General, 62 I. C. C. 157, 160.

(y) So trackage agreements can not be used as a cloak to cover unjust discrimination, and where such arrangements do not result in unjust discrimination they are not to be condemned. Benton Coal Mining Co. v. C., B. & Q. R. R. Co., 63 I. C. C. 396, 399.

(z) Carriers seek to justify a proposed rate structure on the ground that otherwise manufacturing will tend to be further concentrated on the congested Atlantic seaboard. They represent that their proposed rate structure will beneficially distribute manufacturing throughout the Middle and Central West. But this they may not do, unless it can be done without creating undue rate preferences. Transcontinental Cases of 1922, 74 I. C. C. 48, 82.

(aa) Condition of contract by which railroad sold mill property to lumber company, requiring lumber company to deliver to the railroad all freight tonnage originating on or tributary to the logging road of the lumber company, did not constitute an assent to a discriminatory rate, though then being charged. United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

§6. Carrier as Shipper or Consignee.

See Evidence §46; Forwarders II; Reasonableness of Rates §23; Restricted Rates.

IMPORTANT CASES SINCE 1908

(a) A carrier as shipper over lines of another carrier may not lawfully be given any preference in application of tariff rates on interstate shipments. Hitchman Coal & Coke Co. v. B. & O. R. R. Co., 16 I. C. C. 512, 517.

(b) A carrier as a shipper over the lines of another carrier may not have any preference in the application of transportation rates and charges. Conversely, it may have the same privileges under the tariffs as any other shipper. In Re Transportation of Company Material, 22 I. C. C. 439, 440.

(c) The fact that a railroad in fuel coal does not come into competition with commercial coal and is in competition with coals coming upon the line of the

consuming railroad, at other points, does not constitute such a difference in circumstances as to warrant the carriers under section 2 and 3 of the Act in according a different rate to fuel coal than to commercial coal, and the practice of extending such a difference in rates amounts to unjust discrimination under said sections of the Act. I. C. C. v. B. & O. R. R. Co., 225 U. S. 326, 32 Sup. Ct. 742, 747; 56 L. ed. 1107.

ALL OTHER CITATIONS

Cedar Hill Coal & Coke Co. v. A. T. & S. F. Ry. Co., 15 I. C. C. 73, 78; Board of Mayor and Alderman v. V. & S. W. Ry. Co., 15 I. C. C. 453, 456; Hitchman Coal & Coke Co. v. B. & O. R. R. Co., 16 I. C. C. 512, 518; In Re Restricted Rates, 20 I. C. C. 426, 435; Beekman Lumber Co. v. St. L. & S. F. R. R. Co., 21 I. C. C. 270, 272, 273, 275; Doran & Co. v. N. C. & St. L. R. R., 33 I. C. C. 523, 531; Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 254; Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 11.

§7. Carriers Not Serving Prejudiced Point.

See Evidence §23.

CASES 1887-1908

(a) A carrier is not made responsible for rates made by a connecting road because merely of its giving them in connection with its own rates to parties desiring through shipments. Crew v. R. & D. R. R. Co., 1 I. C. R. 703.

(b) A railroad cannot be said to discriminate against a town which it does not reach and in whose carrying trade it does not participate; therefore, no case is made out against the carriers which were made parties at the request of the original defendant, because none of them have lines extending to Eau Claire. Preference, prejudice and other like terms imply comparison, and the basis of comparison is wanting unless the rates compared are made by the same carrier. But these parties having defended and endeavored to justify the differential found excessive, while not technically subject to an order for its correction, have no more right to render it ineffectual than to openly disregard a direction clearly within the scope of the Commission's authority. The intervening defendant, the Omaha road, though serving the complaining town, need not, for reasons stated, be included in the order directing the reduced rate, but the case will be held open as against that company for such direction as may hereafter be required. Eau Claire of Trade v. Chicago, M. & St. P. R. Co., 4 I. C. R. 65.

(c) Preferences existing under relative rates to competing localities must be shown to result from wrongful action of the carrier before it can be required under the Act to readjust the rates in question. Wilmington Tariff Asso. v. P. C. & V. R. R., 9 I. C. C. 118, 157.

(d) Dismissal as to defendant carrier where it appears that such defendant does not participate in the rates in question. Chicago Live Stock Exchange v. Chicago G. W. R. Co., 10 I. C. C. 428.

IMPORTANT CASES SINCE 1908

(e) A carrier cannot discriminate within the meaning of the statute except as between those whom it serves or whom it may lawfully be required to serve. It is not guilty of discrimination merely because it does not afford as favorable rates as others served in different territory, though the products carried by each are brought to the same market. The law does not deal in these matters with all carriers collectively as a single unit or system, but its commands are directed to each with respect to the service which it is required to perform. Chicago Lumber & Coal Co. v. T. S. Ry. Co., 16 I. C. C. 323, 332.

(f) Where two carriers serve same destination from two different points of origin, neither can be held to discriminate against mills at that destination because it sees fit to make or refuse a rate lower than is inherently reasonable. Saginaw & Manistee Lumber Co. v. A. T. & S. F. Ry. Co., 19 I. C. C. 119, 125.

(g) It is no violation of the Act to maintain joint rail-lake-and-rail rates higher than rail-and-lake rates to farther distant points, where lake boats did not stop at the complaining point. City of Ashland v. N. Y. C. & H. R. R. R. Co., 20 I. C. C. 3.

(h) If a particular line alone delivers at a point, participating in through routes and joint rates thereto from two points of production not directly served by its own lines, it may not be a party to a preferential joint or proportional rate from either point of production. The test of the discrimination is the ability of one of the carriers participating in the two through routes from the

two points of origin to the same point of destination to put an end to the discrimination by its own act. Ashland Fire Brick Co. v. S. Ry. Co., 22 I. C. C. 115, 120.

(i) The fact that carriers serving a certain milling center but not serving a competitive center establish transit privileges at the former and thus compel a carrier serving both milling centers to similarly establish such privilege at the one, but not at the other, where no competition between carriers exist, does not in law render the carriers not serving the competitive milling center guilty of subjecting it to undue prejudice or disadvantage. Blodgett Milling Co. v. C. M. & St. P. Ry. Co., 23 I. C. C. 448, 449.

(j) Where two roads are under a substantially common ownership and control, they are considered as one system, notwithstanding the fact that they may be operated separately, and each is considered as having its rails extended to points directly served by the other. Commercial Club of Superior v. G. N. Ry. Co., 24 I. C. C. 96, 111, 117.

(k) For an interstate carrier to apply to state traffic lower rates than are contemporaneously applied by it under like conditions to interstate traffic is a violation of the law forbidding undue discrimination even though the lower rates were used by a state in the exercise of its lawful powers, and for that reason made effective by the interstate carrier. Keogh v. M. St. P. & S. Ste. M. Ry. Co., 26 I. C. C. 73, 76.

(l) Rates in distant sections of country form no basis for finding of discrimination under section 3 unless responsibility for both rates with same carrier or carriers. Hennepin Paper Co. v. N. P. Ry. Co., 27 I. C. C. 699, 701.

(m) There can be no undue prejudice within section 3, unless it is within the power of the carrier charged with the discrimination to do away with it by its own act. Richmond Cham. of Com. v. S. A. L. Ry., 44 I. C. C. 455, 463.

(n) Where a rate adjustment is found to result in undue prejudice by reason of separately established factors, the carriers parties to the components of the through rates which are not attacked, and which do not in any way contribute to the undue prejudice found to exist, are proper but not necessary parties. Indianapolis Chamber of Commerce v. C. C. C. & St. L. Ry., 46 I. C. C. 547, 556.

(o) No carrier has the right to so adjust rates on its own lines as unduly to prejudice shippers on other lines or to deprive such shippers of reasonable and just rates, merely through a desire to serve shippers on its own lines. Willamette Valley Lumbermen's Asso. v. S. P. Co., 51 I. C. C. 250, 261.

(p) One of the tests of the presence of undue prejudice is: Can one of the carriers participating in two through routes from two points of origin to the same destination put an end to the prejudice by its own act? Peters Cartridge Co. v. Director General, as Agent, 73 I. C. C. 311, 313, 314.

(q) It is not within the province of defendants to remove any discrimination that may exist by reason of a different rate adjustment over the lines of other carriers. Ohio-Michigan Coal Cases, 80 I. C. C. 663, 677.

(r) It is a well established principle that undue prejudice or preference may not be said to exist as between shippers or communities unless the same carrier serves them or participates in their traffic and the transportation conditions are shown to be substantially similar. Kokomo Opalescent Glass Co. v. P. C. C. & St. L. R. Co., 81 I. C. C. 352, 354.

(s) There can be no undue prejudice under section 3 of the Act, unless it be within power of carrier charged with the discrimination to remove it by its own act. Wood Iron & Steel Co. v. P. R. R. Co., 83 I. C. C. 503, 507.

(t) It is well established principle that undue prejudice or preference may not be said to exist between shippers and communities unless the same carrier serves them or participates in their traffic. Wichita Motors Co. v. A. & V. Ry., 88 I. C. C. 152, 156.

(u) The Commission has frequently found and ordered the removal of undue prejudice and preference where the originating carriers were different but the delivering carriers were the same. Lake Dock Coal Cases, 89 I. C. C. 170, 185.

C. 136, 139; Hooker Electro Chemical Co. v. A. C. R. Co., 83 I. C. C. 196.

§7½. Use of Commodity.

See Classification §10.

IMPORTANT CASES SINCE 1908

(a) Tariffs which contain rates applicable only to the shipments of certain consignees or when a commodity is put to a particular use and the rates which are so restricted to the use of certain shippers and not open to all shippers alike are in violation of section 2 of the act, and unjustly discrimina-

tory in violation of section 3 of the act, and therefore unlawful. Rates on bunker Coal, 73 I. C. C. 62, 71.

ALL OTHER CITATIONS

Anthony v. Director General, as Agent, 61 I. C. C. 366, 368; I. C. C. v. B. & O. R. R. Co., 225, U. S. 326, 32 Sup. Ct. 472, 56 L. Ed. 1107, Ann. Cas. 1914A, 504.

§8. Competition.

(1) In General.

See Competition.

CASES 1887-1908

(ab) Dissimilar circumstances and conditions may be made out by the existence of actual competition which is of controlling force in respect to traffic important in amount; and the limitations suggested by this rule are applicable, when the controlling force of water competition is invoked in respect to the second and third sections of the Act, as well as in respect to the fourth. The exceptional circumstances to be proved is "actual competition"—not possible competition likely to arise if rates are raised—"of controlling force"—not when the rail line is the controlling force, but when the competing water line is able to dictate rates which will control the traffic, unless met by the railroad—"in respect to traffic important in amount"—not when competition in a single direction or for the transportation of a single article or class of articles exists, but general competition of the character stated, controlling the carriage of the traffic on which the discrimination is made. That "railroads have water competition and are compelled to meet it," without more, is not sufficient to justify the lesser charge for the greater distance, much less to justify the making of such tariffs as the petitioners seek relief from. Harwell v. Columbus & Western R. R. Co., 1 I. C. R. 631.

(c) On a question of unjust discrimination the fact of competition may be properly considered, for all the circumstances of situation ought to be known to enable the proper judgement to be formed; but it may happen that as between a large town and a small the reason why there is no competition is because the more favorable rates to the former have built it up and kept the latter in a condition of subordination and dependence. It would be difficult to conceive of discrimination more unjust than that which has such a blighting effect; and the wrong would be emphasized and aggravated if the very helplessness which the injustice has begotten could in law be an answer to any complaint for redress. Stone & Marten v. D. G. H. & M. R. Co., 3 I. C. C. 60, 63.

(d) Upon complaint by dealers at Humboldt, Kan., against the respondent lines for unjust discrimination in charging a rate of 65 cents per hundred pounds on sugar transported from San Francisco to Kansas City, and 85 cents per hundred pounds upon the same commodity from San Francisco to Humboldt, more than a hundred miles shorter distance but not on a through line, HELD, That the reduced rate to Kansas City being forced upon the carriers by competitive conditions beyond their control, and the rate to Humbolt not being unreasonable in itself but lower than it would be except for the influence of the competitive conditions at Kansas City, and it not appearing that substantial injustice results from the higher rate at Humboldt, the lower rate to Kansas City and the higher rate to Humboldt are not deemed to be in contravention of the Statute. Lehman, Higginson & Co. v. Southern Pacific Co., 3 I. C. C. 80.

(e) Charges of the Louisville & Nashville Railroad for the transportation of petroleum to several points on its lines are not only apparently unreasonable in themselves, but the existing disparity in rates to neighboring localities creates presumption of extortion in exacting the higher charges; moreover, as between tank and barrel shipments of petroleum this adjustment of rates operates to the general advantage of the former mode of conveyance. Water competition to various points on its lines may furnish justfication for rates to intermediate inland points somewhat higher than the railroad must accept to participate in business to the more remote locality favored with water carriage, but when charges for the shorter distance on these lines are three times those for the longer, the disparity is absurd and inexcusable. The lower figure must be unremunerative or the higher must be extortionate. This defendant ordered to revise and correct its charges on petroleum to

many interior and local points on its lines, and make such reductions and modifications therein as will remove the gross disproportions and inequalities now found to exist. Rice v. Cinn., W. & B. R. Co., 3 I. C. C. 841.

(f) The circumstance of competition at one of two places, the rates to which from a third place, made by a carrier, are claimed to be discriminative, must be taken into consideration in determining as to such discrimination and the reasonableness of the rates. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.), 5 I. C. R. 656.

(g) Among the circumstances and conditions to be considered, as well in the case of traffic originating in foreign ports, as in the case of traffic originating within the limits of the United States, competition that affects rates should be considered and in deciding whether rates and charges made at a low rate to secure foreign freights which would otherwise go by other competitive routes are or are not undue and unjust, the fair interests of the carrier companies and the welfare of the community which is to receive and consume the commodities are to be considered. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(h) The competition of carriers by water from San Francisco to Gulf of Mexico and Atlantic seaports, and by the competition of refineries on the eastern seaboard with refineries on the Pacific coast, operate, in conection with transportation rates in effect from the east and south to Omaha, to render the circumstances and conditions governing carriage of sugar by defendants from San Francisco to Omaha, Nebr., substantially dissimilar in comparison with those applying on the transportation for the shorter distance over the same line from San Francisco to Kearney, Nebr., and to justify a rate of 65 cents per 100 pounds to Kearney, while a rate of 50 cents per 100 pounds is in force to Omaha; but a rate of 77 cents per 100 pounds as compared with the rate of 50 cents in force to Omaha, is not justified. Gustin v. Burlington & M. R. R. in Nebraska, 8 I. C. C. 481.

(i) While the location of Palatka on the St. John's River, and the fact that there is more competition by rail at Palatka than at Hampton, may justify rates to Palatka somewhat lower than to Hampton, the Hampton rates should not be higher than the Palatka rates by the locals from Palatka to Hampton; and in fixing the Hampton rates the carriers are bound to take into account the interest of the community at Hampton as well as its own interest, and they must not put in rates to Hampton which prohibit its citizens from the transaction of business in competition with Palatka. Board of Trade v. Nashville, C. & St. L. Ry. Co., 8 I. C. C. 503.

(j) The Interstate Commerce law was enacted to encourage normal competition, but it is not in accord with the spirit or letter of the law to recognize as a condition justifying a discrimination against one locality, competition at a more distant locality, when competition at the nearer point is stifled or reduced, not by normal restrictions, but by agreement between those who otherwise would be competing carriers. The difference in conditions thus produced is effected by a restraint upon trade and commerce, which is not only violative of the common law, but of the so-called Federal anti-trust act. Board of Trade of Hampton, Fla., v. N. C. & St. L. Ry. 8 I. C. C. 503, 528.

(k) The building up of one locality at the expense of another, by rates favoring the former and discriminating against the latter, was undoubtedly one of the principal evils which the Act was designed to remedy, and it would seem that due allowance might and should be made for the effect of competition without defeating the object of the law. Board of Trade of Hampton, Fla. v. N. C. & St. L. R. Co., 8 I. C. C. 503, 522.

(l) If Los Angeles has means at its command by which it may force a rate from the two railroad lines, or either of them, which serve it and San Bernardino, which the latter place does not possess, that is an element to be considered in determining the legality of a lower rate from the east to Los Angeles, the longer distance point; but the mere fact that it is a larger town, with more business, and thereby creating a fiercer competition between the lines, does not justify the difference in charges. Holdzkom v. Michigan Central R. Co., 9 I. C. C. 42.

(m) It is the duty of the Commission to consider all circumstances and conditions that reasonably apply to the situa-

tion, the legitimate interests of the carrying companies as well as those of traders and shippers, and the wefare of the communities at localities where the goods are delivered as well as that of communities in the places of shipment, and to give effect to this rule a much broader view must be taken than that of the competition of carriers alone. Mayor and Council of Tifton, Ga. v. Louisville & Nashville R. Co., 9 I. C. C. 160.

(n) The principle of relative justice applied is that when a carrier, by reason of competitive conditions or for other reasons, serves certain localities at very low rates and concessions made must not subject other localities or other patrons dependent on the same carrier to undue and unreasonable prejudice or disadvantage, but there must be an equitable adjustment of rates, so that there is no unjust discrimination between competitors in like pursuits. Johnson v. St. P. M. & O. R. Co., 9 I. C. C. 221, 241.

(o) With water competition compelling low all-rail freight rates from New York to San Francisco and other Pacific Coast terminals, a showing that the distance is less, and that graded rates were formerly in force, is not sufficient to warrant an order requiring lower rates from Chicago and other interior points than from New York on traffic carried by rail to Pacific Coast destinations. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(p) There is no unjust discrimination in charging higher rates for the transportation of ice to and from points in Michigan to Springfield than for the longer distance to Columbus, where other and shorter delivering lines compete for traffic to Columbus and the short line distance to Columbus is less than the short line distance to Springfield. Ulric & Williams v. Lake Shore & Michigan S. R. Co., 9 I. C. C. 495.

(q) On complaint by the City of Wichita, Kans., alleging that defendant's rates on coal in carloads from Minden, Mo., McAlester, I. T., and Russellville, Ark., to Wichita are unlawful as compared with defendant's coal rates from the same points to Kansas City, it appeared that the rates to Kansas City are controlled and actually forced by competitive conditions governing the transportation of coal to that city but that such rates are remunerative and that the rates to Wichita can not be found excessive upon the record as made in this case: HELD, That the complaint should be dismissed without prejudice. Mayor and City Council of Wichita v. A. T. & S. F. Ry. Co. et al, 9 I. C. C. Rep. 534, cited and applied. Mayor, etc., of Wichita v. A. T. & S. F. Ry. Co. et al., 9 I. C. C. 558.

(r) The defendants' rates on coal in carloads from Minden, Mo., McAlester, I. T., and Russellville, Ark., to Wichita do not unjustly discriminate in favor of Kansas City, by charging a lower rate to that city, where the rates to Kansas City are controlled and actually forced by competitive conditions governing the transportation of coal to that city, and are remunerative. Mayor and City Council of Wichita v. Atchison, T. & S. F. R. Co., 9 I. C. C. 558.

(s) On complaint of the City of Wichita, Kansas, alleging that rates from lumber shipping points west of the Mississippi River in Louisiana, Arkansas and Texas to Wichita are unreasonable and unduly prejudicial as compared with rates on like traffic from the same points to Kansas City. Mo., Omaha and Lincoln Nebr., and Topeka, Kans., and that such rates are higher via the lines of the defendants, the Santa Fe and Rock Island systems, for the shorter distance to Wichita than for the longer distance through Wichita and Kansas City, and the other destination points mentioned, it appeared that competitive conditions existing in Kansas City, Omaha, and Lincoln produce low rates to those points from the lumber territory in question and that such competitive conditions do not exist at Wichita; that there is no substantial dissimilarity in the circumstances and conditions governing the transportation of lumber from such territory to Wichita and through Wichita to Topeka by the Santa Fe and Rock Island Systems; that the rate from such lumber producing territory to Wichita is excessive to the extent of one cent per 100 pounds. HELD, That for reasons set forth in Wichita v. A. T. & S. F. R. Co., 9 I. C. C. Rep. 534, based upon decisions of the United States Supreme Court there cited, the defendants' lumber rates to Wichita as compared with those in effect to Kansas City, Omaha, and Lincoln from the lumber shipping territory herein involved are not in violation of the third and fourth

sections of the Act to regulate commerce; that all of the defendants do violate section three of the Act; that the Santa Fe and Rock Island Systems violate section four by maintaining higher lumber rates from such territory to Wichita than to Topeka; and that the lumber rate from the territory described to Wichita is unreasonable and should be reduced. Mayor etc., of Wichita v. C., R. I. & P. Ry. Co., et al., 9 I. C. C. 569.

(t) The defendants are justified in maintaining rates from the Pacific Coast which are lower to Missouri River points than to Denver upon rice, hemp, baking powder, blankets, books, boot and shoe heels, chocolate, cocoa, and extracts, as exceptions to the general rule that in the making of transcontinental rates, Denver must receive the same treatment that is accorded to cities in the Middle West and Missouri River territory. Kindel v. Atchison, T. & S. F. R. Co., 9 I. C. C. 606.

(ta) No undue discrimination results to Sheridan by reason of the fact that the rate from that place to Boston is 2 cents per 100 lbs. more than from Indianapolis to Boston, although the latter is the longer-distance point by the defendant's line, which runs north from Indianapolis through Sheridan, connecting at various points with lines to Boston; as Indianapolis is a competitive point, and the short lines from Sheridan to the east are through Indianapolis, and by those lines Sheridan is a longer distance point. G. C. Pratt Lumber Co. v. Chicago, I. & L. R. Co. 10 I. C. C. 29.

(u) Prior to April 25, 1903, defendant had in effect rates per 100 pounds on bananas in carloads from Charleston, which were 43 cents to Danville and 20 cents to Lynchburg. The rate of 20 cents to Lynchburg was 13 cents below the rate which was justified by competition from Baltimore or elsewhere. Such relation of rates was in violation of section three of the Act to Regulate Commerce. Gardner & Clark v. Southern R. Co., 10 I. C. C. 342.

(v) The rates from Cannon Falls, a point in Minnesota 48 miles from Minneapolis, to Chicago, East St. Louis, and Louisville, are competitive rates, as are also the rates from Minneapolis; and Cannon Falls, with its competition with Minneapolis, is entitled to as low a rate to common points as the difference in conditions will permit. In view, however, of the desirability of keeping open the Minneapolis market to Cannon Falls grain, the short distance between those points, and the low rate from Minneapolis forced by competition, it is apparently not unjust that the grain rate from Cannon Falls should be as high as the local rate to Minneapolis plus a 7½ cent rate therefrom to Chicago, provided the Cannon Falls dealer is not thereby subjected to disadvantage as compared with the Minneapolis grain dealer. Cannon Falls Farmers' Elevator Co. v. Chicago G. W. R. Co., 10 I. C. C. 650.

(w) With competition for the carriage of grain to and via Duluth and other northern lake ports, rates of 10 cents on wheat and 7½ cents on other grain from Minneapolis to Chicago are as high as can be obtained by the all-rail lines between those points, and competition by lines other than the defendants from Minneapolis to East St. Louis has fixed the rate by all lines at 10 cents per 100 pounds, and this also controls the rate to Louisville. The rates from Cannon Falls, a point in Minnesota 48 miles from Minneapolis, to Chicago, East St. Louis and Louisville, are also competitive rates, and in its competition with Minneapolis, Cannon Falls is entitled to as low rates to common points as the difference in conditions will permit. In view, however, of the desirability of keeping open the Minneapolis market to Cannon Falls grain, the short distance between those points, and the low rate from Minneapolis forced by competition, it is apparently not unjust that the grain rate from Cannon Falls should be as high as the local rate to Minneapolis plus a 7½ cent rate therefrom to Chicago, provided the Cannon Falls dealer is not thereby subjected to disadvantage as compared with the Minneapolis grain dealer. Cannon Falls Farmers' Elevator Co. v. C. G. W. R. Co., et al., 10 I. C. C. 650.

(x) Substantial dissimilarity of circumstances and conditions exists between Goodhue and Red Wing, Minn., and consequently no undue discrimination arises out of the fact that the defendant charges a rate on grain of 15 cents per one hundred pounds from Goodhue, Minn., to Chicago, Ill., while it charges only 12½ cents per one hundred pounds from Red Wing, Minn., to Chicago, 14 miles farther off, the traffic

passing through Goodhue. Goodhue v. Chicago Great Western R. Co., 11 I. C. C. 683.

(y) Defendant transports coal from Pennsylvania mines to Baltimore which may be carried from Baltimore by water to Norfolk and to various other points on Chesapeake Bay termed in its tariffs as "points inside the Capes." The rate to Baltimore on coal reshipped by water to "inside the Capes points" is materially less than its rate to Baltimore on coal reshipped by water to Norfolk. Defendant's service and expense to Baltimore is the same whether the coal finally goes to Norfolk or to other points on Chesapeake Bay. By agreement between the carrier of coal from the various mines to Norfolk, Newport News, and other Chesapeake Bay points, competition has been suppressed, and while defendant does want to carry traffic to designated "inside the Capes points," it does not desire to participate in the coal traffic to Norfolk. HELD, That this constitutes wrongful prejudice and unjust discrimination, and that while defendant continues to give a rate less than its local to Baltimore on coal destined to "inside the Capes points," it cannot lawfully deny the same rate on coal forwarded by water from Baltimore to Norfolk. Complainant granted reparation. City Gas Co. v. Baltimore & O. R. Co., 11 I. C. C. 371.

(z) A difference in charge by defendant on coal carried from Pennsylvania mines to Baltimore for local consumption and on coal carried to its Curtis Bay or Locust Point docks in Baltimore, is based upon the dissimilar circumstances and conditions and is not unlawful. City Gas Co. v. Baltimore & O. R. Co., 11 I. C. C. 371.

(aa) Cleveland and Charleston, Tenn. take the Chattanooga rate on lumber to Cincinnati, but the conditions at those points are not the same as at Dalton, and no wrongful discrimination results from the existing adjustment of rates. Farrar v. Southern R. Co. et al., 11 I. C. C. 632.

(bb) The competitive conditions existing at Afton, Minn., prevent the maintenance of higher coal rates than those now in effect, and consequently there is no unjust discrimination between places by reason of the fact that defendant's rate on coal is 35 cents per ton less from Superior, Wis., to Afton than from Superior to Hastings, although the traffic to Afton passes through Hastings. Hastings Malting Co. v. Chicago, M. & St. P. R. Co., 11 I. C. C. 675.

IMPORTANT CASES SINCE 1908

(cc) It is well settled that distance is always a factor to be taken into consideration in determining either the reasonableness of a rate by itself or in considering its relation to rates to other points, but it is equally well settled that distance alone is not controlling. Competition is an important element and there are various other considerations, all of which must be taken into account in determining the fact whether a particular rate or a system is entitled as a matter of law to rates that are reasonable and that do not operate to unduly discriminate against them. Corporation Commission of North Carolina v. N. & W. Ry. Co., 19 I. C. C. 303, 309.

(dd) Competition of controlling force cannot be ignored by the Commission in determining whether an advantage in rate at the competitive point is undue, or is one not chargeable to the carriers defendant because involuntarily made. Sioux City Terminal Elevator Co. v. C. M. & St. P. Ry. Co., 23 I. C. C. 98, 107.

(ee) The fact that a carrier may voluntarily accept lower rates than it can be required to accept and that whether or not a carrier will meet competitive conditions at a particular point rests primarily with the carrier, does not relieve the carrier by meeting competitive conditions at one point and refusing to meet them at a neighboring point. Chamber of Commerce of Newport News v. G. S. & F. Ry. Co., 23 I. C. C. 140, 149.

(ff) The public interest may demand that a carrier shall not avail itself of competitive conditions to produce discrimination. Chamber of Commerce, Ashburn, Ga. v. G. S. & F. Ry. Co., 23 I. C. C. 140, 150.

(gg) The "like circumstances and conditions" referred to in section 2 are those which arise within the field of haulage and do not include competition. Chattanooga Packet Co. v. I. C. C. R. R., Co., 33 I. C. C. 384, 392.

(hh) It is well established that competitive conditions at a given point may render the circumstances substantially dissimilar and justify a discrimination in rates against a competing point where such competitive conditions do not ex-

ist; but where competitive conditions present at both points the discrimination in rates should bear some relation to the difference in competitive conditions. Du Pont Wholesale Grocery Co. v. A. T. & S. F. Ry. Co., 42 I. C. C. 79,82.

(ii) Carriers may meet competition, when no unjust discrimination results, without being compelled to extend similar rates to points where no competition exists. Pacific Creamery Co. v. S. P. Co., 42 I. C. C. 93, 96.

(jj) In connection with the issue of discrimination competitive conditions must frequently be considered, but it is not within the province of the Commission to probe into mining costs as a factor affecting the ability of rival coal operators to compete with each other. This is obvious when we consider all the elements affecting the question. The cost of mining coal varies greatly not only by districts but even by mines. It may and does change from day to day. The character and quality of the coal, the depth at which it is found, the thickness and purity of the vein, the cost, and nature of the mining equipment, the wages of the miners, the hours of labor, the efficiency of the organization, the extent of the operations, the output of the mine, the regularity of the demand, the capital invested, the interest paid on loans and many other elements enter into the determination of mining costs. These ever-changing factors afford no basis for a rate adjustment. Bituminous Coal to C. F. A. Territory, 46 I. C. C., 66, 142.

(kk) Maintenance by interstate carriers of the two divergent systems of rates inevitably tended to restrain and interfere with the free movement of interstate commerce between Shreveport and Texas points. R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 371.

(ll) Ordinarily undue prejudice does not exist in the absence of competition. Tidewater Oil Co. v. Director General, as Agent, 62 I. C. C. 226. 227.

(mm) But the absence of competition does not prevent a finding of unjust discrimination under section 2 of the Act. Tidewater Oil Company v. Director General, as Agent, 62 I. C. C. 226, 227.

(nn) In fixing rates carriers may give consideration to competitive conditions as well as distance so long as no undue prejudice or undue preference results, and the commission may properly consider such conditions when the validity of a specific rate or general adjustment is in issue. Coal from Southwest to Omaha, 73 I. C. C. 536, 539.

(oo) Undue prejudice under section 3 of the act ordinarily requires the prejudice suffered by one party to be the source of positive advantage to the one alleged to be preferred and that a competitive relationship exist between the parties or commodities concerned. Boston Wool Trade Asso. v. B. & A. R. R., 78 I. C. C., 178, 183.

(pp) In measuring comparative distance from competing points to determine question of prejudice it has been custom of the commission to consider shorter and more direct routes rather than circuitous routes. Reduced Rates from New York Piers, 81 I. C. C. 312, 324.

§8 (2) Artificial Competition.

See Competition.

CASES 1887-1908

(a) A system of rate-making under which a comparatively few places arbitrarily selected are designated competitive points and given preferential rates, while adjacent points are classed as local and made to pay much higher rates violates the equality provisions of the Act to Regulate Commerce, including those requiring all rates to be reasonable and just. Hill v. Nashville C. & St. L. R. Co., 6 I. C. C. 343.

IMPORTANT CASES SINCE 1908

(b) Where carriers through discriminatory rates produce competitive conditions at one point they cannot set up such conditions as a reason for maintaining discriminatory rates at a neighboring point. Chamber of Commerce, Ashburn, Ga., v. G. S. & F. Ry. Co., 23 I. C. C. 140, 150.

§8 (2½) Potential Competition.

See Competition; Evidence §14 (2).

IMPORTANT CASES SINCE 1908

(a) Possibility of actual competition developing on a river justifies a slight difference in rates between a river point and one not so situated. Planters' Gin and Compress Co. v. Y. & M. V. R. R. Co., 16 I. C. C. 131, 133.

§8 (3) Railroads in General

See Railroad Competition.

CASES 1887-1908

(a) Competition between railroad companies may afford a legitimate reason for a preference by railroad companies to one city over another. Cattle Raisers' Asso. v. Fort Worth & D. C. R. Co., 7 I. C. C. 513.

(b) Competition between railroad companies may justify the preference of one locality to another as to freight rates charged to such localities, although it does not necessarily justify such preference. New York Produce Exchange v. Baltimore & O. R. Co., 7 I. C. C. 612.

(c) Under decisions of the United States Supreme Court,—Import Rate Case, Interstate Commerce Commission v. Texas & P. R. Co., 162 U. S. 197, 40 L. ed. 940, 5 Inters. Com. Rep. 405, and the Troy Case, Interstate Commerce Commission v. Alabama Midland R. Co., 168 U. S. 144, 42 L. ed. 414,—railway competition may, but it does not necessarily, justify a preference to a particular locality or commodity, and therefore, granting that discrimination against a locality which is based on such competition is excusable in theory, the question still remains whether under the third section it is undue or unreasonable; and that question is one of fact in each case. New York Produce Exchange v. Baltimore & O. R. Co., 7 I. C C. 613.

IMPORTANT CASES SINCE 1908

(d) Railroad competition held to justify difference in rates. Coke Producers' Assn of Connellsville v. B. & O. R. R. Co., 27 I. C. C. 125.

(e) While carriers may and frequently do, establish and maintain rates lower than they could be required to publish to meet competitive or other conditions at a particular point, they are not thereby relieved from the obligation imposed by law to remove unjust discrimination which may arise from meeting competition or other conditions at one point and refusing to meet the same conditions at another point entitled to the same consideration. San Toy Coal Co. v. A. C. & Y. Ry., 34 I. C. C. 93, 98.

(f) There can be no question of undue prejudice to a specific point where the carrier serving that point is in no way responsible for lower rates accorded competitors who ship from other points to the same destinations. Equity Co-Operative Packing Co. v. Director General, as Agent, 64 I. C. C. 615, 616.

(g) Class and commodity rates from Boston, Mass., and Providence, R. I., via ocean and rail and from interior New England via rail, ocean and rail to points in the Southeast, found not unreasonable or unduly prejudicial. A previously existing relationship by which Boston and Providence were accorded the same rates as New York, N. Y., and Philadelphia, Pa., was brought about by carrier competition in which distance and cost of service were disregarded. In connection with the readjustment following Fourth Section Violations in the Southeast, 30 I. C. C. 153, and 32 I. C. C. 61, and subsequent general increases and reductions such rates were made differentials over the rates from New York. Boston Chamber of Commerce v. O. S. S. Co., 73 I. C. C. 233.

J., 17 I. C. C. 383, 384; Wilson-Leuthold Lbr. Co. v. C. M. & S. P. Ry., 34 I. C. C. 146; Haskew Lumber Co. v. N. C. & St. L. Ry., 34 I. C. C. 333; Chamber of Commerce of Milwaukee v. C. M. & St. P. Ry., 34 I. C. C. 581.

§8. (5) Water Carriers.

See Water Carrier.

CASES 1887-1908

(a) The defense of water competition from Chicago and the lake shipping points to seaboard points east, as a justification for an otherwise unjustifiable discrimination in rate between corn and its direct products from Indianapolis to said seaboard points, was held to be untenable, owing to the situation of Indianapolis as to the lakes and to the location of the territory where the corn was mainly raised that was marketed at Indianapolis, and to the other facts established in this case. Bates v. Pennsylvania R. Co., 2 I. C. R. 715.

(b) To justify discrimination because of water competition the freight must have been able to reach destination by water.—In order to justify a greater haul for shorter distance because of water competition the transportation as to which such competition exists must be concerning freight to the longer distance point which if not carried to such point by the road giving the rate complained of could reach such point by water transportation. So, the competition of one transportation line cannot be said to meet that of another for the carriage of traffic from any particular locality so as to constitute dissimilar conditions justifying a greater charge for a short than a long haul unless one line could perform the service if the other did not. Competition existing by water between Chicago and the North Alantic ports, and competition by rail between Memphis and Charleston, together with the competition of markets, do not constitute dissimilar circumstances or conditions which will justify a greater charge from Memphis to Summerville than for the longer distance from Memphis to Charleston. Behlmer v. Louisville & Nashville R. R. Co., 8 I. C. C. App. XXXIV.

(c) Conditions affecting traffic, including carriages and buggies, from eastern points, are rendered substantially different at Los Angeles than at San Barnardino, a shorter distance point on the same line, by the competition of carriers wholly by water from the Atlantic seaboard to Port Los Angeles, a point on the Pacific coast near Los Angeles and the effect of such competition by water direct to San Francisco is properly recognized at Los Angeles by giving that city all-rail rates from the east as low as those in effect to San Francisco. Holdzkom v. Michigan Central R. Co., 9 I. C. C. 42.

IMPORTANT CASES SINCE 1908

(d) Carriers may, for the purpose of meeting water competition, make rates lower than would otherwise be justifiable, even to the extent of charging a less rate to the more distant point. The carrier may determine for itself whether it will or will not meet such water competition. While, however, the carrier may in the first instance settle its policy in this respect, it must act under certain limitations. It cannot be permitted to compete at one point and decline to compete at another, where all conditions are the same; nor should it, ordinarily, be allowed to compete one day and decline to compete the next. The public has the right to require equal and uniform treatment within the bounds of reason. Cases might therefore arise where the Commission would require the continuance of a rate established to meet such competition. Darling & Co. v. B. & O. R. R. Co., 15 I. C. C. 79, 87.

(e) Water competition at given point may render circumstances and conditions dissimilar and justify discrimination against points where such competition is not controlling. Planters Gin and Compress Co. v. Y. & M. V. R. R. Co., 16 I. C. C. 131, 133.

(f) Where a carrier has nullified water competition at one city through a community of interest with water carriers it is not justified in granting a lower rate at related points on the ground that water competition at such other points compels a lower rate. Bowling Green Business Men v. L. & N. R. R. Co., 24 I. C. C. 228, 237.

(g) If water competition at a given point compels a carrier to discriminate in rates against a point not so favorably situated, the amount of the discrimination must not be greater than the dissimilarity of circumstances demand. Tezarkana Freight Bureau v. St. L. I. M. & S. Ry. Co., 28 I. C. C. 569, 582.

(h) While a carrier, in the exercise of its discretion, may establish rates to meet water competition, it can not be compelled to do so, so long as no unjust discrimination or undue preference is thereby created. Nephi Plaster & Mfg. Co. v. D. & R. G. R. R. Co., 45 I. C. C. 433, 434.

ALL OTHER CITATIONS

§8. (6) State Rates.

See State Rates and Regulation.

IMPORTANT CASES SINCE 1908

(a) Complaint alleges undue prejudice of intrastate commerce and preference of interstate commerce, which it is urged the commission has power to remove under section 13 of the act. Such prejudice is claimed to result from the application of interstate rates which are lower than the corresponding intrastate rates, but such allegation of undue prejudice not proved. Mathieson Alkali Works v. C., C. & O. Ry., 77 I. C. C. 150, 153.

ALL OTHER CITATIONS

C. 607, 617, 618; Ohio-Michigan Coal Cases, 80 I. C. C. 663, 690.

§8. (7) Market Competition.

See Market Competition.

CASES 1887-1908

(a) The provision of the third section of the act prohibiting carriers from making or giving any undue or unreasonable preference or advantage to any particular firm, person, company, corporation or locality, or any particular description of traffic, in any respect whatsoever, not only applies to relative rates on one description of traffic shipped to or from competing localities, but also to relative rates on differently described articles which are competitive in the same markets; and when carriers have established rates on articles of competitive traffic which are relatively reasonable and fair, they cannot arbitrarily select particular articles of such traffic and materially raise or lower rates so established thereon without violating that provision of the statute. Squire & Co. v. M. C. R. R. Co., 3 I. C. C. 515, 520;

(b) If any articles are competitive in the markets, the clause in the law which makes it unlawful for a common carrier to give any undue and unreasonable advantage to one over another, applies. In contemplation of the act, these competitive articles are to be treated as one subject by the carriers in providing for their transportaion. This situation demands for such articles relative rates of freight, and when the carriers establish a rate upon one of them they would make a rate on the other, relatively smaller or greater, basing the relation in rates upon the differing cost of the service as to each. Squire & Co. v. M. C. R. Co., 3 I. C. C. 515, 523.

(c) A charge of higher rates from certain points to a place than is made on traffic carried through such place to another place in competition therewith constitutes an unjust discrimination under the Interstate Commerce Act, §3. Brewer v. Louisville & N. R. Co., 7 I. C. C. 224.

(d) Defendant has had in force since April 25, 1903, rates per 100 lbs., on bananas in carloads from Charleston, S. C., which are 43 cents to Danville, Va., and

35½ cents to Lynchburg, Va., the transportation to the latter point by defendant's line being through Danville. The lower rate to Lynchburg is forced upon defendant by the competition of bananas coming from Baltimore. The 43-cent rate to Danville is not found to be unreasonable, and upon these facts the higher rate to Danville is not in violation of the Act to Regulate Commerce. Gardner & Clark v. Southern R. Co., 10 I. C. C. 342.

IMPORTANT CASES SINCE 1908

(e) The fact that there is competition between communities for the purchase of a commodity does not justify the carrier transporting the same to levy an unreasonable rate on one community. Nebraska State Railway Commission v. U. P. R. R. Co., 13 I. C. C. 349, 355.

(f) While market competition may be considered in determining a violation of section 3, it is no defense to a charge of undue prejudice that competition compels the low rate at the favored point, when similar conditions obtain at the point discriminated against. North Fork Channel Coal Co. v. A. A. R. R. Co., 25 I. C. C. 241, 246.

(g) It is a foregone conclusion that competition between jobbing houses and factories for trade cannot exist without the jobbing houses and factories, and if a certain adjustment of rates prevents one town from securing the jobbing houses and factories in competition with another a situation is presented which the Act was designed to correct. When the question of rates enters into the competition of cities and towns in any respect, whatever, whether the competition is one for trade factories or people, complaints alleging unjust discrimination will be entertained. Transcontinental Commodity Rates, 32 I. C. C. 449, 454;

(h) There need not be a direct and substantial commercial competition in a common market between merchants at two points in order to come within the provisions of section 3. Without attempting to enumerate the various classes of cases it may be said that the section is broad enough to include any undue prejudice to one description of traffic, including interstate commerce, and undue preference of another description of traffic, that interferes with the free movements of such interstate commerce, whatever form the discrimination may take. Railroad Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 363.

(i) Fact that a city is a thriving jobbing center, and in spite of rate differences does business in a territory in competition with other cities, does not deprive it of the right to have rates that are not unduly prejudicial in favor of those competing cities. Meridan Traffic Bureau v. S. Ry. Co., 60 I. C. C. 11.

(j) Any superiority which one point may have over another as a market may not be urged as a reason for denying a nonprejudicial adjustment of freight rates. Indianapolis Chamber of Commerce v. C. C. C. & St. L. Ry. Co., 60 I. C. C. 67, 73.

C. 549; Wholesale Coal Trade Asso. v. Director General, as Agent, 58 I. C. C. 15, 32; Michigan Paper Mills Traffic Asso. v. A. T. & S. F., 59 I. C. C. 649; In the matter of intrastate rates in Illinois, 60 I. C. C. 92, 98; Montgomery Chamber of Commerce v. Director General, 60 I. C. C. 203; Silicia Sand Producers Traffic Asso. of Illinois v. Director General, 60 I. C. C. 453; Lehigh Portland Cement Co. v. Director General, 61 I. C. C. 613; Security Mills & Feed Co. v. Director General, 62 I. C. C. 657; Meridian Traffic Bureau v. S. Ry. Co., 60 I. C. C. 5, 11; United Iron Works Co. v. Director General, as Agent, 61 I. C. C. 33, 38; Certain-Teed Products Corp. v. A. T. & S. F. Ry. Co., 63 I. C. C. 65, 72; Waggoner & Gates Milling Co. v. Director General, as Agent, 69 I. C. C. 83, 86; Farley & Loetscher Mfg. Co. v. Director General, as Agent, 73 I. C. C. 704; Atchison Board of Trade v. A., T. & S. F. Ry. Co., 80 1. C. C. 350; Oklahoma Corp. Comm. v. A. R. R., 80 I. C. C. 607, 617, 618; Melcroft Coal Co. v. I. C. V. Ry. Co., 81 I. C. C. 251.

§8½. Difference in Conditions.

IMPORTANT CASES SINCE 1908

(a) Rate on molding sand from Ottowa, Ill., to Chattanooga, Tenn., found not unduly prejudicial as compared with lower rate to Pittsburgh, Pa., Buffalo,

N. Y., and other points in the same group as the transportation conditions obtaining from and to these points are dissimilar. Rock Producers Traffic League v. C. B. & Q. R. R. Co., 62 I C. C. 105.

ALL OTHER CITATIONS

Empire Steel & Iron Co. v. Director General, 62 I. C. C. 157.

§9. Disadvantage of Location.

See Equalization of Rates §3.

CASES 1887-1908

(a) A distributing center, however great or important, cannot demand as a matter of right that the rates from a common source of supply to more distant and smaller towns shall be made up of the sum of the rate to itself and the rate thence to such smaller towns; but the carriers may make rates from the common source of supply to the smaller towns directly, as single rates; and if the single rate is less than the sum of the two which are made to and from the distributing center, it is not for that reason necessarily objectionable. Martin v. Chicago, Burlington & Quincy R. Co., 2 I. C. R. 32.

(b) The fact that under rates which are impartially arranged as between large and small towns one large distributing center may have an advantage over another in competition for the business of the small towns, does not make out a case of undue preference in favor of the one distributing center as against the other. Impartial rates are not rendered illegal by their effect upon the business of localities. Martin v. Chicago, Burlington & Quincy R. Co., 2 I. C. R. 32.

(c) The fact that one city is much larger and has more important and extensive business interests than another, and has been treated by the carriers in making rates to surrounding points as a "trade center," is no justification for a continuation of discriminatory rates in favor of such city. Troy Bd. of Trade v. Alabama M. R. Co. (Com), 4 I. C. R. 348.

(d) A person who receives cotton at Mobile from any particular point on the Alabama rivers whether it comes by boat or wagon or any other way and desires to ship it from Mobile to New Orleans by a railroad line is entitled to have it shipped at the Mobile rate as much as any person who receives his cotton from any other point or who may have bought it at Mobile, and it is no objection to such right that it would give every town located on such rivers equal facilities and advantages with those of Mobile, as that is the purpose of the Interstate Commerce Act. Bigbee & Warrior Rivers Packet Co. v. Mobile & Ohio R Co., 4 I. C. R. 829.

(e) A city is entitled to benefits arising from its location, and the fact that it enjoys exceptional advantages in one respect is no reason why it should be subjected to discrimination in other respects. Freight Bureau of Cincinnati v. N. O. & T. P. R. Co., 7 I. C. C. 180.

(f) That a city from its location obtains better rates from the points of origin, upon articles which it distributes to a certain territory, than another city, constitutes no reason for subjecting it to discrimination, in favor of such other city, in rates to such territory. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 7 I. C. C. 180.

(fa) A city is entitled to benefits arising from its location, and the fact that it enjoys exceptional advantages in one respect is no reason why it should be subjected to discrimination in other respects. Freight Bureau Cincinnati Chamber of Commerce v. C. N. O. & T. P. R. Co., 7 I. C. C. 180, 189.

(fb) Complainant attacked rates between Omaha or South Omaha, Neb., and points in Iowa west of the Mississippi River as unjustly discriminatory against Omaha in favor of Council Bluffs. The rates from Omaha are made by adding to the rates in force between Council Bluffs and such Iowa points the prevailing bridge tolls over railway bridges across the Missouri River at or near Omaha and Council Bluffs, while on practically all other freight transported to or from Council Bluffs, Omaha and South Omaha the same rates are applied. Council Bluffs, on the east bank of the Missouri River, is more favorably located than Omaha, on the west side of that river, in regard to traffic with points in Iowa, and the defendant carriers are not to be condemned for recognizing such natural advantages of location in adjusting their charges; nor does it follow that rates should be the same from Omaha and Council Bluffs into Iowa because they are the same from those cities into Nebraska. HELD, the charge of unjust discrimination against Omaha is not sustained, and complaint

dismissed. Commercial Club of Omaha v. C. & N. W. R. Co., 7 I. C. C. 386.

(g) In cases of preference between places, the question is not merely that some form of competition exists at the more favored point which is not found at the other, but rather do all the circumstances and conditions, giving due regard to the interests of all parties, excuse the preference. Holdzkom v. Michigan Central R. Co., 9 I. C. C. 42.

(h) If Los Angeles has means at its command by which it may force a rate from the two railroad lines, or either of them which serve it and San Bernardino, which the latter place does not possess, that is an element to be considered in determining the legality of a lower rate from the east to Los Angeles, the longer distance point; but the mere fact that it is a larger town with more business, and thereby creating a fiercer competition between the lines, does not justify the difference in charges. Holdzkom v. Michigan Central R. Co., 9 I. C. C. 42.

IMPORTANT CASES SINCE 1908

(i) If a city is large and prosperous by virtue of natural advantages it may justly be given the benefit of its location even though that may result in apparent discrimination against smaller intermediate points; but the mere fact that a market is important and a large consumer is not of itself this kind of a natural advantage. One purpose of the Act was to stop discrimination against the weak, whether individual or locality. In re Application Under Fourth Section as to Rates on Salt, 24 I. C. C. 192, 194.

(j) That a city is recognized as a commercial center is no reason for giving it unduly preferential rates. Bowling Green Business Men v. L. & N. R. R. Co., 24 I. C. C. 228, 239.

(k) Unjust discrimination by carriers cannot be predicated upon their failure or declination to remove by preferential rates, services or privileges, the natural disadvantages of location under which one community rests in competition with another more favorably located. Port Arthur Board of Trade v. A. & S. Ry. Co., 27 I. C. C. 388, 402.

(l) The mere fact that a city is thriving does not deprive it of the right to have rates that are not unduly discriminatory in favor of other cities. Board of Trade of Carrollton, Ga., v. C. of Ga. Ry. Co., 28 I. C. C. 154, 167.

(m) Difference in cost of production cannot be recognized as a basis for the adjustment of freight rates between different localities. Sheridan Chamber of Commerce v. C. B. & Q. R. R. Co., 28 I. C. C. 250, 262.

C. 238, 244; Columbia Chamber of Commerce v. S. Ry. Co., 28 I. C. C. 339,

347; Gottron Bros. Co. v. G. & W. R. R. Co., 28 I. C. C. 38; Becker v. P. M. R. R. Co., 28 I. C. C. 645, 657; Milburn Wagon Co. v. A. A. R. R. Co., 32 I. C. C. 582; Anson, Gilkey & Hurd Co. v. S. P. Co., 33 I. C. C. 332, 338; Empress Coal Co. v. O. W. R. R. & Nav. Co., 51 I. C. C. 345; Indianapolis Chamber of Commerce v. C. C. C. & St. L. Ry. Co., 60 I. C. C. 67, 73; Belber Trunk & Bag. Co. v. W. J. & S. R. R., 66 I. C. C. 490.

§10. Encouragement of Own Territory.

See Evidence §40½; Origin of Traffic; Through Routes and Joint Rates §9.

CASES 1887-1908

(a) But rates and charges not unreasonably high of themselves, can be so adjusted in their relations to each other as to give the undue preference and produce the unreasonable disadvantage which the third section of the Act to Regulate Commerce makes unlawful, and if the railway company in establishing its charges on the different divisions and branches of its road, so adjusts them as to divert trade and business to one locality, which naturally under an equitable adjustment of charges would go to another, such unreasonable preference for one place and disadvantage to another, are not excused or made lawful by the fact that some of such rates are not entirely voluntary, but the result of competition with other carriers. If an advantage is given to competing towns on the main line, the advantage must not be unreasonable. The difference in the rates at Mazeppa, compared with the rates at Red Wing and Lake City, should neither exceed 2½ cents on 100 pounds, nor one third part of the rates made in the adjustment of charges from said competing town. Raymond v. Chicago, Milwaukee & St. P. R. Co., 1 I. C. R. 627.

(aa) Complainant charged that the discriminations made by the defendant against the locality of Mazeppa are unjust and sufficient to divert largely its grain business. Where from Wabesha, the distance over the main line northwest to Lake City is 12 miles, and to Red Wing 29 miles, and over the branch line the distance west from Wabasha to McCracken is 18 and to Mazeppa is 52 miles, and the distance north from Mazeppa to Red Wing by wagon road is 22 miles, and nearly the same to Lake City, and both are competitors with Mazeppa for the grain and other trade with the territory intervening; the distance from Chicago to Mazeppa being 392, to Red Wing 369, to Lake City 352 miles, and to Milwaukee the distance is less than to Chicago by 107 miles, and complainant alleged that the discriminations made by the defendant against Mazeppa were unjust and sufficient to divert largely its grain business; that the excess charged of 8c in the Mazeppa rates over Lake City and Red Wing rates was and, any difference or excess in such rates above 2c would be an undue preference in favor of Lake City and Red Wing, and an unreasonable prejudice against Mazeppa in respect of the grain and other trade in which complainant was and is interested, and the only evidence in support of complainants statement that the Mazeppa rate now 12½c was unreasonable, is afforded by comparison of this and other rates on the branch line with the Red Wing, Lake City and other rates on the River division of the main line, the Commission declined to declare 12½c an unreasonable charge for the service rendered, or that a rate nearly a third lower than it had ever been previous to the Act is unjust and unlawful of itself, or within the meaning of the first section. HELD, rates and charges not unreasonably high of themselves, can be so adjusted in their relations to each other as to give the undue preference and produce the unreasonable disadvantage which the third section of the Act makes unlawful, and if the railway company in establishing its charges on the different divisions and branches of its road, so adjusts them as to divert trade and business to one locality, which naturally under an equitable adjustment of charges would go to another. Such unreasonable preference for one place and disadvantage to another, are not excused or made lawful by the fact that some of such rates are not entirely voluntary, but the result of competition with other carriers. If an advantage is given to competing towns on the main line, the advantage must not be unreasonable. The difference in the rates at Mazeppa compared with the rates at Red Wing and Lake City should neither exceed 2½c per 100 pounds nor one third part of the rates made in the adjustment of charges from said competing towns. Raymond v. C. M. & St. P. R. R. 1 I. C. C. 627.

(b) An agreement by a railroad company with other companies within a specified territory for the purpose of maintaining a uniform rate upon all shipments of cotton from certain points in Alabama in vessels plying the Alabama rivers and received at Mobile, to be reshipped and transported to New Orleans, to charge a certain sum per bale in excess of its regular rate from Mobile is no justification of such discriminating charge and contravenes the Interstate Commerce Act. Bigbee & Warrior Rivers Packet Co. v. Mobile & Ohio R. Co., 4 I. C. R. 829.

(c) The fact that one city is much larger and has more important and extensive business interests than another, and has been treated by the carriers in making rates to surrounding points as a "trade center," is no justification for a continuation of discriminatory rates in favor of such city. The object of the Act to Regulate Commerce was to eradicate the existing system of rebates and unjust discriminations in favor of particular localities, special enterprises, and favored individuals. Board of Trade of Troy, Ala., v. Ala. Mid. Ry. Co., et al., 6 I. C. C. 2.

(d) The requirement of the agreement of a railway and steamship association that its members apply "full local rates upon all traffic subject to the association agreement coming from or going to" connecting lines which do not maintain association rates, while to traffic from other connecting lines conforming to such rates full local rates are not applied, is repugnant to that clause of the Act to Regulate Commerce, §3, which forbids carriers to "discriminate in their rates and charges between connecting lines." Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 6 I. C. C. 195.

(e) The rates from St. Louis, Nashville and Chattanooga to Hampton, complained of in this case, are combinations of the through rates for the haul through Hampton to Palatka and the local rates from Palatka back to Hampton. The result of this system of rate-making is to enable the merchants at Palatka to compete with merchants at Hampton at their own doors on equal terms, while the latter are debarred from such competition with the former, and as to territory between the two localities, Palatka merchants are given such an advantage in rates as to enable them to undersell Hampton merchants. This system of rate-making results in one of the principle evils which the Act to Regulate Commerce was designed to remedy. Board of Trade v. Nashville, C. & St. L. Ry. Co., 8 I. C. C. 503.

(f) Desire to build up particular station does not justify discrimination.—The interest of a railroad company in building up a station upon its line does not justify a discrimination against another station. I. C. C. v. E. Tenn., Vir. & Georgia R. R. Co., 8 I. C. C. App. XLIII.

(g) While a railway may protect its traffic by any proper means, the enforcement of this rule might be carried to such an extent as to absolutely prohibit every mill not located on its line from selling upon its line. Blackwell Milling & Elevator Company v. M. K. & T. Ry., 12 I. C. C. 24, 25.

(h) A railroad company can not arbitrarily determine that a particular mill shall compete in a certain market with other localities and that other mills on its line shall not so compete, particularly where the discrimination is not justified by operating conditions. Texas Cement Plaster Co. v. St. L. & S. F. R. R. Co., 12 I. C. C. 68, 71.

(i) Right of carrier to encourage industries does not include right to discriminate. Hope Cotton Oil Co. v. Texas & Pacific Ry. Co., 12 I. C. C. 265.

IMPORTANT CASES SINCE 1908

(j) Within certain limits a railroad company is bound to protect its territory, and within those limits the Commission may consider rates and their effect upon movement of traffic. Receiver's and Shippers' Ass'n. of Cincinnati v. C. N. O. & T. P. Ry. Co., 18 I. C. C. 440, 458.

(k) Market competition is a euphemism for railroad policy. The desire of a number of shippers to reach a market is a force to which the carrier may not yield unless it can establish clearly that the adoption of such a policy will not unfairly discriminate against one community in favor of another, and will not produce those results which the law was intended to destroy. Railroad Commission of Nevada v. S. P. Co., 21 I. C. C. 329, 367.

(l) No undue preference results from the fact that a carrier maintains lower rates from points on its own line than other carriers maintain on the same traffic from nearby points on their lines.

Stonega Coke & Coal Co. v. L. & N. R. R. Co., 23 I. C. C. 17, 24.

(m) Where a carrier adjusts rates to accomodate certain traffic in which it participates and to discourage other traffic moving to territory which it does not directly serve, the carriers may compete among themselves in this field, but the right of the shipping public to reasonable and non-discriminatory rates can not be defeated by the private interest of a carrier to have traffic move in a certain direction. Wichita Board of Trade v. A. T. & S. F. Ry. Co., 25 I. C. C. 625, 631.

(n) The Commission has never recognized the right of a carrier to fix its rates to or from a given point on a higher level than they otherwise should be, in order to prevent one community from competing with another, or to keep the products of one community out of a territory, the wants of which may be fully supplied by another community, and the right to adjust rates on any such theory should not rest either in the carriers or in the Commission. Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 26 I. C. C. 53, 58.

(o) A carrier is not justified in attempting to restrict traffic to movement between points on its own line. Lumber Rates from Texas, Louisiana and Arkansas, 28 I. C. C. 471, 474.

(p) Carrier may not by rate adjustments reserve territory it serves for plants located on its own lines. Oklahoma Portland Cement Co. v. A. L. & G. Ry. Co., 32 I. C. C. 221.

(q) Carriers may not establish restricted trade zones. Commercial Club of Joplin, Mo., v. M. P. Ry. Co., 32 I. C. C. 226, 232.

(r) It is the carrier's right to utilize to its own interest the entire road haul that it can perform, so long as it does not result in an unreasonable route. Louisville Board of Trade v. L. & N. R. R., 40 I. C. C. 679, 689.

(s) No carrier has the right so to adjust rates on its own lines as unduly to prejudice shippers on other lines, or to deprive such shippers of reasonable and just rates, merely through a desire to serve shippers on its own lines. Williamette Lumbermen's Asso. v. S. P. Co., 51 I. C. C. 250, 261.

(t) Upon consideration of the relative transportation characteristics and ton-mile and car-mile earnings, rates on mill-work from Iowa points to Texas common-point territory and El Paso group found unreasonable and unduly prejudicial in favor of competitors on the Pacific Coast as the disparity in rates between these points of origin clearly has the effect of restricting the market for complainant's products within Texas. Reasonable maximum rates prescribed and reparation awarded. Farley & Loetscher Mfg. Co. v. Director General, as Agent, 62 I. C. C. 721.

(u) It is not within the power of the Commission to determine where certain cities or persons should transact their business and such power is not vested in carriers. As a matter of sound policy a carrier is not justified in attempting to restrict its traffic to movement between points on its own line. Lumber from the Pacific coast, 63 I. C. C. 125, 128.

(v) Fact that a carrier would be deprived of its long hauls is no answer to a charge of undue prejudice under section 3 of the act. York Mfrs. Asso. v. P. R. R. Co., 73 I. C. C. 40, 50.

(w) The fact that a carrier would be deprived of its long haul is not an answer to a charge of undue prejudice under section 3. York Mfrs. Asso. v. P. R. R. Co., 73 I. C. C. 40, 50.

Wagner, Zagelmeyer & Co. v. Detroit & Macinac Co., 13 I. C. C. 160, 165; Reliance Textile & Dye Works v. S. Ry. Co., 13 I. C. C. 48, 54; Memphis Freight Bureau v. Ft. S. & W. R. R. Co., 13 I. C. C. 1, 4; Corn Belt Meat Produces' Ass'n. v. C. B. & Q. Ry. Co., 14 I. C. C. 376, 386; Greater Des Moines Committee v. C. Gt. W. Ry. Co., 14 I. C. C. 294, 297; Standard Lime & Stone Co. v. Cumberland Valley R. R. Co., 15 I. C. C. 620, 625; Cedar Hill Coal & Coke Co. v. A. T. & S. F. Ry. Co., 15 I. C. C. 73, 77; Delray Salt Co. v. C. St. P. M. & O. Ry. Co., 16 I. C. C. 507, 511; Duncan & Co. v. N. C. & St. L. Ry. Co., 16 I. C. C. 590, 595; Wilson Produce Co. v. Pa. R. R. Co., 16 I. C. C. 116, 122; Wichita Board of Trade v. A. T. & S. F. Ry. Co., 25 I. C. C. 625, 632; Meridan Fertilizer Factory v. H. & P. Ry. Co., 26 I. C. C. 351; Commercial Club of Duluth v. B. & O. R. R. Co., 27 I. C. C. 639, 652; Arkansas Pass Channel and Dock Co. v. G. H. & S. A. Ry. Co., 27 I. C. C. 403, 415; Port Arthur Board of Trade v. A. & S. Ry. Co., 27 I. C. C. 388, 402; Mem-

phis Freight Bureau v. I. C. R. R. Co., 27 I. C. C. 1; Worn v. B. & L. R. R., 32 I. C. C. 58; Goldcamp Mill Co. v. N. & W. Ry. Co., 39 I. C. C. 433, 444; Lutcher & Moore Lum. Co. v. T. & N. O. R. R., 42 I. C. C. 88; Western Pacific v. S. P. Ry., 55 I. C. C. 71, 81, 82.

§10½. Failure to Agree on Divisions.

See Division §4.

IMPORTANT CASES SINCE 1908

(a) The Commission holds that the inability of carriers to agree upon divisions is no justification for maintaining unduly prejudicial rates, a remedy being provided by section 15 of the commerce Act. Under the present unified management of the railroads there is still less basis for this plea. Ohio Valley Coal Operators Asso. v. I. C. R. R., 53 I. C. C. 148, 152.

(b) It has appeared in many cases before the Commission and is a matter of common knowledge that carriers frequently take advantage of their strategical position and demand divisions which fairly compensate them for surrendering a part of the line haul which they could perform. Carriers that are disadvantageously situated are frequently willing to accord liberal divisions in order to be permitted to share in traffic to or from a point reached only by a competitor. It can not, however, be said that the carrier having the strategical advantage may lawfully accept from one of its connections a division which permits that competitor to share on fair and compensatory terms in the competitive traffic and at the same time demand from another connection for the same service in movement of the same competitive traffic a division so high as to make it impossible for it to share therein on a compensatory basis. In other words, if the carrier having the strategical advantage were to admit one competitor to share in the traffic and exclude another by refusing to enter into any arrangement with it, or effect the same exclusion by exacting divisional arrangements which would prohibit participation by that connection in the traffic, the discrimination would be unlawful. Western Pacific v. S. P. Ry., 55 I. C. C. 71, 81.

ALL OTHER CITATIONS

Proportional Rates on Grain Products to Texas, 27 I. C. C. 282, 285; Koehler Produce Co. v. P R. R. Co., 27 I. C. C. 635; Clay County Coal Asso. v. C. & M. R. R. Co., 81 I. C. C. 414, 419, 420.

§11. Low Rate to Favored Point.

See Equalization of Rates; Origin of Traffic; State Rates and Regulation.

IMPORTANT CASES SINCE 1908

(a) Carriers may not by means of their intrastate rates discriminate against traffic moving in interstate commerce. Colonial Salt Co. v. C. B. & Q. R. R. Co., 31 I. C. C. 558, 570; H. E. & W. T. Ry. Co. v. U. S. 234 U. S. 342.

(b) The imposition of higher rates on interstate than on state traffic between the same points, in the same direction, over the same rails, subjects the interstate traffic to unjust discrimination in violation of the Act. Whether such interstate traffic is large or small in extent is immaterial, as in either event it is entitled to the full protection of the law. Class Rates between Stations in Louisiana, 33 I. C. C. 302, 304.

(c) Section 3 covers every discrimination between intrastate and interstate commerce. Intrastate rates within Illinois, 59 I. C. C. 350.

ALL OTHER CITATIONS

Board of Trade of Bristol, Tenn., v. V. & S. W. Ry. Co., 15 I. C. C. 453, 455; Board of Trade of Winston-Salem v. N. & W. Ry. Co., 16 I. C. C. 12, 18; Saunders & Co. v. Southern Express Co., 18 I. C. C. 415, 422, 424; Andy's Ridge Coal Co. v. Southern Ry. Co., 18 I. C. C. 405, 407; In Re Advances by Carriers Operating Between the Mississippi and Missouri Rivers, 21 I. C. C. 546, 549; In Re Advances on Meats and Packing-house Products, 23 I. C. C. 656, 664; In Re Investigation of Unreasonable Rates on Meats, 23 I. C. C. 656, 664; Meridith v. St. L. S. W. Ry. Co., 23 I. C. C. 31, 41, 45, 47; Southern Shippers' Traffic Assn., v. A. T. & S. F. Ry. Co., 24 I. C. C. 570, 584; Rates on Hay from the Northwest, 25 I. C. C. 680, 684; Cement Rates from Pennsylvania to New Jersey, 26 I. C. C. 687, 688; Oklahoma Portland Cement Co. v. M. K. & T. Ry. Co., 27 I. C. C. 101, 104; Southwestern Missouri Millers' Club v. St. L. & S. F. R. R. Co., 29 I. C. C. 28; Rhinelander Paper Co. v. M. St. P. & Ste. M. Ry. Co., 31 I. C. C. 555; Louisiana Sugar Planters' Asso. v. I. C. R. R., 31 I. C. C. 311; Carroll, Brough & Robinson v. A. T.& S. F. Ry. Co., 31 I. C. C. 466; Class Rates between Stations in Louisiana, 33 I. C. C. 302, 304; Elba Mfg. Co. v. S. Ry. Co.,

Unrep. Op. A-830; California Pine B. & L. Co. v. S. P. Co., 47 I. C. C. 372.

§11¼. Two Line Haul.

See Evidence §59.

IMPORTANT CASES SINCE 1908

(a) Discrimination may sometimes be effected as well by a joint rate as by a one-line rate. Traffic Bureau of Knoxville, Tenn., v. C. N. O. & T. P. Ry., 37 I. C. C. 687, 691.

(b) Joint rates on steam sizes of anthracite coal from Wyoming field of Pennsylvania to Albany, N. Y., district found unreasonable and unduly prejudicial to extent they exceeded rates maintained for one-line movement between same points. It does not appear that two-line haul results in greater cost of service than one-line haul. Reasonable and nonprejudicial rates prescribed, and reparation awarded. Somers v. N. Y., O. & W. Ry. Co., 78 I. C. C. 243.

ALL OTHER CITATIONS

Parlin & Orendorff Co. v. I. C. R. R., 34 I. C. C. 90; Hollingshead & Biel Co. v. M. & N. A. R. R., 48 I. C. C. 449.

IV. REMOVAL OF DISCRIMINATION.

§11½. In General.

CASES 1887-1908

(a) Preference existing under relative rates to competing localities must be shown to result from wrongful action of the carrier, before it can be required to readjust the rates. Wilmington Tariff Asso. of North Carolina v. Cincinnati, Portsmouth & Va. R. Co., 9 I. C. C. 118.

IMPORTANT CASES SINCE 1908

(b) A practice that is bad only because discriminatory can always be remedied by withdrawing the benefit to the favored parties or by extending it to the injured parties. In Re Mileage Books, 28 I. C. C. 318, 324.

(c) If discrimination were removed by extending the rate-breaking system, the final result would be that grain rates would be made on an arbritary mileage basis, without reduction in the rate per ton mile proportionate to the length of the haul. Such a result may finally be reached in rate making, but the industries and commerce of the country are now established on the present basis, and great commercial hardship would inevitably attend the abandonment of the present system. Wichita Board of Trade v. A. & S. Ry. Co., 29 I. C. C. 376, 379.

(d) A carrier is obliged by law to remove unjust discrimination which may arise from meeting competition or other conditions at one point and refusing to meet same conditions at another point entitled to same consideratain. San Toy Coal Co. v. A. C. & Y. Ry. Co., 34 I. C. C. 93, 98.

(e) The duty of the Commission under the terms of section 13, paragraph 4 of the interstate commerce act, is to require the removal of undue or unreasonable advantage, preference, or prejudice as between persons or localities in interstate commerce on the one hand and interstate or foreign commerce on the other hand, and of undue, unreasonable or unjust discrimination against interstate or foreign commerce, if found to exist, the law of any state or the decision or order of any state authority to the contrary notwithstanding. Arkansas fares and rates, 59 I. C. C. 471, 475.

(f) Prior to the transportation act, 1920, the Commission's orders requiring the removal of unjust discrimination or undue prejudice afforded carries the choice of reducing the higher rate to the level of the lower, increasing the lower to the level of the higher, or placing both upon some other common level. The act now empowers the Commission to prescribe the exact rates to be charged in such cases. Arkansas Jobbers' & Mfrs.' Asso. v. Director General, 59 I. C. C. 662, 669.

(g) An order of the Interstate Commerce Commission requiring the carriers brought before it to cease discrimination against the complaining shipper, resulting from the fact that his competitors were granted the privilege of creosoting in transit by other lines with whom the carriers had joint through rates, could not be complied with by discontinuing the joint rates, since that would still leave the complainant's competitors with the privilege under the combined local rates. Central R. Co. of New Jersey v. United States, 42 Sup. Ct. 80.

(h) Under order of Interstate Commerce Commission directing carriers "according as they participate in the transportation * * * to cease and desist" from discrimination in charging lower through rate from certain points in blanket territory than from another

point, the carriers could remove the discrimination either by decreasing the high rate, or by raising the low rate, or by giving both points an intermediate rate. United States v. Illinois Cent. R. Co. 44 Sup. Ct. 189.

ALL OTHER CITATIONS

Gottron Bros. Co. v. G. & W. R. R. Co., 28 I. C. C. 38, 45; Mississippi River Case, 28 I. C. C. 47, 55; Colorado Mfrs'. Asso. v. A. T. & S. F. Ry. Co., 28 I. C. C. 82, 88; In Re Mileage Books, 28 I. C. C. 318, 324; Swift & Co. v. L. & N. R. R. 40 I. C. C. 56; Huerfano Coal Co. v. C. & S. E. R. R. Co., 41 I. C. C. 657, 659; Weis-Peterson Box Co. v. M. & O. R. R., 46 I. C. C. 693, 697; Chamber of Commerce of Johnson City, Tenn., v. S. Ry. Co., 50 I. C. C. 605; Private Wire Contracts, 50 I. C. C. 731, 761; Oatman Codensed Milk Co. v. Director General, 55 I. C. C. 228; Illinois Classification, 55 I. C. C. 290, 306; Memphis-Southwestern Investigation, 55 I. C. C. 515, 533, 575; Montgomery Chamber of Commerce v. Director General, 55 I. C. C. 688; Wheeler Lumber Bridge & Supply Co. v. Director General, as Agent, 59 I. C. C. 6; Petroleum Oil and Petroleum Oil Products, 59 I. C. C. 499; Holmes & Hallowell Co. v. G. N., 60 I. C. C. 687; Badger Lumber Co. v. A., T. & S. F. Ry. Co., 60 I. C. C. 278; Public Service Commission of Oregon v. Director General, 62 I. C. C. 633; Rates, Fares and Charges of the N. Y. C. R. R. Co., 64 I. C. C. 55; Natchez Chamber of Commerce v. L. & A. Ry. Co., 66 I. C. C. 386; Salt from Louisiana Mines to Chicago, 69 I. C. C. 312, 313; Silica Sand Producers' Traffic Association v. Director General, 73 I. C. C. 549; Farley & Loettscher Mfg. Co. v. Director General, 73 I. C. C. 704; Williamette Valley Lumbermen's Association v. S. P. Co., 73 I. C. C. 733.

§12. Reduction of Rates.

IMPORTANT CASES SINCE 1908

(a) Interveners insisted that to make order prayed for would make a discrimination against them. The matter of adjusting rates relatively to meet conditions that will arise after the reduction herein ordered is made rests primarily with the defendants. Baer Bros. Mercantile Co. v. M. P. Ry. Co., 17 I. C. C. 225, 229.

(b) Relief against discrimination due to a rate adjustment cannot be denied on the ground that other points similarly situated might thereby be induced to ask for like relief. Chamber of Commerce of Newport News v. S. Ry. Co., 23 I. C. C. 345, 356.

(c) The Commission would not hesitate to reduce rates because of the threat of a reduction from carriers serving competing localities if unreasonableness and discrimination were established. Bituminous Coal Operators v. Penn. R. R. Co., 23 I. C. C. 385, 391.

(d) The Commission has held in cases where joint or proportional rates were made by all the carriers leading to certain points of destination, that it was within its power to end discrimination as between points of origin by a reduction in the rate from a certain point that was discriminated against. This principle only has application where the traffic from both groups of origin is necessarily transported to destination by the same connecting carrier or carriers, and where it is possible for the delivering carriers to put an end to the discrimination by the exercise of their power to refuse to enter into the preferential, joint or proportional rates. Scott Paper Co. v. P. R. R. Co., 26 I. C. C. 601, 604.

(e) If it be affirmatively shown that a particular rate is unjust and unreasonable, the fact that other rates adjusted in relation thereto may be affected, is no reason for refraining from reducing the rate assailed; but where for a long period of time rates have been the same and no complaint has been made with reference thereto, the presumption obtains that they are reasonable. Youngstown Sheet & Tube Co. v. P. & L. E. R. R. Co., 29 I. C. C. 428, 437.

(f) A disparity between two rates can as logically be removed by a reduction of the higher rate as by an increase in the lower. Chamber of Commerce, Houston, Tex., v. I. & G. N. Ry. Co., 32 I. C. C. 247, 259.

(g) A lower rate accorded a competing city for a shorter haul, forced by competition with a rival carrier having the short haul, is not sufficient reason for a reduction in rates. Cement Rates to Stations on the M. C. R. R., 32 I. C. C. 540, 541.

(h) Ordinarily it is more logical to remove a preference by raising special rates to a general basis than by reducing the general rates to the level of the

special rates. Kentucky Distilleries & Warehouse Co. v. L. & N. R. R., 36 I. C. C., 293, 300.

ALL OTHER CITATIONS

National Petroleum Assn. v. C. M. & St. P. Ry. Co., 14 I. C. C. 287, 290; Kindel v. N. Y. N. H. & H. R. R. Co., 15 I. C. C. 555, 560; Union Made Garment Mfrs'. v. C. & N. W. Ry. Co., 16 I. C. C. 405, 409; Milburn Wagon Co. v. L. S. & M. S. Ry. Co., 22 I. C. C. 93, 101; In Re Advances on Cement, 24 I. C. C. 290; In Re Wool, Hides and Pelts, 25 I. C. C. 185, 191; Oklahoma Portland Cement Co. v. M. K. & T. Ry. Co., 27 I. C. C. 101, 104; Corp. Comm. of Okla. v. A. T. & S. F. Ry. Co., 31 I. C. C. 532, 542, 543; Choate Oil Corp. v. Director General, 62 I. C. C. 93; Sublimed Lead to Trunk Points, 68 I. C. C. 343, 345.

§13. Disturbance of Settled Adjustment.

See Evidence §66; Relative Rates.

CASES 1887-1908

(a) Where the petitioners ask that the discrimination against their Town of Opelika, which it appears unjustly exists in favor of the Cities of Montgomery and Columbus, be corrected, that is, that the rates at Opelika be reduced, but when the order which they seek would increase the existing discrimination under the "Ball Arbitraries" in favor of Opelika as against the local points on each side of it, the relief was refused, as to grant it in a form in which no injustice would be done to other points, and yet conforming to the law, would involve a readjustment so general that other interests and localities are entitled to be first heard and their respective claims considered. Harwell v. Columbus & Western R. R. Co., 1 I. C. R. 631.

(b) When rates are relatively unjust, so that undue preference is afforded to one locality or undue prejudice results to another, the law is violated and its penalties incurred, although the higher rate is not in itself excessive, and such rule is especially applicable where a given relation in rates, long continued and concededly equitable, is suddenly and almost completely reversed, merely because other carriers to the longer distance point have disregarded their legal duty. Board of Trade of Lynchburg, Va. v. Old Dominion S. S. Co., 6 I. C. C. 632, 645.

IMPORTANT CASES SINCE 1908

(c) While it is proper to consider the effect of a decision upon the general rate adjustment applying over a wide scope of territory, rates which discriminate against one locality on a particular road cannot be justified on the ground that they are part of a general scheme adopted by several roads entering the same territory and supplying coal from different and unassociated districts. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 294.

(d) Unreasonable rates or undue and unjust discrimination should be corrected even if long-standing adjustments must be disturbed, but where no rate is alleged to be unreasonable, and the discrimination alleged and complained of is between an intermediate or primary market which naturally wishes to handle grain and forward it for export or to the consuming territory, and direct shipment of the grain from points where it is grown to export points and consuming territory under lower transportation charges, undue or unjust discrimination cannot be held to arise. Kansas City Transportation Bureau v. A. T. & S. F. Ry. Co., 15 I. C. C. 491, 498.

(e) Because a rate is reasonable in and of itself, it does not follow that it is lawful; rates are often so related to each other that to change one without a corresponding change in the other works an unjust discrimination. Lumbermen's Exchange of St. Louis v. A. & S. R. R. Co., 24 I. C. C. 220, 224.

(f) Fear of disrupting commercial conditions is no defense to charge of unjust discrimination. Middlesboro Board of Trade v. L. & N. R. R. Co., 27 I. C. C. 14, 21.

(g) The fact that a relation of rates has been in effect for many years cannot justify its continuance if it unduly wrongs one of the related communities. The Commission not infrequently inquires into the origin and history of rates and of rate relations in order properly to interpret and to understand their significance; but when dealing with a rate or relation of rates now in existence, the Commission can neither justify nor condemn it on the basis of its origin or of the conditions surrounding the traffic in the past, but only on the basis of its present effect in the light of present conditions. Commercial Club of Duluth v. B. & O. R. R. Co., 27 I. C. C. 639, 652.

(h) An unreasonable or unjustly discriminatory rate may not be allowed to stand merely because other rates will be affected by a change therein. Wilson & Co. v. C. M. & St. P. Ry., 50 I. C. C. 126, 129.

(i) A proper rate relationship from competing points is often of greater importance to the shipping public than the measure of the rate itself. Horses and Mules from Kansas City, Mo., 69 I. C. C. 97, 101.

(j) The mere fact that correction of rates that are unduly prejudicial or otherwise unlawful will or may require reductions or corrections in the rates on other traffic affords no justification for continuing a prejudicial adjustment on a particular commodity. Certain Teed Products Corp. v. A. T. & S. F. Ry., 73 I. C. C. 82, 89.

ALL OTHER CITATIONS

C. 186, 193; Intrastate Rates within the State of Texas, 62 I. C. C. 591; West Virginia Rail Co. v. B. & O. R. R. Co., 73 I. C. C. 149, 151; Atchison Board of Trade v. A. T. & S. F. Ry. Co., 80 I. C. C. 350.

V. PROCEDURE AND EVIDENCE

See Evidence; Procedure Before Commission.

§13½. In General.

CASES 1887-1908

(a) Where a complaint is made by a shipper that an unjust discrimination was perpetrated by a railroad company against him at a particular time named, in a case like the present, to rebut the inference arising from the circumstances, calling for explanation, among other evidence the carrier may show that during a long course of business neither it nor any of its agents have ever shown any unfriendly spirit whatever toward the shipper; and that on the contrary its agents, immediately before the matter complained of, made extra exertions in good faith to serve the shipper in obtaining cars for him from the connecting line to whom the shipper had to look for such cars. Riddle, Dean & Co. v. Baltimore & Ohio R. R. Co., 1 I. C. R. 778.

(b) In deciding a case against one or more carriers who are charged with making rates which are unjustly discriminating in a certain line of traffic, the decision made upon the facts of the particular case does not necessarily govern rates in other sections of the country, where the facts bearing upon them may be altogether different. Re Relative Tank & Barrel Rates on Oil (Com.), 2 I. C. R., 245.

(c) A case of undue or unreasonable preference or advantage or prejudice or disadvantage includes, as the terms themselves imply, consideration of all those circumstances and conditions which bear, not only upon the transportation by the carrier, but also often relate to the value and volume of the traffic, the favorable or unfavorable location of the places involved in the controversy, character of grades on different divisions, lateral lines, and other essential elements which enter more particularly into matters of relative services and relative rates. Trammell v. Clyde Steamship Co., 4 I. C. C. 121, 141.

(d) The intent of a carrier to dis-

criminate against certain shippers will not render it liable for damages, if the act committed is not in fact an illegal discrimination. Parsons v. Chicago & N. W. R. Co., 5 I. C. R. 95.

(e) An action against a carrier for violation of the interstate commerce act in making unlawful discriminations may be maintained in the name of the United States by the district attorney under §12 of such act as amended March 2, 1889, and Feb. 10, 1891, which provides that, upon the request of the commission, it shall be the duty of any district attorney to institute in the proper court, and to prosecute under the direction of the attorney general, all necessary proceedings for its enforcement and for the punishment of all violations thereof. United States v. Missouri Pacific R. Co., 5 I. C. R. 106.

(f) In passing upon the question of undue or unreasonable preference or disadvantage, it is not only legitimate but proper to take into consideration besides the mere difference in charges, various elements, such as the convenience of the public, the fair interests of the carrier, the relative quantities or volume of the traffic involved, the relative cost of the services and profit to the company, and the situation and circumstances of the respective customers, with reference to each other, as competitive or otherwise. Interstate Commerce Commission v. L. &. N. R. Co., 5 I. C. R. 656.

(g) Questions of unjust discrimination or undue preference must be treated broadly and practically. The carrier's business is one which involves so many considerations, and the necessity of taking into account so many conditions, that questions of this kind do not admit of any rigidly theoretical rules in their solution. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(h) One or more of several connecting carriers need not be made parties to a proceeding before the Interstate Commerce Commission against another connecting carrier for unlawful discrimination in rates between places wholly on its own line as compared with the through rate over the connecting lines. Daniels v. Chicago, R. I. & P. R. Co., 6 I. C. C. 458.

(i) Question of undue preference is one of fact.—Whether there has been an undue or unreasonable prejudice or preference, or whether the circumstances and conditions of carriage have been substantially similar or otherwise, is a question of fact depending on the matters proved in each case. Inaterstate Commerce Commission v. Alabama Midland Ry. Co., 7 I. C. C. App. CIX..

(j) Complainant alleged that defendant had unjustly discriminated in rates and facilities for the transportation of sand against him and in favor of his competitors, but the evidence was not sufficient to show breach of legal duty on the part of the defendant, and the complaint was dismissed without prejudice. Castle v. Baltimore & O. R. Co., 8 I. C. C 333.

(k) Dismissal as to defendant carrier where it appears that such carrier has removed the discrimination complained of as to its lines. Chicago Live Stock Exchange v. Chicago G. W. Ry. Co., 10 I. C. C. 428.

IMPORTANT CASES SINCE 1903

(l) Comparison of actual rates paid with lower paper rates which competitors would theoretically have to pay for same distance fails to prove undue discrimination. Capital City Oil Co. v. Y. & M. V. R. R. Co., 39 I. C. C. 141, 146.

(m) Complainants by pressing claims for extension of its jobbing territory court similar action by competitors in adjacent states, but this should not deter a community suffering from unjust or discriminatory rates from making complaint thereof. Greater Des Moines Committee v. C. St. P. M. & O. Ry. Co., 42 I. C. C. 65, 73.

(n) It is obvious that to remove undue prejudice it is necessary to have definite standards of comparison and that even where class rates themselves are the same, these can exist only where the descriptions of the articles and the various rules and regulations are the same for both interstate and intrastate shipments. Railroad Comm. of La., 48 I. C. C. 312, 369.

(o) Where complaints challenge the propriety of practically the entire rate structure on a commodity in the territory outlined in the statement of the case, it is not only the usual practice but is indeed the duty of the Commission on the broad general principles embodied in the Act to examine the whole rate situation in order to ascertain whether the individual rates are fairly related to each other and whether the whole

rate fabric, besides being reasonable, is free from unlawful preferences and discriminations . The Southeastern Sugar Cases, 48 I. C. C. 739, 754.

(p) Whether undue or unreasonable preference or advantage exists in a particular case is a matter of fact. National Traffic League v. A. & R., 61 I. C. C. 120, 123.

(q) Where a shipper applies to the Interstate Commerce Commission in regard to discrimination, he must proceed in accordance with the Interstate Commerce Act. Petition of Southern Lumber & Mfg. Co., 210 S. W. 639.

(r) A finding of unlawful discrimination can not be predicated on mere assumption or assertion of its existence. Davison & Namack Foundry Co. v. P. R. R. Co., 81 I. C. C. 345, 346.

(s) In defense to complaint alleging undue prejudice defendant relied chiefly on disclosure of divisions, HELD: Issue is whether joint rates as such are free from undue prejudice and preference; and it constitutes no defense to show that divisions are reasonable or otherwise not violative of the act. Contention means that if particular rates were found unduly prejudicial and preferential, carriers without making any change in rates, but by readjustment of divisions, could rid rates of their unlawful character, thus leaving shippers where they were before. Clay County Asso. v. C. & M. R. R. Co., 81 I. C. C. 414, 419, 420.

ALL OTHER CITATIONS

P. & R. Ry. Co. v. U. S., 219 Fed. 989, 993; American Round Bale Co. v. A. T. & S. F. Ry. Co., 32 I. C. C. 458, 463; West Lumber Co. v. M. K. & T. Ry., 38 I. C. C. 746; Major Stave Co. v. M. D. & G. R. R. Co., 39 I. C. C. 573, 574; Mobridge Grocery Co. v. C. M. & St. P. Ry., 52 I. C. C. 307; Seaboard Air Line Ry. Co. et al. v. United States et el, 41 Sup. Ct. 24; Natchez Chamber of Commerce v. L. & A. R. R., 58 I. C. C. 610, 618, 642; Chicago, Lake Shore & S. B. Ry. Co. v. Director General, 58 I. C. C. 135, 141; Minnesota Fares and Charges, 62 I. C. C. 198; Natchez Chamber of Commerce v. L. & A. Ry. Co., 62 I. C. C. 464; Mayer & Co. v. C., M. & St. P. Ry. Co., 69 I. C. C. 519, 522; Reduced Rates form New York Piers, 81 I. C. C. 312, 324; Pittsburgh Coal Producers Asso. v. P., C. C. & St. L. R. R. Co., 83 I. C. C. 145.

§14. Burden of Proof.

See Burden of Proof; Evidence I.

CASES 1887-1908

(a) The burden is on the carrier to justify the fact of discrimination when that is admitted and the service is stated to have been substantially the same, and rendered under substantially the same circumstances and conditions. Samuels v. Louisville & N. R. Co., 4 I. C. R. 420.

(b) Undue discrimination in rates between localities may be shown without proving actual shipments from the favored place during the time, and after such shipments the published rates of the carrier made the discrimination, and shipments were actually made at the published rates from the favored place both before and after the shipments from the other. Seawell v. Kansas City, Ft S. & M. R. Co. (Mo.), 5 I. C. R. 262.

(c) The burden of proving undue preference or undue prejudice rests upon the complaining party. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(d) Every shipper is legally entitled to fair opportunity and treatment in the use of these public utilities, and any discrimination which in substantial degree deprives shippers of such use must be considered unjust, unless forced by justifying conditions. In such a case the burden of proof is upon the complainant to the extent of showing discrimination, and then upon the carrier to show that the discrimination was justified. Richmond Elevator Co. v. Pere Marquette R. Co., 10 I. C. C. 629.

IMPORTANT CASES SINCE 1908

(e) The filing by carriers of an application for relief from the operation of section 4 does not preclude a determination by the Commission of a complaint under section 3. Mayor and Council of Boston v. A. C. L. R. R. Co., 24 I. C. C. 50.

(f) One of the ways of showing unreasonableness under the first section of the Act, is by proving that a rate is unduly high, as compared with rates to other places similarly situated, and therefore unjustly prejudicial also, under the third section; and one of the ways of showing undue prejudice and disadvantage under the third section, is by showing unreasonableness and excessiveness in the rate under the section and

then comparing it with the rates to similarly located places. Board of Trade of Carrollton, Ga., v. C. of Ga. Ry. Co., 28 I. C. C. 154, 164.

(g) In cases involving the relationship of rates between points in one group, as compared with rates from nearby points in another group taking lower rates, the question whether, under the circumstances of such an adjustment, the discrimination or preference is undue, is one of fact to be determined from all the circumstances of the particular case. Hammerschmidt & Franzen Co. v. C. & N. W. Ry. Co., 30 I. C. C. 71, 81.

(h) Transportation conditions under which rates compared established must be shown to be substantially similar. Chamber of Commerce, Houston, Tex. v. I. & G. N. Ry. Co., 32 I. C. C. 247, 251.

(i) It is not sufficient to consider rates to an intermediate market, nor alone rates from such market, if the question of discrimination between such markets is to be determined. Board of Trade of Kansas City v. St. L. & S. F. R. R. Co., 32 I. C. C. 297.

(j) The fact that suit was commenced against a complainant, and not against its competitors, does not prove undue prejudice within the meaning of the act. American Coal & Coke Co. v. M. C. R. R., 36 I. C. C. 195, 197.

(k) The Commission must, to make a finding of discrimination, be shown the fact of discrimination, not merely the difference in ratings without the cause and reason for the difference. National Confectioners' Asso. v. A. & R. R. R., 49 I. C. C. 566, 576.

(l) Comparison of distance, even when supported by other evidence as to operating conditions, do not constitute conclusive evidence of undue prejudice. Commercial Club of Greeley v. C. & S. Ry., 53 I. C. C. 66, 74.

(m) Contention, without proof, that lack of industries and communities on defendant carrier's line due to rate adjustment assailed as prejudicial. HELD, finding of undue prejudice can not be based upon assumptions such as these. United States v. Director General, as Agent, 80 I. C. C. 143, 149.

(n) The mere showing that rates from one point in a territory are higher than rates, blanketed or not, from other points in that terrtitory, whether maintained by the same carrier or by different carriers does not establish undue prejudice or preference. State of Idaho v. O. S. L. R. R. Co., 83 I. C. C. 4, 8.

ALL OTHER CITATIONS

Greater DesMoines Committee v. C. G. W. Ry. Co., 18 I. C. C. 98, 104; Bituminous Coal Operators v. P. R. R. Co., 23 I. C. C. 385, 391, 392; Sioux City Terminal Elevator Co. v. C. M. & St. P. Ry. Co., 23 I. C. C. 98, 107, 109; Fedder v. Southern Exp. Co., 41 I. C. C. 529; Donner Steel Co., Inc., v. D. L. & W., 57 I. C. C. 745, 751.

§15. Showing of Damage.

See Reparation §10½.

CASES 1887-1908

(a) That no direct injury results does not justify discrimination; Kindel v. Atchison, T. & S. F. R. Co., 8 I. C. C. 608.

IMPORTANT CASES SINCE 1908

(b) And in discrimination cases, the measure of damage contemplated by the Act is the pecuniary loss inflicted upon the shipper or consignee as a result of the rates paid. The damage might be the same as the difference between the two rates, less than this amount, or greater, but it must be definitely proven in order to warrant an order of reparation. The Commission can not assume the fact that there has been damage nor estimate the amount thereof. Such contentions must be established by evidence and proof of such evidentiary value as would warrant a judgment in a court of law. In such cases the claimant must not only show that the discrimination alleged or found to exist has operated to his injury but must also show that he has been damaged and the amount thereof. Coal Switching Reparation Cases in Chicago, 36 I. C. C. 226, 232.

(c) In order to hold a carrier or carriers responsible in damages for unjust discrimination it must be affirmatively established, among other things, that traffic actually moved at the lower rate from the point alleged to have been unlawfully favored over the line of the carrier or carriers responsible for the discrimination. Greenbaum & Co. v. S. Ry., 38 I. C. C. 715, 718.

(d) In a case predicated upon unjust discrimination of rates, the damage suffered, if any, is not always measurable by the exact difference in rates; it may be more or less. Mere diminution or loss of prospective trade profits does

not alone afford a basis for reparation under the Act. The fact of damage as well as the amount must be satisfactorily established. Brooks Coal Co. v. Wabash R. R. Co., 39 I. C. C. 426, 432.

(e) Where undue prejudice under section 3 of the Act has been established and reparation is prayed, not only the injury but the fact and amount of resulting damage must be proven. Such damage is not necessarily to be measured by the difference in the rates. Fogarty & Sons v. N. Y. N. H. & H. R. R., 49 I. C. C. 744, 748, 749.

(f) In discrimination cases it must not only be shown that the discrimination alleged to exist operated to the injury of the complainants, but also that they have been damaged and the amount thereof. Compton Coal Co. v. D. & R. G. R. R., 55 I. C. C. 718, 720.

(g) During a portion of the period of movement the government fixed the price of pig iron, f. o. b. furnace, at which price complainant and other furnaces were required to sell their commodity. It can not be said that any of the alleged favored competitors controlled the prices to complainant's detriment. It is true that some competitors may have reaped greater profits than complainant, but that does not establish damage to complainant as a consequence of undue prejudice. Wharton Steel Co. v. Directo General, 59 I. C. C. 11, 24.

(h) The fact of damage can not be presumed from the ascertained existence of unjust discrimination under section 2 or undue prejudice under section 3 of the act; nor is the amount of any damage that may have resulted therefrom necessarily measured by the difference in rates. In each case it must be proved that the complainant has suffered actual pecuniary damage as a direct and proximate result of the unlawful discrimination or prejudice, and the amount of the damage must be established with reasonable certainty by definite facts, without resort to conjecture, speculation or unsupported opinion. A. H. Kerr & Co. v. S. S. R., 62 I. C. C. 296, 299.

(i) That complainant was compelled to shrink its profits on account of lower rates enjoyed by competitors is no such proof of damage as is necessary in discrimination cases. Gulf Lumber Co. v. G. H. & S. A. Ry. Co., Unrep. Op. 2097.

(j) Reparation sought following payment of alleged discriminatory and unduly prejudicial rates, denied. Complainant's selling price is not fixed in relation to prices of competitors, nor controlled by them, and no loss of business is shown to result from rate situation. That complainant would receive additional profit in difference between rate charged and that enjoyed by competitors is not sufficient to support award of reparation even if defendants are guilty of preferring such competitors. Koenig Coal Co. v. B. & O. R. R. Co., 81 I. C. C. 683, 684.

(k) Fact that under an adjustment of rates a shipper may be unable to sell with reasonable profits at certain points does not warrant finding that adjustment is unduly prejudicial. Lester & Toner v. L. I. R. R. Co., 83 I. C. C. 251, 253.

ALL OTHER CITATIONS

Joynes v. Penn. R. R. Co., 17 I. C. C. 361, 367; Minneapolis Threshing Machine Co. v. C. St. P. M. & O. Ry. Co., 17 I. C. C. 189, 190; Inter-National Salt Co. v. Penn. R. R. Co., 20 I. C. 718, 720; Home Packing Co. v. Director General, 57 I. C. C. 691, 697; Donner Steel Co. v. D. L. & W. R. R. Co., 57 I. C. C. 745, 752; Montana Oil Co. v. A. T. & S. F. Ry. 58 I. C. C. 85; George R. Franzen v. Director General, 58 I. C. C. 213; Wharton Steel Co. v. Director General, 59 I. C. C. 11, 84; Birmingham Packing Co. v. Director General, 59 I. C. C. 81, 89; Central Iron &

Steel Co. v. Pa. R. R., 59 I. C. C. 385, 390; Independant Home Oil Co. v Director General, 59 I. C. C. 398, 403; E. A. Wexelbaum & Bro. v. Ocean Steamship Co., 59 I. C. C. 480, 482; Philip Carey Mfg. Co. v. Director General, 59 I. C. C. 640, 648; Oklahoma Producing & Refining Corp. v. Director General, 60 I. C. C. 255, 257; Cambria Steel Co. v. Director General, 60 I. C. C. 459, 464; Nat'l Spring & Wire Co. v. Director General, 60 I. C. C. 564, 568; Allegheny Steel Co. v. Director General, 60 I. C. C. 575, 578; Hines Lumber Co. v. Director General, 60 I. C. C. 590; Illiff-Bruff Chemical Co. v. Director General, 60 I. C. C. 720; Inman-Poulsen Lumber Co. v. S. P., 61 I. C. C. 185; Chaote Oil Corporation v. Director General, 62 I. C. C. 93, 95; Wertheim Coal & Coke Co. v. L. V., 62 I. C. C. 211, 216; Louisville Cement Co. v. Director General, 62 I. C. C. 362; Security Mills & Feed Co. v. Director General, 62 I. C. C. 405; W. H. Barber & Co. v. Director General, 61 I. C. C. 23, 28; Schlicher v. Director General, 62 I. C. C. 181, 185; Kerr & Co. v. S. S. Ry. Co., 62 I. C. C. 269, 302; Canton Chamber of Commerce v. P. Co., 62 I. C. C. 726; Peerless Coal Co. of Illinois v. A. T. & S. F., 63 I. C. C. 335; Albers Bros. Milling Co. v. Director General, as Agent, 66 I. C. C. 593; Clay County Coal Asso. v. C. & M. R. R. Co., 81 I. C. C. 414, 422.

§16. Action in Court.

See Action at Law; Courts §11.

CASES 1887-1908

(a) The allowance of a rebate by a common carrier to certain of his customers from the tariff rates charged other customers for precisely similar services is sufficient of itself to show that the rates charged the latter were unreasonable, and that there was unjust discrimination against them, illegal by the common law, which will give the latter a right to recover the amount paid by them in excess of the rates charged the former after deducting the rebates. Cook & Wheeler v. Chicago R. I. & P. R. Co., 3 I. C. R. 383.

(b) Payments of freight charges made by shippers of goods in ignorance that services similar to those received by them were being secretly rendered by the carrier to other shippers for much less compensation, and after the positive assertion of the carrier that no lower rates were received by it, are not voluntary within the rule that voluntary payments cannot be recovered back. Cook & Wheeler v. Chicago R. I. & P. R. Co., 3 I. C. R. 383.

(c) The bona fides of a complaint of discrimination by a carrier cannot be attacked in the circuit court by impeaching the good faith of those who in the first instance induced the Interstate Commission to take action under the provisions of the Interstate Commerce Law for the lodging by any person of complaints with the Commission, and that no complaint shall be dismissed because of the absence of direct damage to the complainant, but that the Commission may institute any inquiry on its own motion, and requiring the Commission, if the law has been violated, to notify the carrier to cease from further violation, and, in case of its refusal, to apply by petition to a circuit court in equity to enforce its order. Interstate Commerce Commission v. Detroit, G. H. & M. R. Co. (C. C. W. D., Mich.) 4 I. C. R. 722.

(d) No recovery for discriminating charges.—A recovery by a shipper from a carrier because of partiality and favoritism to other shippers cannot be had in the absence of a statute, provided the complaining shipper has not been charged more than an reasonable rate. Parsons v. Chicago & Northwestern Ry. Co., 7 I. C. C., App. VCI.

(e) A valid order of the Commission will be enforced although based on wrong sections of a statute.—An order of the Interstate Commerce Commission prohibiting discrimination between places will be enforced where it was proper under all the circumstances, although it was based upon the wrong provision of the Interstate Commerce Act. I. C. C. v. E. Tenn., Vir. & Georgia R. R Co., 8 I. C. C., App. XLIII.

IMPORTANT CASES SINCE 1908

(f) It might not be amiss here to note that the question whether the discrimination by a carrier found to exist can be held in law to be attributable to the parties to the order, and whether they can be required to cancel existing joint rates unless it is removed, can be reviewed by a federal court regardless of any finding by the Commission. Central R. Co., of New Jersey v. United States, 42 Sup. Ct. 80.

ALL OTHER CITATIONS

M. K. & T. Ry. Co. v. The New Era Milling Co., 79 Kan. 435, 448, 100 P. 273; Lilly Co. v. N. P. Ry. Co., (Wash. 1911), 117 P. 401, 402, 403; L. & N. R. R.

Co. v. Ohio Valley Tie Co. (Ky. 1914), 170 S. W. 633, 641, 642; Langhill v. Pennsylvania R. Co., 98 Atl. (Pa. 1916), 873; Mfrs. Ry. Co. v. United States 38 Sup. Ct. 383.

§17. Reparation.

See Supra §15; Refrigeration IV, Reparation.

CASES 1887-1908

(a) The intent of a carrier to discriminate against certain shippers will not render it liable for damages if the act committed is not in fact an illegal discrimination. Parsons v. Chicago & N. W. R. Co. (C. C. App. 8th C.), 5 I. C. R. 95.

(b) The measure of damages for undue discrimination against shippers is the amount of the preference given. Seawell v. Kansas City, Ft. Scott & Memphis R. Co.,, 5 I. C. R. 262.

(c) Complainants allowed to apply for further hearing, where the evidence relating to damages was found to be unsatisfactory and inconclusive. Gallogly v. Cincinnati, H. & D. R. Co., 11 I. C. C. 1.

(d) Reparation allowed complainant where defendants' rates unjustly discriminated against complainant. City Gas Co. v. Baltimore & O. R. Co., 11 I. C. C. 371.

IMPORTANT CASES SINCE 1908

(e) A shipper at common law could recover for discrimination in rates; the carrier being bound to carry at an equal rate for all customers for substantially similar service and under substantially similar conditions. Jeremy Fuel & Grain Co. v. Denver & R. G. R. Co., (Utah 1922), 207 Pac. 155.

ALL OTHER CITATIONS

Pennsylvania R. R. Co. v. International Coal Mining Co., 33 Sup. Ct. 893, 896; 230 U. S. 184; Holland Blow Stave Co. v. A. C. L. R. R. Co., 24 I. C. C. 81, 88; Curry & Whyte Co. v. D. & I. R. Co., 30 I. C. C. 1, 14; Hormel & Co. v. C. M. & St. P. Ry. Co., 30 I. C. C. 98, 102; L. & N. R. R. Co. v. Ohio Valley Tie Co. (Ky. 1914), 170 S. W. 633, 642, 640; Brooks Coal Co. v. Wabash R. R. Co., 39 I. C. C. 426, 432; Divisions of Joint Rates for Transportation of Stone, 41 I. C. C. 330; Hormel & Co. v. C. G. W. R. R., 49 I. C. C. 639; Fogerty & Sons v. N. Y. N. H. & H. R. R., 49 I. C. C. 744 748; Springfield Milling Co. v. C. & N. W. Ry., 51 I. C. C. 216; Western Pacific v. S. P. Ry., 55 I. C. C. 71, 83; Inman-Poulsen Lumber Co. v. S. P. Co., 55 I, C. C. 357, 362; Hormel & Co. v. C. G. W. R. R., 56 I. C. C. 419, 425; Inman-Poulsen Lumber Co. v. S. P., 61 I. C. C. 185, 186; Vicksburg S. & P. Ry. Co. et al. v. Anderson-Tully Co., 41 Sup. Ct. 524; Schlicher v. Director General, 62 I. C. C. 181, 183; Wertheim Coal & Coke Co. v. L. V. R. R. Co., 62 I. C. C. 211, 216; Kerr & Co. v. S. S. Ry. Co., 62 I. C. C. 296, 299, 302; Canton Chamber of Commerce v P. Co.,, 62 I. C. C. 726; Lake Charles Rice Milling Co. v. A. & N. Ry. Co., 63 I. C. C. 18, 40.

§18. Complaint.

See Procedure Before Commission. II.

CASES 1887-1908

(a) A complaint of discrimination in rates otherwise insufficient is not made good by a single allegation of the nonfiling of the rate sheet, evidently inserted only to develop the intent of the defendant. Parsons v. Chicago & N. W. R. Co. (C. C. App. 8th C.), 5 I. C. R. 95.

IMPORTANT CASES SINCE 1908

(b) Where an increase in rates may operate to create or increase a discrimination it is not always necessary to inquire in passing upon the propriety of the increase whether the discrimination be undue; but where the relation has not been changed and where the discrimination, if one previously existed, has not been intensified, that question does not properly arise upon the justification of the increase. The party claiming to rest under such discrimination should file his complaint in due form, thereby bringing to the attention of interested carriers and other parties the exact question for consideration. Grain Rates in Central Freight Association Territory, 28 I. C. C. 549, 557.

(c) With the contention that an issue of discrimination in the sense of preference and prejudice under section 3 of the Act cannot be considered in a proceeding relating to a rate increased since 1910, the Commission is unable to agree. Wickwire Steel Co. v. N. Y. C. & H. R. R. Co., 30 I. C. C. 415, 419.

(d) When the question of freight rates enters into the competition of cities and towns in any respect whatsoever, whether that competition is one for trade, factories or people, complaints, al-

leging unjust discrimination will be entertained by Commission. Transcontinental Commodity Rates, 32 I. C. C. 449, 454.

(e) Where there is a general allegation that the rates in question are unjustly discriminatory, but no attempt to point out the character of the alleged discrimination, nor any prayer for the removal of any discrimination, no question of unjust discrimination under section 2, or of undue preference or prejudice under section 3, is properly raised. Graham & Gila County Traffic Assn. v. A. E. R. R. Co., 40 I. C. C. 573, 574.

(f) Certain carriers contended that no issue of undue prejudice under section 3 is raised by the pleadings. The complainants allege violations of section 3, but fail to designate the individuals, organizations, communities or traffic accorded undue or unreasonable preference or advantage, to the undue prejudice of complaints. The carriers were not put upon notice of the particular violations of law they were called upon to defend. Under these circumstances, and as the Commission construes the record before it, no issue of undue prejudice under section 3 has been properly raised, and the Commission is confined to the questions of the reasonableness of the rates attacked and the alleged violations of section 4. Guildfold Lumber Mfg. Co. v. S. Ry., 53 I. C. C. 669, 670.

(g) Complaint attacking rates on lumber from points in southern territory east of the Mississippi River to Gulf ports, when for export, which became effective due to the cancellation of all export rates by the director general under General Order No. 28, and seeking restoration of the export rates in effect prior to the general order, plus increases since authorized. HELD, evidence submitted by complainant too general in character to warrant a finding that rates attacked are unreasonable, discriminatory, or unduly prejudicial. Southern Pine Asso. v. Director General, as Agent, 73 I. C. C. 731.

(h) Where complaint places in issue alleged undue prejudice against interstate commerce in favor of intrastate commerce, reasonableness of interstate rates must necessarily be determined before determination of issue of undue preference and prejudice can be made, notwithstanding complaint may contain no specific allegation with regard to reasonableness of interstate rates. Atlas Portland Cement Co. v. C., B. & Q. R. R. 81 I. C. C. 1, 3.

(i) Complaint alleged undue preference of certain named points "and other destinations taking relatively lower rates than" points alleged to be prejudiced. Under latter allegation complainant introduced evidence tending to show undue preference of points not specifically named in complaint, without objection by defendants, who introduced counter evidence. Upon oral argument defendants objected to finding of undue preference of such points as beyond issue. HELD: Defendants do not claim to have been put at any disadvantage by failure to specifically name these points in complaint, and objection therefore not sustained. Graham & Gila Counties Traffic Asso. v. A. E. R. R. Co., 81 I. C. C. 134, 135.

(j) At hearing, formal motion by complainant to strike defendant's answer from files on ground that it does not comply with Rule IV (e) of commission's Rules of Practice, which provides that answers denying discrimination, preferences or prejudice, or unreasonableness, should state fully grounds relied upon in making such denial, HELD: Answer filed does not purport to admit existence of discrimination, preference, or prejudice and therefore does not deny that it is unjust, undue, or unreasonable under the act. Answer is a complete specific denial of existence of any discrimination, preference, or prejudice. Motion denied. Koenig Co. v. B. & O. R. R. Co., 81 I. C. C. 683; Ohio Refining Co. v. L. & N. R. R. Co., 81 I. C. C. 688.

Mayor and Council of Boston, Ga. v. A. C. L. R. R. Co., 24 I. C. C. 50; Wheeler Lumber Bridge & Supply Co. v. Director General, 59 I. C. C. 6, 10.

DISINFECTING CHARGES

See Facilities and Privileges §5½.

IMPORTANT CASES SINCE 1908

(a) A carrier is entitled to make a reasonable charge for disinfecting cars. Charges collected for cleaning and disinfecting cars carrying livestock for the prevention of foot and mouth disease, not found unreasonable. Hammond, Standish & Co. v. M. C. R. R. Co., 42 I. C. C. 102.

(b) Where a special charge for clean-

ing and disinfecting cars in compliance with government quarantine regulations is in issue, the fact that a similar service had for a time been performed without charge is not of particular value as tending to prove that the cost of the service required is already provided for in the transportation rate. Hammond, Standish & Co. v. M. C. R. R., 42 I. C. C. 102, 104.

(c) Cars can not be disinfected properly unless they are thoroughly cleaned; that is to say, disinfecting a car includes cleaning it in a manner satisfactory to a government inspector. A car cleaned for shipments of live stock is simply one from which the refuse has been removed from the floor space. Natl. Live Stock Exchange v. A. & S. Ry., 50 I. C. C. 578, 582.

I. ESTABLISHMENT.

§1. In General.

CASES 1887-1908

(a) A prayer in a petition against a railroad company that the company be required to make its rates from one terminus to the town from which the petition proceeds and to other towns in the same section, and also from such terminus to the petitioning town and from thence to such other towns, on a uniform and equal mileage basis, cannot be granted, the Commission having no power to require the adoption of such a basis. LaCrosse etc. v. Chicago etc. R. Co. 2 I. C. R. 9.

(aa) A departure from the rule of equal mileage rates as applied to the several branches of a road is not conclusive that such rates are unlawful; but the burden is on the company making such departure to show its rates to be reasonable when disputed. Northwestern Iowa Grain & Livestock Asso. v. C. & N. W. R., 2 I. C. C. 431, 434.

(b) While it must be conceded that there is an apparent justice in the claim that rates should be apportioned to distance, it is not an absolute and unconditional right from which a departure may not be justified by other considerations. But, if the effect of disregarding distance is to impose burdens for the benefit of others of those who have the natural advantage of location, it is unjust and can not be sanctioned. Imperial Coal Co. v. P. & L. E. R. Co., 2 I. C. C. 436, 443.

(c) It was not the intention of the Act to establish mileage rates; that they are not compulsory, nor always politic; that one effect of such rates would be to put an end to competition as a factor in making rates, and that it would work a revolution in the business of the country, which though it might be beneficial in some instances would be destructive in others. Imperial Coal Co. v. P. & L. E. R. R., 2 I. C. C. 436, 443.

IMPORTANT CASES SINCE 1908

(d) The impossibility of applying a mileage scale to all points in a blanket may be due mainly to the fact that many lines enter it. Wisconsin & Arkansas Lumber Co. v. St. L. I. M. & S. Ry. Co., 33 I. C. C. 33, 45

(e) Line-haul rates vary as to shipments transported by different lines for the same shipper and by the same line for different shippers, although all may pay the same rate; but for this service it is impracticable to grade rates with such nicety as to make them absolutely dependent upon every slight variation in the measure of service rendered. Iron Ore Rate Cases, 41 I. C. C. 181, 200.

(f) In checking out rates under a distance tariff via the routes of different carriers where the short line makes the rate, if intermediate points via the longer lines can not exceed the terminal rate, the result will be a scale of rates via these lines which is substantially below the distance tariff. In other words, the distance tariff would simply be a maximum basis upon which to check out the rates. Western Cement Rates, 48 I. C. C. 201, 224.

(g) In making rates between territories of different rate levels the rate for the entire distance should be calculated under each scale and an average taken. Western Cement Rates, 48 I. C. C. 201, 238.

(h) All distance scales and group rates must of necessity disregard slight inequalities in cost of service and other conditions. Whether or not a distance scale may properly be prescribed is peculiarly a matter to be determined from a consideration of all the circumstances and conditions. Shreveport-Texas Cattle, Lignite, Wood, and Tanbark, 48 I. C. C. 283, 286.

(i) Where distance scales of rates are rigidly applied, all points should be given the benefit of their short-line distance, and it is impracticable where rates are constructed on a distance basis to follow the actual movement of traffic thru alternative channels. Memphis-Southwestern Investigation, 55 I. C. C. 515, 545.

(j) The Commission has said that if it were to start with a clean slate some so-called scientific basis of rate making, based on strict mileages, might be adopted, but as it is the process of rate making and dealing with rate situations must necessarily be one of evolution, not revolution. Kansas Rates, Fares and Charges, 64 I. C. C. 679, 681.

(k) Carriers authorized to cancel schedules proposing increased rates and new rules and regulations applicable to the transportation of live stock to, from and between points in the Southeast, purporting to be in compliance with directions quoted in East. Tennessee Packing Co., 63 I. C. C. 322, and to establish in lieu thereof a distance scale of rates agreed upon by carriers and shippers at the hearing. Live Stock to, from and between Points in the Southeast, 74 I. C. C. 419.

(l) A distance rate is a legal rate only when distance can be determined from a tariff publication with the same definiteness as the quantum of the rate itself. Central Iron & Coal Co. v. Director General, as Agent, 77 I. C. C. 300.

(m) Coal does not ordinarily move at distance rates where there is any substantial regular movement, lower commodity rates being usually provided. Cramp & Sons Co. v. Director General, as Agents, 83 I. C. C. 55, 57.

C. 419; Brick between Stations on the C. & O. Ry., 77 I. C. C. 416; Arizona Cattle Growers Asso. v. A. T. & S. F. Ry., 77 I. C. C. 617.

§2. Effect.

See Differentials.

IMPORTANT CASES SINCE 1908

(a) Objections made in principle to a distance scale are its lack of flexibility, that it does not take account of commercial conditions, that it makes no allowance for fourth section departures, that

it disregards such factors in rate making as commercial and water competition, giving effect only to the element of distance. Western Cement Rates, 48 I. C. C. 201, 217.

(b) Where only distance rates are in effect between two points and the distance between them is not shown in distance table referred to in connection with the rate, there is no rate legally applicable. Elton Lumber Co .v. N. O. T. & M. R. R., 50 I. C. C. 85, 86.

(c) It is believed, however, that where distance scales of rates are rigidly applied all points should be given the benefit of their short line distance, and that it is impracticable where rates are constructed on a distance basis to follow the actual movement of traffic through alternate channels. Memphis Southwestern Investigation, 55 I. C. C. 515, 545.

(d) The Iowa distance rates, regardless of their measure, can not be lawfully used as a basis for interstate rates. Hormel & Co. v. C. G. W. R. R., 56 I. C. C. 419, 424.

(e) Carriers urged that by express tariff provision the Iowa distance rate was not to be used either by itself or in combination in preference to a specific class or commodity rate; that this restrictive clause had the effect of eliminating the distance rate in cases where another basis exists for making through rates on interstate traffic: and that, therefore, no departure from the fourth section existed on the shipments in question. The tariff naming the distance rate was on file with the Commission and would have been applicable in the absence of the through rates charged. This was a departure from the fourth section protected by Fourth Section Application No. 3786. Departure denied, Heider Mfg. Co. v. B. & O., 58 I. C. C. 185.

(f) In a case it appeared that in the distance tariffs of the defendants, over which the shipments appear to have moved, the port terminals are not specified as stations, nor are they intermediate to any stations on those lines. The rates charged therefore were without tariff authority, and as it appears that there were no other rates applicable, it become necessary to determine what would have been reasonable rates. Condon Baking Co. v. Director General, 60 I. C. C. 149, 150.

(g) Shortest distance applies via a branch line, a portion of which is of narrow gauge construction. Contention that the physical situation is immaterial and that shipper is lawfully entitled to use the shortest distance in the application of distance rates in view of the tariff being unrestricted. HELD, such unrestricted distance rates would clearly be applicable via the branch line, but the charging of such rates on shipments moving via the longer route is not a violation of section 6, but rather involves unreasonableness under section 1. Since the branch line does not constitute a reasonable route the moving of shipments via the longer route does not constitute misrouting. Calivada Fertilizer Co. v. S. P. Co., 73 I. C. C. 496, 501, 502.

(h) A distance rate is a legal rate only when distance can be determined from a tariff publication with the same definiteness as the quantum of the rate itself. Central Iron & Coal Co. v. Director General, as Agent, 77 I. C. C. 300.

(i) The substitution of rates based on mileage for a group adjustment must necessarily result in many instances in different rates to points formerly grouped together and accorded the same rates. Memphis-Southwestern Investigation-Commodity Rates, 77 I. C. C. 473, 497.

(j) In computing distances under distance rates prescribed in instant case the shortest possible routes embracing as a maximum lines or parts of lines of not more than three carriers via existing connections for interchange of traffic should be used, and lines under common ownership and control be considered as a single line. Ft. Worth Cotton Mill v. A. T. & S. F. Ry. Co., 80 I. C. C. 18, 25.

(k) In applying distance rates lines under common ownership or control should be considered as a single line. Oklahoma Corp. Comm. v. A. R. R. 80 I. C. C. 607, 618.

(l) In applying rates under prescribed distance scale, carriers operating under a common ownership, control, or management to be treated as a single line. Arizona Packing Co. v. A. E. R. R. Co., 81 I. C. C., 115, 126, 127.

ALL OTHER CITATIONS

C. 300; McLean Lumber Co. v. A. G. S. R. R. Co., Unrep. Op. A-771; Cookston Gas Co. v. C. N. Ry. Co., 81 I. C. C. 128; Apache Cotton Oil & Mfg. Co. v. Director General, as Agent, 81 I. C. C. 569, 575; Shafer Lumber Co. v. Director General, as Agent, 83 I. C. C. 427.

II. REASONABLENEESS.

§3. In General.

See Reasonableness of Rates.

CASES 1887-1908

(a) Complainant attacked rates on merchandise from Chicago, Ill., to La Crosse, Wis., as compared with rates from Chicago to points beyond La Crosse in that the rates from Chicago to La Crosse plus the rates out and rates from LaCrosse to those towns are higher than from Chicago as unreasonable and discriminatory against La Crosse. HELD, the fact that rates of a railroad company are not established on a mileage basis does not necessarily make out their illegality or injustice. A prayer in a petition against a railroad company that the company be required to make its rates from one terminus to the town from which the petition proceeds and to other towns in the same section, and also from such terminus to the petitioning town and from thence to such other towns, on a uniform and equal mileage basis, cannot be granted, the Commission having no power to require the adoption of such a basis. Complaint dismissed. LaCrosse Manufacturers & Jobbers Union v. C. M. & St. P. Ry. 2 I. C. C. 9.

(aa) Through rates are not required to be made on a mileage basis, nor local rates to correspond with the divisions of a joint through rate over the same line, mileage is usually an element of omportance, and due regard to distance proportions should be observed in connection with the other considerations that are material in fixing transportation charges. McMorran & Co. v. G. T. R. R. of Canada, 2 I. C. C. 604, 606.

IMPORTANT CASES SINCE 1908

(ab) The fact that a mileage scale is an exception to the general basis does not condemn its propriety. Rates and Rules on shipments of Packing House Products, 36 I. C. C. 62, 70.

(b) The two factors in the construction of a distance scale are the terminal charge and the road-haul charge. The terminal charge at best is speculative, and no method has yet been found of exactly computing it. To determine the rate for a given distance, there is added to the assumed terminal charge a certain amount to represent the road haul. Upon the rate of increase in the road-haul charge for successive distances depends the level of the rates. It it be maintained that the policy of carriers should be to afford the widest possible latitude to competition, which is consistent with any return short of actual loss, the proponents of a distance scale will favor a low rate of increase for unit progressions, and this will result in relatively low rates for long distances. Thus, a distance scale directly reflects the purpose of its maker. No one contends that a carrier should be compelled to haul a commodity for less than cost, but an acceptable demonstration of what is the actual cost to a carrier of transporting a given commodity has yet to be determined, and the cost will vary upon different lines. Therefore, as a general rule the reasonableness of rates is still determined according to the usual well-known methods, important among which are rate comparisons, distance, and considerations of traffic density and population. Western Cement Rates, 48 I. C. C. 201, 233, 234.

(c) Shortest distance applies via a branch line, a portion of which is of narrow-gauge construction. Contention that the physcial situation is immaterial and that shipper is lawfully entitled to use the shortest distance in the application of distance rates in view of the tariff being unrestricted. HELD, such unrestricted distance rates would clearly be applicable via the branch line, but the charging of such rates on shipments moving via the longer route is not a violation of section 6, but rather involves unreasonableness under section 1. Since the

branch line does not constitute a reasonable route the moving of shipments via the longer route did not constitute misrouting. Calivade Fertilizer Co. v. S. P. Co., 73 I. C. C. 496, 562.

(d) Rates on brick and related articles taking the same rates from Sioux City and Sargent's Bluffs, Iowa, to points in Nebraska, South Dakota east of Missouri River, and in southern Minnesota found unreasonable and unduly prejudicial as compared with corresponding interstate rates from competing brick-producing points in Iowa, Kansas and Minnesota to the same destination territories. Reasonable maximum distance rates and nonprejudicial relationships of rates prescribed. Ballou Brick Co. v. A. T. & S. F. Ry. Co., 77 I. C. C. 4.

(e) Rates on brick and related articles taking same rates from Mason City, Iowa, to points in Nebraska, in South Dakota east of the Missouri River, and in southern Minnesota found unreasonable and unduly prejudicial as compared with the corresponding rates from competing brick-producing points in Kansas to destinations in Nebraska and from competing brick-producing points in Iowa and southern Minnesota to South Dakota destinations. Reasonable maximum distance rates and nonprejudicial relationships of rates prescribed. Mason City Brick & Tile Co. v. Director General, as Agent, 77 I. C. C. 22.

(f) Upon reconsideration, original report 73 I. C. C. 511, rates on bituminous coal from mines located on branch lines in the Clinton district of Indiana to Brazil, Ind., during Federal control, computed in strict accordance with the actual distance from the mines, found unreasonable to extent they exceeded rates found reasonable in 66 I. C. C. 338, and 68 I. C. C. 435, for distances not in excess of 30 miles. By applying the more equitable method of applying graded rates found reasonable to the actual distances from the mines the distances involved are less than 30 miles. Reparation awarded. Chicago Sewer Pipe Co. v. Director General, as Agent, 77 I. C. C. 171.

(g) Proposed distance rates on brick and related articles, c. l. and l. c. l., resulting in advances and reductions, between points on the C. & O. Ry., west of Gauley, W. Va., found justified in part. Between main-line points on the Cincinnati and Huntington divisions of the C. & O., Gauley, W. Va., to Bellevue, Ky., inclusive, and to and from Ironton, Ohio, proposed rates found justified only to basis of c. f. a. territory scale prescribed in National Paving Brick Mfrs. Asso., 68 I. C. C. 213. Brick between Stations on C. & O. Ry., 77 I. C. C. 416.

(h) Order of State commission in connection with intrastate distance rates provided for treating Southern Pacific and Arizona Eastern railroads as one line for rate-making purposes, but carrier in publishing scales refused to comply with this requirement. HELD: Fact that director general did not see fit to treat these carriers as a single line for rate-making purposes does not prove unreasonableness, as director general was not subject to orders of State regulatory bodies. Northern Pac. Ry. Co., 250 U. S., 135. Southern Arizona Traffic Asso. v. Director General, as Agent, 81 I. C. C. 609.

I. CONTROL AND REGULATIONS

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Tap Lines §2.

CASES 1887-1908

(a) The statute provides that the Commission shall in the first instance establish the through route and joint rate, and shall only fix the divisions of that rate in case the carriers themselves have failed to agree after the same has been established. Cattle Raisers Asso. of Texas v. G. H. & S. A. Ry., 12 I. C. C. 20, 23.

(aa) Divisions of through rates, Congress gave Commission full power over. McRae Terminal Ry. v. Southern Ry. Co. 12 I. C. C. 270.

IMPORTANT CASES SINCE 1908

(ab) The Commission cannot prescribe divisions of a joint rate until it has been fixed in amount and carriers have failed to agree. Kansas City Missouri River Nav. Co. v. C. & O. Ry. Co., 34 I. C. C. 67, 72.

(b) In dealing with the question of divisions it is the duty of the Commission to take into consideration all circumstances, conditions and equities affecting either group of the contending carriers in so far as necessary to enable it to arrive at a fair and reasonable adjustment. Sloss-Sheffield Steel & Iron Co. v. L. & N. R. R. Co., 35 I. C. C. 460, 465.

(c) The Commission may fix divisions when carrier is shipper or is owned by shipper so that divisions might be the means of indirectly refusing through charges or effecting discriminations, and may require their publication. Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 11, 13.

(d) The Commission has the right, where one of the carriers is a shipper, to inquire into the reasonableness of divisions received by it and fix proper ones. Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 13.

(e) The Commission can not act upon the theory that a controversy among carriers regarding divisions does not affect protestants or shippers. Switching Absorptions, 47 I. C. C. 583, 586.

(f) The phrase "or otherwise" is frequently used not only in statutes but in contracts, deeds, and other legal documents. Its function is to broaden the context and to embrace general matters of kindred import not included in the specific language preceding it. It may rarely, if ever, be ignored as having no meaning or influence in connection with the text in which it appears. As used in section 15, the phrase "or otherwise" seems very clearly to qualify the words immediately preceding, namely, "in obedience to such order of the Commission;" and the meaning that seems most easily and naturally to flow from the words is that they were intended by the Congress to have the effect of extending the provisions of the clause not only to joint rates and fares established by the carriers "in obedience to such order of the Commission," but to joint rates established by them "otherwise," that is to say, volutarily. Rearranging in direct sequence the real thought embodied in the language, the provision would seem to relate to disagreements among carriers respecting the apportionment or division of their joint rates, fares, or charges established "in obedience to such order of the Commission, or otherwise;" and "otherwise" would appear necessarily to refer to and embrace joint rates, fares or charges established otherwise than "in obedience to such order of the Commission," that is to say, by agreement among themselves or voluntarily. Morgantown & Kingwood Divisions, 49 I. C. C. 540, 545.

(g) The Commission may, upon complaint by one carrier against another, lawfully determine the division of compensation that each is entitled to receive out of their voluntarily established joint rates in effect over a through route operated by the two carriers. Conclusions announced in original report herein, 40 I. C. C. 509, reversed. Morgantown & Kingwood Divisions, 49 I. C. C. 540, 546.

(h) Congress, recognizing that carriers occasionally fall into controversy as well with respect to the division of their voluntary rates as with respect to the apportionment of their compelled rates, intended that the Commission's jurisdiction should extend over the division of both classes of rates.. The Commission has ample authority to hear and determine such controversies. Morgantown & Kingwood Division, 49 I. C. C. 540, 546.

(i) Not only is a remedy provided in the Act against an unreasonable demand in the apportionment of a joint rate established under the Commission's order, but in voluntarily opening through routes and making joint rates applicable over them "those entitled thereto," namely, a participating line like this complainant, may insist that "reasonable compensation" shall be paid to it out of the joint rates. Not only the Commission's

order must be obeyed but the statute also. Morgantown & Kingwood Divisions, 49 I. C. C. 549.

(j) Although the complaint contained no request for fixation of divisions, where parties agreed at hearing and offered testimony on the question, and were offered opportunity to make the record as complete as possible, the Commission held full hearing was had as required by the act. Lodwick-White Coal Co. v. Director General, 58 I. C. C. 530, 536.

(k) Under the Interstate Commerce Act prior to its amendment by the Transportation Act, 1920, the Commission could require the adjustment of divisions prior to filing of complaint, but under Paragraph (6), which was added to section 15 by the Transportation Act, it can require adjustment of divisions from the time the complaint was filed. P. & W. V. Ry. Co. v. P. & L. E. R. R. Co., 61 I. C. C. 272, 275, 276.

(l) A petition was filed March 24, 1920, subsequent to taking effect of amendments to act made by the Transportation Act, 1920, as to prescribing of divisions between carriers. Under the provisions of paragraph 6, section 15 of the amended act, the Commission can require adjustment of divisions only for the period subsequent to the filing of the petition. Diamond Alkali Co. v. F. P. & E., 62 I. C. C. 161, 165.

(m) With respect to divisions acruing to carriers out of joint rates with Canadian connections, the Commission's jurisdiction inheres only in so far as the transportation takes place within the United States. New England Divisions, 62 I. C. C. 513, 516.

(n) Under provisions of paragraph 6 section 15 of the Act the Commission is authorized in appropriate cases, after a full hearing, to prescribe by order the just, reasonable and equitable divisions of joint rates, fares or charges to be received by the several carriers. New England divisions, 62 I. C. C. 513, 560.

(o) The remedial provisions of paragraph 6 section 15 of the act offer to the carrier a source of relief to which it may resort in the event of a failure to observe the substantive provision of section 1 paragraph 4, or in the event of a failure to agree upon divisions and indicate the facts and circumstances which the Commission intended should be considered in determining what is just, reasonable and equitable. New England divisions, 62 I. C. C. 513, 562.

(p) The public interest does not demand nor does the statute either expressly or by reasonable implication provide that the Commission may prescribe increased divisions to be received by certain carriers merely because other carriers participating in the joint rates, fares or charges, considered as a whole, have not failed in so great a degree to earn a fair return upon the value of their property devoted to the public service, although this is one factor which may be taken into consideration. New England Divisions, 62 I. C. C. 513, 562.

(q) The Commission is authorized to prescribe only just, reasonable, and equitable divisions "to be received by the several carriers," Full hearing and competent and relevant evidence are a prerequisite and any attempt to prescribe a blanket increase in the face of admissions and uncontradicted evidence that certain divisions are just, reasonable, and equitable would override the plain mandate of law. Divisions, 62 I. C. C. 513, 516, 560, 561, 565.

(r) The Commission is without jurisdiction to require adjustments of divisions for the period prior to the filing of complaint. Pittsburgh & West Va. Ry. Co. v. P. & L. E. R. R. Co., 61 I. C. C. 272; East Jersey R. R. & Term. Co. v. C. R. R. Co. of N. J., 63 I. C. C. 80, 85.

(s) The Commission is bound under the statute to determine whether divisions properly in issue justly, reasonably and equitably compensate each carrier, relatively and per se, for the services it performs in the joint haul under joint rates, fares and charges. Its determination must be predicated upon a consideration of all the various pertinent factors including the ability or disability of the several carriers to adequately, economically, and efficiently meet their common carrier obligations. In the final analysis the just measure of divisions is the reasonable and equitable share of the revenue earned under the rates to be divided which each carrier should receive. New England divisions, 66 I. C. C. 196, 197.

(t) Strategic advantage was not a factor to which the Commission could give weight in fixing divisions, and it was to avoid the unduly prejudicial effect of such strategic advantages upon the weaker carriers and the resulting impairment of transportation facilities upon which a substantial portion of the country depends that the Commission's pow-

er over divisions was clarified and strengthened. New England Divisions, 66 I. C. C. 196, 198.

(u) In a case involving divisions, the Commission may, when the public interest so requires, grant immediate relief subject to later readjustments, as it has done in cases involving general increases or reductions in rates. New England Divisions 66 I. C. C. 196, 204.

(v) And of course that portion of the act which confers upon the Commission jurisdiction to establish just divisions of joint rates refers only to divisions between the carriers subject to this act. Keokuk & Hamilton Bridge Co. v. Wabash Ry., 66 I. C. C. 545, 548.

(w) That a carrier deducts an amount greater than is paid by it for the use of a bridge before dividing with its connections a joint rate does not of itself confer upon the Commission jurisdiction to prescribe the amount to be paid for that use. Keokuk & Hamilton Bridge Co. v. Wabash Ry., 66 I. C. C. 545, 548.

(x) Under the amended act, the Commission may prescribe just, reasonable and equitable divisions for the future. Wichita Northwestern Ry. Co. v. C. R. I. & P. Ry., 69 I. C. C. 68.

(y) It is an intent clearly disclosed that the Commission shall keep continually in view the public interest, the public need for a transportation system strong in all its parts, and the consequent necessity that carriers shall receive compensation fairly apportioned to the amount and character of the service which they perform and adequate to enable them to perform it efficiently. Freeman & Boettcher v. A. T. & S. F. Ry., 73 I. C. C. 178, 187.

(z) Under the provisions of paragraph (6) of section 15 of the Act, the scope of the Commission's powers and duties in prescribing divisions of joint rates between carriers has been amplified. Kansas City, Mexico & Orient Division, 73 I. C. C. 319, 322.

(aa) Antecedent to the question of prescribing divisions must be determined the question of whether or not a complainant is a party to joint rates. New York Dock Ry. v. B. & L. R. R. Co., 73 I. C. C. 656, 660.

(bb) The New York Dock Ry. filed with the Commission concurrences in tariffs naming rates applicable to or from its terminals, which, in effect, give assent to the publication of rate schedules in which it is shown as a participating carrier. In instances where such railway is not named in the tariffs it is not a party to joint rates published therein, in view of the specific requirement of the law as set forth in paragraph (4), section 6, of the act. Accordingly divisions thereof to be received by such railway can not be prescribed. New York Ry. v. B. & O. R. R. Co., 73 I. C. C. 656, 662.

(cc) Paragraph (3) of section 3 of the act, among other things, requires carriers to "afford all reasonable, proper and equal facilities for interchange of traffic between their respective lines." Miller Paper Co. v. P. R. R. Co., 80 I. C. C. 316.

(dd) Paragraph (4) of section 3 of the act, in substance, authorizes the commission when found "to be in public interest and practicable," to require joint use of terminals at reasonable compensation to carrier owning such terminals. Authority of Commission under this paragraph is dependent upon showing of public interest. Miller Paper Co. v. P. R. R. Co., 80 I. C. C. 317.

(dda) Paragraph (6) of section 15 of the act deals with authority of the commission to prescribe just, reasonable, and equitable divisions of joint rates, fares, and charges. It must be conceded that on company fuel there are no joint rates to be divided and that therefore this section has no application to this species of traffic. New Mexico Central Ry. Co. v. A. T. & S. F. Ry. Co., 81 I. C. C. 718, 721.

(ddb) The commission has power to require retroactive adjustment of divisions only where joint rates in question were established "pursuant to a finding or order of the commission." Wichita Northwestern Ry. Co., 81 I. C. C., 513. U. S. War Department v. A. & S. Ry. Co., 83 I. C. C., 742, 752.

(ddc) While section 208 b. clearly contemplates the continuance of the divisional agreements that were in effect upon the termination of federal control until changed as therein specified, the Commission found prior to the passage of the transportation act, 1920, that it has no authority to enforce agreements respecting divisions and that act did not change its jurisdiction in this respect or authorize it to enforce the requirements of 208 b. Hampton & Branchville R. R. & L. Co., 88 I. C. C. 77, 84.

(ee) The validity of an order of the Interstate Commerce Commission fixing

rates or division of joint rates is not affected by the fact that it is provisional and subject to change after further consideration. Akron, C. & Y. Ry. Co., v. United States, 282 Fed. 306.

(ff) An order of the Interstate Commerce Commission prescribing division of joint rates between all railroads operating to the west of the Hudson river and connecting New England lines, as groups, without determining the divisions as between individual carriers, held within the comprehensive discretionary powers given the Commission by Transportation Act 1920, §418. Akron, C. & Y. Ry. Co. v. United States, 282 Fed. 306.

(gg) An order of the Interstate Commerce Commission, fixing or prescribing the division of joint rates, based on finding of fact, will not be set aside by the courts unless it is in violation of the Constitution, or does not conform to the statutory authority vested in the Commission, or it is not supported by evidence. Akron, C. & Y. Ry. Co. v. United States, 282 Fed. 306.

(hh) Transportation Act Feb. 28, 1920, discloses no intention to vest the Interstate Commerce Commission with power to relieve the necessities of weaker lines by imposing the burden on connecting lines, simply because they are able to bear it, and exhibits a contrary purpose in section 422, adding section 15a to the Interstate Commerce Act, requiring a portion of excess earnings to be paid into a fund to be loaned to weaker roads. Abilene & S. Ry. Co. v. United States, 288 Fed. 102.

(ii) The provision of Interstate Commerce Act §15 (6), as amended by Act Feb. 28, 1920, that, in prescribing and determining the divisions of joint rates, fares and charges, the Interstate Commerce Commission shall give due consideration, among other things, to the efficiency with which the carriers concerned are operated, the amount of revenues required, etc., must be construed as not limited to the paragraph relating to authority to prescribe divisions of joint rates, but to the entire section, so that some of the elements therein mentioned, which are immaterial on the division of the rates, are not to be considered on that issue, but on issues arising under other paragraphs. Abilene & S. Ry. Co. v. United States, 288 Fed. 102.

(jj) Under Interstate Commerce Act §1, par. 4 (Comp. St. §8563), it is the duty of participating carriers to establish by agreement a just division between them of the joint rates, and the law presumes that this obligation has been complied with and that the division by the carriers is just, and the Interstate Commerce Commission is without power under section 15 (6) of the act, as amended by Transportation Act, Feb. 28, 1920, to prescribe new divisions, unless, after full hearing, it is of the opinion on the evidence adduced that the existing divisions are unjust, and unless in the record presented there is some evidence to sustain such conclusion, its order establishing new divisions is nonenforceable. Abilene & S. Ry. Co. v. United States, 288 Fed. 102.

(kk) Where the evidence was made to support an order of the Interstate Commerce Commission dividing joint rates between carriers, it is beyond the province of the Supreme Court to consider the weight of evidence or the wisdom of the order made. Akron, C. & Y. Ry Co. v. United States, 43 Sup. Ct. 270.

(ll) Under the Interstate Commerce Act, §15 (6), as amended by Transportation Act Feb. 28, 1920, §418, authorizing the Interstate Commerce Commission, after full hearing, to prescribe proper divisions of joint rates, where voluminous evidence was received, and carriers had ample time and opportunity to introduce all evidence desired, a provisional order increasing the share of New England roads in joint rates pending a comprehensive revision was not void, as not made after full hearing, as it is the character of the hearing, and not of the order entered, that determines whether a hearing was full. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(mm) Within the Interstate Commerce Act, §15 (6), as amended by Transportation Act Feb. 28, 1920, §418, authorizing the Interstate Commerce Commission, after full hearing, to prescribe proper divisions of joint rates, a "full hearing" is one in which opportunity is afforded to all parties to make, by evidence and argument, a showing fairly adequate to establish the propriety or impropriety from the standpoint of justice and law of the step asked to be taken. Akron, C. & Y. Ry. Co. v. United Stats, 43 Sup. Ct. 270.

(nn) An order made by the Interstate Commerce Commission, after affording time and opportunity to carriers to in-

troduce any and all evidence desired, increasing the share of New England roads in through rates, pending a comprehensive revision of divisions of through rates, was not obnoxious to the due process clause, because provisional. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(oo) Under Interstate Commerce Act, §15 (6), as amended by Transportation Act Feb. 28, 1920, §418, authorizing the Interstate Commerce Commission to prescribe proper divisions of joint rates, the duty imposed on the Commission does not extend beyond the need for action, and if the real controversy concerns the division of the joint rate between carriers east of the Hudson river and those west thereof, there is nothing in the law preventing the Commission from letting the carriers of each section apportion their respective shares among themselves; and, moreover, an order directing that the shares of New England roads should be increased 15 per cent, and that the balance of the joint rate should be divided among the lines west of the Hudson river in the same proportions as then existing, or otherwise as they might agree, sufficiently prescribed the subdivisions as well as the primary divisions, of the joint rates. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(pp) An order of the Interstate Commerce Commission, providing that the share of New England roads in joint rates on freight moving between New England and the rest of the United States should be increased 15 per cent, and that the balance of the joint rate should be divided among the other carriers in the existing proportions, or otherwise as they might agree, or as might be determined by the Commission on application, did not, as claimed, show failure on the part of the Commission to consider the several factors which Transportation Act Feb. 28, 1920, §418, amending Interstate Commerce Act §15 (6), requires the Commission to take into consideration in making divisions of joint rates. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(qq) An order of the Interstate Commerce Commission, fixing rates or apportioning joint rates, between carriers, if unsupported by evidence, is invalid. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(rr) An order of the Interstate Commerce Commission, granting to New England railroads a larger share of the through rates on freight moving between New England and the rest of the United States, in order to meet in part the greater need of New England lines for increased revenues, was not void, as made to accomplish an unauthorized purpose, since, while Transportation Act Feb. 28, 1920, §418, amending Interstate Commerce Act, §15 (6), is in part designed to remove doubts as to the Commission's power to act on its own initiative, that act also seeks to insure adequate transportation service, and to that end to secure a fair return on capital devoted to such service, without permitting an unreasonably large return to prosperous roads. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(ss) The Transportation Act Feb. 28, 1920, §418, amending Interstate Commerce Act, §15 (6), construed as authorizing apportionment by the Interstate Commerce Commission of a joint rate on the basis of the greater needs of particular carriers, is not unconstitutional, as depriving carriers of their just share of the joint rate, as it is for the Commission to determine what is just, reasonable and equitable, and it may be just to give a prosperous carrier a smaller proportion of an increased rate than of the original rate. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(tt) Where the Interstate Commerce Commission, at all times having the special needs of New England roads before it, granted an increase in rates to all roads in the Eastern group, and thereafter made an order increasing the share of New England roads in joint rates on traffic between New England and other parts of the country, the order may properly be deemed a supplement to, or modification of, the order granting the increase, and the fact that two orders, instead of one, were made, has no legal significance. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

(uu) Under the Transportation Act Feb. 28, 1920, §418, amending Interstate Commerce Act, §15 (6), and authorizing the Interstate Commerce Commission to prescribe proper divisions of joint rates the Commission is authorized to base finding in respect to each division of each rate of every carrier in a particular group upon evidence typical in character and ample in quantity, as it must be assumed that Congress knew of the practice of the Commission to adjudicate

comprehensively on substantially all rates in a large territory, and knew that to require specific evidence and separate discussion respecting each division of each rate would be tantamount to a denial of relief. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

II. PUBLICATION AND TARIFFS.

See Tariffs.

§2. Obligation to File.

IMPORTANT CASES SINCE 1908

(a) While in ordinary commercial business the through rate to be paid for transportation is the important factor, where the originating carrier owns the mines from which fuel coal is shipped, the essential factor is the division of the through rate paid up to the junction. For this reason all the facts and circumstances which make it desirable that the exact rate of transportation on commercial shipments shall be published make it desirable that the divisions of the rates under which railway fuel coal is transported be published. Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 4.

(b) A tariff provision which makes the application of rates over particular routes dependent upon divisions, without stating the routes with respect to which divisional arrangements are in effect, is indefinite and unlawful, and imposes uncertain and unreasonable conditions upon the shipper. McGowin Lumber & Export Co. v. Director General, 59 I. C. C. 238, 240.

(c) The existence or nonexistence of divisions is not a tariff matter. Acme Mills v. Director General, 81 I. C. C. 492, 494.

III. AGREEMENT FOR DIVISIONS

§2½. In General.

CASES 1887-1908

(a) The decision of the Interstate Commerce Commission on a complaint to fix a maximum freight charge does not affect the question of the division of such rates between connecting carriers. Boston Fruit & P. Exch. v. New York & N. E. R. Co. (Com.) 3. I. C. R. 604.

(aa) The shipper can base no right of recovery upon the violation of a contract between connecting railways, as to the apportionment of an agreed rate of freight. If the carrier lays an additional charge on the shipper without sharing it with its connecting line, it would be no injury to him unless the same was unreasonable. Arkansas & L. R. Co. v. Smith, 4 I. C. R. 415.

IMPORTANT CASES SINCE 1908

(b) The division of a joint rate between carriers is a matter of agreement between the participating carriers in the first place. The law prescribes no basis upon which the Commission's findings shall rest when, in the event of the contingencies provided for in the Act, the duty of fixing the divisions falls upon it. People's Fuel & Supply Co. v. G. F. W. Ry. Co., 30 I. C. C. 657, 661.

(c) Owing to different transportation conditions north and south of the Ohio River the southern carriers are entitled to higher ton mile earnings than are the northern carriers. Sloss-Sheffield Steel & Iron Co. v. L. & N. R. R. Co., 35 I. C. C. 460, 465.

(d) Divisions to fuel coal billing points must be determined by the same considerations which control fixing of divisions on commercial coal to points similarly situated. Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 13.

(e) The allowance of smaller divisions on fuel coal at a certain junction by one carrier than is allowed by another, does not prove that the arrangement is inequitable where the connecting carriers serve different producing fields and are active competitors. Galloway Coal Co. v. A. G. S. R. R. Co., 40 I. C. C. 311, 325.

(f) The Commission is not impressed with the argument that the absence of divisional arrangements between the carriers is justification for closing any available and useful route. Lumber from the Southeast, 50 I. C. C. 191, 197.

(g) The fact that no divisions of joint rates have been established by the carriers participating therein does not render the rates inapplicable. George C. Holt, et al., as Receivers of Aetna Explosives Co. v. C. & E. I. R. R., 52 I. C. C. 393, 396.

(h) Where carriers earn specific amounts out of through rates or fares, such amounts authorized to be increased in the same percentages as the through rates or fares, and where the division of carriers participating in through rates or fares are in fixed amounts per unit and are absorbed by other carriers, such absorptions should be increased in the same percentages as the through rates or fares. Increased Rates, 1920, 58 I. C. C. 220, 254.

(i) Divisions are affected with a public interest and are not a mere matter of bargain and trade between carriers, Division of joint rates and fares of M. & N. A. R. R., 68 I. C. C. 47, 51, 61.

(j) Where hauls differ by not more than 5 miles or thereabouts, each requiring two terminal services, the Commission is not disposed to insist upon a very material difference in divisions, especially where such a difference would induce an uneconomical handling of traffic via the more distant junction point. Divisions received by Brimstone Railroad & Canal Co., 68 I. C. C. 375, 384.

(k) Practice of carriers in requiring shippers to adjust charges under divisions of joint rate as between the inbound and outbound carriers to and from the transit point when a mistake in showing the division is made by the transit bureau found unjust and unreasonable. Such adjustments should be made between the carriers themselves. Cin-

cinnati Grain & Hay Exchange Co. v. B. & O. R. R. Co., 73 I. C. C. 104, 108.

(l) The burden of proof is upon the defendant, in a proceeding for determination of reasonable divisions of joint rates, to show that the divisions originally determined by agreement should not have been changed proportionately thereafter—as the joint rates were increased or decreased. Ohio & Kentucky Ry. Co. v. L. & N. R. R. Co., 77 I. C. C. 636, 643.

ALL OTHER CITATIONS

Sloss-Sheffield Steel & Iron Co. v. L. & N. R. R. Co., 35 I. C. C. 460; Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 14; Chestnut Ridge Ry. Case, 37 I. C. C. 558, 560; West Lum. Co. v. St. L. & S. F. R. R., 38 I. C. C. 401, 404; Lake Line Application Under Panama Canal Act, 37 I. C. C. 77, 79; Black & White River Transportation Co. v. M. P. Ry. Co., 37 I. C. C. 244, 246, 249; Rates via Rail-and-Lake Routes, 37 I. C. C. 302, 307, 308; Peninsular & Occidental S. S. Co., 37 I. C. C. 432, 440; Morgantown & Kingwood Divisions, 40 I. C. C. 442, 452; Allowances to Kanawha, Glen Jean & Eastern, 58 I. C. C. 405, 410; Lodwick-White Coal Co. v. Director General, 58 I. C. C. 530, 536; Swift & Co. v. Ft. W. & D. C. Ry. Co., 61 I. C. C. 77, 79; New England Divisions, 66 I. C. C. 196, 198;

§3. Computation.

See Advanced Rates §18 (10).

CASES 1887-1908

(a) The percentage, amounting to 23 cents per 100 pounds, received by the defendants and their connecting lines east of Milwaukee as their proportion of this through rate on shipments from Minneapolis and points west of Milwaukee and between Milwaukee and Minneapolis, while the defendants charge 25½ cents per 100 pounds on the same class of freight originating at Milwaukee and transported over their lines and connecting lines to eastern points, was not an unjust discrimination against Milwaukee; nor did it injure the business of Milwaukee; or was it a violation of the Act to Regulate Commerce, approved February 4, 1887. Milwaukee Chamber of Commerce v. Flint & Pere Marquette R. Co., 2 I. C. R. 393.

(aa) Divisions of joint rates are usually less than the corresponding locals, and almost without exception not greater, and while a case may arise in which such a division could with propriety be made greater than the local or straight rate, no such case is presented here where the total through rate on competitive traffic exceeds the sum of charges to and from an intermediate point. Hilton Lumber Co. v. Wilmington & W. R. R. Co. et. al. 9 I. C. C. 17.

(ab) The Commission prescribed a rate of 50c, joint commodity, on beef cattle from Fort Worth, Tex., to Birmingham, Ala., 12 I. C. C. 29. Carriers involved were unable to agree upon the division thereof, and made application to the Commission to fix the divisions. HELD, considering the terminal charges of the receiving and the delivering lines and the ferry charge of the intermediate line the rate should be divided on a mileage basis, but this conclusion should not be taken as implying that all joint rates established by the Commission should necesssarily be divided upon a mileage basis. Birmingham Packing Co. v. T. & P. Ry. Co., 12 I. C. C. 500.

(b) Defendants having been unable to agree upon the divisions of a joint rate on beef cattle from Fort Worth, Tex., to Birmingham, Ala., put in effect by them in accordance with an order of this Commission, made application to fix the divisions; HELD, upon the peculiar facts of this case, that considering the terminal charges of the receiving and the delivering lines and the ferry charge of the intermediate line the rate should be divided upon a mileage basis, but this conclusion should not be taken as implying that all joint rates established by the Commission should necessarily be divided upon a mileage basis. Birmingham Packing Co. & Tex. & Pac. Ry. Co., et al., 12 I. C. C. 501.

IMPORTANT CASES SINCE 1908

(c) In fixing a division between carriers of joint rates ordered to be established, section 15 of the Act implies that it is the duty of the Commission to take into consideration all the circumstances and equities fairly affecting their several interests, and precludes the idea that the divisions must be adjusted on a mileage or any other fixed basis. Star Grain & Lumber Co. v. A. T. & S. F. Ry. Co., 14 I. C. C. 364.

(d) As a general rule where operat-

ing conditions are substantially similar the straight mileage prorate is accepted as a fair basis for dividing joint rates but where the hauls are short or unusual terminal difficulties are encountered arbitrary proportions are not infrequently deducted before prorating and allowed to the line or lines affected by such disadvantages. Under such conditions it is not unusual also to provide for a minimum division to one or more of the lines forming the through route. Louisville Bd. of Trade v. I. C. & S. Traction Co., 34 I. C. C. 640, 642.

(e) In proceedings to divide the rate on coal traffic between three lines the Commission will consider: (1) Allowance to the initial carrier for assembling at mines; (2) the fact that the majority of the equipment is furnished by the intermediate carrier; and (3) the fact that the coal shipped displaces at the destinations coal which would otherwise originate on the lines of delivering carriers. Hayden Bros. Coal Corp. v. D. & S. L. R. R., 45 I. C. C. 236, 240.

(f) Section 1 gives the shipper a right to a reasonable rate and with equal directness, in the provision just quoted, it gives the small line the right to receive "reasonable compensation" out of any joint rate applicable over a through route which it may operate conjointly with a trunk-line connection. The Act in this particular enforces justice as between carriers as to the reasonableness of divisions no less than it requires justice between carriers and the shippers in respect of the reasonableness of rates. Morgantown & Kingwood Divisions, 49 I. C. C. 540, 547.

(g) The divisions accorded a short line can not be predicated solely on the amount necessary to insure its successful operation. McGowan-Foshee Lumber Co. v. F. A. & G. R. R., 51 I. C. C. 317, 319.

(h) Divisions in the form of absorptions can not be predicated solely upon the amount of revenue necessary to insure successful operation, and it is improper to attempt forcible adjustment of divisions between carriers by increasing the through rates which shippers must pay. Absorption of Switching Charges at Fort Worth, Tex., 61 I. C. C. 73, 75, 76.

(i) The function of the Commission in a divisional case has been considered to be an equitable, just and reasonable apportionment of earnings derived from the carriage of a particular commodity as between the carriers participating in the transportation, and the fact for example, that a coal carrying road has derived its principal revenue therefrom has not operated to decrease the divisions it received for the carriage of merchandise traffic. New England Divisions, 62 I. C. C. 513, 539.

(j) Short-haul l. c. l. traffic is generally conceded to be unremunerative, but it cannot be said that because complainants originate a larger percentage of l. c. l. traffic than defendants, that fact should be given weight in determining that the divisions of complainants "as a whole" are unjust. New England Divisions, 62 I. C. C. 513, 540.

(k) While the Commission is urged to adjust the divisions in New England "as a whole," some of the roads in that territory have been excluded from the list of complainants and included in the list of defendants. To so deal with the situation would not be treating the New England roads as a group. It would be taking from one road and giving to a less prosperous road thus doing by indirection what the Congress deliberately and specifically refused to authorize the Commission to do. New England Divisions, 62 I. C. C. 513, 565.

(l) Fact that the divisions of express rates acruing to the rail carrier are inequitable affords no justification for increasing those rates. Express Rates on Bangor & Aroostook R. R., 63 I. C. C. 452, 454.

(m) The thought that dominates the law, as it is now framed, that a paramount consideration in determining the equitable share of the joint revenue which any carrier shall receive must be the relative amount and cost of the service which it renders, and that mileage is not a gauge of relative cost where terminal service is performed or the transportation is carried on under other unfavorable conditions. New England Divisions, 66 I. C. C. 196, 198.

(n) The power of the Commission over divisions is founded upon the public interest; that the carriers are mutually dependent parts of the transportation system; that the public interest requires that all essential parts be maintained, so far as possible, in effective working condition; that the relative amount and

cost under economical and efficient management of the service rendered is a prime factor in determining the fair and equitable share of joint revenue which each carrier shall receive; and that included in such cost is a due proportion of the burden of maintaining the financial integrity and credit of the carrier. New England Divisions, 66 I. C. C. 196, 198.

(o) A common method of dividing rates on traffic crossing the Mississippi and Ohio Rivers is to allow the carriers east and north of the rivers their local or proportional rates, or the established percentages of through rates, to or from the crossings, plus an allowance for bridge service where they perform that service. W. J. Jackson v. St. L. S. F. Ry., 66 I. C. C. 359, 362.

(p) Divisions of rates are frequently made on a mileage prorate with a minimum division to the short line when the movement to and from the point of interchange is in the same general territory under approximately similar rate adjustments, and when no unusual services are performed. Jackson v. St. L. S. F. Ry., 66 I. C. C. 359, 363.

(q) Although divisions of rates can not be based wholly on the financial conditions of the respective carriers, it is one of the elements that may properly be considered by the commission. Jackson v. St. L. & S. F. Ry., 66 I. C. C. 359, 369.

(r) Among the facts and circumstances which would ordinarily entitle one carrier to a greater or less proportion than another carrier of a joint rate, fare or charge, one of the most important is the average length of haul. The effect of relative lengths of haul on relative costs of transportation has long been recognized. Division of Joint Rates and Fares of M. & N. A. R. R., 68 I. C. C. 47, 58, 60, 61.

(s) In view of the extremely high operating costs upon the line of the Denver & Salt Lake R. R., the difficult services perfomed by it, the comparisons of yields per ton-mile under its divisions with the weighted average yields under the divisions of the principal defendants, show that its divisions on coal from mines on its line to destinations on lines of participating carriers are unjust, unreasonable, inequitable, and unduly prej-udicial to the Denver & Salt Lake and unduly preferential of participating carriers. Increased divisions prescribed, and adjustments required to date of filing of complaint. Freeman & Boettcher v. A. T. & S. F. Ry. Co., 73 I. C. C. 178.

(t) Divisions received by a carrier which crosses no mountain ranges and encounters no severe grades or snow troubles are not fair measures for divisions to be accorded a carrier that does. Freeman & Boettcher v. A. T. & S. F. Ry. Co., 73 I. C. C. 178.

(u) In fixing just, reasonable and equitable divisions, consideration given to fact that road is operated efficiently and economically. Freeman & Boettcher v. A., T. & S. F. Ry. Co., 73 I. C. C. 178, 184.

(v) In the determination of just, reasonable, and equitable divisions, consideration must be given not only to the necessities of a short line but also to the condition and requirements of connecting lines, having due regard to their revenues, expenses, taxes, and return, and considering their operating burdens and the efficiency of their management, as well as all the factors enumerated in section 15 of the act. Nevada-California-Oregon Divisions, 73 I. C. C. 330, 336.

(w) Divisions which one carrier accords to another do not demonstrate the unreasonableness of rates. Atlas Portland Cement Co. v. N. & B. R. R. Co., 73 I. C. C. 687.

(x) Divisions of joint rates on shipments for railroads must be fixed by the same considerations which would determine the divisions upon through commercial shipments in which the railroads have no other interest than that of a carrier. Chicago Lake Shore & South Bend Ry. v. I. C. R. R., 74 I. C. C. 609, 610.

(y) A line participating in a joint rate does not prove that it is entitled to a division equal to its local rate by showing that the service which it performs in connection with the joint haul is no less expensive than its local service. That may be a reason why a joint rate lower than the combination of locals should not have been established but it does not demonstrate that the carrier should have an amount equal to its local as its fair share of the joint rate which has been established. Nor does it prove that the joint rate should not have been established. U. S. War Dept. v. A. & S. Ry., 77 I. C .C. 356.

(z) Relative cost of service is not the only factor to be considered in determin-

ing just divisions. By paragraph 6 of section 15 of the act, the Commission is directed to give due consideration to the efficiency with which the carriers concerned are operated; the amount of revenue required to pay their respective operating expenses, taxes, and a fair return on their railway property; the importance to the public of the transportation service of such carriers; whether any particular carrier is an originating, intermediate or delivering line; any other fact or circumstance which would ordinarily, without regard to the mileage haul, entitle one carrier to a greater or less proportion than another carrier of the joint rate, fare or charge. Wichita Northwestern Ry. v. C. R. I. & P. Ry., 81 I. C. C. 513, 518.

(aa) In determining whether lines composing Southern Railway system shall be regarded as a unit for fixing reasonable divisions, question is not whether such lines are legally separate entities nor whether they are operated as though ownership and management were concentrated in a single corporation. The commission has in numerous cases found that lines under common control and management, though owned by separate corporations, shall be deemed single units for rate-making purposes. Lines of the system, whatever their strict legal relations, benefit in operation from their common control and interlocked managements, and are advertised to the public as a single unified system. U. S. War Department v. A. & S. Ry. Co., 83 I. C. C., 742, 744, 745.

(bb) The principle is well established that where the cost of service performed by a common carrier industrial line varies substantially as between its different trunk line connections, the divisions of joint rates made by trunk lines to the industrial line must be based, so far as practicable, upon the cost of the service in each case, plus fair return. Otherwise, if the divisions accorded for the greater service were reasonable, the same divisions accorded for a lesser service would amount substantially to a rebate to the proprietary company. Divisions Received by Brimstone R. R. and Canal Co., 88 I. C. C. 62, 73.

(cc) Participating carriers in a joint service are entitled to be compensated in proportion to the amount of service and the cost of the services which each render, and the fact that one of them is prosperous and the other not does not affect the just right of each to a fairly proportionate share out of the joint earnings, regardless of whether the amount distributed to each be fully compensatory, or be less to each than the value of the services so rendered. Abilene & S. Ry. Co. v. United States, 288 Fed. 102.

(dd) The necessities of a carrier and the fact that it is being operated at a deficit are not sufficient ground on which to order an increase in the division of joint rates in favor of the failing carrier. Abilene & S. Ry. Co. v. United States, 288 Fed. 102.

§4. Inability to Agree.

See Advanced Rates §7 (6); Discrimination §10½; Through Routes and Joint Rate §5.

IMPORTANT CASES SINCE 1908

(a) Shippers may not be deprived of just through rates merely because carriers can not agree upon a division of joint rates. Willamette Valley Lumber men's Asso. v. S. P. Ry., 51 I. C. C. 250, 261.

(b) If satisfactory divisions can not be agreed upon between carriers that matter may be presented to the Commission in an appropriate proceeding Routing restrictions on lumber, 66 I. C C. 56, 57.

(c) The shipping public must not be made to suffer because of disagreements as to divisions. Routing of Fruits and Vegetables from Texas Points to Certain Defined Territories, 74 I. C. C. 575 579.

(d) Disagreement between carriers as to divisions does not justify cancellation of through routes and joint rates. The act provides the means by which such matters may be brought before the commission, and the shipping public must not be made to suffer because of such disagreements. Fruits and Vegetables from Texas Points, 74 I. C. C. 579.

(e) A dispute among carriers over divisions is no justification for increased rates. Concentration of Cotton at New Orleans, 83 I. C. C. 18, 20.

C. C. 277, 278; Rate Cancellation from Indiana to Ohio, 66 I. C. C. 449, 451.

§5. Reductions.

IMPORTANT CASES SINCE 1908

(a) The divisions received by tap lines out of the through rate should have a proper relation to the service which they perform. N. O. N. & A. Ry. v. Illinois Central R. R., 52 I. C. C. 113, 116.

ALL OTHER CITATIONS

In Re Advance in Class Rates, 22 I. C. C. 338, 340; B. S. & C. R. R., 52 I. C. C. 347; Owasco River Ry., 53 I. C. C. 104, 111; Advances on Coal within Chicago Switching District, 53 I. C. C. 442, 454; Louisiana & Pine Bluff Divisions, 53 I. C. C. 475; Wasteful Service by Tap Lines, 53 I. C. C. 656, 662.

§6. Right to Divisions.

See Tap Lines §9.

CASES 1887-1908

(a) Under the act a common carrier subject to its provisions can allow a division of the rates only to another common carrier, which, participating in the particular traffic to which the rate is applied, is also subject to the Act. The two lines may by contract or agreement establish a joint rate from the point of origin on the one road to the point of destination on the other and agree between themselves as to divisions of the rate. Central Yellow Pine Asso. v. V. S. & P. R. R., 10 I. C. C. 193, 210.

IMPORTANT CASES SINCE 1908

(b) If divisions earn a rate above out-of-pocket cost, thereby contributing something to the net earnings of that carrier, and if no violations of law are created, no valid objection can be made against such division. New Pittsburgh Coal Co. v. H. V. Ry. Co., 26 I. C. C. 121, 123.

(c) A carrier may deem it good business policy to secure a part of a through haul on a large volume of traffic and to accept a division of the through rate which is much lower than local rates. New Pittsburgh Coal Co. v. H. V. Ry. Co., 26 I. C. C. 121, 123.

(d) Rail lines handling traffic from the port to the interior point do not accept the arbitrary as their division of the through rate, but exact local rates for the service. Augusta & Savannah Steamboat Co. v. O. S. S. Co. of Savannah, 26 I. C. C. 380, 388.

(e) It is unjustly discriminatory for a carrier to demand higher division of joint rates when traffic is routed via one than when it is routed via another connecting carrier. Chattanooga Packet Co. v. I. C. R. R. Co., 33 I. C. C. 384, 391.

(f) For the purpose of fixing divisions separate corporate organizations of commonly controlled and operated carriers should be disregarded and they should be treated as one system. P. & W. V. Ry. Co. v. P. & L. E. R. R. Co., 61 I. C. C. 272, 284.

(g) The law in its present form requires that the Commission give due consideration among other things, to the revenue needs of the carriers participating in joint rates to enable them to pay operating expenses, taxes and a fair return on the value of their carrier property used in the transportation service as well as to all other facts or circumstances which, without regard to the mileage haul, entitle one carrier to a greater or less proportion of a joint rate than is received by others. Division of Joint Rates and Fares of M. & N. A. R. R., 66 I. C. C. 47, 50, 53.

(h) Unremunerative operation of rail lines can not fail to produce an injurious effect upon the base of the general rate structure and upon equitable divisions. Construction Application of Michigan Northern R. R., 72 I. C. C. 21, 23.

(i) The New York Dock Ry. filed with the commission concurrences in tariffs naming rates applicable to or from its terminals, which, in effect, give assent to the publication of rate schedules in which it is shown as a participating

carrier. In instances where such railway is not named in the tariffs it is not a party to joint rates published therein in view of the specific requirement of the law as set forth in paragraph (4), section 6, of the Act. Accordingly divisions thereof to be received by such railway can not be prescribed. New York Dock Ry. v. B. & L. R. R. Co., 73 I. C. C. 656, 662.

ALL OTHER CITATIONS

Board of trade of Winston-Salem v. N. & W. Ry. Co., 26 I. C. C. 146, 150; In re Advances on Barley, 24 I. C. C. 664, 667; Waverly Oil Works v. P. R. R. Co., 28 I. C. C. 621, 631; Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 4; Henderson Commercial Club v. I. C. R. R. Co., 36 I. C. C. 20, 28; Chestnut Ridge Ry. Case, 37 I. C. C. 558, 560; M. & R. V. Ry. Case, 42 I. C. C. 607; D. & S. L. R. R. v. C. B. & Q. R. R. 51 I. C. C. 679; East Jersey R. R. & Term. Co. v. C. R. R. Co. of N. J., 63 I. C. C. 80; Morgantown & Wheeling Ry. Co. v. P. R. R. Co., 63 I. C. C. 197; Divisions received by Brimstone Railroad & Canal Co., 68 I. C. C. 375, 386.

§7. As Evidence.

See Comparative Rates; Evidence §13 (2), §13 (3); Through Routes and Joint Rates §14.

CASES 1887-1908

(a) The apportionment of rates to different parts of a through line do not determine the charge to the public, but may be significant on the question of reasonable rates for the whole distance. Brady & Co. v. Pennsylvania Co., 2 I. C. C. 78, 81.

(b) Divisions may sometimes very properly be scrutinized by the Commission in arriving at a just and reasonable rate, for the divisions agreed to between the carriers are not without significance in determining what are reasonable rates for the whole distance; but as an original proposition in the matter of fixing of a through rate, the Commission can only say what is a just and reasonable charge for the whole distance, naming an entire and single rate therefor, and leaving to the several carriers the detail of properly dividing up the entire rate according to what may seem just and equitable to all concerned, in view of all the circumstances. Boston Fruit & Produce Exchange v. N. Y. & N. E. R. Co., 3 I. C. C. 604, 605.

(c) While a complainant has no interest in the division the defendants make between themselves, and it does not determine what the charge to the public must be, yet the division is not without significance in determining what are reasonable rates for the whole distance on the lines in question. Railroad Commission of Florida v. S. F. & W. R. Co., 3 I. C. C. 688, 699.

(d) Divisions of a joint rate among the carriers are sometimes inquired into for the purpose of ascertaining, from the divisions, whether a rate unreasonable in itself may not be traced to the inequality of such divisions. Perry v. Fla. Central & Penninsular R. Co., 3 I. C. R. 740.

(e) The division among themselves which a number of connecting carriers make of a through rate should not affect the question of the reasonableness or unreasonableness of the rate as an entirety. Florida Fruit Exch. v. Savannah, F. & W. R. Co. (C. C. N. D. Fla.) 4 I. C. R. 400.

(f) While the share which a carrier receives out of a joint or through rate over a line of which its road is a part is not necessarily the measure of reasonable rates by such carrier for a similar length of haul over its own road, it is proper in any case under the statute to use the aggregate joint or through rate in force over such line as a basis of comparison in determining the legality of rates charged by such carrier over its own road. Daniels v. C. R. I. & P. R. Co., 6 I. C. C. 458, 477.

(g) It is lawful for a carrier, within reasonable limits, to accept less per ton per mile upon long hauls than upon short ones, and to widen the disparity between such rates per ton per mile as the difference in distance increases. Hence, the proportion received by some of the carriers out of a long distance through rate is not necessarily the measure of the through rate which such carriers are entitled to make over a materially shorter distance, though such proportion is an important consideration in determining the rightful relation of the two through rates. Colorado Fuel & Iron Co. v. S. P. Co., 6 I. C. C. 488, 513.

IMPORTANT CASES SINCE 1908

(h) While it is not improper to consider the divisions of rates in determining questions of reasonableness, it is not obvious that in many instances, if not

generally, these comparisons of total rates with divisions are of little value, as there are many considerations, concerning which the public is not interested, which carriers in making arrangements between themselves may take into account in fixing joint rates and divisions. For instance, one rate in a through line may be so situated with respect to the movement of a particular kind of traffic, by reason of its location with reference to the points of supply and demand, or otherwise, that it is in a position to command a much more liberal allowance from its connections than it would with respect to other kinds of traffic. On the other hand, another rate made under the necessity of accepting abnormally low division in order to participate in the traffic. It follows that there may be wide variations in per ton-mile earnings of carriers composing through lines. Should the Commission undertake to measure the local or individual rates of a carrier by its divisions of through rates, it would inevitably lead to the continuous process of hammering down of local rates, or the withdrawal of carriers from such through routes and rates as yield only a small profit. Board of Trade of Winston-Salem, N. C., v. N. & W. Ry. Co., 26 I. C. C. 146, 150.

(i) Proof that the division of a joint rate received by one road is unremunerative is not conclusive of the unreasonableness of the rate itself. An adjustment of divisions might be the remedy, rather than an advance in rates. In re Advances in Break-bulk Rates, 27 I. C. C. 78, 80.

(j) Division of through rates are often pertinent, but not conclusive. Break-bulk Rates on Grain, 27 I. C. C. 78, 80

(k) The shipping public has no interest in the question of divisions. Boston-New York Proportional Rates (No. 2), 43 I. C. C. 210.

(l) Where divisions received by carrier is contended to be more than that received by other participating carriers, held that divisions of through rates primarily are matters of agreement between participating carriers, and that, while they may be considered as evidence, they are not regarded as conclusive, and ordinarily afford but little basis upon which to determine the reasonableness of joint rates. Freight Bureau, Chamber of Commerce, Macon, Ga., v. M., D. & S. R. R. Co., 45 I. C. C. 83, 84.

(m) While divisions may be considered as evidence they are not conclusive and ordinarily do not afford a sound basis upon which to judge of the reasonableness of rates. American Creosoting Co. v. Director General 61 I. C. C. 145, 151.

(n) Divisions which one carrier accords to another do not demonstrate the unreasonableness of rates. Atlas Portland Cement Co. v. N. & B. R. R. Co., 73 I. C. C. 687.

(o) Divisional arrangements and arrangements relating to per diem reclaim on cars are matters between the carriers which must be considered apart from the measure of the rate. Dissatisfaction with such arrangements, whether or not well founded, does not justify cancellation of the rates. Crushed Stone from Thornton, 87 I. C. C. 759, 761.

IV. LEGALITY.

§8. In General.

See Allowances IV; Legality; Tap Lines §7.

CASES 1887-1908

(a) Under the Act to regulate commerce a common carrier subject to its provisions can allow a division of rates only to another common carrier which, participating in the particular traffic to which the rate is applied, is also subject to the Act to regulate commerce. The two lines may by contract or agreement establish a joint rate from the point of origin on the one road to the point of destination on the other, and agree between themselves as to the division of the rate. Central Yellow Pine Asso. v. Vicksburg, S. & P. R. Co., 10 I. C. C. 193.

(b) Where excessive division of rates are granted by the carrier to another carrier owned and controlled by a shipper, for the purpose of obtaining the traffic of that shipper, they benefit the shipper and operate as a rebate or other device to cut the tariff charge, in violation of the Act to regulate commerce. Re Division of Joint Rates, etc., 10 I. C. C. 385.

(c) An unlawful preference to the United States Steel Corporation, which owns and controls the Illinois Steel Company, is practised under a division of rates whereby the Chicago, Lake Shore, & Eastern Railway Company—a terminal road owned by the United States Steel Corporation, and operated between the Illinois Steel Company's works—obtains a grossly excessive division for the service rendered. Re Division of Joint Rates, etc., 10 I. C. C. 385.

(d) While there may be great objections to allowing shippers to build and operate railroads over which their traffic moves, such action is not prohibited by the Act to Regulate Commerce; and the mere fact that the property of a common carrier is owned by the largest individual shipper over it, or that it was originally constructed for the purpose of doing the work of that shipper, furnishes no reason why it cannot make joint rates and agree upon joint divisions with other railroads. Re Division of Joint Rates, 10 I. C. C. 385.

(da) An unlawful preference in favor of the International-Harvester Company is practised by means of the division of the through rate, under which division the Illinois Northern Railway Company, owned by such Harvester Company, and the Chicago, West Pullman, & Southern Railroad Company, controlled by it, received a percentage of the rate, which amounts to about $12 per car, for services which were formerly performed by these terminal roads as a switching charge, and which amounted to a maximum of $3.50 per car, which was reasonable for these services. Re Division of Joint Rates, etc. 10 I. C. C. 385.

IMPORTANT CASES SINCE 1908

(e) What the public is primarily interested in is the charge for the transportation service rendered, irrespective of the divisions of the rate, and if the rate itself is reasonable and just, the fact that it is unequally divided between the participating lines is not a basis for reduction. There may be many reasons why a particular carrier would be willing to accept a very small portion of a joint rate in order to secure business, and it is within its rights in bargaining with its connections for tonnage so long as it does not undertake to haul one class of freight at rates so low as to thereby burden other traffic. Florida Mercantile Agency v. Penn. R. R. Co., 21 I. C. C. 85, 87.

(f) Whenever an abnormal division

is allowed to a railroad which is tied up with an industry, there results an indirect and hidden rebate to a shipper because of his ownership of the railroad. In Re Divisions of Joint Rates on Coal, 22 I. C. C. 51, 55.

(g) Allowances and divisions to tap lines recognized by the Commission as common carriers must have a proper relation to the service performed and be such in amount as not to effect a rebate to the industry. The Tap-line Case, 23 I. C. C. 277, 295.

(h) A boat line incorporated as a common carrier obtained its facilities from a salt company by which it is owned and in whose interest it is operated; it published no rates except upon salt in cargo lots; rates were manipulated for the benefit of the salt company, and it used as terminal facilities the docks and warehouses of the salt company by whose agents and employes all shipments must be handled. It was held that the boat line was a mere device to defraud the law, and payments made to it by connecting rail carriers in the guise of divisions are rebates. Colonial Salt Co. v. M. I. & I. Line, 23 I. C. C. 358.

(i) Acceptance by a railroad company of a given division only on traffic transported via railroad-owned lake lines does not constitute the discrimination against connecting lines prohibited by section 3. Flour City S. S. Co. v. L. V. R. R. Co., 24 I. C. C. 179, 189.

(j) A carrier may deem it good business policy in the public, as well as in its private, interests to secure a part of a through haul on a large volume of traffic and to accept a division of the through rate as compensation therefor which is much lower than the local rate. If such division earns a rate sufficiently above the out-of-pocket cost incurred by the carrier in performing this service to contribute something to the net earnings of that carrier, and if no unjust discriminations or other situations in violation of law are created thereby, no valid objection from any point of view can be made against such division. To the extent to which this through traffic does actually contribute to the net revenues of the participating carrier, such carrier can reasonably accept a correspondingly lower rate on all of its other business which otherwise would have to be charged with rates sufficient to yield the increased revenue required on the assumption that the carrier does require and is legally entitled to that amount of revenue. New Pittsburgh Coal Co. v. H. V. Ry. Co., 26 I. C. C. 121, 123.

(k) Carriers frequently take advantage of their strategical position and demand divisions which fairly compensate them for surrendering part of their line but a carrier with such an advantage may not lawfully accept from one of its connections a division which permits that competitor to share on fair and compensatory terms and demand from another connection a division so high as to make it impossible for it to share therein on a compensatory basis. Western Pacific R. R. Co. v. S. P. Co., 55 I. C. C. 71, 81.

(l) And a division out of a joint rate is essentially different from the allowance contemplated by section 15 of the act. Cambria Steel Co. v. Director General, 64 I. C. C. 737, 742.

(m) One purpose of the act is to prevent rebates effected by means of exorbitant divisions which find their way to proprietary companies through common carriers owned by proprietary companies. Divisions received by Brimstone Railroad & Canal Co., 68 I. C. C. 375, 386.

(n) If the divisions of joint rates are such as to amount to rebates or discriminations in favor of the owners of the tap lines because of their disproportionate amount in view of the service rendered, it is within the province of the Commission to reduce the amount so that a tap line shall receive just compensation only for what it actually does. Divisions of the Brimstone Railroad & Canal Co., 68 I. C. C. 375, 386.

(o) If the divisions of joint rates are such as to amount to rebates or discriminations in favor of owners of the tap lines because of their disproportionate amount in view of the service rendered, it is within the province of the Commission to reduce the amount so that a tap line shall receive just compensation only for what it actually does. Prescott & Northwestern R. R. v. M. P. R. R., 68 I. C. C. 687, 490.

(p) Practice of carriers in requiring shippers to adjust charges under divisions of joint rates as between the inbound and outbound carriers to and from the transit point when a mistake in showing the divisions is made by the transit bureau found unjust and unreasonable. Such adjustments should be made be-

tween the carriers themselves. Cincinnati Grain & Hay Exchange Co. v. B. & O. R. R. Co., 73 I. C. C. 104, 108.

(q) Complainant, a corporation oprating a grain elevator, and performing a transportation service, not as an independent entity, but as agent of a railroad, under contract, which service such railroad holds itself out to perform by the publication of charges in its tariffs, alleges that allowances made to it were unreasonably low. HELD, since complainant has no interest in traffic handled through the elevator, it can not be considered a shipper or "owner of property transported." It stands in much the same position as an employee of the railroad and can not be considered a common carrier whose compensation is to be derived from divisions of joint rates. Keystone Elevator & Warehouse Co. v. Director General, as Agent, 73 I. C. C. 273.

(r) The Commission has frequently found that shippers may not be deprived of lawful rates because of differences between carriers. Slogo Coal Corp. v. M. P. R. R., 88 I. C. C. 111, 112.

ALL OTHER CITATIONS

In Re Divisions of Joint Rates on Coal, 22 I. C. C. 51, 55, 57; Fourche River Lumber Co. v. Bryant Lumber Co., 33 Sup. Ct. 887, 889; 230 U. S. 316; Missouri River-Illinois Wheat and Flour Rates, 27 I. C. C. 286, 290. Cancellation of Joint Rates in Connection with C. Z. & G. R. R. 27 I. C. C. 353, 365; Joint Rates with the Washington Western Ry., 27 I. C. C. 630, 634; Pardee Works v. C. R. R. Co. of N. J., 29 I. C. C. 500, 502; Sheridan Chamber of Commerce v. C. B. & Q. R. R. Co., 28 I. C. C. 250, 255; Sandstone, Minn-Missouri River Building Stone Rates, 28 I. C. C. 269, 273; Rates on Railroad Fuel and Other Coal, 36 I. C. C. 1, 5, 9, 11; Poteau Coal & Mercantile Co. v. A. & S. Ry. Co., 40 I. C. C. 459, 463; Morgan v. F. V. R. R., 46 I. C. C. 327, 328; New Orleans, Natalbany & Natchez Ry. Co., v. I. C. R. R. 55 I. C. C. 113, 116; Gwinn Bros. & Co. v. C. & O. Ry., 56 I. C. C. 298, 300; Pittsburgh & West Virginia Ry. v. P. L. E., 61 I. C. C. 272, 282.

V. REASONABLENESS AND DISCRIMINATION.

§9. In General.

See Advanced Rates §18 (10); Supra §2½, §3, §4.

CASES 1887-1908

(a) Where two companies or railroad systems stipulated for a division of traffic and agreed that when one party carried traffic belonging to the other, but one-half of the charges should be retained for the transportation service, HELD, That in the light of this arrangement in connection with the other facts of the case some reduction was warranted. A. S. Newland v. Northern Pacific R. R. Co., et al, 6 I. C. C. 131.

(b) The practice, if lawful, of giving to Kansas City, on shipments from the west through Pueblo, Colorado Springs, Denver and Cheyenne, and from the northwest through Cheyenne, rates not higher than on such shipments to Omaha, furnishes no warrant for giving Omaha rates from Texas points not higher than those to Kansas City,—the circumstances and conditions in the two cases being substantially dissimilar. Commercial Club of Omaha v. Chicago R. I & P. Ry. Co., 6 I. C. C. 647.

(c) Complainant attacked divisions allowed by defendants to the M. I. & I., a boat line, on salt from Michigan to Western Trunk Line points as unlawful. Manistee and Ludington are salt producing points in Michigan, and salt shipped from those points to places on the Missouri River is carried by a boat line on Lake Michigan to Chicago, and by railroads from Chicago to the Missouri River. The through rate is 53c per barrel of which the boat line receives 33 1-3%, amounting to from 16 to 18c per barrel. Established vessel lines on the lake formerly carried the salt to Chicago for from 8 to 11c per barrel, but additional services rendered by the boat line, including storage at points of shipment and unloading, coopering, docking, storage, insurance, handling and loading in cars at Chicago, represent a cost of about 8½c per barrel. The boat line and the salt are owned by distinct corporations, but the same persons own controlling interests in both corporations. Salt interests at Detroit complained that this division to the boat lines amounted to a rebate from the tariff to the salt shippers from Manistee and Ludington and enabled them to undersell Detroit salt in the western markets. It further appeared that coal used in producing Detroit salt costs on the average about 75c to each ton of salt, while Manistee and Ludington salt producers also operate lumber mills and

the refuse from lumber manufacture for fuel in the salt works. HELD, that it is no part of the duty of the Commission to equalize differences in the natural advantages of localities through the adjustment of tariff rates, and that upon the facts shown in this investigation it does not appear that the share of the through rate allowed to the boat line is so grossly disproportionate to the value of the entire through service as to amount to a rebate in favor of the salt interests of Manistee and Ludington, which also control the boat line. In the matter of transportation of salt from points in Michigan to Missouri River points and intermediate localities. 10 I. C. C. 148.

(d) It seldom happens that a railroad should be permitted to charge more on through business than its regular local rate, where that local rate is sufficiently high for the local service. Blackwell Milling & Elevator Company v. M. K. & T. Ry., 12 I. C. C. 24, 25.

IMPORTANT CASES SINCE 1908

(e) Carriers frequently take advantage of their strategical position and demand divisions which fairly compensate them for surrendering a part of their line haul, but a carrier with such an advantage may not lawfully accept from one of its connections a division which permits that competitor to share on fair and compensatory terms and demand from another connection a division so high as to make it impossible for it to share therein on a compensatory basis. Western Pacific R. R. Co. v. S. P. Co., 55 I. C. C. 71, 81.

(f) One of the duties of common carriers is to participate in such joint rates as the public interest requires. This is an incident of their public undertaking, and equity does not necessarily demand that they be compensated by larger divisions in instances where it might be more advantageous to confine traffic to their own lines. P. & W. V. Ry. Co., v. P. & L. E. R. R. Co., 61 I. C. C. 272, 283.

(g) Per diem has never been a factor specifically taken into account in the determination of divisions. If so considered one of the essential purposes of per diem, i. e., greater use of freight equipment, might be nullified. As a road may have a debit balance one month and a credit balance in another, an exceedingly variable factor would be injected into the measure of compensation for the service performed under joint rates. New England Divisions, 62 I. C. C. 513, 538.

(h) Short-haul l. c. l. traffic is generally conceded to be unrenumerative, but it can not be said that because complainants originate a larger percentage of l. c. l. traffic than defendants, that fact should be given weight in determining that the divisions of complainants "as a whole" are unjust. New England Divisions, 62 I. C. C. 513, 540.

(i) Under the substantive provision of section 1 paragraph 4 of the act, there rests upon every common carrier subject to the act the duty, in the case of joint rates, fares or charges, to establish just, reasonable and equitable divisions thereof as between the carriers participating therein which shall not unduly prefer or prejudice any of such participating carriers. New England Divisions, 62 I. C. C. 513, 560.

(j) Under the provisions of section 15, no one of the elements which the Commission is required to consider is predominant; all are to be considered per se and relatively in the determination of just, reasonable, and equitable divisions "to be received by the several carriers." New England Divisions, 62 I. C. C. 513, 561.

(k) The public interest does not demand nor does the statute either expressly or by reasonable implication provide that the Commission may prescribe increased divisions to be received by certain carriers merely because other carriers participating in the joint rates, fares or charges, considered as a whole, have not failed in so great a degree to earn a fair return upon the value of their property devoted to the public service, although this is one factor which may be taken into consideration. New England Divisions, 62 I. C. C. 513, 562.

(l) The age of divisions affords no presumption that they are unreasonable; it may be that they were too liberal originally. New England Divisions, 62 I. C. C. 513, 563.

(m) While the Commission is urged to adjust the divisions in New England "as a whole" some of the roads in that territory have been excluded from the list of complainants and included in the list of defendants. To so deal with the situation would not be treating the New

England roads as a group. It would be taking from one road and giving to a less prosperous road, thus doing by indirection what Congress deliberately and specifically refused to authorize the Commission to do. New England Divisions, 62 I. C. C. 513, 565.

(n) A plan of divisional arrangements, which is the antithesis of equality, uniformity, system, or order, so fraught with incongruities from which anything might be proved by a judicious selection of items, is indefensible. New England Divisions, 62 I. C. C. 513, 565.

(o) It is impossible to avoid the conclusion that Congress intended the relative financial needs of carriers, so far as these needs are legitimate and incident to the transportation service, to be given consideration in fixing divisions; and it is just and right that this should be so. New England Divisions, 66 I. C. C. 196, 199.

(p) The group plan of increasing rates followed in Increased Rates, 1920, 58 I. C. C. 220, necessarily results in inequality of return to the various carriers. Certain of them gain a larger reward than they would receive if it were practicable to fix rates for individual companies, while others have less. Yet all are parts of the national transportation system and must be adequately maintained if they are not to be abandoned and due regard for the public interest demands that the Commission give these fortuitous inequalities consideration in the fixing of divisions. New England Divisions, 66 I. C. C. 196, 199.

(q) Although divisions of rates can not be based wholly on the financial conditions of carriers, it is one of the elements that may properly be considered by the Commission. Jackson v. St. L. S. F. Ry. Co., 66 I. C. C. 359, 369.

(r) One of the duties of a common carrier is to participate in such joint rates as the public interest requires. This is an incident of their public undertaking, and equity does not necessarily demand that they be compensated by larger divisions in the instances where it might be more advantageous to confine traffic to their own lines. Divisions of Joint Rates and Fares of M. & N. A. R. R., 68 I. C. C. 47, 51.

(s) Public interest requires that all essential parts be maintained, so far as possible, in effective working condition; that the relative amount and cost under economical and efficient management of the service rendered is a prime factor in determining the fair and equitable share of joint revenue which each carrier shall receive; and that included in such cost is a due proportion of the burden of maintaining the financial integrity and credit of the carrier. Division of Joint Rates and Fares of M. & N. A. R. R., 68 I. C. C. 47, 51.

(t) Density of traffic, grades, alignment, and other physical characteristics of the road are circumstances which ordinarily, without regard to the mileage haul, entitle one carrier to a greater or less proportion than another of the joint rate. Division of Joint Rates and Fares of M. & N. A. R. R., 68 I. C. C. 47, 57, 58, 60.

(u) The relative amount and cost under economical and efficient management of the service is a prime factor in determining the fair and equitable share of joint revenue which each carrier shall receive; and that included in such cost is a due proportion of the burden of maintaining the financial integrity and credit of the carrier. Federal Valley R. R. v. T. & O. C. Ry., 68 I. C. C. 499, 502.

(v) Practice of carriers in requiring shippers to adjust charges under divisions of joint rates as between the inbound and outbound carriers to and from the transit point when a mistake in showing the divisions is made by the transit bureau, found unjust and unreasonable. Such adjustments should be made between the carriers themselves. Cincinnati Grain & Hay Exchange Co. v. B. & O. R. R. Co., 73 I. C. C. 104, 108.

(w) The law in its present form requires that the Commission give due consideration among other things, to the revenue needs of carriers participating in joint rates to enable them to pay operating expenses, taxes, and a fair return on the value of their carrier property used in the transportation service as well as to all other facts or circumstances which, without regard to the mileage haul, entitle one carrier to a greater or less proportion of a joint rate than is received by others. Kansas City, Mexico & Orient Divisions, 73 I. C. C. 319, 324.

(x) Consideration must be given not only to the necessities of the short line but also to the condition and require-

ments of the connecting lines, having due regard to their revenues, expenses, taxes, and return, and considering their operating burdens and the efficiency of their management. Nevada, California, Oregon Divisions, 73 I. C. C. 330, 336.

(y) When a road seeks an increase in its division of a joint through rate there is cast upon it the burden of proving under all the circumstances that, as compared with the divisions received by its connections, it receives an unreasonably low proportion of the entire rate. U. S. War Department v. A. & S. Ry., 77 I. C. C. 317, 344.

(z) Divisions are affected with a public interest and are not a mere matter of bargain and trade between carriers. U. S. War Department v. A. & S. Ry., 77 I. C. C. 317, 354.

(aa) While the law does not permit the Commission to require rail carriers to establish through routes which result in the short-hauling of one carrier which has a reasonably direct route of its own, it is not a necessary conclusion, when such routes and joint rates are established, that local rates are fair divisions for the carrier which is short-hauled. U. S. War Department v. A. & S. Ry., 77 I. C. C. 317, 355.

(bb) A line participating in a joint rate does not prove that it is entitled to a division equal to its local rate by showing that the service which it performs in connection with the joint haul is no less expensive than its local service. That may be a reason why a joint rate lower than the combination of locals should not have been established, but it does not demonstrate that the carrier should have an amount equal to its local as its fair share of the joint rate which has been established. Nor does it prove that the joint rate should not have been established. U. S. War Dept. v. A. & S. Ry., 77 I. C. C. 356.

(cc) The exaction by rail lines of their local rates as divisions of through routes and joint rates with water carriers has for its purpose the protection of the long haul. It is a means of accomplishing indirectly what Congress, in the law respecting the establishment of through routes and joint rates, has sought to prevent. U. S. War Dept. v. A. & S. Ry., 77 I. C. C. 356.

(dd) Divisions of joint rates accorded Ohio & Kentucky Ry. Co. on bituminous coal from mines on its line to points in c. f. a. and western trunk-line territories, found unjust, unreasonable, and inequitable, in that they have not been increased proportionately with increases in joint rates since original agreement as to reasonable divisions. Reparations awarded and just, reasonable, and equitable divisions prescribed. Ohio & Kentucky Ry. Co. v. L. & N. R. R. Co., 77 I. C. C. 636.

(ee) A readjustment by the Interstate Commerce Commission of established divisions of joint freight rates on through traffic between the New England railroads and their connecting roads west of the Hudson held justified by changed conditions, brought about by increased rates and large increase in labor and fuel cost, which affected the New England lines comparatively more than their Western connections, because of their comparatively shorter hauls, their less density of freight traffic, their numerous terminals and branch lines, and their greater distance from coal supplies, with the increased cost of its transportation. Akron, C. & Y. Ry. Co. v. United States, 282 Fed. 306.

C. 513; U. S. War Department v. A. & S. Ry. Co., 83 I. C. C. 742, 752.

§10. Evidence and Procedure.

See Evidence; Procedure Before Commission.

IMPORTANT CASES SINCE 1908

(a) Value of terminals and facilities should be considered by connecting lines in fixing divisions. Buffalo, Attica & Arcade R. R. Co. v. B. & S. R. R. Corp., 31 I. C. C. 583, 585.

(b) Divisions should be computed with respect to earnings of lines to and from points of interchange. Rates on Lumber and Other Forest Products, 31 I. C. C. 673, 675.

(c) Grades and curves are considered in determinig reasonable divisions. Low Moor Iron Co. of Virginia v. C. & O. Ry. Co., 42 I. C. C. 221, 225.

(d) Operating conditions appear more difficult south of the gateways, and comparisons of traffic densities and revenues of northern and southern carriers argue for divisions south of the gateways at least as great as suggested by the southern carriers. Low Moor Iron Co. of Virginia v. C. & O. Ry. Co., 42 I. C. C. 221, 225, 228.

(e) Divisions shown would yield very little revenue for the service performed, but are not necessarily too low merely because they are less than local rates from the Ohio River for like service. Lehigh Portland Cement Co. v. B. & O. S. W. R. R. Co., 42 I. C. C. 406, 409.

(f) Where a road seeks an increase in its divisions of a joint through rate there is cast upon it the burden of proving under all the circumstances that, as compared with the divisions received by its connections, it receives an unreasonably low proportion of the entire rate. L. & N. R. R. Coal & Coke Rates, 50 I. C. C. 54, 58.

(g) Where there is no movement under a local rate, it affords no criterion in determining proper divisions of a joint rate. Laona & Northern R. R. Co. v. M. St. P. & S. Ste. M. Ry., 52 I. C. C. 7, 8.

(h) Per diem has never been a factor specifically taken into account in the determination of divisions. If so considered one of the essential purposes of per diem, i. e., greater use of freight equipment, might be nullified. As a road may have a debit balance one month and a credit balance in another, an exceedingly variable factor would be injected into the measure of compensation for the service performed under joint rates. New England Divisions, 62 I. C. C. 513, 538.

(i) While manufacture and production of commodities in general in a particular section of the country has a most important bearing in a rate case, the Commission's function in a divisional case has been considered to be an equitable, just, and reasonable apportionment of earnings derived from the carriage of a particular commodity as between the carriers participating in the transportation. New England Divisions, 62 I. C. C. 513, 539.

(j) If a particular traffic must bear its proper and proportionate share of operating costs and only earn its due proportion of the total earnings of a particular carrier, it would be inequitable to increase the divisions of a carrier having a large percentage of i. c. l. traffic because another carrier with which it participated in the transportation received the major portion of its earnings from some particular commod-

ity moving in greater volume. New England Divisions, 62 I. C. C. 513, 540.

(k) Under the provisions of section 15 no one of the elements which the Commission is required to consider is predominant; all are to be considered per se and relatively in the determination of just, reasonable, and equitable divisions "to be received by several carriers." New England Divisions, 62 I. C. C. 513, 560, 561.

(l) Words "without regard to the mileage haul" in paragraph (6), section 15, of the act, do not forbid consideration of element of distance in a proceeding involving divisions. They serve rather to emphasize the fact that other specified elements may outweigh the element of distance, in which event the Commission may properly disregard the mileage haul. The clause is inclusive rather than exclusive, and the general words "among other things" constitute a clear exposition of the intent of Congress that the Commission should consider all the facts and circumstances. New England Divisions, 62 I. C. C. 513, 560, 561.

(m) The burden of proof is upon the defendant, in a proceeding for determination of reasonable divisions of joint rates, to show that the divisions originally determined by agreement should not have been changed proportionately thereafter as the joint rates were increased or decreased. Ohio & Kentucky Ry. Co. v. L. & N. R. R. Co., 77 I. C. C. 636, 643.

(n) An order of the Commission, requiring a reduction in the divisional share of a railroad company in joint through class rates on carload lots, held not invalid, as arbitrarily made, because, while the established tariff fixed its share at a stated sum per 100 pounds, the order fixed a maximum sum per car, where its service rendered was almost entirely over a branch line only 1½ miles long. Chestnut Ridge Ry. Co. v. United States, 248 Fed. 791.

(o) An order of the Interstate Commerce Commission, fixing the divisional share of joint through rates to which a railroad company was reasonably and lawfully entitled, by determining the cost of its service and adding thereto a percentage as profit, held invalid, as unsupported by the evidence, because of a mistake in the theory upon which it calculated an item of the cost of service. Chestnut Ridge Ry. Co. v. United States, 248 Fed. 791.

(p) Agreements between railroads for divisions of joint through rates in force for more than 30 years, are presumed fair under unchanged conditions. Akron, C. & Y. Ry. Co. v. United States, 282 Fed. 306.

(q) Annual reports by connecting carriers to the Interstate Commerce Commission, which showed that the connecting carriers all made a profit in their operation, while the carrier which objected to the division of the rates was operated at a loss, but which were based on total revenue, both freight and passenger, and joint and local, and showed that the objecting carrier received more per ton mile than any of the connecting carriers, and more per car mile and per train mile than some of the connecting carriers, HELD, not to show that the divisions were unjust. Abilene & S. Ry. Co. v. United States, 288 Fed. 102.

(r) Exhibits for the Interstate Commerce Commission at a hearing on the division of joint rates, which showed that the complaining carrier received, under the existing division, more per ton mile than the other carriers, without showing any extra service rendered by that carrier, or any ground for complaint, except that its revenues were insufficient to meet its operating expenses, did not alone show that the divisions of joint rates were unjust, so as to sustain an order of the Commission prescribing new divisions. Abilene & S. Ry. Co. v. United States, 288 Fed. 102.

(s) The Transportation Act Feb. 28, 1920, §418, amending Interstate Commerce Act §15 (6), construed as authorizing Interstate Commerce Commission in dividing joint rates, to act on evidence typical in character and ample in quantity, without requiring specific evidence, and making a separate adjudication respecting each division of each rate of each carrier, is not unconstitutional. Akron, C. & Y. Ry. Co. v. United States, 43 Sup. Ct. 270.

§11. Reparation.

IMPORTANT CASES SINCE 1908

(a) Damages awarded for discrimin-

ation in divisions of passenger fares between points in California and Salt Lake City, Utah, in violation of the second paragraph of section 3 of the act. Western Pacific R. R. Co. v. S. P. Co., 55 I. C. C. 71, 81.

(b) To prevent bankruptcy, complainant carrier, with consent of shippers, instituted special increased joint rates, which were continued in effect for one year. Defendant connecting lines refused to allow complainant to retain whole increase, and retained portion thereof. On finding that present divisions accorded complainant out of joint rates are unjust, unreasonable, and inequitable, HELD: While paragraph (6) section 15 of the act provides for retroactive adjustment of divisions within discretion of commission, retroactive adjustment out of above special increased rates can not lawfully be required since not established "pursuant to finding or order of commssion." Wichita Northwestern Ry. Co. v. C. R. I. & P. Ry. Co., 81 I. C. C., 513, 515, 520, 521.

DOCKAGE

IMPORTANT CASES SINCE 1908

(a) If a shipper is so situated that he cannot conveniently remove goods from a dock within a reasonable time, and therefore requires dock insurance, there is no hardship in compelling him to pay for such protection, according to the length of time for which it is needed. Wyman, Partridge & Co. v. B. & M. R. R. Co., 15 I. C. C. 577, 579.

(b) A departure from the uniform practice of refusing to permit ships to dock at piers, while continuing the practice as to other shippers under similar circumstances and conditions, gives a shipper an advantage or preference in violation of the act. Samuel v. D. L. & W. R. R., 36 I. C. C. 255, 256.

(c) A carrier can not absorb the switching charges of connecting lines from one dock and refuse to do so from another dock, similarly situated. National Dock and Storage Warehouse Company v. B. & M. Ry., 38 I. C. C. 643.

(d) Where special dock and terminal services are included in a flat rate it is impracticable accurately to test the reasonableness of such rates without tearing them apart to analyze the component parts. Iron Ore Rate Cases, 41 I. C. C. 181, 204.

(e) Discontinuance of absorption of the charges for dockage, and to provide for deliveries of freight in lots of three carloads or more at private docks upon payment of certain charges, found not justified except as to private docks. Duluth Dockage Absorption, 44 I. C. C. 300, 302.

(f) The right of shippers to operate docks of their own can not be denied, and if they can perform the service at a less cost per ton than the carriers charge, or if they elect to assess a lower charge for the service than the maximum allowed to the carriers, are matters with which the Commission is not concerned. Iron Ore Rate Cases, 44 I. C. C. 368, 376.

(g) Rates on iron ore applied from the rail of the vessel on ore handled over all docks. It was proposed to continue this arrangement with respect to the ore shipped from private docks; that is—the rates were to apply from the rail of the vessel, and out of the through charges the private docks were to be allowed 2c a long ton on direct ore and 10 on dock ore. Certain private dock companies contended that they should be allowed to make charges equal to those made by the railroads at railroad docks, i. e., 6c on direct ore and 26c on dock ore. But it appeared that each of these private docks was an integral part of a furnace plant. HELD (1) that no reason appeared why the carriers should make any allowance to the private docks, or why rates should be published from the rail of the vessel on ore handled over such docks; (2) that as to such shipments the carriers might publish rates from the docks as such and not from the rail to the vessel; and (3) that a reasonable rate on ore from private docks served by short line railroads would be 4c per long ton higher than the line haul rates. Iron Ore Rate Cases, 44 I. C. C. 368.

(h) Any service performed by the private docks in the way of loading, handling, or storing the ore prior to the time of shipment is a matter to be disposed of between the dock and the shipper of the ore. Iron Ore Rate Cases, 44 I. C. C. 368,376.

(i) To publish and maintain rates applicable from the rail of the vessel on shipments handled over private docks would apparently make those docks public transportation agencies and put them under the obligation to handle all cargoes offered, but no such arrangement is intended. Iron Ore Rate Cases, 44 I. C. C. 368, 376.

(j) Carriers were required to state in their tariffs the amounts charged against the lake cargo coal traffic for the line-haul service from the mines to the docks at the lake ports and for the service of transferring the coal from the cars to the vessels at the docks. Lake Cargo Coal Rates, 46 I. C. C. 159, 194.

(k) The Commission should not order a physical connection with a dock, the location of which is unknown. Baltimore & Carolina S. S. Co. v. A. C. L. R. R., 49 I. C. C. 176, 177.

(l) Docks and depots of carriers are not to be used except as incident to the business of transportation. Baltimore & Carolina S. S. Co. v. A. C. L. R. R., 49 I. C. C. 176, 182.

(m) Where rail carriers have docks and physical connections therewith it would clearly be a wasteful requirement to insist that the water carrier secure a dock and that the rail carriers then extend spurs to that dock. Baltimore & Carolina S. S. Co. v. A. C. L. R. R., 49 I. C. C. 176, 184.

(n) Where either the rail or water carrier has suitable dock facilities the ownership or control by the one or the other is immaterial, in so far as the exercise of power under paragraphs (b) and (c) of section 6 is concerned, except as bearing upon the reasonable compensation for the use of such facilities. B. & C. S. S. Co. v. A. C. L. R. R., 49 I. C. C. 176, 185.

(o) Water craft are operated under conditions which make it impossible to predict at all times the pecise date of docking and clearing, and rail carriers can not be held responsible therefor. American Smelting & Refining Co. v. Director General, as Agent, 62 I. C. C. 583, 588.

(p) Where, under a carrier's duly published schedule or tariff, it would have been a violation of law for it to voluntarily pay a shipper for the shipper's services in the wharfage and handling of goods, the shipper was not entitled to a judgment requiring the carrier to pay for such services. Southern Cotton Oil Co. v. Central of Ga. Ry. Co., 288 Fed. 335.

(q) A carrier can not pay a shipper for wharfage services unless charges therefor are specified in a duly published schedule tariff. Southern Cotton Oil Co. v. Central of Ga. Ry. Co., 228 Fed. 335.

DOUBLE ADVANCES

See Advanced Rates §9½.

DOUBLE LOADING

See Classification §7½.

DRAYAGE CHARGES

See Allowances §8 (8); Cartage.

CASES 1887-1908

(a) The rspondent company had a tariff schedule in effect grouping the rates from eastern points at Ionia and Grand Rapids, Mich., Ionia being the shorter distance, and furnished free cartage at Grand Rapids and not at Ionia. HELD, that the free carriage at Grand Rapids was in effect a rebate and unlawful. Stone & Carten v. D. G. H. & M. R. Co., 3 I. C. C. 60.

(b) Where a common carrier subject to the act has established and published its schedule of rates and charges for a station on its line, free carriage furnished by the carrier for the collection and delivery of freight carried on its road to or from such station operates as a reduction or rebate from the schedule charge and is unlawful. If free cartage at a station has the effect to reduce a rate below the charge at another station nearer the point of shipment it is unlawful as a less charge for a longer distance over the same line and in the same direction, the less being included within the greater. Stone & Marten v. D. G. H. & M. R. Co., 3 I. C. C. 60, 64.

(c) It is not material to the question of the lawfulness of free cartage furnished at one town and not at another that the business was done in that way for many years before the act was enacted. If what was done and is now done works unjust discrimination or is in any particular obnoxious to the law, it is an abuse, and one that it must be assumed was intended to be corrected by the act. Stone & Marten v. D. G. H. & M. R. Co., 3 I. C. C. 60, 63.

(d) Rates for the transportation of flour originating at St. Louis or East St. Louis are the same, and such flour is forwarded by the defendant from its receiving station in East St. Louis. Shippers in St. Louis deliver flour to rail or wagon transfer companies at their stations in St. Louis and defendants bear the cost of transfer to said receiving station, the average being about 6c per barrel, or St. Louis shippers sometimes deliver to the wagon transfer company at their mill doors and then bear half

of the cartage expense by wagon, the defendants the other half. Petitioner teams flour from its mill about one-half a mile to said receiving station at East St. Louis at a cost of 6c per barrel, or loads it on cars furnished by the defendants on a side track contiguous to said mill at a cost of about 3c per barrel, being required to so load such cars that the lot for the nearest station is placed in the forward part of the train and lots for other stations are arranged consecutively, according to distance, and also being required to clean and repair such cars before using. HELD, that on flour destined to points outside the state which the initial carrier requests petitioner to haul to its station, or which petitioner is compelled to haul there by reason of proper cars not being furnished on said side track for loading, petitioner is entitled to a reduction of 6c per barrel from rates in force as long as defendants bear that amount of the cost of cartage for other shippers. HELD, FURTHER, defendants rule requiring petitioner to clean and repair cars furnished on said side track is unreasonable, but the requirement that petitioner shall load such cars according to stations is not unreasonable, and rates on flour loaded by petitioner in properly cleaned and repaired cars so furnished are properly the same as rates in force on shipments of flour originating in St. Louis. With reference to the transportation of flour defendants seem to treat St. Louis and East St. Louis as a single business community; therefore, they cannot complain if this case is determined upon that theory. Taking petitioners flour in cars from its mill is presumably equal in value to its expense of hauling by teams; therefore petitioner cannot complain that the carriers bear a portion of the cartage expense of the St. Louis millers equal to the benefit it receives from being able to deliver on the side track at its mill. Hezel Milling Co. v. St. L. A. & T. H. R. Co., 3 I. C. C. 701.

(e) For the carrier to pay the larger expense of the transportation of a remote shippers merchandise to the station, and not to pay the less expense of such transportation of the nearer shippers merchandise, would be the equivalent of a rebate to the former, the railroad service proper being the same to each and at the same rate; nor would it be treating all patrons with statuable equality to bear a part of the cartage expense for one shipper and not bear a part of it for another. Hezel Milling Co. v. St. L. A. & T. H. R. Co., 3 I. C. C. 701, 705.

(f) Drays may be common carriers. Re Right of Railroad and Transfer Companies to Exchange Transportation, 12 I. C. C. 39.

(g) Complainant attacked as unduly prejudicial practice of defendant in employing a particular trucking firm to transport through shipments via its line from railroad depots in and about New York City to its pier No. 25 in New York, and gives preference at such pier to the through traffic transferred by such trucking firm over traffic originating in New York and vicinity brought to the pier by other trucking firms. The pier is inadequate for the business of defendant, and congestion and delay result. The pier is not closed at night until all waiting trucks are unloaded, and it is soon to be considerably enlarged. No instance of injury resulting to shippers on their traffic and no discrimination amounting to exclusion from the pier was shown. HELD, such preference does not operate unduly or unreasonably against other truck owners. New York Team Owners Asso. v. Southern Pacific Co., 12 I. C. C. 204.

(h) Complainant attacked as unreasonable drayage charges assessed by defendant on two cars lumber from Avon, Wash., to Sawyer, N. D. There was no joint rate basis charged 40c Avon to Minot, N. D., and 4c beyond via the Soo Line. At Minot the lumber was taken from the cars by defendant and placed in cars belonging to the Soo Line for which transfer it charged the sum of $12.50 per car and paid by the shipper. Neither the published tariff of the G. N., or Soo Line provide for a drayage or transfer charge at Minot. HELD, reparation awarded to the extent of the cost of transfer at Minot. Schwager & Nettleton v. G. N. Ry., 12 I. C. C. 521.

(i) The Act does not bar a carrier from providing for costs of transfer in making delivery to a certain carrier, but if it so provides, it must publish and file a tariff showing where the transfer will be made, the kind of transfer service required and the charges to be exacted therefor. Schwager & Nettleton v. G. N. Ry., 12 I. C. C. 521, 524.

(j) A shipper is entitled to notice of a transfer charge other than one coming to him through the collection of the charge from his consignee, and as he is

not obliged to follow his shipment and make the transfer himself, he is entitled to the protection afforded by a published definite rate. Schwager & Nettleton v. G. N. Ry., 12 I. C. C. 521, 524.

(k) A carrier can not excuse the collection of an unpublished and unknown drayage and transfer charge by proof that it had a rule which forbade the sending of its own cars beyond its own line during a period of car shortage and congestion of business. This defense would be especially unavailable where no notice of the rule, either actually or by reference in a published tariff, had been brought to the shipper. Schwager & Nettleton v. G. N. Ry., 12 I. C. C. 521, 524.

(l) Reparation for drayage and transfer charge not published in tariff. Schwager & Nettleton v. Great Northern Ry. Co., 12 I. C. C. 521.

IMPORTANT CASES SINCE 1908

(la) Any teaming and drayage service must be entirely separate from joint rates herein prescribed or in division thereof. Stone's Express v. B. & M. R. R., 33 I. C. C. 638, 642.

(lb) Regulation that outside shippers shall employ a certain drayage company to remove their freight from the station is one whose lawfulness is gravely open to doubt and which should be promptly canceled, thereby permitting outside shippers their choice of agencies of wagon haul. St. Louis (Cupples Station) Terminal Regulations, 40 I. C. C. 425, 433.

(lc) Reparation awarded for drayage charges resulting from initial carrier's failure to promptly transmit to connecting carrier request for diversion. Central Foundry Co. v. S. Ry. Co., 42 I. C. C. 333.

(ld) Drayage costs do not determine the reasonableness of charges for trap-car service. Macey Co. v. P. M. R. R., 50 I. C. C. 555, 556.

(m) Due to strike, complainants obliged to cart express shipments from freight station to place of business. Contention that shipments overcharged to extent of cartage charges, not sustained. Carrier's tariffs did not authorize allowance or deduction from legally applicable rate for services performed; and since question whether or not complainants may recover for such services can not be determined from tariff, amounts paid for cartage are not overcharges. Tariff rate itself and rules and regulations connected therewith are standards to determine an overcharge. Lay Fish Co. v. Director General, as Agent, 80 I. C. C. 4.

(n) Due to harbor strike at New York City, cars could not be floated to destination in Brooklyn. To expedite movement to its plant, complainant accepted delivery at points where held and carted to destination. HELD: Defendants' obligation to perform further transportation, after complainant's accepting delivery short of billed destination, was terminated by complainant's waiver of the complete service. Defendant's failure to make allowance for cost of cartage was not unjust or unreasonable. Geisel Mfg. Co., 59 I. C. C. 193. Tidewater Paper Mills Co. v. B. T. R. R. Co., 80 I. C. C. 493.

DRAWING ROOMS

See Passenger Fares and Facilities §5¼.

DRESSING-IN-TRANSIT

See Facilities and Privileges §6½, §15.

IMPORTANT CASES SINCE 1908

(a) Complainant claimed that the carriers unlawfully failed to stop at Charleston, W. Va., for dressing, a carload of lumber shipped from Quick, W. Va., to Buffalo, N. Y. The bill of lading of the initial carrier bore the instructions, "With stop-over at M. L. M. Co., Charleston, W. Va., to be worked." Complainant sought to recover the difference between the expense of milling at Buffalo and the amount it would have cost to stop and dress the lumber at Charleston; and also contended that it was further damaged because the through charges were collected on the weight of the rough lumber. If milled at Charleston the weight would have been reduced about 5,000 lbs., and a tariff rule provided that from junction point to destination freight charges would be assessed on basis of the reduced weight. HELD (1) that the failure to stop the car at Charleston as directed in the bill of lading had damaged complainant to the extent of the difference between the expense incurred at Buffalo and that which would have accrued had the shipment been stopped as directed; but (2) that no allowance could be made for the reduced weight. Reparation awarded. Atlantic Lumber Co. v. T. & O. C. R. R., 45 I. C. C. 368.

ALL OTHER CITATIONS

Burritt Co. v. C. P. Ry., 45 I. C. C. 195.

DUMPED

See Facilities and Privileges §6.

IMPORTANT CASES SINCE 1908

(a) Carrier states term "dumped" in railroad parlance means to store at owner's risk and expense. Sharon Steel Hoop Co. v. P. R. R. Co., 42 I. C. C. 495, 496.

DUNNAGE

See Allowances §8 (2½)

DUPLICATE SHIPMENT

See Classification §12½.

Important Cases Since 1908

(a) One article of bulked shipment was lost in transit through the fault of the carrier. On a second article of the same kind sent to take the place of the lost article, the full minimum charge was collected. HELD, that complainant was entitled to damages to the extent of the additional charge thus accruing through no fault of the shipper. Larkin Co. v. E. & W. T. Co., 24 I. C. C. 645.

DURESS

IMPORTANT CASES SINCE 1908

(a) The old rule that there could be duress only where there was a threat of loss of life, limb, or liberty has been so changed, that "duress" may sometimes be implied when a payment is made or an act performed to prevent great property loss or heavy penalties, when there seems no adequate remedy except to submit to an unjust or illegal demand and then seek redress in the courts. Minneapolis, St. P. & S. S. M. Ry. Co. v. Railroad Commission (Wisc, 1924), 197 N. W. 352.

EATING HOUSES

IMPORTANT CASES SINCE 1908

(a) Conceding that a carrier has no right to enter the field of general business and transport the articles and commodities used and sold therein at less than the regular published rates available to the general public, it has the right to provide eating houses for its passengers and employees at points on its line, and may transport the articles and commodities for the use of such eating houses at less than the full published rate. Montgomery v. Chicago B. & Q. R. Co., 228 Fed. 616, 618.

ALL OTHER CITATIONS

Montgomery v. Chicago B. & Q. R. Co., 228 Fed. 616, 619, 620, 621.

I. CONTROL AND REGULATION

See Control and Regulation; Interstate Commerce Commission I.

CASES 1887-1908

(a) An electric railway lying partly in the District of Columbia and partly in the state of Maryland is subject to the provisions of the Interstate Commerce Act, although constructed on public highways and essentially a street surface road

for the convenience of urban and suburban passengers. Willson v. Rock Creek R. Co., 7 I. C. C. 83.

(b) The defendant, operating a line of electric railway lying partly in the District of Columbia and partly in the State of Maryland, is subject to the provisions of the Act to Regulate Commerce, although it appears to be constructed upon or along public highways, and is essentially a street surface road for the conveyance of urban and suburban passengers. Yeomans and Prouty, Commissioners, dissenting. Willson v. Rock Creek R. C., 7 I. C. C. 83, 88.

IMPORTANT CASES SINCE 1908

(c) Electric railways, other than street passenger railways, participating in the interstate movement of persons or property are held within the jurisdiction of the Commission and subject to the requirements of the Commission relative to the filing of reports of finances and operations and accidents. Jurisdiction over Urban Electric Lines, 33 I. C. C. 536.

(d) If the maintenance of fares fixed by a franchise contract between an electric line and a municipality results in unjust discrimination against interstate commerce, it is within the power of the Commission to remove it by prescribing other and different intrastate fares. Ohio Rates, Fares and Charges, 64 I. C. C. 493, 498.

(e) It may be argued that this Commission has no jurisdiction over a city street car line and may not impose rates and conditions for local service other than those stipulated in a franchise, it is not seriously to be contended that the federal government in its efforts to maintain facilities of interstate communication and to prevent discrimination is to be prevented by municipalities which, in franchise involving the use of their local streets, assume to regulate the rates to be charged to and between other cities; and particularly when such franchises impose rates which, under present conditions, obviously are unjust and which menace maintenance of interstate transportation facilities and service. Ohio & Pennsylvania Rates, Fares and Charges, 64 I. C. C. 517, 524.

(f) Complainant attacked the reasonableness of through charges, but showing of unreasonableness was largely as to the factor maintained by an electric line. HELD, since the electric line was not under Federal control, the Director General not named as a party defendant, and no violation of the Federal control act alleged, shipments which moved during the Federal control period can not be considered. Buckeye Pipe Line Co. v. B. & O. R. R. Co., 73 I. C. C. 19, 22.

(g) Contention that even if the intrastate haul of an electric line is held to be part of an interstate movement, the Commission has no jurisdiction to require the establishment of joint rates as such electric line is a "street electric passenger railway" not engaged in the general business of transporting freight in addition to its passenger and express business, not sustained. In addition to the street passenger service the electric line conducts an interurban service, transports freight both in c. l. and l. c. l. quantities and maintains freight stations. Hood Coal Co. v. M. V. T. Co., 73 I. C. C. 54, 57.

(h) The question of whether an electric line is engaged in the general business of transporting freight is to be determined by the nature and extent of its freight business rather than by a technical construction of the act under which the lessor of its lines was organized. Michigan Railroad Co. v. P. M. R. R., 74 I. C. C. 489, 498.

(i) Under the Interstate Commerce Act, §1, as amended by Transportation Act of 1920, making the act applicable to carriers engaged in the interstate transportation of passengers or property wholly by railroad, which was the same in that respect as the language of the original act, when construed with amended section 13 of that Act, particularly in view of paragraphs 3 and 4 thereof, and sections 15a and 20a, which are added by sections 422 and 439 respectively of the Transportation Act of 1920, and with title 4, §402, par. 22, title 2, §209, and title 3, §300, of that act, an electric street or interurban railway is not subject to the Inter state Commerce Commission unless it is being operated as part of a general steam railroad system, is engaged in the general business of transporting freight in addition to its passenger and express business, or does not have, as its principal source of operating revenue, urban, suburban or interurban passenger traffic, or sale of power, heat, and light, or both. Village of Hubbard, Ohio, v, United States, 278 Fed. 754.

II. THRU RATES WITH STEAM ROADS

See Through Routes and Joint Rates.

IMPORTANT CASES SINCE 1908

(a) The Commission's authority to require establishment by steam railroads of through routes and joint rates with interurban electric railroads engaged in interstate commerce has long been settled. Chicago, Ottawa & Peoria Ry. Co. v. C. & N. W. Ry. Co., 33 I. C. C. 573, 575.

(b) Connecting electric lines should be accorded the same service upon like terms under like conditions as connecting steam roads. A. E. & C. R. R. v. I. H. Belt R. R., 51 I. C. C. 331, 334.

(c) The right of an interurban electric railway to the establishment of through routes and joint rates, under section 15 of the act, depends upon whether it is engaged in the general business of transporting freight in addition to its passenger and express business; its ability to maintain in connection with other carriers such through routes and joint rates; whether they are necessary or desirable in the public interest; and whether by such establishment any of the other carriers would be short-hauled. Michigan R. R. Co. v. P. M. R. R. Co., 74 I. C. C. 496, 497.

(d) The question of whether an electric line is engaged in the general business of transporting freight, so as to entitle it to through routes and joint rates, is to be determined by the nature and extent of its freight business rather than by a technical construction of the law under which the lessor of its lines was organized. Michigan R. R. Co. v. P. M. R. R. Co., 74 I. C. C. 496, 498.

III. RIGHT TO FUEL RATES AND DIVISIONS.

ALL CITATIONS

In Re Restricted Rates, 20 I. C. C. 426, 431; Hurst v. B. V. T. R. R., 51 I. C. C. 697, 700, 701; Montana Rates and Fares, 61 I. C. C. 500; Intrastate Fares of the C. N. S. & M. R. R., 62 I. C. C. 188; State of Idaho ex rel. v. O. S. L. R. R. Co., 83 I. C. C. 4; Cement from Bonner Springs, 83 I. C. C. 176.

IV. TRANSFERS AND RATES

IMPORTANT CASES SINCE 1908

(a) Special rates made to apply exclusively on the electric lines to school pupils not over 18 years of age are unlawful and discriminatory, but such rates may be put in, provided they apply to all young persons within the age limit specified. Bitzer v. W. Va. Ry. Co., 24 I. C. C. 255, 257.

(b) Higher fares may be charged on the electric lines between the same points on express trains than on local trains. Bitzer v. W. Va. Ry. Co., 24 I. C. C. 255, 259.

(c) A rule of a street railway company which prohibits the sale on its trains of round-trip tickets to interstate passengers from its station in Washington, D. C., where such tickets are kept on sale, is not unlawful, but defendant required to accord passengers boarding cars at Bureau of Engraving and Printing the same privileges as are accorded at other non-agency stations. Ford v. W. Va. Ry. Co., 24 I. C. C. 632.

(d) Fact that the combined passenger and newspaper traffic has increased to a point where the transportation facilities are inadequate does not furnish any justification for proposed increased rates on newspapers transported in passenger cars between stations on the Kansas City, Kaw Valley & Western Ry. Newspapers on Passenger Cars, 57 I. C. C. 743.

(e) So rates of electric lines authorized to be so increased by the same percentages as are approved herein for trunk lines in the same territory, but this is not to be construed as a disapproval of increases made or proposed in the regular manner in the passenger fares of electric lines. Increased Rates, 1920, 58 I. C. C. 220, 254.

(f) Proposal to establish, in lieu of a 5-cent fare, an 8-cent interstate local passenger fare between Jersey City and Hoboken, N. J., and Hudson Terminal station, New York, down town, and a 7-cent fare between Jersey City and Hoboken and stations in New York, Christopher street to thirty-third street, inclusive, uptown, found not justified, but present 6-cent fare down town and 10-cent fare uptown, established by special permission of the Commission in order that respondent might obtain additional revenue to which it was prima facie entitled, found justified. Local Fares on Hudson & Manhattan R. R., 58 I. C. C. 270.

(g) In accordance with act of Congress, approved July 2, 1918, 40 Stat. 742, 748, the space-basis system to govern the transportation of mails by electric roads found fair and reasonable. Reasonable rates and certain rules prescribed for different classes of mail service. Electric Railway Mail Pay, 58 I. C. C. 455.

(h) The service of interurban electric railways is distinguished by its local and limited character and by the fact that the bulk of their revenues are derived from the transportation of passengers. Their facilities for handling freight are usually inadequate or lacking so as to disable them from engaging in its general transportation. The amount of business interchanged by them with connecting carriers is ordinarily very small. Proposed Control of Sacramento Northern by W. P. R. R., 71 I. C. C. 653, 657.

(i) Standard and commutation fares of the Chicago, Lake Shore & South Ry. Co., for the transportation of passengers within the State of Illinois, lower than the corresponding interstate fares authorized in Increased Rates, 1920, 58 I. C. C. 220, 58 I. C. C. 302, found unduly preferential to intrastate passengers, unduly prejudicial to interstate passengers, and unjustly discriminatory against interstate commerce. Similar fares of the Aurora, Elgin & Chicago R. R. Co. and the Southern Illinois Ry. & Power Co. found not unduly preferential or discriminatory. Intrastate Rates within Illinois, 77 I. C. C. 173.

Rates, Fares and Charges, 64 I. C. C. 517, 524; Intrastate Rates within Illinois, 66 I. C. C. 350; Indiana Passenger Fares of C., L. & S. B. Ry. Co., 60 I. C. C. 180; Buckeye Pipe Line Co. v. B. & O. R. R. Co., 73 I. C. C. 19; Hood Coal Co. v. M. V. T. Co., 73 I. C. C. 54; Elimination of Michigan R. R. Co. from Fruit Tariff, 74 I. C. C. 228.

V. FACILITIES.

IMPORTANT CASES SINCE 1908

(a) Where electric interurban lines are common carriers and are engaged in interstate traffic, it is their duty, under express and affirmative provisions in the Act, to provide cars and all other reasonable facilities necessary properly to serve the public. Louisville Board of Trade v. I. C. & S. T. Co., 27 I. C. C. 499, 504.

ALL OTHER CITATIONS

Knapp Supply Co. v. Ohio Electric Ry. Co., 38 I. C. C. 627.

VI. OPERATION.

See Operation.

IMPORTANT CASES SINCE 1908

(a) A branch line proper may as well be operated by electricity as by steam, and no reason is obvious why the building of such branch lines ought not to be encouraged. New England Investigation, 27 I. C. C. 560, 609.

VII. REGULATION.

See Rules and Regulations.

IMPORTANT CASES SINCE 1908

(a) Defendant electric railway's published round-trip fare between Washington, D. C., and Robey, Va., was 50c, the fare one way being 30c. Under its rules, defendant sold round-trip fares only through its ticket agent. At 14th and B. streets, S. W., Washington, defendant had a station but no ticket agent and refused to permit passengers boarding at that station to procure round-trip tickets on the trains, thereby compelling passengers to pay single fares both ways. HELD, while it was not improper to require that round-trip tickets be purchased of the ticket agent at stations where there were such agents, it was unjustly discriminatory to prohibit the sale on the train of such tickets at stations having no ticket agent. Ford v. Washington-Virginia Ry. Co., 24 I. C. C. 632.

(b) Reduction of time within which commutation tickets of certain electric lines operating from Belleville and East St. Louis, Ill., to St. Louis, Mo., may be used, by limiting their use to the calendar month in which issued in lieu of 60 day period previously in effect, not found unreasonable as carriers are merely standardizing their practice and bringing it into conformity with that which has been in effect on their other divisions. Greater Belleville Board of

Trade v. E. St. L. & S. Ry. Co., 60 I. C. C. 741, 746.

VIII. SWITCHING CONNECTIONS.

See Switch Tracks and Switching §7.

IMPORTANT CASES SINCE 1908

(a) The power of the Commission to order a switch connection is provided in section 1 of the Act, and is limited to making such connection with a lateral branch line of railroad or with a private sidetrack. St. Louis, Springfield & Peoria R. R. v. P. & P. U. Ry. Co., 26 I. C. C. 226, 230.

(b) The Commission has no jurisdiction to order a switch track to be built connecting an independent electric line with a steam road where the electric line does not form a physical connection with such road. St. Louis, Springfield & Peoria R. R. v. P. & P. Ry. Co., 26 I. C. C. 226, 231.

(c) If a connection between an electric line and a steam road is not sufficient to render the service for through routing which the law requires, both carriers are under obligation to make the facilities adequate. St. Louis, Springfield & Peoria R. R. v. P. & P. U. Ry. Co., 26 I. C. C. 226, 231.

(d) Respondent proposed to cancel its switching charge for interchange of cars with the P. & N., at Paris, S. C. The P. & N. is an electric carrier of standard guage extending from Spartenburg to Greenwood, both in South Carolina, a distance of 128 miles. It parellels the Southern all the way, serves generally the same stations, and at no point is more than two or three thousand feet from the rails of the Southern. It is equipped for interchange of traffic with steam roads. In March or April, 1920, the Minter Homes Company purchased a part of the property of the former Camp Sevier, situated just south of the main line of the Southern at Paris and separated from the P. & N. by the tracks of the Southern. During the war the P. & N., in order to reach Camp Sevier, built a track about a thousand feet long connecting with the southbound track of the Southern. The Southern provided the frogs and switches for the connection with its track and a minor portion of the track. It switched freight to and from the P. & N., at a tariff charge of $2 per car, now $2.50, which was absorbed by the P. & N. on competitive traffic. On June 28, 1920, about two or three months after the transfer of the camp property and several months after the use of the connecting track for government shipments had ceased, the Southern took up about 230 feet of the track, thus destroying the connection. A witness for the Southern stated that if the cancellation is allowed to become effective the Southern will extend the Greenville switching limits to include Paris, and, with this Commission's permission, will do so upon less than statutory notice. It would appear that the assumption of the Southern at the time the track was removed that the necessity for the connection had ceased was not without justification. The only question before the Commission for determination upon this record is the propriety and lawfulness of the cancellation of the published charge for the service which is no longer physically possible for respondent to render. HELD, that respondent, upon extending, by proper tariff publication, the switching limits of Greenville so as to include Paris, as proposed by it, will have justified cancellation. This finding is without prejudice to the rights of shippers in an appropriate proceeding to seek reestablishment of the cancelled charge should the track connection, as a result of the order of the state commission, or otherwise be later restored. Switching and Absorption at Paris, 60 I. C. C. 210.

ALL OTHER CITATIONS

Chicago, Lake Shore & South Bend Ry. Co., v. Director General, 58 I. C. C. 135, 647, 654; Class and Commodity Rates of Kansas City Rys. Co., 59 I. C. C. 382.

ELKINS ACT

See Crimes I.

EMBARGOES

See Car Congestion; Demurrage §3½; Reconsignment §4½.

CASES 1887-1908

(a) Complainant attacked defendants as guilty of unjust discrimination by reason of unreasonable delay in forwarding and delivering a carload of baled hay from Condit, O., to Washington, D. C., resulting in damages in the sum of $1,159.20. At this time there existed an unprecedented congestion of traffic

upon all lines of railroad connecting with the field of bituminous coal due to a strike of coal miners. In consequence, the B. & O., issued to its connections embargo notices to the effect that certain kinds of freight would not be accepted by it. HELD, it is proper for carriers to issue embargo notices and the Commission is unable to find from the testimony that any undue or unreasonable prejudice or disadvantage resulted to complainant, complaint dismissed. S. S. Daish & Sons v. C. A. & C. Ry., 9 I. C. C. 513.

(b) Embargo against one shipper, discrimination. Roger & Co. v. P. & R. Ry. Co., 12 I. C. C. 308.

(c) Embargo against one commodity and individual. A special embargo of complainant's shipments of hay and straw destined to defendant's Third and Arch streets station in Philadelphia, held to constitute an unlawful discrimination. Whatever may be said of an embargo against one commodity only in a time of congestion can be said for an embargo which refuses transportation facilities to some establishments while according such facilities to their competitors. Rogers & Co. v. P. & R. Ry. Co., 12 I. C. C. 308.

(d) Complainant attacked as discriminatory an embargo placed by defendant on complainants shipment of hay and straw destined to its station in Philadelphia. HELD, this resulted in discrimination against complainant for the reason competitors of complainants receiving these commodities at the same station were not embargoed. E. L. Rogers & Company v. P. & R. Ry., 12 I. C. C. 309.

(e) In July, 1906, defendant issued a special embargo on complainant's shipments of hay and straw destined to its Twenty-third and Arch streets station in Philadelphia: HELD, upon the facts of the case: (1) That such embargo constituted an unlawful discrimination against complainant. Whatever may be said of an embargo against one commodity only in a time of congestion, can be said for an embargo which refuses transportation facilities to some establishments while according such facilities to their competitors. If the exercise of such a power were to be at all tolerated, carriers would be able to issue sentences of commercial death against some of their patrons, while continuing to serve others. (2) That this Commission has jurisdiction to forbid such discrimination and to award reparation for the detriment directly and proximately resulting from it, but as the record in the case fails to show that the shipments made during the embargo period were interstate, no order of reparation will be entered until after proper showing that said shipments were interstate. Rogers & Co. v. Phila. & Reading Railway Co., 12 I. C. C. 309.

(f) Reparation for detriment proximately resulting from embargo against one commodity and individual, not ordered where record fails to show that shipments made during the embargo period were interstate. Rogers & Co. v. P. & R. Ry. Co., 12 I. C. C. 309.

(g) Whatever may be said of an embargo against one commodity only in a time of congestion, nothing can be said for an embargo which refuses transportation facilities to some establishment while according such facilities to their competitors. If the exercise of such a power were to be at all tolerated, carriers would be able to issue sentence of commercial death against some of their patrons, while continuing to serve others. E. L. Rogers & Company v. P. & R. Ry., 12 I. C. C. 309, 311.

IMPORTANT CASES SINCE 1908

(h) In a certain case embargoes were placed by some lines against movement of their own coal cars beyond their rails, a practice held unlawful in Mo. & Ill. Coal Cases, 22 I. C. C. 39, and in that case carriers were expected to make such rules for return of cars as would terminate such abuses. Where carriers have failed in this respect Commission is empowered to determine individual or joint regulation or practice that is just, fair, and reasonable. Car Supply Investigation, 42 I. C. C. 657, 662, 671.

(i) The question whether or not an embargo unduly prejudiced those who desired to ship a particular commodity upon which it was in effect is one of fact, determinable only upon consideration of all the facts, circumstances, and conditions in a particular case and a showing that there was no accumulation of that commodity at a carrier's termini does not of itself justify a finding of undue prejudice and disadvantage in a case where there was an excessive accumulation of other freight. Prudential Oil Corporation v. M. & M. Transp. Co., 43 I. C. C. 696, 699.

(j) The Commission's jurisdiction is limited to determining the lawfulness of the practices of embargoes and to requiring after full hearing the establishment and maintenance of such regulations or practices as may be found to be just, fair and reasonable. Baltimore Chamber of Commerce v. B. & O. R. R. Co., 45 I. C. C. 40, 53.

(k) The Act does not inhibit the declaration of an embargo by a carrier, and the advisability or the necessity of declaring embargoes is a matter of policy to be determined in the first instance by the carrier. Baltimore Chamber of Commerce v. B. & O. R. R., 45 I. C. C. 40, 53.

(l) Carriers may not, under the guise of an embargo, attempt to accomplish results which the law requires shall be effected only by means of published tariffs. Powell-Myers Lumber Co. v. St. L. I. M. & S. Ry. Co., 45 I. C. C. 594, 596.

(m) An embargo on traffic is an emergency measure adopted where it is physically impossible for carriers to transport freight, or where there is an unusual accumulation of traffic. Under such circumstances there is temporarily and to a limited extent a failure by a carrier to fulfill its obligations as a common carrier. Such failure is unlawful unless it has sufficient justification, and, with respect to interstate traffic, also violates that provision of the Act to regulate commerce which, requires that carriers subject thereto shall "furnish * * * transportation upon reasonable request therefor." That some embargoes may be justifiable is obvious, but carriers may not, under the guise of an embargo, attempt to accomplish results which the law requires shall be effected only by means of published tariffs. Powell-Myers Lumber Co. v. St. L. I. M. & S. Ry. Co., 45 I. C. C. 594, 595, 596.

(n) Federal embargoes are declared in the interest of the general public and must be observed. By observing them the carrier incurs no liability to the shipper whose goods are embargoed. Union Hay Company v. C. St. P. M. & O. Ry. Co., 45 I. C. C. 594, 597.

(o) A shipper who chooses to defeat the spirit of an embargo against the making of export shipments to New York before he has secured his ocean space suffers the penalty represented by the difference between the provisions of the export and the domestic tariff schedules. New York Produce Exchange v. B. & O. R. R., 46 I. C. C. 666,672.

(p) No charge should be made for a reconsignment or change in route made necessary by an embargo or by the confiscation of freight. Reconsignment Case, 47 I. C. C. 590, 616.

(q) If under all the facts a particular embargo could not be justified by the carriers, it is clear that they could not justify refusal to reconsign to the embargoed point, although the tariff might so provide. Reconsignment Case, 47 I. C. C. 590, 635.

(r) Where physical disabilities prevent the carriers from handling certain kinds of traffic for particular destinations, or where the consignees are unable promptly to accept delivery, the embargo is properly invoked. Coal from Arkansas and Other States, 49 I. C. C. 727, 731.

(s) Unlike rate increases, the embargo is but a temporary measure, which leaves the rate structure undisturbed. Coal from Arkansas and Other States, 49 I. C. C. 727, 731.

(t) An embargo was in effect at the billed destination. A car was reconsigned but complainant failed to request change in name of consignee. Upon arrival at new destination consignee could not be located and complainant did not give delivery instructions until after receipt of a second telegram. Delivery again not affected due to accrued demurrage and car was towed across the river and subsequently towed back and delivered. It was held that demurrage and towage charges not unreasonable or otherwise unlawful. Currie & Campbell v. Director General, 57 I. C. C. 450.

(u) A carrier accepted reconsignment instructions after being informed that car would be accepted by connecting point. Failure to comply with further instructions for reconsignment to another point received while shipment was on carrier's rail, or to inform the connecting carrier before shipment left reconsignment point, resulted in higher charges than would otherwise have lawfully accrued. Reparation awarded. Lowry Lumber Co. v. Director General, as Agent, 58 I. C. C. 12.

(v) But it is within the jurisdiction of the Commission to condemn an embargo which results in an unreasonable

practice. Herman Gross v. Director General, 58 I. C. C. 604, 606.

(w) The law does not require that notices of embargoes be published as tariffs are published. La Fayette Box Board & Paper Co. v. Director General, as Agent, 59 I. C. C. 105, 107.

(x) Where an embargo in effect prohibits movement to a point except upon special permits and carrier accepts shipments from connections in addition to those for which permits were issued and complainants are unable to unload within free time, demurrage accruing is not unreasonable or otherwise unlawful. Timken Roller Bearing Co. v. W. & L. E. Ry. Co., 59 I. C. C. 149.

(y) Unless tariffs prohibit reconsignment to embargoed points no demurrage charges accrue. McGowin Lumber & Export Co. v. Director General, as Agent, 64 I. C. C. 694, 697.

(z) Shipments found misrouted where embargoes were a desirability of the carriers, which did not confer upon them the right of diverting shipments to higher rated routes contrary to shippers' instructions, especially where there were no provisions in tariffs at time shipments moved prohibiting reconsignment to embargoed points, and nothing which would have precluded shipper from specifically routing via lower rated routes had it billed shipments to final destinations in the first instance. McGowin Lumber & Export Co. v. Director General, as Agent, 64 I. C. C. 694, 697.

(aa) Because of an embargo, shipper authorized change in destination and ultimately reconsigned shipment to originally billed point. Shipper might have stood upon his right to have joint rate specified in original billing protected, but since he consented to the substitution of a different contract in the face of a warning that change in destination could not be made the effective means of diversion after arrival at new destination, he thereby assumed liability for the combination rates charged and legally applicable over route of movement. George Pottery Co. v. Director General, as Agent, 60 I. C. C. 372.

(bb) Charges applicable on shipments of cotton on which shipper directed compression in transit at a point off the initial carrier's rails, because of an embargo, found unreasonable to extent they exceeded lower charges from more distant points of origin with carrier's privilege of compression at points on its own line, which lower charges were subsequently established from points of origin here involved. Reparation awarded. Tarver, Steele & Co. v. Director General, as Agent, 60 I. C. C. 666.

(cc) Due to an embargo via the normal route, shipper was obliged to route intrastate shipments for delivery via route over which higher rate applied. HELD: As distances over both routes practically the same and shipments moved during federal control, when the carriers were being operated as part of a national system, and were, for then-present purposes, a single line, higher rate charge found unreasonable. Reparation awarded. Barrett Co. v. Director General, as Agent, 61 I. C. C. 401.

(dd) An embargo placed by Fuel Administrator against complainant's plant became effective while shipments en route and cars were constructively placed in carrier's yards. HELD: Embargo not applicable to complainant's shipments, and since demurrage accrued as a result of such constructive placement and not to disability of complainant, demurrage found unlawfully assessed and should be refunded. Union Bag & Paper Corp. v. Director General, as Agent, 61 I. C. C. 424, 427.

(ee) The contention that carriers having established through rates and provided for reconsignment it was unlawful to assess penalty charges upon shipments held on account of embargoes, notwithstanding tariff provisions to the effect that reconsignment orders would not be accepted to a point against which an embargo was in force at the time shipment was forwarded from point of origin, not sustained. American Wholesale Lumber Asso. v. Director General, as Agent, 66 I. C. C. 393, 398.

(ff) If a shipper habitually delays cars for unloading at destination the carriers may place an embargo against freight consigned to him and thus prevent further detention of equipment; if the shipper habitually delays loading cars the carrier may refuse further supply and thus prevent detention and accumulation of cars at the loading point. American Wholesale Lumber Asso. v. Director General, as Agent, 66 I. C. C. 393, 405.

(gg) The right to refuse shipments temporarily for good cause by the es-

tablishment of embargoes, which are not required to be filed with the Commission is recognized. Krauss Bros. Lumber Co. v. Director General, 66 I. C. C. 637, 639.

(hh) The obligation to accept articles tendered for transportation is governed by general principles of law; to reconsign, by rules lawfully on file with the Commission. The right to refuse shipments temporarily for good cause by establishment of embargoes, which are not required to be filed, is recognized. The right to reconsign depends entirely upon the construction of the rules, which are required to be filed in the same manner as rates. If carriers do not restrict such rules to the extent of their capacity to perform the service, the shipper can not be held liable for detention when it is not directly responsible therefor and can not abate the cause thereof, as in the case of an embargo, which is a disability of the carrier. Krauss Bros. Lumber Co. v. Director General, as Agent, 66 I. C. C. 637, 639.

(ii) An embargo is an emergency measure placed because of some disability on the part of the carrier which makes the latter unable properly to perform its duty as a common carrier. It is not placed for the protection of the shipper. John E. Murray v. Director General, 69 I. C. C. 477, 479.

(jj) Tariff authorized diversion or reconsignment at joint rates but provided that such orders would not be accepted to embargoed points except under authorized permits. Delivering line declined to issue permits to divert en route, but shipments were permitted to move to embargoed points by being first billed to an open destination on its line and then rebilled therefrom under permits, for which combination rates were assessed. HELD, purpose of embargo defeated and permits issued negatived prohibition against diversion or reconsignment to embargoed points. The legal rates were thus the joint rates to final destination, plus diversion or reconsignment charges. Reparation awarded. Humble Oil & Refining Co. v. Director General, as Agent, 73 I. C. C. 275.

(kkll) Embargoes are justified by such necessities as may arise from congestion of carrier facilities, inability of consignees to receive shipments, or other causes beyond the control of the carrier, and their object is to prevent stagnation and facilitate movement of traffic. Humble Oil & Refining Co. v. Director General, as Agent, 73 I. C. C. 275, 276.

(mm) Carriers placed embargo on export traffic except when moving under special permits. Routes inserted in permits were invariably inserted by shipper in bills of lading. Contention that under General Order No. 1 of the director general, and the commission's order of April 26, 1918, rates over the cheapest and customary routes should have been protected. HELD, commission's order provided that where routing specified in bill of lading was disregarded charges should be adjusted according to the rates applicable over the route specified. Shipper exercised option of voluntarily accepting the cheapest routes available when permits were issued in lieu of withholding shipments until the desired routes become available. North Packing & Provision Co. v. Director General, as Agent, 73 I. C. C. 749.

(nn) A route justifiably embargoed against certain traffic is not available to a shipper tendering such traffic. A carrier participating in such route may refuse to accept a shipment so tendered and is not bound to protect the rate over such embargoed route if the shipper elects, because of such embargo, to forward his shipment by a more expensive route. North Packing & Provision Co. v. Director General, as Agent, 73 I. C. C. 749.

(oo) Common carriers have the right in order to prevent complete paralysis of their operating facilities, to protect themselves by embargo against acceptance of freight over a certain route or routes which may be congested. North Packing & Provision Co. v. Director General, as Agent, 73 I. C. C. 749, 752.

(ppqq) A route that is embargoed against certain traffic cannot be said to be available to shippers tendering such traffic. North Packing & Provision Co. v. Director General, 73 I. C. C. 749, 752.

(rr) Under the Hepburn Act of 1906, amending the Interstate Commerce Act, an interstate carrier can not at the request of a consignee, who is under contract to receive shipments, declare an embargo and refuse to furnish cars for shippers; that if it temporarily does so and then removes the embargo, the latter act is but a return to its duty under the act; and failure to notify consignee of such removal does not relieve the latter from liability for demurrage

provided by the published tariff. Menasha Co. v. Chicago & Northwestern Ry., 241 U. S., 55; Newton Oil Mill v. Director General, as Agent, 74 I. C. C. 113, 115.

(ss) To avoid embargo via the usual route shipments were specifically routed by shipper over route taking higher combination rate. HELD: Facts that were lower ratas were in effect over routes other than route of movement, that a lower joint rate was subsequently established over the route traversed, and that between other points there were joint rates made on substantially the same basis as that in connection with the less costly route, do not prove unreasonableness. International Paper Co. v. M. C. R. R. Co., 74 I. C. C. 385.

(tt) Embargo placed against domestic freight for New York Harbor delivery except when moving under permits, issued only upon condition that delivery be acepted at Brooklyn terminals. Such delivery accepted under protest necessitating hiring outside lighters or drayage to plants. Tariffs provided for free lighterage delivery, but since bills of lading did not call for such delivery the contracts of carriage were fulfilled when Brooklyn delivery accepted. Permit system was lawfully established and embargo merely closed a delivery service theretofore accorded, neither of which resulted in unreasonable or unlawful rates or practices. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 52.

(uu) Complainant attacked defendant's action in placing embargoes against shipments for complainant's plant which is located within the free lighterage limits of Brooklyn, N. Y., and defendants refusal to issue permits for and deliver shipments to complainant's plants by lighter, requiring complainant to accept delivery of their shipments at various freight stations in Brooklyn at a greater cost and resulted in collection of illegal charges. The only question involved is reparation. On Jan. 15, 1918, the director general placed embargoes against domestic freight for lighterage delivery in New York Harbor, and effective April 1, 1919, lighterage of domestic carload freight was resumed under the permit system, but complainants received no such deliveries until May 3, 1919. In the period between Feb. 14, 1918, and May 3, 1919, complainant was compelled to accept delivery at the railroad terminals in Brooklyn. In order to secure a permit the consignee was required to designate the specific station at which he would receive the shipment. In order to secure delivery of their inbound shipments from rail stations in Brooklyn, to which they were consigned after permits for lighterage delivery could not be obtained, the complainants in some cases engaged outside lighters and in others purchased trucks and leased motor trucks and employed labor and teams. During the entire period in question the schedules of the carriers provided for lighterage deliveries direct to complainant's plants. These embargoes did not absolutely deprive the complainant of the opportunity to receive their shipments, but only deprived them temporarily of a service which they had formerly enjoyed. The rate was the same regardless of the manner of delivery. But aside from a few isolated cases, the record shows that the shipments involved moved as routed in the bills of lading, and the legally applicable rates for the services performed were assessed and collected. HELD, the embargoes and permit system were lawfully established and did not result in any unreasonable or discriminatory practices, complaints dismissed. American Manufacturing Co. v. Director General, 77 I. C. C. 52.

(vv) An embargo is a war measure or extraordinary remedy. Primarily, it is not intended as an incentive to promptly release equipment but to prevent further movement until such time as measures can be taken to remove accumulation of cars. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 55.

(ww) Where physical disabilities prevent common carriers from handling certain kinds of traffic for particular destinations, the Commission has recognized the carriers right to declare embargoes The advisability or necessity for such action is to be determined by the carrier in the first instance, subject to appropriate penalty or correction if laid without legal justification or in a manner to transgress a mandate of law. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 55.

(xx) The director general was authorized, through his agents, in the exercise of the war powers conferred upon him, to issue embargoes. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 52, 55.

(yyzz3a) An embargo is an emergency

adopted where it is physically impossible for carriers to transport freight, or where there is an unusual accumulation of traffic. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 56.

(3b) The permit system approved which creates what may be called a modified embargo, provided the permits were necessary and properly policed. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 56.

(3c) The reasonableness of an embargo must be tested by the conditions existing when they were issued. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 56.

(3d) Under the permit system complainants were enabled to receive traffic and keep their plants in full operation. Contention that embargoes would have been legal if carriers had absolutely prevented traffic from moving, but that since traffic was permitted to move under permits and under certain conditions and in certain channels the embargoes were ineffective. HELD: There is no force to this contention. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 56.

(3ef) An embargo is flexible and can be changed and modified readily. An embargo is a temporary measure, which leaves the rate structure undisturbed. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 57.

(3ghi) Whether or not an embargo unduly prejudiced those who desired to ship a particular commodity upon which it was in effect is one of fact, determinable upon consideration of all of the facts, circumstances and conditions in a particular case. American Manufacturing Co. v. Director General, 77 I. C. C. 52, 58, 59.

(3j) Frequently embargoes take the form of a temporary discontination of a particular station delivery, and consignees ordinarily receiving their traffic at that station must accept delivery of their shipments at a more distant point. If action of carriers in issuing embargoes is otherwise lawful, it can not be urged that a receiver of freight who had established his business in proximity to the embargoed terminal should be reimbursed for the added cost incurred in bringing his freight from the more distant point. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 52, 58.

(3k) Carriers embargoed traffic to New York Harbor points. Complainant's shipments were permitted to go forward under permits which contained an agreement that they would perform their own lighterage service. Refusal of carriers to make an allowance, as provided in tariffs, for lighterage service to Shooters Island, in New York Harbor, found not unreasonable or otherwise unlawful following American Mfg. Co., 77 I. C. C. 52, and Compagnie Auxiliare, 77 I. C. C. 60. Permits were only for movement to Jersey City and Elizabethport and the contracts of transportation were terminated at those points by the express agreement of the parties. Standard Shipbuilding Corp. v. Director General, as Agent, 77 I. C. C. 64.

(3l) Cars were ordered by shipper without specifying destination of shipments. Embargo having been placed on traffic to intended destination, empty cars remained on sidetrack at shipper's plant and demurrage charges accrued. HELD: Cars were ordered by shipper, and carrier was under no obligation to remove them unless instructed to do so. No such instructions having been given, demurrage charges were applicable during time cars were held by shipper. Brennan Packing Co. v. Director General, as Agent, 77 I. C. C. 307.

(3m) Upon shipper's order, without specifying destination of loaded movement, car delivered and loaded. Embargo prevented movement of car, and Federal regulation prohibited return of contents to shipper's plant. Shipper unable to dispose of shipment locally because of contract for entire output. Car remained on sidetrack and demurrage charges accrued. HELD: Partial interference of Federal regulations with disposition of contents of car does not constitute ground for ordering refund of demurrage. Brennan Packing Co. v. Director General, as Agent, 77 I. C. C. 307.

(3n) Complainant attacked rates charged on a carload of wooden bull wheel cants and pins, in the rough, shipped Oct. 29, 1918, from Parkersburg, W. Va., to Ranger, Tex., as inapplicable and unreasonable. An embargo was in effect against Ranger except under permits, but the agent of the B. & O., at Parkersburg accepted the shipment and issued a through bill of lading. Upon arrival at St. Louis complainant was advised of the embargo and instructed to furnish disposition orders, and delivery was thereupon authorized at Strawn, Tex.,

14 miles east of Ranger. The car finally was moved from Strawn to Ranger without issue of a permit. Charged at commodity rate of 60.5c applicable to Strawn and Ranger and after arrival additional charges of 15c class A was charged from Strawn to Ranger, upon the theory that the shipment had been twice reconsigned. The reconsignment rules named a charge of $2 per car in addition to the through rate by way of the reconsignment point on shipments diverted in transit prior to arrival at original destination. HELD, charges collected inapplicable, and unreasonable to extent they exceeded commodity rate of 60.5c, reparation awarded. Parkersburg Rig & Reel Co. v. Director General, 78 I. C. C. 299.

(3na) Embargoes in effect against destination, except on shipments made under authorized permits. Without notifying complainant of embargo, carrier accepted shipment and issued through bill of lading. Before shipment reached destination complainant was advised of embargo and ordered carrier to deliver shipment to another point whence it moved to original destination without permit. Charges were prepaid at joint commodity rates. Additional charges collected at destination on theory that shipment was twice reconsigned, found inapplicable and unreasonable, as reconsignment would not be accepted at or to an embargoed point. Parkersburg Rig & Reel Co. v. Director General, as Agent, 78 I. C. C. 299.

(3o) Due to embargo impelled by strike conditions on trunk line connections, defendant short line declared embargo and notified shippers accordingly. Subsequent to such notice, complainant ordered cars from defendant and loaded them, after which they were removed by defendant to hold tracks where they remained until its connections would accept them. Demurrage assessed during this period found applicable and not unreasonable. Cars were placed for loading at instance of complainant and apparently for its convenience. United Paperboard Co. v. M. & E. R. R. Co., 80 I. C. C. 640,

(3p) Shipment moved under permit during existence of embargo. Prior to arrival at originally billed destination reconsignment requested and denied. Shipment arrived at originally billed destination where demurrage accrued and subsequently upon instructions from shipper was forwarded to destination requested in reconsignment instructions. HELD: Following Skilton case, 56 I. C. C. 251, and Wood case, 53 I. C. C. 183, demurrage charges, and combination rates to extent they exceeded joint rate to ultimate destination, found illegal. Effective reconsignment tariff did not prohibit reconsignment to embargoed points, and fact that shipment moved into embargoed territory under permit did not make tariff inapplicable. Reparation awarded. American Lumber & Mfg. Co. v. G. R. R., 80 I. C. C. 759.

(3pa) An embargo is a temporary measure which leaves the rate structure unimpaired. It may take the form of a complete suspension of all transportation service or a suspension of a part only of the service. In either event the rate structure remains unchanged and unaffected, but if the embargo is partial, charges may not be assessed in excess of the tariff rates for that part of the service which has been actually performed. Compagnie Auxiliare v. D. L. & W. R. Co., 87 I. C. C. 443, 447.

(3pb) Embargoes are not published in the same manner as tariffs and shippers are not chargeable with knowledge of their terms. Empire Lumber Co. v. Director General, 88 I. C. C. 424, 425.

(3q) A so-called embargo, by which a railroad company at the request of a paper company, owning and operating a private side track, refused to furnish cars to shippers for interstate consignment to such paper company, which the latter, under contracts with the shippers was under an obligation to receive and did in fact receive, violates the provisions of the Hepburn Act, requiring railway companies to provide and furnish transportation to shippers upon reasonable request therefor, and such embargo could be removed by the railroad company without notice to the paper company, although such action produced a congestion of cars beyond the ability of the paper company to handle on its side track in the usual way, and thus render the paper company liable to demurrage charges. Menasha Paper Co. v. C. & N. W. Ry. Co., 36 Sup. Ct. 501.

EMERGENCY RATES

See Evidence §21½; Experimental.

IMPORTANT CASES SINCE 1908

(a) Rate legally applicable on ice from Jacksonville, Fla., to Atlanta, Ga., found not unreasonable as compared with lower rate in the opposite direction or as compared with lower rate temporarily established after shipments moved to meet an ice shortage at Atlanta. Atlantic Ice & Coal Corp. v. S. Ry. Co., 61 I. C. C. 111.

(b) Reduced return rates were established by the Director General as emergency rates to prevent cattle from starving. Because of the high price of winter feed and under impression that such reduced rates would be applied, shipper sent his cattle south for wintering, which cattle were subsequently returned. HELD: Since no emergency existed and there was no tariff authority for the reduced return rate on cattle moving from point of origin here involved, rates charged found not unreasonable. Parks v. Director General, as Agent, 64 I. C. C. 147.

(c) So it has been held that fifth-class rates on iron tanks, k. d., from Cushing, Okla., to Central City, Ohio, and Morgantown, W. Va., found not unreasonable as compared with lower emergency commodity rate established from Cushing to Roxana, Ill., upon representation of a competing company which contemplated the removal of its refinery to the latter named point, and which expired by limitation. Pure Oil Co. v. Director General, as Agent, 64 I. C. C. 444.

(d) Complainant attacked rates charged on 26 carloads of soft coal, shipped June 29, and Oct. 1, 1918, from points in the Linton and Princeton districts of southwestern Indiana to Aurora and Frankton, Ind., as unreasonable to extent they exceeded $1.30 and $1.32 subsequently established. Shipments to Frankton originated at Fort Branch

and moved over the C. & E. I. to Terre Haute, Big Four through Indianapolis, to Anderson and Pan Handle beyond, 207 miles, charged at rate of $2.30 applicable rate $2. Shipments to Aurora moved over same routes, 190 miles, rates applicable varied from $1.40 to $2.60. The movement, theretofore, from Indiana mines had been light and the only rates generally available were combination rates. In January 1918 carriers established a scale of distance rates. The shipments to Frankton represented the only coal purchases made by complainant at Fort Branch and it is apparent that those to Aurora were emergency movements. HELD, rates attacked unreasonable to extent they exceeded $1.60 per ton, reparation awarded. Opp. Coal Co. v. Director General, 68 I. C. C. 349.

(e) The practice of securing revenue through a minimum higher than the capacity of cars furnished should be condemned, but where abnormally low per car charges resulted from emergency rates established as a temporary relief measure a shipper has no well-founded claim because he could not load to the prescribed minimum. Devereux Co. v. Director General, as Agent, 73 I. C. C. 289, 290, 291.

(f) Rates on emergency shipments of gas oil, gasoline, and distillate, in tank-car loads, from Oklahoma points to Potwin, Kans., found not unreasonable or unduly prejudicial as compared with lower rates to other Kansas refining points, which rates were subsequently made applicable to Potwin. Rates assailed compare favorably with those in the reverse direction prescribed in National Petroleum Asso., 57 I. C. C. 355. Vickers Petroleum Co., v. Director General, as Agent, 73 I. C. C. 578.

(g) Sixth-class rate on sporadic shipments of ice from White Lake, N. Y., to Scriba, N. Y., found not discriminatory or unduly prejudicial but found unreasonable to extent it exceeded lower commodity rate subsequently established, as a result of negotiations, prior to the movement, to take care of emergency shipments made necessary by an ice shortage at Scriba. Reparations awarded. Evans Dairy Co., Inc., v. Director General, as Agent, 73 I. C. C. 581.

(h) Emergency rates established by the director general to afford relief to drought-stricken territory and assessed on hay, feed, bran, and shorts, from points in Washington to destinations in Montana, found applicable. Another section of the same tariff named specific commodity rates, but since they were restricted to apply westbound, the "application of rates" provisions can not be construed as making them applicable on traffic moving eastbound. Devereaux Co. v. Director General, as Agent, 73 I. C. C. 627.

(i) Class rates on sporadic shipments of artificial ice from Hamlet, N. C., to Atlanta, Ga., found unreasonable as compared with rates on similar emergency shipments from other points to Atlanta, and to extent they exceeded distance commodity rate between stations in North and South Carolina projected to distance traversed by shipments in issue. Reparation awarded. Fruit Growers Express v. Director General, as Agent, 74 I. C. C. 701.

(j) Upon complaint seeking a reduction of 50 per cent in the rates on cotton seed products, hay, grain, and other feedstuff for cattle from points in Oklahoma, Arkansas, Louisiana, Colorado, and Kansas, and from points in Texas over interstate routes, to afford relief to drought-stricken points in Western Texas, such rates to expire by limitation, HELD: Present rates are not unreasonably high per se, nor under normal conditions, and the freight rate factor is a comparatively small item in the total cost of stock feed laid down in Western Texas. American National Live Stock Asso. v. S. P. Co., 74 I. C. C. 760.

(k) Complainant attacked as unreasonable rates on cotton seed, cottonseed products, hay, grain, and other feed for cattle from Oklahoma, Arkansas, Louisiana, Colorado, Kansas, and from points in Texas over interstate routes, to destinations in that portion of Western Texas affected by drought. Complainants do not attack the rates as unreasonable for movement under ordinary circumstances, but they contend that in view of the serious conditions resulting from the drought the Commission should as an emergency matter require defendants to reduce by 50 per cent their rates on feed into this territory. The situation here presented is not unlike other cases which have been before the Commission where the shipper or producer finds himself in financial difficulties arising from a complexity of economic conditions, one of which is the measure of the freight rates. A reduction in the cost of stock feed

through a reduction in the freight rate is the relief here asked, but in this case the Commission is met with complainants admission upon the record that the rates attacked would not be too high if the situation were normal. There is also convincing affirmative evidence that the existing rates are not unreasonably high per se and there is also the further significant showing that the freight rate factor, considered alone, is a comparatively small item in the present total cost of stock feed laid down in western Texas. Nevertheless the effective relief of the cattle industry of western Texas, and a resultant stimulation of present and future traffic, may well afford ground for further consideration by the carriers of some reduction in rates as one of the means whereby such relief may be accomplished. HELD, rates attacked not unreasonable, complaint dismissed. American National Live Stock Asso. v. S. P. Co., 74 I. C. C. 760.

(l) The Commission should not set up its judgment as to the possible and proper thing to do as against the judgment of other public officers, presumed to be performing their duty lawfully, who met a situation of extreme difficulty as best they could under the limitations imposed by war, and with existing or procurable facilities overtaxed. Clearly it should not do so when the preponderance of evidence supports the action as having been taken in good faith, in a timely manner, to the extent reasonably necessary, and so as to apply with substantial uniformity upon all similarly circumstanced persons and traffic. American Mfg. Co. v. Director General, as Agent, 77 I. C. C. 52, 57.

(m) Rate on emergency shipments of coal from Liberty Mine, Ala., to Kellerman, Ala., during Federal control, found unreasonable to extent it exceeded lower local or so-called commercial rate from Kellerman to Holt and Tuscaloosa, Ala. Reparation awarded. Central Iron & Coal Co. v. Director General, as Agent, 77 I. C. C. 301.

(n) Charges on cottonseed cake from Memphis, Tenn., to Mosquero, N. Mex., collected on basis of 50 per cent of applicable class rates, under emergency reduction on stock feeds during drought, found not unreasonable. While applicable class rate was admittedly unreasonable as compared with lower commodity rate subsequently established, charges were not unreasonable for the service performed. McIntosh v. Director General, as Agent, 77 I. C. C. 364.

(o) Complainant attacked rate of 40.5c charged on blackstrap molasses, carloads, shipped from points in Louisiana to St. Joseph, Mo., between August 26, 1920, and June 9, 1921, as unreasonable, unjustly discriminatory and unduly prejudicial. Blackstrap is the lowest grade of cane molasses and is used in mixed livestock feed. On June 10, 1921, defendants established so-called emergency rates of 30c from this origin territory to St. Joseph These rates were established on account of abnormal conditions prevailing in the blackstrap trade, and because western carriers had made similar reductions in sugar beet molasses, a competitive article, from Colorado and Utah. They were published to expire on certain dates, but were extended from time to time. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Grain Belt Mills Co. v. A. T. & S. F. R. Co., 80 I. C. C. 745.

R., 89 I. C. C. 1.

EMPLOYES

See Employer's Liability Act; Evidence §64½

CASES 1887-1908

(a) Members of a labor organization, employees of a railroad company, and the officers of such organization though not such employees, who, by threatening to withhold their labor from such company unless it violates the interstate commerce act by refusing to accept cars containing interstate freight from another road with which such organization is in conflict, cause it to refuse to accept such freight, are civilly liable to the latter road for any loss inflicted in pursuance of their conspiracy. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. C. 522.

(b) While an employee may bestow or withhold his labor as he will, if he uses the benefit which his labor is or will be to another, by threatening to

withhold or, agreeing to bestow it, or by actually withholding it or bestowing it, for the purpose of inducing, procuring, or compelling that other to commit an unlawful and criminal act, such withholding or bestowing his labor is itself an unlawful and criminal act. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 522.

(c) Members of a labor organization who induce railroad companies to refuse to handle interstate freight from a company with which such organization is in conflict, violate the provisions of the interstate commerce law declaring any carrier or any director, officer, receiver, agent, or person acting for or employed by an incorporated carrier, who, alone or with any other corporation, person or party, shall wilfully fail or omit to do any act, or cause, or willingly suffer or permit, any act required by such act to be done or not to be done, or aid or abet such omission or failure, to be guilty of a misdemeanor. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 522.

(d) An injunction will lie to prevent the chief officers of a labor organization from enforcing or putting into operation a rule of such organization making it the highest offense against the order for a member in the employ of a railroad company to handle cars received from another company with which a conflict approved by such chief officers exists, where refusal to handle such cars will constitute a violation of the Interstate Commerce Act requiring the furnishing of equal facilities for the interchange of traffic; and such officers may be required to rescind a direction already given for the enforcement of such rule,—especially where the order so directed to be rescinded will induce violations of an injunction previously granted against the company and its employees. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 522.

(e) The provisions of the interstate commerce law requiring connecting railroads to receive and deliver passengers and freight from other roads, and afford equal facilities for the interchange of traffic, apply with equal force to their officers and employees. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(f) Employees of a railroad company need not be made parties to an injunction restraining its officers and employees from refusing equal facilities for the interchange of traffic to another road, in order to make the injunction binding upon them, but it is sufficient if they are served with full and proper notice of the orders and process of the court. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(g) The proper practice, upon the refusal of employees to obey an injunction against a railroad corporation, is the issuance of a citation requiring them to appear and show cause why they should not be attached for contempt. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(h) Employees of a railroad company assume, upon entering the service, an implied obligation to perform their duties in such a manner as will enable it to discharge its obligations to the public faithfully and protect it against irreparable losses, injuries, and excessive damages by any acts of omission on their part. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(i) Employees of a railroad company may be restrained from commission of violence or intimidation, or from enforcing rules and regulations which result in irremediable injuries to their employers and to the public. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(j) An employee of a railroad company is not guilty of contempt as disobeying an injunction restraining the company from refusing to another road equal facilities for the interchange of traffic, where, rather than perform the duties necessary to such interchange, he quits the service in good faith, unconditionally and absolutely, while his train is safely stored in the company's yard and no special injury can result, no lives be imperiled, or property jeopardized, by his refusal to continue in the service; but so long as he continues in the service he is guilty of contempt in refusing to obey such injunction. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(k) A combination of railroad employees to act concertedly in quitting their employment in a way to injure their employer, aid in enforcing a boycott, injure the public, and oppress other employers, is criminal. Toledo, A.

A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(l) An engineer who, while on the road with his train, refuses to switch into the train a car from another road with which the labor organization to which he belongs is in conflict, declares that he quits the employment of the company, and refuses repeated orders to proceed with his train; but, upon receiving an order from such labor organization, completes his trip, and thereafter, upon being told what his next run will be, gives no notice of having quit or intending to quit his employment,—is guilty of contempt as violating an injunction restraining the company from refusing equal facilities for the interchange of traffic to such other company, of which he has notice. Toledo, A. A. & N. M. R. Co. v. Pennsylvania Co., 5 I. C. R. 545.

(m) Where the property of a railway or other corporation is being administered by a receiver, under the superintending power of a court of equity, it is competent for the court to adjust difficulties between the receiver and his employees, which, in the absence of such adjustment, would tend to injure the property and to defeat the purpose of the receivership. Waterhouse v. Comer., 5 I. C. R. 564.

(n) It follows, then, that it is in the power of the court, in the interest of public order, and for the protection of the property under its control, to direct a suitable arrangement with its employees or officers, to provide compensation and conditions of their employment, and to avoid, if possible, an interruption of their labor and duty, which will be disastrous to the trust and injurious to the public. Waterhouse v. Comer., 5 I. C. R. 564.

(o) Rule twelve of an association of locomotive engineers, styled the Brotherhood of Locomotive Engineers, which provides: "That hereafter when an issue has been sustained by the grand chief, and carried into effect by the Brotherhood of Locomotive Engineers, it shall be recognized as a violation of obligations if a member of the Brotherhood of Locomotive Engineers, who may be employed on a railroad run in connection with or adjacent to said road, handle the property belonging to said railroad or system in any way that may benefit said company with which the Brotherhood of Locomotive Engineers are at issue, until the grievances or issues or differences of any nature or kind have been amicably settled,"—is plainly a rule or agreement in restraint of trade or commerce and violative of §1 of the act of Congress of July 2, 1890. Waterhouse v. Comer, 5 I. C. R. 564.

(p) Construing several clauses of the interstate commerce law recited in the opinion with U. S. Rev. Sta. § 5540, it follows that a combination of persons, without regard to their occupation, which will have the effect to defeat the provisions of the interstate commerce law inhibiting discriminations in the transportation of freight and passengers, and further to restrain the trade of commerce of the country, will be obnoxious to the penalties therein prescribed. Waterhouse v. Comer, 5 I. C. R. 564.

(q) In this case, the movants having avowed their purpose, in open court, to submit to the construction to be made by the court relating to rule twelve of the brotherhood, the receiver is directed to enter into an appropriate contract with them, subject to the general operation of this decision with reference to said rule. Waterhouse v. Comer, 5 I. C. R. 564.

I. CONTROL AND REGULATION.

See Control and Regulation; Interstate Commerce Commission I.

§1. Jurisdiction of Commission.

See Jurisdiction of Commission.

CASES 1887-1908

(a) Complainant petitioned the Commission to order and allow to remain in effect the equalizing arrangement whereby raw material from Chicago, Ill., to Marshalltown, Iowa, and from Marshalltown to Missouri River was moved at the same rate as from Chicago to Missouri River direct. From the statement of the petition it is apparent that what is prayed for is an exceptional privilege—a privilege not granted to manufacturers in general and which must be of great value to the line of trade which is thus favored. The petitioner makes no complaint of violation of law by the railroads; the complaint is that a privilege is not granted. The privilege is one which, if lawful, the companies might withhold on their own view of what was dictated by their interest or policy. On the other hand, if the privilege is one which the railroad companies can not grant voluntarily because of its coming under the condemnation of the law, neither can the Commission give authority to grant it. HELD, the Commission is powerless to make any order. Re Iowa Barb Steel Co. 1 I. C. C. 605.

(aa) It is the province of the Commission to interfere and secure, if possible, a fair adjustment in cases of unreasonable rates or unjust discrimination; but the Commission has no more authority to place competing millers in different states upon precisely the same footing than it has to equalize conditions in all localities and in every industry. The Mayor, etc. of Wichita v. M. P. Ry. Co., et al, 10 I. C. C. 35.

IMPORTANT CASES SINCE 1908

(b) It is not the duty of a carrier to place all its shippers in a position to meet the markets which they may desire to supply, nor has the Commission the power to require the railroads, in the face of varying trade conditions, to adjust their rate schedules in such manner as to insure to a market the continuance of a trade it has once enjoyed. Lake Cargo Coal Rates, 46 I. C. C. 159, 165.

(c) Any differences in inbound rates must be reflected in the ability of one city to compete with others, but marked dissimilarity of conditions affecting the competing points may and should be recognized in any relative adjustment of rates, and where such recognition entails rate disparities the primary question is whether the disparities are fully warranted by the varying conditions. Tuscaloosa Board of Trade v. A. G. S. R. R., 47 I. C. C. 483, 506.

(d) It is no function of this Commission to stabilize markets. Lake Charles Rice Milling Co. v. A. & N. Ry. Co., 77 I. C. C. 700, 705.

II. CIRCUMSTANCES AND CONDITIONS.

§2. In General.

See **Differentials; Evidence §2, §56; Reasonableness of Rates §12½, §28.**

CASES 1887-1908

(a) Complainant petitioned the Commission to order and allow to remain in effect the equalizing arrangement whereby raw material from Chicago to Marshalltown, Iowa, and from Marshalltown to Missouri River was moved at the same rate as from Chicago to Missouri River direct. HELD, Whether a special privilege granted by railroad companies to manufacturers in a single line of trade, but not to manufacturers in general, is consistent with the rule of equity and justice which the Law undertakes to establish, is a question upon which an opinion ought to be expressed only after the most careful consideration; and the

Commission ought clearly to see that duty requires an answer, before it proceeds to give one on exparte application. The Commission will not express an opinion whether neither by complaint nor by application for relief is a case stated which will come within its jurisdiction. The Commission has not been given a general dispensing power to relieve hardships under the law, but its power in that regard is strictly limited. Re Iowa Barb Steel Wire Co. 1 I. C. C. 605.

(aa) It is not a ground of complaint against a railroad company that it equalizes its rates as between small and large towns, even though the effect may be prejudicial to the large towns which before had been specially favored. Crews, Danville Chamber of Commerce v. R. & D. R. R. Co., 1 I. C. C. 705, 707.

(ab) Different localities are more or less favored, in regard to transportation facilities either by nature or the enterprise of man. It can not be maintained that it is the duty of the common carrier to equalize these existing inequalities at his own expense. All that is required of him is not to create them him self arbitrarily. He must treat all alike that are situated alike, but he can not be bound to wipe out existing differences. He may be obliged to carry freight at a lower rate to some localities than to others, but this in itself does not constitute an injustice or injury to the shipper in a less favored locality, so long as the charges are reasonable in themselves and alike to all in the same situation. Boston Chamber of Commerce v. L. S. & M. S. R. R., 1 I. C. C. 754, 760.

(b) No substantial damage is suffered by Lincoln from the difference in rates between St. Louis and Omaha and St. Louis and Lincoln, inasmuch as the distributing rates from Lincoln are so arranged, in comparison with those from Omaha, that the difference in the rates to these points is equalized; and although this is not done by the defendant road, it is sufficient that nearly all points available to Lincoln jobbers are reached by lines over which the adjustment of rates is made. That a disparity exists as to merchandise which is consumed at Lincoln, coming from St. Louis, as against merchandise consumed at Omaha, coming from the same city, must be fairly attributable to the situation of Lincoln a substantial distance west of the line of common rates from eastern points. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. R. 98.

(c) Rates having been established from St. Louis to Omaha in view of the distance over the Wabash line, the action of the Missouri Pacific in meeting the Wabash rates, although too low to be greatly desirable for its longer line, and involving loss of former revenue at intermediate points on the main line south of Omaha, by the application to the situation of the long and short haul clause, cannot be properly criticised. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. R. 98.

(d) When freight is offered to carriers for shipment it is their duty to take it for what they can get, not above a reasonable compensation for the service to be performed by them and not below a rate which will yield them a profit. The duty of equalizing rates beyond their through line is not imposed on them as receivers of freight for shipment. The origin of the goods or the fact that they come over from some other railroad or over a wagon road is not an element which enters into the question of what they may reasonably demand for the transportation services they are to render. James & Abbott v. V. & Ga. R. R., 2 I. C. C. 609, 612.

(e) When a carrier engages in transportation for which, by reason of competitive conditions, or for purposes of its own, it receives low rates from some patrons and at some localities, it accepts the legal obligation to give impartial service to other patrons and at other localities that sustain similar relations to the traffic. Manufacturers and Jobbers Union of Mankato, Minn. v. M. & St. L. R. Co., 3 I. C. C. 115, 117.

(f) Equality of charges is required under circumstances and conditions substantially similar, and relative equality is necessary in the degree of similarity. Manufacturers and Jobbers Union of Mankato, Minn. v. M. & St. L. R. Co., 3 I. C. C. 115, 117.

(g) The law undertakes to forbid discriminations which are unjust, but not to equalize advantages springing from rates that in themselves are just. Bates v. Pennsylvania R. Co., 3 I. C. C. 296, 301.

(h) Complainant attacked rates from Eastern Seaboard territories as unjustly discriminatory against the rates from Chicago, Ill., and Cincinnati, O., to southern territory. The rates on traffic of the numbered classes from Chicago and Cincinnati to southern territory are made higher than they otherwise would be, for the purpose of securing to the lines from northeastern cities the transportation of that traffic from the territory set apart to them under Southern Railway & Steamship Association raises a prima facie presumption of the unreasonableness of those rates. The cost on freight in general per ton per mile on the roads south of the river appears to have been about 25 per cent on the average greater than the cost per ton per mile on the roads from Chicago to the river. HELD, the rates from Chicago and Cincinnati to southern territory should be about 35 per cent to 50 per cent higher per ton per mile than from Chicago to Cincinnati. Freight Bureau v. C. N. O. & T. P. R. Co., 4 I. C. C. 592.

(i) Carriers have no right to disregard distance and natural advantages for the purpose of bringing about commercial equality. Commercial Club of Omaha v. C. R. I. & P. R. Co., 6 I. C. C. 647, 674.

(j) To justify interference by the Commission with the adjustment of rates as between rival localities it must appear that the preference and advantage to the one, and the corresponding prejudice and disadvantage to the other, are so appreciable, and established with certainty as to be justly declared unreasonable. Commercial Club v. C. & N. W. R. Co., 7 I. C. C. 386, 404.

(k) That the 19-cent rate on corn from Sioux City and other points in adjacent territory should be reduced, the 17-cent rate on corn now in effect from most points in western Iowa should be extended to Sioux City and points in Iowa on and east of the Sioux City & part of the C., St. P. M. & O. system), and corresponding reduction should be made from other points in southeastern South Dakota. HELD, further, that while no opinion is expressed as to what is the proper relation of the rates on wheat and corn from Sioux City and adjacent territory, the difference of 4 cents which now prevails from most shipping points in that section should not be exceeded. Grain Shippers' Asso. v. Illinois Central R. Co., 8 I. C. C. 128.

(l) Common carriers are bound by every principle of justice and of law to accord equal rights to all shippers who are entitled to like treatment, both in the receiving of supplies and the shipment of their products, and a carrier who under any pretext whatsoever grants to one shipper an advantage which it denies another violates the spirit and thwarts the purpose of the law. Castle v. B. & O. R. Co., 8 I. C. C. 333, 345.

(m) It is the province of the Commission to interfere and secure, if possible, a fair adjustment in cases of unreasonable rates or unjust discrimination; but the Commission has no more authority to place competing millers in different states upon precisely the same footing than it has to equalize conditions in all localities and in every industry. Wichita v. Missouri P. R. Co., 10 I. C. C. 35.

(n) Complainant attacked as unreasonable rates on coal from South McAlester, Indian Territory, to Denison, Tex., and unduly discriminatory in favor of Dallas, Tex., although the distance to Dallas is more than twice as great as to Denison. Competitive conditions on the part of other carriers force a lower rate to Dallas than to Denison and the Commission does not think that the cause presents any question of discrimination. The sole issue to be considered is the unreasonableness of the rate charged. Distance South McAlester to Denison is 97 miles. Manifestly the present rate is too high. The average rate upon the defendant system received for the transportation of coal is but 6 mills per ton and its average rate on all traffic was 9.59 mills for the year ending June 30, 1903. The rate of $1.90 yields nearly 2c per ton mile. Nothing appears in the cost of movement or otherwise which calls for an especially high rate. HELD, the complainant is entitled to an order that defendant cease and desist from charging the present rates, but the Commission has no power to name a rate for the future. Denison Light & Power Company v. M. K. & T. R. Co., 10 I. C. C. 337.

(o) A ruling that an antecedent haul to one locality, and no previous transportation to a competing locality, constitute justification for a lower charge

from the former to a common market would be in effect to approve the equalization of natural advantages and disadvantages as between localities; and such equalization is not sanctioned by the Act to Regulate Commerce. Cannon Falls Farmer's Elevator Co. v. Chicago G. W. R. Co., 10 I. C. C. 650.

(p) Freight rates to Charlotte, N. C., from New York and other northern and eastern points, and from Louisville, Chicago, and other western points, are complained as unjust, and those from the west as greater for the shorter distance to Charlotte than for longer distances through Charlotte to more distant localities. The rates to Charlotte are made by combining rates to Virginia cities with the local rates from those cities, to Charlotte. Competition forces low rates to the Virginia cities, and also compels the low rates in force from the west to certain points east of Charlotte. If through rates to Charlotte lower than the combination of charges to and from the Virginia cities were established, the disadvantage now resulting to Charlotte dealers in the competition with dealers at Virginia cities would to that extent be removed, and the carriers are recommended to consider taking such action; but unless the present through charges are unreasonable the Commission is without authority to require discontinuance of the charges now exacted. HELD, That the facts presented do not constitute a basis for an order of relief which would be enforced, and therefore the complaints must be dismissed. Charlotte Shippers' Asso. v. Southern R. Co., 11 I. C. C. 108.

(q) Upon complaint that defendants charge higher rates on canned goods, grain, flour, hay and packing-house products from Cincinnati, Ohio and Memphis, Tenn., to Helena and McRae, Ga., than to Cordele and Fitzgerald, Ga., towns in the section of country surrounding Helena and McRae, —HELD: That the situation of Helena and McRae is not so similar to that of Cordele as to require the application of Cordele rates to the first-named places, but that the rates in question to Helena and McRae should not exceed those now in effect to Fitzgerald. Davenport v. Southern R. Co., 11 I. C. C. 650.

(r) Complainant attacked as unreasonable rate charged on sugar carloads from New Orleans, La., to McAlester, I. T., and unduly discriminatory as compared with rate to Muskogee, I. T. Rate charged 38c, rate to Muskogee 35c. Subsequently defendants published the same rate to McAlester. HELD, complaint dismissed. Hale Halsell Grocery Company v. M. K. & T. Ry., 12 I. C. C. 136.

(s) Complainant attacked as unreasonable and unjustly discriminatory rates charged on refined oil from Erie, Kas., to Joplin, Mo., as compared with rate to St. Louis, Mo. Distance to Joplin 69 miles., to St. Louis, 400 miles, rate charged to both places 17 cents, which was subsequently reduced to 15c to Joplin. The rates to Joplin, St. Louis, and Kansas City from these producing points are apparently adjusted with a view to placing the shippers on an equitable basis and affording them equal opportunities in the markets. HELD, rate attacked not unreasonable, complaint dismissed. E. M. Wilhoit v. M. K. & T. Ry., 12 I. C. C. 139.

(t) Complaint alleged that defendants' rates, which are higher from Louisville, Cincinnati, Memphis, and Nashville to Moultrie, Ga., than from the same points of origin to Tifton, Valdosta, Quitman, Thomasville and Fitzgerald, Ga., are unreasonable and unjustly discriminatory: HELD, Upon the record made in this case, that the circumstances and conditions surrounding the transportation of freight by defendants from such points of origin to Moultrie are not substantially dissimilar from those surrounding the transportation from such points of origin to other nearby Georgia points, and that the practice of charging such higher rates to Moultrie is unjustly discriminatory, unreasonable and unlawful; and, HELD, further, that the just and reasonable practice would be to charge for such transportation to Moultrie the same rates from such points of origin as are charged therefrom to Tifton, Valdosta, Quitman, Thomasville and Fitzgerald. So. Grocery Co. et al, v. Ga. Nor. Ry. Co., et al, 12 I. C. C. 230.

IMPORTANT CASES SINCE 1908

(u) The opportunity to buy in a widely extended market is a valuable one to merchants in that it presents a larger field for competition and ordinarily offers the best quality at the lowest price; and a carrier has no right, by refusing through routes and reasonable joint rates, to restrict or circumscribe this opportunity. It is the duty of common

carriers to haul the traffic that is offered and to make the necessary arrangements and furnish facilities and establish reasonable rates therefor; and a carrier is not justified in refusing traffic from points on other lines on the ground that such traffic would displace in the markets traffic from points on its own lines and thus adversely affect its revenues. Star Grain & Lumber Co. v. A. T. & S. F. Ry. Co., 14 I. C. C. 364, 367.

(v) Before the Commission can conclude that a rate on a given commodity is too high, because it is higher than some other rate named, it must know that the rate selected as the standard for a comparison is a reasonable and a fair one. Darling & Co. v. B. & O. R. R. Co., 15 I. C. C. 79, 83.

(w) A rate is not unreasonable simply because a lower rate is in effect via lines of other carriers. South Canon Coal Co. v. C. & S. Ry. Co., 17 I. C. C. 286.

(x) Carriers may not haul a particular class of traffic or traffic for a particular community at less than the cost of the service and recoup themselves from the charges levied against other charges. In Re Rates for Single Packages, etc., 22 I. C. C. 328, 335.

(y) Carriers are not required to establish rates that will guarantee a profit to shippers. R. R. Com. of Kans. v. A. T. & S. F. Ry. Co., 22 I. C. C. 407, 410.

(z) It is not enough to show that in miles the distance is less from a producing center via one gateway to a consuming center in order to equalize the rate between the same points via another gateway. It must be shown that the cost of transportation is less, or rather that the combination of rates is less as estimated by the general level of rates in the territory through which the transportation is conducted. In Re Investigation of Unreasonable Rates on Meats, 23 I. C. C. 656, 669.

(aa) The chief function of section 6 is to accord and require the application of the same rate to all shippers and to promote equality of treatment between them. Crescent Coal Mining Co. v. C. & E. I. R. R. Co., 24 I. C. C. 149, 158.

(bb) A discrimination predicated upon the maintenance of a different basis of rates by one road or set of roads serving two competing points falls within section 3, while an "equalization" between two different coal fields served by different groups of lines does not. Wickwire Steel Co. v. N. Y. C. & H. R. R. R. Co., 30 I. C. C. 415, 422.

(cc) The question of rates to and from jobbing points has been and is continually being pressed upon the Commission's attention by complaining shippers. The desire of jobbers located at various points is to have rates into and out of their particular points equalized, so that the through rates to consuming territores shall be the same, no matter through which point the traffic moves. It is well settled that undue prejudice and disadvantage against a distributing point cannot be predicated merely upon the fact that the combination of inbound and outbound rates exceeds the combination via a competitive distributing point. Rates on knitting factory products, 25 I. C. C. 634, 639. It is not practicable to have rates into and out of all jobbing points so constructed that the resulting through charges from the factory to ultimate destination are the same via all jobbing centers. Advantages of location, competitive conditions, the volume and flow of traffic and numerous other considerations come into play and must be given due weight in determining the adjustment of rates into and out of different jobbing points. Mobridge Grocery Co. v. C. M. & St. P. Ry., 52 I. C. C. 308, 309.

(dd) Ocean rates are generally not published and are subject to fluctuations. Therefore an equalization based on such rates by no means constitutes a permanent basis upon which to construct rail rates to the ports. Unless the process of equalization rests upon substantial, fairly permanent, and controlling facts and natural relationships, it can not be proper and lawful. Inland Steel Co. v. Director General, 57 I. C. C. 339, 340.

(eeff) It is impossible under the present system of rate making in this country to so adjust rates that the in-and-out charges will be the same in the aggregate for all jobbing points which buy and sell in common markets. Fort Dodge Commercial Club v. Diretcor General, 57 I. C. C. 343, 345.

(gg) It does not follow as a matter of law that rates should be the same for the same distance over two different roads. I. C. C. v. U. P. R. R., 222 U. S. 541, 549, 32 Sup. Ct. 108, 56 L. ed. 308.

(hh) Grain rates into and out of the various markets authorized to be increased by the general percentages herein approved, with the understanding that carriers will file tariffs restoring the equalization through such grain markets now enjoying that basis. Increased rates, 1920., 58 I. C. C. 220, 253.

(ii) In applying the increased class and commodity express rates herein approved, rates on milk and cream authorized to be equalized with those applied by the railroad lines between the same points. Express Rates, 1920, 58 I. C. C. 281, 297, 711.

(jj) The act does not require that in-and-out charges be equalized through all jobbing points. Ft. Dodge Commercial Club v. Director General, 60 I. C. C. 224.

(kk) The owner of a coal mine having access to two carriers has a property right in the advantage of such location, of which he cannot lawfully be deprived by an order of the Interstate Commerce Commission under the guise of a regulation, which in effect deprives him of his property without due process of law. New River Co. v. Chesapeake & O. Ry. Co. 293 Fed. 460.

§3. Commercial Advantages and Disabilities.

See Blanket Rates §7; Commercial Conditions; Discrimination §4, §5; Differentials §5, §6, §7; Evidence §2; Express Companies §19; Interstate Commerce Commission; Reasonableness of Rates §12½.

CASES 1887-1908

(a) Rates should not be fixed in inverse proportion to the natural advantages of competing towns, with the view of equalizing "commercial conditions." Eau Claire Bd. of Trade v. Chicago M. & St. P. R. Co., (Com.), 4 I. C. R. 65.

(b) That rates should be fixed in inverse proportion to the natural advantages of competing towns, with the view of equalizing commercial conditions as they are sometimes described, is a proposition unsupported by law and quite at variance with every consideration of justice. Each community is entitled to the benefits arising from its location and natural conditions, and any exaction of charges unreasonable in themselves or relatively unjust, by which those benefits are neutralized or impaired, contravenes alike the provisions and the policy of the statute. Eau Claire Board of Trade v. C. M. & St. P. R. Co., 4 I. C. C. 65, 77.

(c) A town favorably situated with respect to one through route, but competing in a common market with another town more favorably located on another through route, should not have a reduction of the local rate over roads connecting the two through routes, for the purpose of overcoming the natural advantage which the latter competing town enjoys. Chamber of Commerce of Minneapolis v. G. N. R. Co., 4 I. C. C. 230.

(d) A milling town possessing great natural, acquired and improved advantages for the carrying on of that industry, and favorably situate in point of distance to a large grain producing region, is entitled to the benefits arising from its location, and carriers of grain to that point and to a competing town considerably more remote from points of production, and in other particulars less advantageously located, are not justified in making rates on grain to the competing towns which destroy the advantage the former is entitled to enjoy. Chamber of Commerce of Minneapolis v. G. N. R. Co., 4 I. C. C. 230, 234.

(e) A carrier cannot be compelled to disregard distance between two competing cities for the purpose of putting the two cities on a commercial equality. New York Produce Exch. v. Baltimore & O. R. Co., 7 I. C. C. 612.

(f) Defendant contended that as coal from its mines at Rich Hill has less value for domestic purposes than Myrick coal it might equalize such difference in value by making a lower rate on Rich Hill coal. Complainant's cost of mining at Myrick is nearly 50 cents a ton more than it costs defendant to mine its coal at Rich Hill. HELD, That

there is in fact no such difference in value as to justify defendant's rate adjustment in favor of Rich Hill; that if difference in quality is to be equalized in favor of the defendant the question arises why should not difference in cost of mining be equalized in favor of complainant; that if any such process of equalization is permissable defendant may absolutely dictate the comparative value of every mine and industry upon its road; and that such rates should be examined with closest scrutiny when resorted to by the carrier in its own favor. McGrew v. Missouri Pac. Ry. Co., 8 I. C. C. 630.

(g) It is the province of the Commission to interfere and secure, if possible, a fair adjustment in cases of unreasonable rates or unjust discrimination; but the Commission has no more authority to place competing millers in different states upon precisely the same footing than it has to equalize conditions in all localities and in every industry. Mayor and Council of Wichita, Kas. v. M. P. R. R. 10 I. C. C. 35, 40.

(h) Manistee and Ludington are salt producing points in Michigan, and salt shipped from those points to places on the Missouri River is carried by a boat line on Lake Michigan to Chicago, and by railroads from Chicago to the Missouri River. The through rate is 53 cents per barrel of which the boat line receives, according to the destination, from 30 to 33 1-3 per cent, amounting to from 16 to 18 cents per barrel. Established vessel lines on the lake formerly carried the salt to Chicago for from 8 to 11 cents per barrel, but additional services are rendered by the boat line, including stowage at points of shipment and unloading, cooperage, docking, storage, insurance, handling and loading in cars at Chicago, representing a cost of about 8½ cents per barrel. The boat line and the salt are owned by distinct corporations, but the same persons own controlling interests in both organizations. Salt interests at Detroit complained that this division to the boat line amounted to a rebate from the tariff to the salt shippers from Manistee and Ludington and enabled them to undersell Detroit Salt in the Western markets. It further appeared that coal used in producing Detroit salt costs on the average about 75 cents to each ton of salt, while Manistee and Ludington salt producers also operate lumber mills and use the refuse from lumber manufacture for fuel in the salt works. HELD, That it is no part of the duty of the Commission to equalize differences in the natural advantages of localities through the adjustment of tariff rates, and that upon the facts shown in this investigation it does not appear that the share of the through rate allowed to the boat line is so grossly disproportionate to the value of the entire through service as to amount to a rebate in favor of the salt interests of Manistee and Ludington, which also control the boat line. Re Transportation of Salt 10 I. C. C. 148.

(i) It is no part of the duty of the Commission to equalize differences in the natural advantages of localities through the adjustment of tariff rates. Re Transportation of Salt, 10 I. C. C. 148.

(j) It can be no duty of the Commission to equalize natural advantages between localities through the adjustment of tariff rates. Re Transportation of Salt, 10 I. C. C. 148, 171.

(ja) A ruling that an antecedent haul to one locality and no previous transportation to a competing locality constitute justification for a lower charge from the former to a common market, would be in effect to approve the equalization of natural advantages and disadvantages as between localities, and such equalization is not sanctioned by the Act to regulate commerce. Cannon Falls Farmers' Elev. Co. v. C. G. W. R. Co. et al. 10 I. C. C. 650.

(k) Commission has often ruled against equalizing commercial conditions. Howard Mills Co. v. Mo. Pacific Ry. Co., 12 I. C. C. 258.

(l) Natural advantages of location are neither to be enlarged nor minimized by the Commission, whose duty and purpose is to secure just and reasonable transportation rates, as nearly equal as possible for all localities and individuals, having due regard to differences in circumstances and conditions. Enterprise Manufacturing Co. v. Georgia R. R., 12 I. C. C. 451, 456.

IMPORTANT CASES SINCE 1908

(m) A carrier cannot lawfully so group its mines with respect of rates as to unduly discriminate against any locality. The duty imposed by law is to give equal treatment to all shippers who are in a position to demand it, and this includes the right to reach competitive markets on relatively equal terms. Where

the same carrier serves two districts, which, by their location, the character of their output and distance from markets, are in substantially similar circumstances and conditions, it cannot lawfully prefer one to the other in any manner whatsoever. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 292.

(n) Carriers should keep in close touch with commercial conditions pertaining to sales of commodities and the needs of communities, and adjust their charges, when practicable, within reasonable limitations to meet those conditions and encourage sales and the movement of freight; yet it cannot be held to be a duty of the carrier, in adjusting charges, to equalize the value of commodities in their final distribution. Chicago Lumber & Coal Co. v. T. S. Ry. Co., 16 I. C. C. 323, 331.

(o) Because carriers have constructed a system of rates on a zone or blanket system is not sufficient reason to justify the collection of unreasonable charges to any point. Every city is entitled to the advantage of its location and may not lawfully be subjected to high freight charges merely because carriers for reasons of convenience or otherwise include it with a number of other points in surrounding territory, which latter points are not similarly situated. Corporation Commission of North Carolina v. N. & W. Ry. Co., 19 I. C. C. 303, 309.

(p) Carriers may have a limited right to encourage and protect by rate equalization communities which are under natural disadvantages, notwithstanding the fact that substantially more burdensome transportation conditions are encountered in handling the traffic from such points. The Commission, however, can not prescribe a rate that is less than reasonable, nor can it require the removal of discrimination unless it is found to be unjust. Cast Iron Pipe from North Carolina Points, 38 I. C. C. 183, 186.

(q) That rates should be fixed in inverse proportion to the natural advantages of competing towns, with the view of equalizing commercial conditions as they are sometimes described, is a proposition unsupported by law and quite at variance with every consideration of justice. Each community is entitled to the benefits arising from its location and natural conditions, and any exaction of charges unreasonable in themselves or relatively unjust, by which those benefits are neutralized or impaired, contravenes alike the provisions and the policy of the statute. Inland Empire Shippers' League v. Director General, 59 I. C. C. 321, 338.

(r) While the Commission will not attempt to readjust inbound and outbound rates so as to put all competing jobbing plants on a parity in common territory, the inability of jobbing points generally to compete in their contiguous territory is a condition that may, and should, be considered in determining whether a rate adjustment to the jobbing points is just and reasonable and free from undue prejudice. Certain-Teed Products Corp. v. A., T. & S. F. Ry. Co., 73 I. C. C. 82, 86.

(s) It is not necessary, in order to preserve advantages of location, that rates should be based rigidly on mileage or on cost of service. Kalmath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 213.

(t) In distributing commodities in competitive territory, the point that can avail itself of a long carload haul and a short less-than-carload haul is ordinarily entitled to a lower total transportation charge than the point using a short carload haul and a long less-than-carload haul. Certain-Teed Products Corp. v. A., T. & S. F. Ry Co., 77 I. C. C. 444, 445, 446.

(ta) In adopting a policy of rate equalization in which distance is disregarded, carriers can not accord advantages of such rates to certain points of origin and deny them to other competing points from which traffic moves under substantially similar circumstances and conditions. Rates from River Crossings to Nebraska, 78 I. C. C. 439, 442.

(u) Equalization of commercial advantages and disadvantages through regulation of rates from competing points of production, irrespective of the transportation services performed, is not the function of the Commission. Western Coal Rates, 80 I. C. C. 383, 461.

(v) The Commission can not regulate rates for the purpose of equalizing cost of production or manufacture and primarily it is not its concern to equalize market competition. Vinegar Rates from Pacific Coast, 81 I. C. C. 666, 669.

(va) The equality of treatment among shippers which the law requires of car-

riers extends only to shippers whom it is under a duty to serve. Tacoma Traffic & Transp. Bureau v. N. P. Ry., 87 I. C. C. 507, 513.

(vb) The right of carriers to meet competitive conditions and equalize localities is subject to the limitation that no undue prejudice will be caused thereby. Lincoln Gas Co. v. B. & O. R. R., 88 I. C. C. 379, 384.

(w) The Interstate Commerce Act as amended does not attempt to equalize fortune, opportunities or abilities. On the contrary, it in turn contemplates that if a carrier receives services from an owner of property transported or uses instrumentalities furnished by the latter, he shall pay for them, the only restriction being that he shall pay no more than is reasonable, and the only permissive element being that the Commission determine the maximum in case there is complaint or upon its own motion. I. C. C. v. Diffenbaugh, 222 U. S. 42, 46, 32 Sup. Ct. 22, 56 L. ed. 83.

§3½. Costs of Shipper.

IMPORTANT CASES SINCE 1908

(a) Defendant contended that as coal from its mines at Rich Hill has less value for domestic purposes than Myrick coal it might equalize such difference in value by making a lower rate on Rich Hill coal. Complainants cost of mining at Myrick is nearly 50c per ton more than it costs defendant to mine its coal at Rich Hill. HELD, that there is in fact no such difference in value as to justify defendants rate adjustment in favor of Rich Hill; that if difference in quality is to be equalized in favor of the defendant the question arises why should not difference in cost of mining be equalized in favor of complainant, that if any such process of equalization is permissable defendant may absolutely dictate the comparative value of every mine and industry upon its road; and that such rates should be examined with closest scrutiny when resorted by the carrier in its own favor. McGrew v. M. P. R. R. Co., 80 I. C. C. 630, 640.

§4. Competition.

(1) In General.

See Competition.

IMPORTANT CASES SINCE 1908

(a) Competition in commodities alone is not a circumstance that will entitle a selling point to have an already low rate made still lower to equal one at a more distant point, which was made to meet competition of carriers and of rates as well as of markets and products. Bovaird Supply Co. v. A. T. & S. F. Ry. Co., 13 I. C. C. 56, 64.

(b) Carriers may, for the purpose of meeting water competition, make rates lower than would otherwise be justifiable, even to the extent of charging a less rate to the more distant point. The carrier may determine for itself whether it will or will not meet such water competition. While, however, the carrier may

in the first instance settle its policy in this respect, it must act under certain limitations. It cannot be permitted to compete at one point and decline to compete at another, where all conditions are the same; nor shall it, ordinarily, be allowed to compete one day and decline to compete the next. The public has the right to require equal and uniform treatment within the bounds of reason. Cases might therefore arise where the Commission would require the continuance of a rate established to meet such competition. Darling & Co. v. B. & O. R. R. Co., 15 I. C. C. 79, 87.

(c) A railroad cannot set up any imaginary water competition. But where a water competition exists that could readily take all the tonnage offered, no reason why rail line may not meet the competition. Bulte Milling Co. v. C. & A. R. R. Co., 15 I. C. C. 351, 359.

(d) It is unjust to fix rates so as to destroy the business of one concern and create a monopoly in favor of other concerns, though it be merely incidental, to meeting competitive rate. Spiegle & Co. v. S. Ry. Co., 19 I. C. C. 522, 525.

(e) Strictly speaking there is no such thing as market competition which is distinct from competition between the lines of transportation serving the market. A market can only compete through the agency which tranports for it. The carrier makes a rate from a given market not out of favor to that locality, but because it desires to obtain traffic which will not otherwise come to it. There would seem, therefore, to be little distinction between the competition of markets and the competition of rival railroads. City of Spokane v. N. P. Ry. Co., 21 I. C. C. 400 , 414.

(f) A carrier may voluntarily accept lower rates than it can be required to accept, and whether or not a carrier will meet competitive conditions at a particular point rests primarily with it. But this principle does not relieve the carrier from the obligation to remove unjust discrimination created by meeting competitive conditions at one point and refusing to meet them at a neighboring point. Chamber of Commerce, Ashburn, Ga., v. G. S. & F. Ry. Co., 23 I. C. C. 140, 149.

(g) Competitive influences may bring about an equalization of rates on traffic to a certain defined territory which is not accorded as to any other territory; and unless unjust discrimination results the carriers are within their rights in maintaining such an adjustment. Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 23 I. C. C. 195, 207.

(h) The Commission has not recognized the right of a carrier to fix its rates to or from a given point on a higher level than they otherwise should be, in order to prevent one community from competing with another, or to keep the products of one community out of a territory, the wants of which may be fully supplied by another community. Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 26 I. C. C. 53, 58.

ALL OTHER CITATIONS

Bovaird Supply Co. v. A. T. & S. F. Ry. Co., 13 I. C. C. 56, 64; Indianapolis Freight Bureau v. P. R. R. Co., 15 I. C. C. 567, 576; North Bros. v. C. M. & St. P. Ry. Co., 15 I. C. C. 70, 71; Florida Fruit & Vegetable Ass'n. v. A. C. L. R. R. Co., 17 I. C. C. 552, 561; Metropolitan Paving Brick Co. v. A. A. R. R. Co., 17 I. C. C. 197, 203; National Petroleum Ass'n. v. M. P. Ry. Co., 18 I. C. C. 593, 595; Colorado Coal Traffic Ass'n. v. C. & S. Ry. Co., 18 I. C. C. 572; Frederick & Kempe Co. v. N. Y. N. H. & H. R. R. Co., 18 I. C. C. 481, 484 Jennison Co. v. G. N. Ry. Co., 18 I. C. C. 113, 124; Breese-Trenton Mining Co. v. W. R. R. Co., 19 I. C. C. 598, 600; Spiegle & Co. v. S. Ry. Co., 19 I. C. C. 522, 525; City of Spokane v. N. P. Ry. Co., 21 I. C. C. 400, 414; Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 23 I. C. C. 195, 207; Chamber of Commerce, Ashburn, Ga., v. G. S. & F. Ry. Co., 23 I. C. C. 140, 149; Concentration of Cotton, 26 I. C. C. 585, 592; Traffic Bureau of Nashville Tenn., v. L. & N. Ry. Co., 28 I. C. C. 533; Eastern Fruit Growers' Asso. v. B. & O. R. R., 33 I. C. C. 343; Lebanon Commercial Club v. L. & N. R. R. Co., 35 I. C. C. 204; Owens Bottle-Machine Co. v. B. & O. R. R., 55 I. C. C. 122.

§4. (1½) Pipe Line Competition

See Pipe Lines.

IMPORTANT CASES SINCE 1908

(a) The Commission may not require rail carriers to maintain rates merely in order that those who use them may better compete with others who are in a position to utilize the less costly service of pipe lines. Proportional rates on Petroleum and its products from Mississippi river Crossings to Canada, 74 I. C. C. 349, 351.

§4. (2) Railroads.

See Evidence §47; Rate Via Competing Line; Railroad Competition.

CASES 1887-1908

(a) The Missouri Pacific, having met the Wabash rate to Omaha, is not necessarily required to give Lincoln the same terms, although the distance is a trifle less and Lincoln is the center of a thriving trade. The Missouri Pacific gives Lincoln equal rates with Omaha upon all business coming from a direction where there is no competition by a shorter route. The discrimination in the St. Louis rate between the traffic to Omaha and Lincoln has been reduced nearly one half since the filing of the petition. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. R. 98.

IMPORTANT CASES SINCE 1908

(b) It does not follow that because one railroad, as a matter of policy, extends a low rate for a special service, all its connections must be held to an extension of the same policy and rate. Topeka Banana Dealers' Ass'n. v. St. L. & S. F. R. R. Co., 13 I. C. C. 620, 631.

(c) Whatever may have been the practice in the past of "meeting the rate", tariffs must now be adhered to. Menefee Lumber Co. v. T. & P. Ry. Co., 15 I. C. C. 49, 51.

(d) Because the delivering carrier sees fit to state that it will protect a rate made by its competitor, but fails to do so, the Commission cannot hold such lower rate is necessarily reasonable. DeCamp Bros. v. So. Ry. Co., 16 I. C. C. 144, 145.

C. 426, 429, 430; Ottuma Pickle Co. v. C. M. & St. P. Ry. Co., 16 I. C. C. 368; Pepperell Mfg. Co. v. T. S. Ry. Co., 16 I. C. C. 353, 355; LaSalle Paper Co. v. M. C. R. R. Co., 16 I. C. C. 149, 150; Avery Mfg. Co. v. A. T. & S. F. Ry. Co., 16 I. C. C. 20, 25; Omaha Grain Exchange v. C. & N. W. Ry. Co., 19 I. C. C. 424, 433; Georgia-Carolina Brick Co. v. S. Ry. Co., 20 I. C. C. 148, 149; Iola Portland Cement Co. v. M. K. & T. R. R. Co., 20 I. C. C. 91; Simon Cook v. Wabash R. R. Co., 21 I. C. C. 563, 564; Mission Brewing Co. v. A. T. & S. F. Ry., 38 I. C. C. 171; Whitewater Lumber Co. v. A. C. Ry., 53 I. C. C. 278; Board of Trade of Nashville, Ga., v. G. & F., 58 I. C. C. 59.

§4 (3) Rail-and-Water Competition.

See Rail-and Water Competition.

IMPORTANT CASES SINCE 1908

(a) Water and rail competition may justify lower charges to one point than to another. Columbia Grocery Co. v. L. & N. R. R. Co., 18 I. C. C. 502, 507.

(b) The Commission is hardly prepared to find that discrimination necessarily results from the fact that an all-rail carrier meets the rate of a competing lake-and-rail rate. Board of Trade of Chicago v. A. C. R. R. Co., 20 I. C. C. 504, 509.

ALL OTHER CITATIONS

Class and Commodity Rates to and from Quincy, Ill., and Groups, 33 I. C. C. 409; Elmore-Benjamin Coal Co. v. C. & O. Ry., 36 I. C. C. 528, 531.

§4. (4) Water Competition.

See Evidence §14 (5); Water Competition.

CASES 1887-1908

(a) Complainant asked that Santa Barbara, Cal., be given the benefit of terminal rates on westbound transcontinental shipments, and based its petition upon the contention that the transportation conditions and circumstances obtaining in that city are similar to those which exist at other Pacific coast cities in California to which such rates are voluntarily extended by the rail carriers. HELD, that, from the facts disclosed by the record, there is no real, potential, compelling competition between the transcontinental rail carriers and those carrying similar traffic by water which affects directly the rail rates obtaining at Santa Barbara, and that the complaint should be dismissed. Commercial

Club, etc. v. S. Pac. Co., et al., 12 I. C. C. 495.

IMPORTANT CASES SINCE 1908

(b) Carriers may, for purposes of meeting water competition, make rates lower than would otherwise be justifiable, even to the extent of charging a less rate to the more distant point. The carrier may determine for itself whether it will or will not meet such water competition. While, however, the carrier may in the first instance settle its policy in this respect, it must act under certain limitations. It cannot be permitted to compete at one point and decline to compete at another, where all conditions are the same; nor shall it, ordinarily be allowed to compete one day and decline to compete the next. The public has the right to require equal and uniform treatment within the bounds of reason. Cases might therefore arise where the Commission would require the continuance of a rate established to meet such competition. Darling & Co. v. B. & O. R. R. Co., 15 I. C. C. 79, 87.

(c) Railroad cannot set up any imaginary water competition. But where a water competition exists that could readily take all the tonnage offered, no reason why rail line may not meet the competition. Bulte Mining Co. v. C. & A. R. R. Co., 15 I. C. C. 351, 359.

(d) Carriers cannot be compelled, as a matter of law, to meet water competition; they do it of their own volition, or whenever the same is potent enough to compel them to do so in order to secure the traffic. In each instance the carrier determines for itself whether such water competition has sufficient influence on the traffic to make it reduce its rates. Bainbridge Board of Trade v. L. H. & St. L. Ry. Co., 15 I. C. C. 586, 594;

(e) That carriers are at liberty to meet water competition in whatever way and at whatever point and to whatever extent they see fit cannot be admitted. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 168.

(f) If one city is on the water and can operate boats to another city, it has an advantage which the rail carriers between the same points may recognize without violating the prohibition against undue preference against intermediate cities. So if the water points at one end of the line are grouped, the water points at the other end of the line should be likewise grouped or the influence of the water recognized. In Re Application of the Southern Pacific Co., 22 I. C. C. 366, 375.

(g) Taking all the circumstances into consideration, including the control exercised by the railroad corporations over certain steamship companies and the depressed earnings of the water lines, the evidence does not indicate that defendants are now compelled to maintain their all rail rates between the Virginia cities and eastern seaboard ports on a subnormal basis because of water competition. There is ground for the inference that the water lines feel the necessity, in order that they may secure a substantial share of the traffic, of maintaing their rates at a somewhat lower level generally than the rail rates, but there seems no basis for a belief that the latter are at present held down by the water rates. Indeed, a more reasonable conclusion is that the steamship companies would willingly follow the lead of the carriers on land if all the rail rates were increased. This may be a situation brought about by conditions which are temporary in character, but they have persisted now for some length of time and there is no certainty that they are temporary. Corporation Commission of North Carolina v. Director General, 57 I. C. C. 523, 544.

ALL OTHER CITATIONS

Ry., 218 U. S. 88, 30 Sup. Ct. 651, 54 L. Ed. 946, reversing 171 Fed. 680, 683, enjoining Commission's order; Acme Cement Plaster Co. v. L. S. & M. S. Ry. Co., 17 I. C. C. 30; Kentucky Wagon Mfg. Co. v. I. C. R. R. Co., 18 I. C. C. 360, 363; Cohen & Co. v. Mallory Steamship Co. 23 I. C. C. 374, 377; Bituminous Coal Rates to Baltimore and Other Cities, 33 I. C. C. 307, 316; Alexandria Traffic Bureau v. M. L. & T. R. R. & S. S. Co., Unrep. Op. A-955; Bristol Brass Corporation v. Director General, as Agent, 78 I. C. C. 301; Elem Coal Co., v. L. V. R. R. Co., 80 I. C. C. 647.

§4. (5) Market Competition.

See Supra §6; Market Competition.

CASES 1887-1908

(a) It is not the duty of carriers, nor is it proper, that they undertake by adjustment of rates or otherwise to impair or neutralize the natural commercial advantages resulting from location

or other favorable condition of one territory in order to put another territory on an equal footing with it in a common market. Each locality competing with others in a common market is entitled to reasonable and just rates at the hands of the carriers serving it and to the benefit of all its natural advantages. If this result in prejudice to one and advantage to another, it is not the undue prejudice or advantage forbidden by the statute, but flows naturally from conditions beyond the legitimate sphere of legal or other regulation. Commercial Club of Omaha v. C. R. I. & P. R. Co., 6 I. C. C. 647, 675.

(b) Complainant attacked commodity rates charged on cotton goods from points in Texas to Wichita, Kans., as unreasonable compared with the rates to Omaha, Kansas City and Chicago. Rates are 96c to Wichita, Kans., 50c to Kansas City and St. Louis and 55c to Omaha and Chicago. The average distances range from 458 miles to Wichita to 1,038 miles to Chicago. Active market and carrier competition exists for the sale and transportation of this traffic to the points other than Wichita, to which substantially agreed rates are maintained by the four carriers reaching that point from all markets. A rate from Texas producing points to Wichita of 50c would be highly profitable to carriers and complainant; a Wichita jobber formerly had, by the rebate system, a rate as low as 50c from Galveston, 250 miles further. Until recently the tariff rate to Wichita from these points was $1.16. The present rates to Kansas City and other Missouri river points and to Wichita exclude the Wichita jobber from competition. HELD, present rate of 96c to Wichita unreasonable and unjust, and should not exceed 50c per 100 pounds. Johnson Latimer Dry Goods Co. v. A. T. & S. F. Ry., 12 I. C. C. 48.

IMPORTANT CASES SINCE 1908

(c) It is not the function of this Commission to equalize commercial conditions or neutralize geopraphical advantages by such adjustments as will enable a shipper to compete in markets otherwise closed to him; especially under depressed market conditions. Connor Lumber & Land Co. v. A. C. & Y. Ry. Co., 40 I. C. C. 111, 114.

(d) So long as their competitors in Nebraska are accorded equalized rates the lower Missouri River cities can not lawfully be denied whatever rate advantages would accrue from rate schedules made upon the same principle. The Missouri River-Nebraska Cases, 40 I. C. C. 201, 259.

(e) The construction of rates by equalizing the rates in and out of competing jobbing centers is impracticable, even if it might be assumed that the rate factors necessary to bring about the equalization would always be fair and reasonable. Wheeler Lumber Bridge & Supply Co. v. Director General, 59 I. C. C. 6, 10.

(f) While the Commission will not attempt to readjust inbound and outbound rates so as to put all competing jobbing points on a parity in common territory, the inability of jobbing points generally to compete in their contiguous territory is a condition that may, and should be, considered in determining whether a rate adjustment to the jobbing points is just and reasonable and free from undue prejudice. Certain-Teed Products Corp. v. A. T. & S. F. Ry. Co., 73 I. C. C. 82, 86.

(g) In adopting a policy of rate equalization in which distance is disregarded, carriers can not accord advantages of such rates to certain points of origin and deny them to other competing points from which traffic moves under substantially similar circumstances and conditions. Rates from River Crossings to Nebraska, 78 I. C. C. 439, 442.

C. C. 170.

§5. Low State Rate.

See Discrimination §11; State Rates and Regulations.

IMPORTANT CASES SINCE 1908

(a) Where state rates have been fixed at an unduly or unreasonably low figure, there is a forum in which to test that question, and until such test has been invoked, it cannot be recognized as proper to "neutralize" the reduction in state rates by increases in interstate rates. Commercial Club of Omaha v. Anderson & Saline River Ry. Co., 18 I. C. C. 532, 536.

(b) The maintenance of lower rates in intrastate traffic than on like interstate traffic between the same points affords some evidence of unjust discrimination, but it is not conclusive evidence. Merrill & Bro. v. I. C. R. R., 36 I. C. C. 523, 524.

ALL OTHER CITATIONS

Marble Falls Insulator Pin Co. v. H. & T. C. R. R. Co., 15 I. C. C. 167, 169; Marshall Oil Co. v. C. & N. W. Ry. Co., 14 I. C. C. 210, 213, 214.

§6. Preference of Markets.

See Market Competition; Reasonableness of Rates.

CASES 1887-1908

(a) It is not the duty of a carrier to regulate markets. If by reason of competition in transportation or the condition of the markets a carrier sees fit to move traffic at very low rates in order to participate in the business, that may be done and often is done, but that is a very different matter from compelling it to reduce all its rates to equalize competition between shippers from different fields of supply and by different and unrelated routes. Rice Robinson & Witherop v. W. N. Y. & P. R. R., 2 I. C. C. 298, 301.

(b) When a carrier makes rates to two competing markets which give the one a practical monopoly over the other because it can secure reshipments from the favored locality and none from the other, it goes beyond serving its fair interest, and disregards the statutory requirements of relative equality as between persons, localities, and particular descriptions of traffic. Savannah Bureau of Freight & Transportation v. L. & N. R. Co., 8 I. C. C. 377, 405.

(c) Complainant attacked rates on freight from Louisville, Ky., Cincinnati, O., St. Louis, Mo., Chicago, etc., to Wilmington, N. C., are unreasonable and unjust as compared with the rates from the same points to Norfolk, Richmond and other Virginia cities. The present adjustment of rates on freight traffic from Chicago, St. Louis and other related points of shipment to Wilmington, N. C., operates largely to deprive that city in its competition for trade in common territory with Norfolk and Richmond and other Virginia cities of the benefits of those primary markets and to limit Wilmington to such intermediate points of supply as Cincinnati and Louisville, from which points the rate relations appear to be fair and reasonable and this subjects Wilmington to disadvantages which are in substantial degree undue and unreasonable and for which the defendant carriers are to that extent responsible. Rates from Cincinnati and Louisville to Norfolk are much lower than those from St. Louis and Chicago to Norfolk, and the competitive conditions governing the rates from Cincinnati and Louisville appear to be of the same general character as those which apply to rates from Chicago or

St. Louis. The same is true of rates to Wilmington from Cincinnati, Louisville, Chicago or St. Louis. HELD, that what constitutes just rate relations from Cincinnati and Louisville to Norfolk and Wilmington is a fair basis for relative rates from St. Louis and Chicago and that basis should be adopted with the modification in favor of the carriers that the readjustment may be made on the basis of the East St. Louis rates, and the established practice of charging practically the same rates from St. Louis and Chicago to Wilmington continued. Rates from Chicago, St. Louis and East St. Louis to Wilmington should be 135 per cent of the rates from East St. Louis to Norfolk. Wilmington Tariff Asso. v. C. P. & V. R. R., 9 I. C. C. 118.

IMPORTANT CASES SINCE 1908

(d) No shipper is obliged to confine himself to the nearest markets, but the markets of the country are and should be open to anyone who can reach them under just and reasonable rates. It is not possible to adjust rates so that every town may be a jobbing and distributing point and be on an equality with all jobbers or manufacturers at other points. Certain natural advantages of location must be recognized, and often they are, of necessity, controlling. Competitive conditions between carriers, between producing points, and in common markets, must be given due weight. Distance, while in no sense controlling, must be taken into consideration. New Albany Furniture Co. v. M. J. & K. C. R. R. Co., 13 I. C. C. 594, 600.

(e) No locality, manufacturer or shipper has an exclusive right to supply a market. Avery Mfg. Co. v. A. T. & S. F. Ry. Co., 16 I. C. C. 20, 24.

(f) While a carrier ought not and should not be required to equalize access to markets for all engaged in a common business, if the shippers are differently situated and are not entitled to the same rates, it may be perfectly lawful for it to give equal access to markets to localities of dissimilar distances, where such distances involve no material increase in the transportation expense. Avery Mfg. Co. v. A. T. & S. F. Ry. Co., 16 I. C. C. 20, 24.

(g) A carrier may not, in order to protect mills located on its line, exact unreasonable rates on traffic originating at mills located upon other lines. Acme Cement Plaster Co. v. C. G. W. Ry. Co., 18 I. C. C. 19, 20, 24.

(h) The Commission, in determining whether a carrier and its connections unduly discriminate in their transportation charges from competing coal mines to a common market cannot undertake to equalize differences in the cost of production, whether natural or artificial. Andy's Ridge Coal Co. v. So. Ry. Co., 18 I. C. C. 405, 409.

(i) Neither the east nor the west has any vested right to sell a certain amount of goods in southern territory. Each section is entitled to a reasonable rate and to do what business it can under that rate. Receivers' and Shippers' Ass'n of Cincinnati v. C. N. O. & T. P. Ry. Co., 18 I. C. C. 440, 459.

(j) No jobbing point is entitled because of unfair adjustment of rates to exclusive posession of, or complete supremacy in, a particular consuming territory. A carrier may not by the establisment and maintenance of unreasonable rates give possession of a consumng territory to the jobbers at a point selected or favored by the carriers. Jobbers are shippers and every shipper is entitled to reasonable rates. Every locality is entitled to reasonable and nondiscriminatory rates, and the dealers at any point are entitled to trade wherever and as far as reasonable rates will permit. Billings Chamber of Commerce v. C. B. & Q. R. R. Co., 19 I. C. C. 71, 75.

(k) It is doubtful whether rates may be constructed for the express purpose of compelling the manufacture or merchandising of a commodity at particular points. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 168.

(l) While general commercial conditions should be considered, and while defendants might properly decline to apply the same rate to the longer haul from New York to Spokane which they apply to the shorter haul from Chicago, it may be doubtful whether they should be permitted to construct a tariff for the express purpose of compelling the manufacture or the merchandising of a given commodity at Chicago or upon the Missouri River or at the Atlantic seaboard. Some system of rates which on the whole seem just and reasonable should be established, and these different communities should be permitted to do what ever business they can under that rate system. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 168.

(m) Impossible under the present system of rate making in this country to so adjust rates that the in-and-out charges will be the same in the aggregate for all jobbing points which buy and sell in Common markets. Ft Dodge Commercial Club v. Director General, 57 I. C. C. 243, 345.

(n) Rates on grain from points in Iowa, Nebraska and Missouri, to Cairo, Ill., found not unreasonable, discriminatory, or unduly prejudicial, as substantial equalization appears to have been effected at Cairo through the medium of transit, and the Commission is not warranted in requiring carriers to reduce their inbound rates to Cairo for the purpose of equalizing that market with St. Louis, Mo., and Memphis, Tenn. Cairo Board of Trade v. A. T. & S. F. Ry. Co., 61 I. C. C. 219.

ALL OTHER CITATIONS

Montgomery Freight Bureau v. Western Ry. of Ala., 14 I. C. C. 150, 151; Chamber of Commerce of Milwaukee v. C. R. I. & P. Ry. Co., 15 I. C. C. 460, 464; Bulte Milling Co. v. C. & A. R. R. Co., 15 I. C. 50, 59; Omaha Grain Exchange v. C. B. & Q. R. R. Co., 26 I. C. C. 533, 556; Rates on Linseed Oil, 26 I. C. C. 265, 270; Toledo Produce Exchange v. A. A. R. R. Co., 27 I. C. C. 536, 543; Metropolis Commercial Club v. I. C. Ry. Co., 30 I. C. C. 40; Class and Commodity Rates from Stations in Maine, 31 I. C. C. 18, 21; Pueblo Commerce Club v. D. & R. G. R. R. Co., 31 I. C. C. 133.

§7. Size of Commuity.

See Evidence §33, §53.

CASES 1887-1908

(a) It is not a ground of complaint against a railroad company that it equalizes its rates as between small and large towns, even though the effect may be prejudicial to the large towns which before had been specially favored. Crews v. R. & D. R. R. Co., 1 I. C. R. 703.

(aa) Complainant charged unjust rates and discrimination against Danville, Va. HELD, It is not a ground of complaint against a railroad company that it equalizes its rates as between small and large towns, even though the effect may be prejudicial to the large towns which before had been specially favored. The spirit and purpose of the Act requires that when the circumstances and conditions will fairly admit of it the charges to all points for a like service should be made relatively equal. When the reasonableness of rates is in question the charges made on long through lines cannot form a just basis for comparison with local rates for relatively short distances. A carrier is not responsible for rates made by a connecting road because merely of its giving them in connection with its own rates to parties desiring to make through shipments. A carrier is not compellable by law to give to the merchants of a town on its line the privilege of shipping their goods from the point of purchase to their own locality and again from thence to the place at which the goods may be sold by them at the same rate which would have been charged had there been but one shipment from the point of purchase to the point of ultimate delivery. The fact that a refusal to give the through rate for one shipment operates prejudicially to the town desiring the privilege and favorably to another town does not make

the refusal operate as unjust discrimination when the carrier applies the same rule to all towns and accords the privilege to none. Discrimination must consist in the doing for or allowing to one party or place what is denied to another; it can not be predicated on action which in itself is impartial. Further HELD, tariffs have since been amended showing same rates to Danville as to Richmond and the evidence offered to show that the rates of the defendant are excessive and unjust is too inconclusive to justify any finding to that effect. Crews, Danville Chamber of Commerce v. R. & D. R. R. Co. 1 I. C. C. 703.

(ab) Complainant attacked class rates as unreasonable and discriminatory from Chicago, Ill., to Lincoln, Neb., Fremont, Neb., compared with rates to Omaha and from Omaha to these destination points, in that the rates through from Chicago were lower than the rates to and from Omaha. HELD, Trade centers, or large commercial towns, are not, as a matter of right, entitled to have more favorable rates than the smaller towns for which they form distributing centers; and if carriers shall give to such smaller towns rates as favorable as to the larger, the Commission will not interfere. The fact that under rates which are impartially arranged as between large and small towns one large distributing center may have an advantage over another in competition for the business of the small towns, does not make out a case of undue preference in favor of the one distributing center as against the other. Impartial rates are not rendered illegal by their effect upon the business of localities. A distributing center, however great or important, can not demand as a matter of right that the rates from a common source of supply to more distant and smaller towns shall be made up of the sum of the rate to itself and the rate thence to such smaller towns; but the carriers may make rates from the common source of supply to the smaller towns directly, as single rates; and if the single rate is less than the sum of the two which are made to and from the distributing center, it is not for that reason necessarily objectionable, a case can not be decided on a theory which is neither presented by the complaint nor advanced in the taking of the testimony. Complaint dismissed. Freight Bureau of Omaha Board of Trade v. C. B. & Q. R. 2 I. C. C. 32.

IMPORTANT CASES SINCE 1908

(ac) Advantages of location, such as proximity to a navigable stream or strong competition between carriers naturally result in lower rates to a town so situated, and it is not the province of the Commission to disturb the resulting rate relations unless the discrepancy is so great as to effect an unjust discrimination against the non-competitive points. But the mere fact that a given town has been recognized as a trade center and is enabled by its more favorable rate adjustment to distribute in a certain territory, cannot justify the continuance of relative rates which result in undue preference. The law contemplates relatively fair rates as between different places, and the dealer located in a small town is entitled to a reasonable adjustment which will enable him to compete on an equitable basis with dealers at trade centers enjoying the benefit of competitive rates.. Payne-Gardner Co. v. L. & N. R. R. Co., 13 I. C. C. 638, 643.

(b) Function of carrier not to promote growth of large shippers at expense of small. California Commercial Ass'n v. Wells, Fargo & Co., 14 I. C. C. 422, 432.

(c) A community is not entitled to advantages in the adjustment of freight rates simply because it is larger than some neighboring community. If a locality has natural advantages, it should be allowed to enjoy them, but it ought not to be given the additional artificial advantage which arises from a discriminating railway tariff. Suffern Grain Co. v. I. C. R. R. Co., 22 I. C. C. 178, 182; Harbor City Wholesale Co. v. S. P. Co., 19 I. C. C. 323, 331.

ALL OTHER CITATIONS

Board of Trade of City of Chicago v. C. & A. R. R. Co., 27 I. C. C. 530, 534; Commercial Club of Duluth v. B. & O. R. R. Co., 27 I. C. C. 639, 649; Chamber of Commerce, Freeport, Ill., v. C. M. & St. P. Ry., 33 I. C. C. 673.

III. EFFECT OF EQUALIZATION

§8. Adjustment of Related Rates.

See Evidence §66; Relative Rates.

CASES 1887-1908

(a) Where carriers have maintained for a considerable period of time a relation of rates affecting an extensive territory, though somewhat more favorable to one community therein than appears to be justified, and commercial

conditions there and elsewhere have become measurably dependent upon the continuance of that relation, it would ordinarily be inexpedient to increase rates at that point as the means of correcting relative injustice to another locality; in such case the only practical remedy is to reduce the rates to the injured town. Daniels v. C. R. I. & P. R. Co., 6 I. C. C. 458, 483.

IMPORTANT CASES SINCE 1908

(b) Every locality competing in a common market is entitled to rates which are relatively reasonable and just in comparison with rates from other localities served by the same carrier. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 294.

(c) It is the duty of the Commission to determine a question of relative rates on coal as between competing producing districts upon a basis whch will permit them to compete in common markets and under circumstances to which their location and conditions of production fairly entitle them, with respect to their relation one to another. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 295.

(d) A change in one of a series of related rates changes the relation among all of them. Boileau v. P. & L. E. R. R. Co., 22 I. C. C. 640, 654.

(e) It often happens that two rates are so related to each other that to change one (by advancing it) without corresponding change in the other works an unjustifiable discrimination, even though the proposed advance is reasonable. Lumbermen's Exchange of St. Louis v. A. & S. R. R. R. Co., 24 I. C. C. 220, 224.

(f) While the fact that the reduction of a rate must lead to other reductions is a reason why the Commission should proceed with caution, it is no conclusive reason against granting to shippers such reductions, when necessary to give them reasonable rates. Southwestern Shippers' Traffic Assn. v. A. T. & S. F. Ry. Co., 24 I. C. C. 570, 577.

(g) The fact that a relation of rates has been in effect for many years can not justify its continuance, if at this time it unduly wrongs one of the related communities. Commercial Club of Duluth v. B. & O. R. R. Co., 27 I. C. C. 639, 652.

(h) The deprivation of a city of rates based on percentage principle may not be justified. Rates on Potash and Other Commodities, 29 I. C. C. 626, 627.

(i) The car-mile earnings of carriers on all traffic compared with similar earnings on coal shipped from and to the points involved and other computations made on similar bases are proper to be considered and should be given due weight in reaching a conclusion San Toy Coal Co. v. A. C. & Y. Ry., 34 I. C. C. 93.

(j) Ordinarily, rates not involved in an inquiry before the Commission will adjust themselves to the conditions brought about by the order of the Commission, but even though the assumption that they will adjust themselves is erroneous, and the basis for the assumption involves a mistaken factor as to such other rates, still it does not necessarily lead to the conclusion that the regulation of the rate directly involved in the order is invalid, or that the order fixing such a rate should be annulled by judicial authority, provided always the rate so directly involved is reasonable and just for shippers and carriers, with relation to the particular destinations concerned. N. & W. Ry. Co. v. U. S. 195 Fed. 953, 959.

(k) The Commission is not prevented from reducing an unreasonablly high rate between certain points by the fact that through competitive conditions some other rate will have to be made unreasonably low. N. & W. Ry. Co. v. U. S. 195 Fed. 653, 960.

I. BURDEN OF PROOF.

§1. In General.

See Advanced Rates §3; Blanket Rates §16; Burden of Proof; Crimes §25; Discrimination §14; Evidence I; Long and Short

Hauls §12 (1); Loss and Damage §15; Routing and Misrouting §8; Through Routes and Joint Rates §15; Undercharges §5.

CASES 1887-1908

(a) In case of complaint for violation of section 4 of the Act, the burden of proof is on the petitioner to sustain departure from the general rule prescribed by statute, by showing that circumstances and conditions are dissimilar. Re Southern R. & S. Asso., 1 I. C. R. 278.

(b) The burden of proof is on the petitioner charging exaction of unreasonable rates. Harding v. Chicago, etc., R. Co., 1 I. C. R. 375.

(c) On a petition charging the exaction of unreasonable rates, the burden of proofs is on the petitioner to sustain the charges by evidence which shows with reasonable certainty that they are in substance true. Harding v. same, I. C. R. 375.

(de) Complainant has burden of proof. Rice v. Louisville, Nashville R. R. Co. 1 I. C. R. 724.

(ea) Where the evidence adduced in a proceeding which attacks the reasonableness of a rate, fails to establish the grounds relied upon, as stated in the complaint, and upon which it is heard and tried before the Commission by the parties and their counsel, and to which the evidence is directed, but shows that upon a portion of its line, as for example, between St. Peter, in the State of Minnesota, and Pierre, in the Territory of Dakota, that the rates are made upon a basis which seems to grade them with large differences between stations contiguous to each other, and the grounds assigned for this by the carrier are the additional cost of service incident to operating a new line through a thinly inhabited and but little cultivated country, with very light traffic, and in which the transportation is seriously impeded by snow blockades, and where the coal used for fuel in operating the trains has to be brought by the carrier a distance of nearly five hundred miles, but the evidence is not given with that fullness of detail which should sustain such extra rates of charge, the Commission, while it will not hold the rates to be unreasonable, will, also, not hold that they are reasonable, but will investigate this question in a separate proceeding under the Statute, by which all the parties in interest will have an opportunity to be fully heard and can bring forward all the evidence upon a subject that is important and involving valuable rights, alike to the public and to the carrier. Business Men's Asso. v. Ch. & N. W. R. Co., 2 I. C. R. 48.

(f) A prima facie case of unreasonableness of rates is not made out by showing that the rates for a certain commodity are higher in certain cases than certain other rates, and that they produce a large profit to the carrier. When a question of reasonable rates is presented, the whole subject should be laid open, with all the attending circumstances and relations. Howell v. New York, Lake Erie & Western R. Co., 2 I. C. R. 162.

(g) A departure from the rule of equal mileage rates as applied to the several branches of a road is not conclusive that such rates are unlawful; but the burden is on the company making such departure to show its rates to be reasonable, when disputed. Northwestern Iowa Grain & Stock Shippers Asso. v. Chicago & N. W. R. Co. (Com.) 2 I. C. R. 431; New Orleans Cotton Exch. v. Cincinnati, N. O. & T. P. R. Co., (Com.), 2 I. C. R. 289.

(hi) When rates on the line of a carrier are on their face disproportionate or relatively unequal, the burden is on the carrier to justify them when challenged. McMorran & Co. v. G. T. R. R. of Canada, 2 I. C. C. 604, 607.

(j) The common-law rule that he who attacks a contract has the burden to show its invalidity prevails in the Colorado courts. Therefore a contract of rebate must be held valid until shown to be otherwise. Bayles v. Kansas P. R. Co. (Colo.), 2 I. C. R. 643.

(k) Contracts providing that a complainant may ship coal to points north and west on the same terms and rates that respondent for the time being gives other persons do not preclude complainant from showing that such rates are unjust, oppressive, or unreasonable. Complainant is therefore entitled to a hearing upon that question before the Interstate Commerce Commission. Haddock v. Delaware, L. & W. R. Co. (Com.), 3 I. C. R. 302.

(l) Where a claim for reparation is made in a complaint of unreasonable railroad rates, the burden of proof is on complainant. Perry v. Florida C. & P.

R. Co. (Com.), 3 I. C. R. 740.

(m) Where no discrimination is alleged as between points of production tributary to the same market, or on account of disproportionate rates on different kinds of traffic similar in character and volume, it must affirmatively appear that charges assailed as unreasonable are so and ought to be reduced. Lincoln Creamery v. Union P. R. Co. (Com.), 3 I. C. R. 794.

(ma) The burden is on a company making a departure from equal mileage rates, on different branches or divisions of a road, to show its rates to be reasonable when disputed. James v. Canadian P. R. Co., (Com.). 4 I. C. R. 274.

(n) The petitioner or complainant must in all cases prove the existence of facts alleged to be in violation of the act, unless the carrier complained of shall admit the same, or shall fail to answer the complaint. In case of failure to answer, the Commission will take such proof of charge as may be deemed reasonable and proper, and may make such order therein as the circumstances of the case may require. Duncan v. A. T. & S. F. R. Co., 4 I. C. C. 385, 388.

(o) The burden is upon the carrier in all cases where a departure from the rule of the law is proved, to show clearly that this departure is justified. It is not sufficient to raise a mere doubt. "Where the matter is not clear, the object and policy of the law should prevail." Missouri P. R. Co. v. Texas & P. R. Co., 31 Fed. Rep. 862, 4 Inters. Com. Rep. 434; Phillips, Bailey & Co. v. Louisville & Nashville R. Co., 8 I. C. C. 93, 108.

(p) A rate of 17½ cents on grain and grain products from Chicago to New York is not shown, as alleged by the carriers, to be unremunerative or disproportionate as compared with other rates. Whether tested by cost of movement, by what the carriers have voluntarily accepted in the past, or by comparison with rates on somewhat similar kinds of traffic, it is not unprofitable nor unreasonably low. It is from 2 to 5 cents—10 to 40 per cent—higher than the rates actually received in recent years, and nothing appears in the financial condition of the carriers to justify a greater advance. Re Proposed Advances in Freight Rates, 9 I. C. C. 382.

(q) That certain specific rates were too high, inadmissable under a general allegation that rates imposed from points without the State to a certain destination were unjust and unreasonable. Nobles Bros. Grocery Co. v. Ft. W. & D. C. R. Co., 12 I. C. C. 242.

(r) Neither the requirement that complainants must prove the issues raised by competent testimony, nor the requirement that they must make out a prima facie case sufficiently clear and strong to require the Commission in the public interest to enter upon an investigation of its own, is satisfied by a comparison, without any other showing, of the rates complained of, with rates between points in other and distant localities where different physical, competitive and traffic conditions exist. Dallas Freight Bureau v. M. K. & T. R. Co., 12 I. C. C. 427.

(ra) Under its rules and practice shippers have ample opportunity for personally laying their troubles before the Commission and thus showing the actual results of the rates complained of upon their business. Upon a complaint in which no person directly interested in such rates appeared as a witness and the only testimony offered was that of the secretary of a freight bureau having no personal knowledge of the effect of the rates upon the merchants dealing in the commodities involved and whose testimony is limited to a comparison of the rates attacked with rates on the same commodities for equal distances in other parts of the country, where the traffic is much more dense, the net revenues per mile greater, and where the other transportation conditions are entirely different: HELD, record discloses no sufficient basis for an order by the Commission, complaint dismissed. Dallas Freight Bureau v. M. K. & T. Ry. 12 I. C. C. 427, 432.

(s) A complaint should be supported by competent testimony. Poor Grain Co. v. C. B. & Q. Ry. Co., 12 I. C. C. 469.

(t) Where no person directly interested in the rates complained of appeared as witness, and the only testimony offered was that of the secretary of the freight bureau, who had no personal knowledge of the effect of the rates upon the merchants dealing in the commodity involved, and whose testimony was limited to a comparison of the rates attacked, with rates on the same commodity for equal distance in other parts of the country where the traffic is much more dense, the net revenues per mile greater, and

where the other transportation conditions are entirely different, no sufficient basis for an order is disclosed. Dallas Freight Bureau v. M. K. & T. R. Co., 12 I. C. C. 427.

IMPORTANT CASES SINCE 1908

(u) Where there is a conflict in testimony as to the date of a movement, the rate that was lawfully in effect, the route taken, the size of the car actually used, or the weight of the shipment, official records of the carrier may be resorted to in arriving at a correct conclusion; but where a shipper claims that he ordered a car of a certain size for a particular shipment and this is denied by the carrier, and it is not pretended that the order was in writing, the conflict can be resolved only by considering all the evidence and ascertaining on which side the preponderance of the testimony may lie. Wheeler Lumber, Bridge & Supply Co. v. S. P. Co., 16 I. C. C. 547, 548.

(v) Under the Act of 1910 the burden is on the carrier to prove the reasonableness of advanced rates. In Re Advances on Cattle and Sheep, 23 I. C. C. 7, 12; In Re Advances on Lemons, 23 I. C. C. 27, 28; In Re Investigation of Advances in Rates on Grain, 21 I. C. C. 22, 35; In Re Advances in Rates on Locomotives and Tenders, 21 I. C. C. 103, 111; In Re Investigation and Suspension Docket 24, 21 I. C. C. 546, 555; Ohio Allied Milk Product Shippers v. E. R. R. Co., 21 I. C. C. 522, 528; United States Leather Co. v. S. Ry. Co., 21 I. C. C. 323, 325; Victor Mfg. Co. v. S. Ry. Co., 21 I. C. C. 222, 226.

(w) A group of carriers cannot be pemitted to cast the responsibility of justifying a proposed increase in rates upon a single carrier and claim the benefit of the case made by such carrier, where several roads lead between two points, since the carriers might place the burden of upholding the burden of increase upon that railroad which could make the best showing, having the longest route, most incompetent management, the lowest volume of traffic and the greatest need of additional revenue. In Re Advances on Coal to Lake Ports, 22 I. C. C. 604, 611.

(x) An admission of unreasonableness relieves the carrier of the burden of justifying the advance. Wisconsin State Millers' Ass'n v. C. M. & St. P. Ry. Co., 23 I. C. C. 494, 495.

(y) The burden is on the complainant to show that a rate, reasonable when established, has become unreasonable. National Wool Growers' Ass'n v. O. S. L. R. R. Co., 25 I. C. C. 675, 678.

(z) The burden of proof to show the unreasonableness of rates establishtd prior to Jan. 1, 1910, is upon the shipper. Memphis Freight Bureau v. I. C. R. R. Co., 27 I. C. C. 507, 514.

(aa) And the fact complainants may proceed first at a hearing does not shift the burden of proof. Mixed Car Dealers Asso. v. D. L. & W. R. R. Co., 33 I. C. C. 133, 136.

(bb) Congress placed the burden of proof upon the carrier to justify the propriety of changes in regulations. Stopping Cars in Transit to Complete Loading, 36 I. C. C. 130, 132.

(cc) The burden of the proof is not sustained by reliance generally upon adherence to a comprehensive rate adjustment, at the same time ignoring important incidents and underlying bases of that adjustment. Lettuce from Texas Points, 36 I. C. C. 511, 513.

(dd) A bill of lading, expense bill, and a copy of an invoice purporting to cover shipment offered in evidence. defendants consented that information as to composition of shipment involved might be furnished in affidavits by officers or employees of complainant, to be filed subsequently to hearing. No affidavits filed and complaint dismissed. Marshalltown Buggy Co. v. Wabash R. R. Co., 39 I. C. C. 633, 634.

(ee) Where rates under attack are initial rates, and not increased rates, they do not come within the purview of section 15 as to the burden of justifying their reasonableness; because the tariff included joint rates with rail carriers the burden of proving the unreasonableness is not upon the Great Lakes Transit Corporation or upon the rail carriers concurring in such rates. Bay State Milling Co. v. G. L. T. Corp., 43 I. C. C. 338, 347.

(ff) The statute does not cast a burden upon a protestant to prove the unreasonableness of a proposed rate. Class rates to and from Delaware division stations, 81 I. C. C. 758, 761.

(ffa) In the event that the unreasonableness of the rates charged is established the extent to which they were unreasonable is a question to be decided not from the pleadings but from the evi-

dence. Omaha Steel Works v. A. T. & S. F. R. Co., 87 I. C. C. 403, 405.

(gg) The weight to be given to evidence on the question of reasonableness of rates is a matter peculiarly within the province of the Commission as a body expert on the complexities, intricacies and history of rate-making. I. C. C. v. L. & N. R. R. Co., 33 Sup. Ct. 185, 189; 227 U. S. 88.

C. 438, 440; Grain via Indianapolis from T., St. L. & W. Stations, 59 I. C. C. 733; Carney v. Director General, as Agent, 68 I. C. C. 199, 200.

II. CIRCUMSTANCES AND CONDITIONS OF PROBATIVE VALUE

§1½. In General.

See Advanced Rates §18; Blanket Rates §18; Divisions §7; Equalization of Rates II; Long and Short Hauls §12 (2); Procedure Before Commission VII, VIII; Reasonableness of Rates II; Reparation III.

CASES 1887-1908

(a) A variety of practical considerations must enter into the making of freight rates by a railroad company, and determine to a great extent in every instance the question whether such rates are reasonable or not. Railroad Companies cannot be required to make freight rates upon mere theories or conjectures. Evans v. Oregon Railway & Navigation Co., 1 I. C. R. 641, 646.

(b) Rates established by a common carrier under the influence of a desire to keep upon its line a material for which the road itself has use, or to keep the price thereof low for its advantage, can not be justified. Reynolds v. Western N. Y. & Pa. R. Co., 1 I. C. R. 685.

(ba) The spirit and purpose of the Act requires that when the circumstances and conditions will fairly admit of it the charges to all points for a like service should be made relatively equal. Crews, Danville Chamber of Commerce v. R. & D. R. R. Co., 1 I. C. C. 703, 707.

(c) The length and character of the haul, the cost of the service, the volume of the business, and the conditions of competition, etc., are elements bearing upon such charges. Boston Chamber of Commerce v. Lake Shore & M. S. R. Co., 1 I. C. R. 754.

(d) The fact that a difference is made upon St. Louis and Mississippi business only, as the same is directed either to Omaha or to Lincoln, and not upon other business originating at other portions of the defendant's system, is significant that the real reason for the difference made in the St. Louis traffic is not because Lincoln is situated upon a branch line. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. R. 98.

(e) The true reason why the rates from St. Louis to Lincoln are higher than the rates from St. Louis to Omaha is that the rates from Chicago are also higher by precisely the same figures, uniform working rates between the two sections having by agreement been carried out by all lines. Lincoln Board of Trade v. Missouri Pac. R. Co., 2 I. C. R. 98.

(ea) Low rates to one place may not be just if still lower rates are given to another. Re Chicago, St. P. & K. C. R. Co. (Com.) 2 I. C. R. 137.

(f) To correctly estimate the causes influencing the movement of cotton and the falling off in the proportion of the crop received at New Orleans in recent years, the rail lines of transportation constructed, improved methods and new conditions must be taken into account. New Orleans Cotton Evchange v. Cincinnati, N. O. & T. P. R. Co., 2 I. C. R. 289.

(g) Where reasonableness of freight rates on oil in car load lots is charged on short local hauls, for example, from Titusville, Pa., to Buffalo, N. Y., and the charge is attempted to be sustained on a comparison of these rates with rates on what is usually an inferior grade of oil transported from Titusville through Buffalo to Perth Amboy, N. J., for export, chiefly in the cars of another company, and it appears that upon such shipments destined to Buffalo there are expensive terminal charges, while upon such shipments to Perth Amboy these terminal charges are far less considerable, the circumstances and conditions which control the making of the rates in each instance are substantially dissimilar. Rice, Robinson & Witherop v. Western New York & Pa. R. Co., 2 I. C. R. 298.

(h) The general rule contemplated by the Statute of equitably graduated charges on like traffic with reasonable reference to the amount of service, is just in itself, and commonly most beneficial both to the carriers and to the public, and is only to be departed from when justified by exceptional conditions, and in such instances no longer than the conditions require. Lehmann Higginson & Co. v. Southern Pacific Co., 3 I. C. R. 80.

(i) It is sufficient to entitle testimony to admission, that there is some evidence of facts, direct or circumstantial, tending to make it competent. Clevland, C. C. & I. R. Co. v. Closser (Ind.), 3 I. C. R. 387.

(j) The statute contemplates and clearly provides for dissimilar conditions that may effect the making of rates by carriers, and in a proper case of that nature it is no less the duty of public tribunals to recognize dissimilarities that justify exceptional rates than to apply the general principles of the law. Kauffman Milling Co. v. M. P. R. R. Co., 3 I. C. C. 400, 408.

(k) Contracts and tariffs filed with the Commission under section six of the Act may be considered, although not specifically introduced in evidence on the hearing. Boston Fruit & Produce Exchange v. New York & N. E. R. Co., 3 I. C. R. 493.

(l) Violation by one carrier of principles laid down in a case as governing relative rates on competitive articles does not justify similar violations by its competitors. Squire & Co. v. Mich. Central R. Co., 3 I. C. R. 515.

(m) Rulings based upon special facts and local conditions are not to be regarded as formulated precepts for general observance. A regulation which promotes fairness and relative equality where the carriage of oil is confined to tank and barrel shipments might be an unjust and oppressive requirement where four-fifths of the transportation is ef-

fected by another mode. Rice v. Cinn. W. & B. R. Co., 3 I. C. R. 841.

(n) A railroad ought not to neglect any traffic of a kind that will increase its receipts more than its expenses; and long haul traffic which can only be had on these terms may sometimes be taken without wronging anyone, when, to carry all traffic or even the major part of it, at the like rates, would be simply ruinous. Raworth v. N. P. R. Co., 3 I. C. C. 857, 864.

(o) Power of concentrated business interests to force concessions in transportation rates which operate to the disadvantage of the general public is not favored. Brownell v. C. & C. M. R. Co., 4 I. C. C. 285, 292.

(p) A carrier is not free to make dissimilarities to any extent it may choose in the freight rates on foreign and domestic traffic, from the fact of the existence of some dissimilarity of conditions. Interstate Commerce Commission v. Texas & P. R. Co. (C. C. App. 2d C.), 4 I. C. R. 408.

(q) No departure from the rule requiring rates in all cases to be reasonable in themselves can be justified on the ground that it is necessary in order to maintain existing trade relations, or to "protect competing markets," or to "equalize commercial conditions," or to secure to carriers traffic from certain territory assumed to be exclusively theirs. Cincinnati Freight Bureau c. Cincinnati, N. O. & T. P. R. Co. (Com.), 4 I. C. R. 592.

(r) The legitimate interests of carrying companies, as well as of traders and shippers, should be considered in determining the lawfulness of rates under the act of Congress to regulate commerce. Texas & P. R. Co. v. Interstate Commerce Commission (U. S. Sup.), 5 I. C. R. 405.

(s) It is impossible to exercise a jurisdiction, such as is conferred by the Act to Regulate Commerce, by any process of mere mathematics or arithmetical calculation. When you have a variety of circumstances differing in the two cases, you cannot say that such a difference of circumstances represents or is equivalent to such a fraction of a penny difference of charge in the one case as compared with the other. A much broader view must be taken, and it would be hopeless to seek to decide a case by any attempted calculation. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(t) Whatever would be regarded by common carriers, apart from the operation of the statute, as matters which warranted differences in charges, ought to be considered in forming a judgement whether such differences were or were not unjust. Some charges might be unjust to shippers—others might be unjust to the carriers. The rights and interests of both must be regarded. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(u) All circumstances and conditions which reasonable men would regard as affecting the welfare of the carrying companies and of the producers, shippers, and consumers, should be considered by a tribunal appointed to carry into effect the provisions of the act. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R., 685.

(v) The practice of making one rate on the same product over a large district is only justifiable under special and exceptional circumstances and is not to be encouraged when the difference in the transportation expense from the various parts of such district is considerable and substantial. A. S. Newland v. Northern Pacific R. R. Co., et al, 6 I. C. C. 131.

(w) It is for the interest of the carriers as well as the public that their rates be low enough, if not below a remunerative point, to promote the general movement and distribution of low class commodities, including iron and steel which are in general demand for construction, building, manufacturing, and other purposes; and rates on steel rails and other commodities recognized as among the lowest classes of freight, which yield per-ton per-mile the average received by the carriers on all freight would be unjust. The value of the goods, the cost of the service, the degree of risk to the carrier, among other considerations, have important bearing upon the relation of rates on different kinds of traffic, as well as the reasonableness of a rate on a specified article. Colorado Fuel & Iron Co. v. Southern Pacific Co., 6 I. C. C. 488, 515.

(x) Excess of manufacturing cost to a complainant at one point over that of its competitors in other localities, by reason of inferior raw material and fuel, condition of its plant, cost of labor or other like causes, is not to be considered in ascertaining the rightful rela-

tive adjustment of rates from such places, nor does the magnitude of a complainant's enterprise, the number of persons for whom it provides employment and support, the developing results of its business upon the natural resources of a state, the impracticability of moving its plant to other localities, or the fact that it produces material largely used on railroads for construction or repair, entitle such complainant to different consideration in respect of just rates than individuals and small concerns should receive; but such facts demonstrate the far reaching extent to which serious injury may be effected, directly and indirectly, by methods and practices which the statute was designed to prohibit. Colorado Fuel & Iron Co. v. Southern Pacific Co., 6 I. C. C. 488.

(yz) The magnitude of a shipper's enterprise, the number of persons for whom it produces employment and support, the developing results of its business upon the natural resources of the state, the impracticability of moving its plant to other localities and the fact that it produces material largely used on railroads for construction or repair do not entitle it to different consideration in respect to rates than individuals and small concerns should receive. Colorado Fuel & Iron Co. v. Southern P. Co., 6 I. C. C. 488.

(aa) Whether an agreement entered into by a carrier mainly for the purpose of developing its milk traffic, and under which compensation is afforded to the other contracting party equal to a considerable share of the gross receipts from such traffic, involves extravagant expenditure of revenue and is disadvantageous to the carrier, is a matter for it to determine; but extraordinary or unnecessary cost of operation or management can not be permitted to excuse unreasonable or unjust rates, discriminations, preferences or prejudices. Milk Producers' Protective Asso. v. D. L. & W. R. Co., 7 I. C. C. 92, 164.

(bb) The reasonableness of the rate in a given case depends on the facts, and the function of the Commission is to consider the facts and give them their proper weight. Cary v. Eureka Springs R. Co., 7 I. C. C. 286, 320.

(cc) Although carriers serving but one of two competing cities may, by reducing their rates to the city served by them, prevent the correction of an unjust relation of rates to the two places from common points of supply, nevertheless it is the duty of the Commission to condemn such a relation of charges, and to indicate the basis upon which the rates should be readjusted. Chamber of Commerce v. Chicago, M. & St. P. R. Co., 7 I. C. C. 481.

(dd) Discrimination in favor of a large customer not authorized.—The Interstate Commerce Law does not authorize discrimination in favor of a larger road or better customer. Augusta Southern Ry. Co. v. Wrightsville & Tennille Ry. Co., 7 I. C. C. app. XXXVIII.

(ee) "Whether the circumstances and conditions of carriage have been substantially similar or otherwise are questions of fact depending on the matters proved in each case." Interstate Commerce Commission v. Alabama Midland R. Co. 168 U. S. 170, 42 L. ed. 424; Missouri P. R. Co. v. Texas & P. R. Co. 31 Fed. Rep. 862, 4 Inters. Com. Rep. 434; Phillips, Bailey & Co. v. Louisville & Nashville R. Co., 8 I. C. C. 93.

(ff) If a carrier can profitably make a low rate for the purpose of obtaining traffic in existence which would otherwise pass over a competing line, then it may profitably, under some circumstances, make a low rate for the purpose of bringing into existence traffic which would not otherwise pass over any line. Grain Shippers' Asso. v. Illinois Central R. Co., 8 I. C. C. 158.

(gg) In the absence of some justifying reason it would not be right for American railroads to permanently transact business for foreigners at a less rate than that for which they render a corresponding service to American citizens. Re Export Rate and Domestic Rates on Grain, 8 I. C. C. 214.

(hh) A rate can seldom be considered in and of itself. It must be taken almost invariably in relation to and in connection with other rates, for the freight rates of this country, both upon different commodities and between different localities, are largely interdependent, and it is because they do not bear a proper relation to one another, rather than that they are absolutely either too low or too high, which most often gives occasion for complaint. Geo. Tileston Mill Co. v. N. P. R. R. Co., 8 I. C. C. 346, 361.

(ii) The rate on sugar may properly

be higher from San Francisco to Denver than to the Missouri River, it being found that the circumstances and conditions governing the traffic are different when it is carried to Missouri river points than when it stops at Denver. Kindel v. Atchison, T. & S. F. R. Co., 8 I. C. C. 608.

(jj) A coal operator is not damaged by the failure of a railroad company to establish a rate upon a class of coal not produced at his mine. McGrew v. Missouri P. R. Co, 8 I. C. C. 630.

(kk) It is the duty of the Commission to consider all circumstances and conditions that reasonably apply to the situation, the legitimate interests of the carrying companies as well as those of traders and shippers and the welfare of the communities at localities where the goods are delivered as well as that of communities in the place of shipment, and to give effect to this rule a much broader view must be taken than that of the competition of carriers alone. Mayor and Council of Tifton, Ga., v. L. & N. R. R., 9 I. C. C. 160, 179.

(ll) It is not the policy of the Government in the regulation of railways under the Act to require them to carry on the transportation business at a loss, but that they shall be fairly dealt with, and, having due regard to public as well as private interests, they shall rather derive a reasonable profit from their operations. Johnson v. C., St. P., M. & O. R. Co., 9 I. C. C. 221, 243.

(mm) It is not shown that the rate of 17½ cents on grain and grain products from Chicago to New York is unremunerative or disproportionate as compared with other rates; and whether tested by the cost of movement, by what the carriers have voluntarily accepted in the past, or by comparison with rates on somewhat similar kinds of traffic, it is not shown to be unprofitable or unreasonably low. It is 10 to 40 per cent higher than the rates actually received in recent years, and nothing appears from the financial condition of the carriers to justfy a greater advance. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

(nn) Carriers are entitled to charge a reasonable compensation for their services. Except in unusual cases no rate is reasonable which does not yield a fair profit upon the transaction. Re Proposed Advances in Freight Rates, 9 I. C. C. 382, 395.

(oo) The reasons existing for lower lumber rates from the southern pineries do not apply to the reshipment of dressed lumber from Dalton. Farrar v. Southern R. Co., 11 I. C. C. 632.

(pp) A railroad company is entitled to a fair return upon the value of that which it employs for the public convenience. Brabham v. Atlantic Coast Line R. Co., 11 I. C. C. 464.

(qq) Rates on refined oil from Erie, and other oil shipping points in Kansas, to Joplin, St. Louis, and Kansas City held to be apparently adjusted with a view of placing the shippers on an equitable basis and affording them equal opportunities in the markets. Wilhoit v. M. K. & T. Ry. Co., 12 I. C. C. 138.

(qqa) Absorption of a competing line of railway by another in alleged violation of State statutes, is a matter within the control of the State courts, and can be considered by the Commission only in its ultimate result of inducing unreasonable rates. Warren Mfg. Co. v. Southern Ry. Co. 12 I. C. C. 381.

IMPORTANT CASES SINCE 1908

(rr) It is a maxim of rate making that the rate should be such, if possible, as to move the traffic. Minneapolis Civic & Commerce Asso. v. C. M. & St. P. Ry. Co., 30 I. C .C. 663, 671.

(ss) To sum up, each case before the Commission stands upon its own facts. Allentown Portland Cement Co. v. P. & R. Ry. Co., 31 I. C. C. 277, 280.

(tt) In fixing new rates or in considering those already established the Commission usually adheres to the plan of rate making followed by the carriers. Colonial Salt Co. v. C. B. & Q. R. R. Co., 31 I. C. C. 559, 568.

(uu) Where the complaint puts in issue the charges applicable to through shipments, the evidence is not objectionable as insufficient merely because limited to one factor of the through charge. LaCrosse Shippers' Ass'n. v. C. M. & St. P. Ry., 43 I. C. C. 605, 607.

(vv) Advantage of location, competitive conditions, volume and flow of traffic, and other considerations must be given weight in determining the adjustment of rates into and out of different jobbing points. Wichita Wholesale Fur-

niture Co. v. A., T. & S. F. Ry., 44 I. C. C. 339, 344.

(ww) It does not necessarily follow that one who ships a particular commodity over the lines of a proprietary common carrier procures the transportation for the exact cost of service. The Alaska Investigation, 44 I. C. C. 680, 704.

(xx) The Commission is not unmindful of the fundamental and immensely valuable service which the carriers perform in times of peace and even more in times of war. Successful operation of the railways is vital to our national welfare. The Fifteen Per Cent Case, 45 I. C. C. 303, 312.

(yy) Railroads have been managed by men of conspicuous ability and integrity, in whose achievement the whole nation may well take pride. The Fifteen Per Cent Case, 45 I. C. C. 303, 313.

(zz) A case dealing with a general advance of rates is dealt with from an economic standpoint rather than legal. The Fifteen Per Cent Case, 45 I. C. C. 303, 317.

(3a) Traffic traversing three sides of a square considered a waste of transportation. New Orleans Cotton Exchange v. L. & N. R. R., 46 I. C. C. 712, 751.

(3b) Strict adherence to the rules of evidence is not required in proceedings before the Commission, and while some evidence introduced may later be cast aside as hearsay, the Commission may make such finding and take such action with respect to the rates on a commodity as the whole record and general considerations appear to warrant. Western Trunk Lines Iron & Steel, 47 I. C. C. 109, 122.

(3c) Most rates were made with a view to including remuneration to the carriers not only for the line haul, but for the ordinary terminal services at point of origin and at destination. N. Y. Harbor Case, 47 I. C. C. 643, 708.

(3d) It is necessary to examine and compare the circumstances and conditions surrounding transportation to competing points, wherever situated, provided the same carriers perform, or participate in, the transportation service, and to determine if possible whether or not these differences are properly measured by the difference in rates. Traffic Bureau of Knoxville, Tenn. v. B. & O. R. R., 49 I. C. C. 205, 217.

(3e) In the determination and fixation of rates, the Commission may not legitimately consider facts antecedent to transportation. Eastbound Transcontinental Canned Goods (No. 2), 50 I. C. C. 62, 66.

(3f) No function of the Commission to determine whether or not manner of conducting business at a particular point is economically sound, nor to base the exercise of its authority over defendants in the slightest degree in respect of that subject. United States v. S. V. Ry. Co., 53 I. C. C. 607, 615.

(3g) It is the duty of the carriers to afford equal opportunity to all who desire to employ their services and the fact that the towns represented by the complainant are small and not well equipped to care for these particular commodities does not relieve them of that duty. Arkansas Jobbers & Mfgrs. Assn. v. Director General, 57 I. C. C. 231, 236.

(3h) In the administration of section 15a, it becomes necessary to determine the aggregate value of the railway property defined in that section, and in making this determination the Commission is authorized to utilize the results of its investigation under section 19a but is required to give to the property investment account only that consideration which under such law, it is entitled to in establishing values for rate-making purposes. Increased Rates, 1920, 58 I. C. C. 220, 228.

(3i) In estimating their financial needs for the immediate future, carriers based their figures on actual performance for the 12 month period ended October 31, 1919, compiled from questionnaires sent to carriers in the various groups. Data not accepted as accurate as it was hastily obtained and inadequate, with neither assurance that it was compiled on a uniform basis nor with proof that it is accurate. Increased Rates, 1920, 58 I. C. C. 220, 230.

(3j) Judicial bodies with unanimity hold that evidence offered and admitted for a limited purpose, and facts found upon such evidence, may not be used for another and different purpose in the case, and that the scope of the offer can not therefore be extended beyond the limits placed by the proponent. It is manifest any other rule would result in surprise and injustice. Schlicher v. Director General, 62 I. C. C 181, 185.

(3k) In exercising the power to prescribe just and reasonable rates as provided under section 1 of the act, the Commission is now required by section 15a to initiate, modify, establish, or adjust rates so that carriers as a whole or in designated rate groups, will, under proper standards of operation, earn an aggregate annual net railway operating income, equal, as nearly as may be, to a fair return upon the aggregate value of the railway property of such carriers held for and used in the service of transportation. Rates on Grain Grain Products and Hay, 64 I. C. C. 85, 98.

(3l) The duty cast upon the Commission by section 15a is continuing and looks to the future. It does not constitue a guaranty to the carriers, nor is the obligation cumulative. The Commission is not restricted by past or present statistics of operation and earnings. These are serviceable only as they illuminate the future. What is contemplated by the law is that in this exercise of rate-making power the result shall reflect the Commission's best judgement as to the basis which may reasonably be expected for the future to yield the prescribed return. Rates on Grain, Grain Products and Hay, 64 I. C. C. 85, 99.

(3m) Where two commodities, admittedly noncompetitive, have long ceased to bear any common or recognized relationship, and where the basic rates upon both show no appreciable difference in stability or duration, the presumption that the rates applicable to one of the two fixes a reasonable maximum standard for the other is not convincing. Slater v. S. P. Co., 64 I. C. C. 647, 652.

(3n) If the Commission were to start with a clean slate, some so-called scientific basis of rate making based on strict mileages, might be adopted, but, as it is, the process of rate making and dealing with rate situations must necessarily be one of evolution, not revolution. Kansas Rates, Fares and Charges, 64 I C. C. 679, 681.

(3o) Thriving communities, all in the same general section of the country, striving for population, industry, and business growth, may not need elaborate evidence to show that they are entitled to relief if the rates are not properly related. Pioneer Lumber Co. v. Director General, 64 I. C. C. 485, 489.

(3p) The Commission has held that the manner in which rates are constructed is but one of the elements to be considered in reaching proper conclusions. Madison Lumber & Mill Co. v. Director General, 64 I. C. C. 699, 700.

(3q) A particular element, if considered alone, might appear to warrant a higher or lower rating on an article than would be justified if all proper elements are taken into consideration. Traffic Bureau of Nashville v. L. & N. R. R., 68 I. C. C. 623, 626.

(3r) To preclude any misapprehension it should be stated that the Commission does not sanction by implication any reversion to the type of rate making known as the equalization of freight assembly costs of raw material. Trunk Line and Ex Lake iron ore rates 69 I. C. C. 589, 601.

(3s) Deliveries of coal to piers for unloading into vessels and deliveries of coal to industries or team tracks within a terminal district found to be two classes of movements not made" under substantially similar circumstances and conditions" of carriage. Rates on Bunker Coal, 73 I. C. C. 62, 75.

(3t) Considering the congested conditions in and around Chicago, Ill., a rate of 70 cents per ton, or 3.5 cents per 100 pounds, can scarcely be denominated a high rate even on a low grade commodity and for comparatively short distances. Illinois Brick Co. v. Director General, as Agent, 73 I. C. C. 215, 217.

(3u) Where complainants have been before the Commission and been given an opportunity to prove their allegations among which is that of unreasonableness, the finding with respect thereto must necessarily be based on the record as made. Goss v. Director General, 73 I. C. C. 649, 653.

(3v) The interest that a dock company, as lessor and creditor, may have in the prosperity of a railroad, does not, and can not, interfere with the rights to which the railroad is entitled as a common carrier subject to the act. New-York Dock Ry. v. B. & O. R. R. Co., 73 I. C. C. 656, 659.

(3w) Rates cannot be condemned upon the mere showing that the carriers failed to comply with the instructions of the Director General. Atlas Portland Cement Co. v. Director General, 74 I. C. C., 653.

(3x) Proposed increased charges

found not justified where no one appeared at the hearing for respondent and no evidence was offered in support thereof. Absorption of Charges between Croxton and Jersey City, 74 I. C. C. 329.

(3y) The Commission can not sanction any attempts to attain a desired end by employing piecemeal methods which work to the advantage of one market at the expense of another. Proportional Rates on Grain and Grain Products, 74 I. C. C. 341, 343.

(3z) In distributing commodities in competitive territory, the point that can avail itself of a long c. l. haul and a short l. c. l. haul is ordinarily entitled to a lower total transportation charge than the point using a short c. l. haul and a long l. c. l. haul. Certain-Teed Products Corp. v. A., T. & S. F. Ry. Co., 77 I. C. C. 444, 445, 446.

(4a) Comparative rates are made by the carriers, or reviewed by the Commission, from the standpoint alone of transportation conditions. Anaconda Copper Mining Co. v. Director General, 78 I. C. C. 549, 552.

(4ab) The commission recognizes commercial conditions in dealing with existing groups, and if such conditions may be considered as reasons for continuing a group they may be considered in creation of a group. If the commission may not create a group which, if already created, it could sanction, general similarity of conditions in the two instances would be counteracted by tactical and artificial advantage which existing group would have by virtue alone of its having been voluntarily created and maintained by carriers. Anaconda Copper Mining Co. v. Director General, as Agent, 78 I. C. C. 549, 552.

(4ac) Contention that decisions of the United States Supreme Court make it mandatory upon commission to fix rates at amounts which will not exceed operating costs and a reasonable return upon value of property and that therefore cost of service must be test of reasonableness of rates on traffic earning more than prescribed return, not sustained. Neither directly nor by implication do those cases lay down principle that rates must be fixed at amounts to yield not more than a stated percentage of value of carrier's property used in transporting a particular class of traffic. On the contrary, such doctrine is distinctly disapproved in 236 U. S., 585, and in cases of this character the commission has never followed cost of service principle exclusively. Adriatic Mining Co. v. C. & N. W. Ry. Co., 78 I. C. C., 611, 631, 632.

(4b) A rate can seldom be considered in and of itself. It must be taken almost invariably in relation to and in connection with other rates. Tileston Mill Co. v. N. P. Ry. Co., 8 I. C. C. 346, 361. Atchison Board of Trade v. A., T. & S. F. Ry. Co., 80 I. C. C. 360.

(4c) The absence of a request for a reduction in the rate at or prior to the time of movement is immaterial if the rate charged was, in fact, unreasonable. Spencer Kellogg & Sons v. Director General, 80 I. C. C. 377, 379.

§2 Advantage of Location.

See Blanket Rates §7; Discrimination §9; Equalization of Rates §3; Reasonableness of Rates §19.

CASES 1887-1908

(a) An advantage given to a competing town on a main line must not be unreasonable. Raymond v. Chicago, M. & St. P. R. Co., 1 I. C. R. 627.

(b) Trade centers, or large commercial towns are not, as a matter of right entitled to have more favorable rates than the smaller towns for which they form distributing centers; and if carriers shall give to such smaller towns rates as favorable as to the larger, the Commission will not interfere. Martin v. Chicago, Burlington & Quincy R. Co., 2 I. C. R. 32.

(ba) Trade centers, or large commercial towns, are not, as a matter of right, entitled to have more favorable rates than the smaller towns for which they form distributing centers; and if carriers shall give to such smaller towns rates as favorable as to the larger, the Commission will not interfere. The fact that under rates which are impartially arranged between large and small towns one large distributing center may have an advantage over another in competition for the business of the small towns, does not make out a case of undue preference in favor of the one distributing center as against the other. Freight Bureau of Omaha Board of Trade v. C. B. & Q. R. R., 2 I. C. C. 32, 37.

(c) Where a reduced rate is made at the terminus of a through route, under the compusion of competition, a town not located on the line of the through route, but reached over a lateral connecting road, has a disadvantage of situation entailing some additional expense, and a reasonably higher rate to such town than the forced competitive rate to the more distant terminus of the through route is not unjust discrimination. Lehmann, Higginson & Co. v. Southern Pacific Co., 3 I. C. R. 80.

(d) Charges for transportation service should have reasonable relation to cost of production and to the value of the service to the producer and shipper, but should not be so low on any as to impose a burden on other traffic. Re Rates and Charges on Food Products (Com.), 3 I. C. R. 93.

(e) In the carriage of great staples, rates yielding only moderate profit to the carrier are both necessary and justifiable. Re Rates & Charges on Food Products (Com.), 3 I. C. R. 93.

(ea) It is not the province of the Commission, by the fixing of rates, to overcome the advantages which one producer or dealer may derive from his geographical location. Squire & Co. v. M. C. R. Co., 3 I. C. C. 515, 522.

(f) On complaints of relatively unreasonable and discriminating rates on salt from Kansas fields to various points as compared with rates to the same points from the salt fields of Michigan, HELD, That any advantages which inure to Michigan salt manufacturers in rates to points in Iowa, Illinois, Missouri and Nebraska are advantages arising from natural situation, and that the low rate to Missouri river points is influenced by conditions which are beyond the defendant's control and existed before Kansas salt was discovered. HELD, further, That rates on salt to points south and southwest of Hutchinson, Kansas, and St. Louis, Missouri, do constitute undue preference in favor of Michigan as against Kansas salt, and that they should be readjusted by the Santa Fe company so that, while observing the law as to the long and short haul, the advantages of distance belonging to Kansas salt fields shall be given to them in any territory supplied by its lines which lies as near or nearer to Hutchinson than St. Louis. Anthony Salt Co. v. Missouri Pacific R. Co., 4 I. C. R. 33.

(g) Any advantages which inure to Michigan salt manufacturers as against those of Kansas, in rates to points in Iowa, Illinois, Missouri, and Nebraska, are advantages arising from natural situation; and a low rate to Missouri River points is influenced by water competition and also by the heavy preponderance of east-bound freight over west-

bound freight. Anthony Salt Co. v. Missouri P. R. Co. (Com.), 4 I. C. R. 33.

(h) The advantages of distance belonging to Kansas salt fields as against those of Michigan should be given to them by a carrier in any territory supplied by its lines, which lies as near, or nearer to Hutchinson as to St. Louis. Anthony Salt Co. v. Missouri P. R. Co., (Com.), 4 I. C. R. 33.

(i) That rates should be fixed in inverse proportion to the natural advantages of competing towns with the view of equalizing "commercial conditions," as they are sometimes described, is a proposition unsupported by law and quite at variance with every consideration of justice. Each community is entitled to the benefits arising from its location and natural conditions, and the exaction of charges unreasonable in themselves or relatively unjust, by which those benefits are neutralized or impaired, contravenes alike the provisions and the policy of the statute. Eau Claire Board of Trade v. Chicago, M. & St. P. R. Co., 4 I. C. R. 65.

(jk) An advantage, resulting from just rates coupled with the enterprise and outlay necessary to utilize them, is legitimate, and carriers should not undertake to deprive a shipper of this advantage by a change of such rates. Patter Manufacturing Co. v. Chicago & G. T. R. Co., 4 I. C. R. 223.

(l) A milling town possessing great natural, acquired and improved advantages for the carrying on of that industry, and favorably situated in point of distance to a large grain producing region, is entitled to the benefits arising from its location and carriers of grain to that point and to a competing town considerably more remote from points of production, and in other particulars less advantageously located, are not justified in making rates on grain to the competing towns which destroy the advantage the former is entitled to enjoy. Chamber of Commerce of Minneapolis v. Great Northern R. Co., 4 I. C. R. 230.

(m) A town favorably situated with respect to one through route, but competing in a common market with another town more favorably located on another through route, should not have a reduction of the local rate over roads connecting the two through routes for the purpose of overcoming the natural advantage which the latter competing town enjoys. Minneapolis Chamber of Commerce v. Great Northern R. Co., (Com.), 4 I. C. R. 230.

(n) Manufacturing industries should not be deprived, through a carrier's adjustment of relative rates, of advantages resulting from their favorable location in respect of cost of raw material supplied from a common source, or of distance to the common market for the finished product. James v. Canadian P. R. Co. (Com.), 4 I. C. R. 274.

(o) The advantageous position of one trader in having his works so placed that he has two competing routes is as much a circumstance to be taken into consideration as the geographical position of another trader who, though he has not the advantage of competition, is situated at a point on the line geographically nearer the market. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R. 656.

(p) The same rate over a district so extensive denies to the producer nearer the market the advantages of his location, for which he receives no compensation in the fact that such rate was established to enable a railroad company to sell its lands more distant from markets at better prices. A. S. Newland v. Northern Pacific R. R. Co., et al., 6 I. C. C. 131.

(q) Carriers have no right to disregard distance and natural advantages for the purpose of bringing about commercial equality. Commercial Club of Omaha v. Chicago, R. I. & P. Ry. Co., 6 I. C. C. 647.

(r) Council Bluffs, on the east bank of the Missouri River, is more favorably situated than Omaha, on the west side of that river, in regard to traffic with points in Iowa, and the defendant carriers are not to be condemned for recognizing such natural advantage of location in adjusting their charges; nor does it follow that rates should be the same from Omaha and Council Bluffs into Iowa because they are the same from those cities into Nebraska. Commercial Club of Omaha v. Chicago & N. R. Co., 7 I. C. C. 386.

(s) A carrier has no right to deprive a community of the competitive advantages which the enterprise of its citizens has secured, and upon the strength

of which business conditions have grown up. Danville v. Southern R. Co., 8 I. C. C. 409.

(t) Government should not attempt to make commercial advantages of places equal.—Government should not undertake the impossible but injurious task of making the commercial advantages of one place equal to those of another. It might as well attempt to equalize the intellectual powers of its people. Interstate Commerce Commission v. Western & Atlantic R. R. Co., 8 I. C. C. App. XIII.

(u) No attempt should be made to deprive a place of its natural advantages —There should be no attempt to deprive a community of its natural advantages, or those legitimate rewards which flow from large investments, business industries, and competing systems of transportation to facilitate and increase commerce. The Act to Regulate Commerce has no such purpose. Citing: Brewer v. Central of Georgia R. Co., 84 Fed. Rep. 258. Interstate Commerce Commission v. Western & Atlantic R. R. Co., 8 I. C. C. App. XIII.

(v) Carriers may recognize natural advantages but ordinarily they must not create artificial advantages. Holdzkum v. M. C. R. Co., 9 I. C. C. 42, 54.

(w) The favorable location of Cannon Falls with reference to Minneapolis and Duluth, and the competitive advantage to which the Cannon Falls dealer is entitled by reason of the route via Duluth, are neutralized to an extent by manipulation of billing at Minneapolis, whereby Cannon Falls grain sold in Minneapolis can be reconsigned to Duluth under a substituted billing and the balance of a through rate, resulting in a less total charge on a through shipment from Cannon Falls to Duluth than the charge on a through shipment from Cannon Falls to Duluth. Cannon Falls Farmers' Elevator Co. v. Chicago G. W. R. Co., 10 I. C. C. 650.

(x) Moultrie, Ga., entitled to be considered as a trade center. Southern Grocery Co. v. Northern Ry. Co., 12 I. C. C. 229.

(y) Railroad has no right to destroy advantages of location. Howard Mills Co. v. Mo. Pac. Ry. Co., 12 I. C. C. 258.

(z) Trade centers grown up with Texas system. Dallas Freight Bureau v. M. K. & T. Ry. Co., 12 I. C. C. 427.

(aa) Natural advantages of location are neither to be enlarged nor minimized by the Commission, whose duty and purpose is to secure just and reasonable transportation rates, as nearly equal as possible for all localities and individuals, having due regard to differences in circumstances and conditions. Enterprise Manufacturing Co. et al. v. Ga. R. R. Co., 12 I. C. C. 451.

IMPORTANT CASES SINCE 1908

(bb) Carriers are not required by law to equalize natural advantages, such as location, cost of production, and the like. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 293.

(cc) Every city is entitled to the commercial advantages of its location. Quimby v. Maine Central R. R. Co., 13 I. C. C. 246, 248; Burnham, Hanna, Munger Co. v. C. R. I. & P. Ry. Co., 14 I. C. C. 299, 303; Kindel v. N. Y. N. H. & H. R. R. Co., 15 I. C. C. 555, 561; Kansas City Transportation Bureau v. A. T. & S. F. Ry. Co., 15 I C. C. 491,498; City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 419; Black Mountain Coal Land Co. v. So. Ry. Co., 15 I. C. C. 286, 293; Hafey v. St. L. & S. F. R. R. Co., 15 I. C. C. 245, 246; Chicago Lumber & Coal Co. v. T. S. Ry. Co., 16 I. C. C. 323, 331; Board of Trade of Winston-Salem v. N. & W. Ry. Co., 16 I. C. C. 12, 16; Florida Fruit & Vegetable Assn. v. A. C. L. R. R. Co., 17 I. C. C. 552, 561; Saginaw Board of Trade v. Grand Trunk Ry. Co., 17 I. C. C. 128, 135; Acme Cement Plaster Co. v. L. S. & M. Ry. Co., 17 I. C. C. 30 ,33; Colorado Coal Traffic Assn. v. C. & S. Ry. Co., 18 I. C. C. 572, 576; Ponchatoula Farmers' Assn. v. I. C. R. R. Co., 19 I. C. C. 513, 516; Corporation Commission of North Carolina v. N. & W. Ry. Co., 19 I. C. C. 303, 309; National Refining Co. v. C. C. C. & St. L. Ry. Co., 20 I. C. C. 649; Truck Growers Assn. v. A. C. L. R. R. Co., 20 I. C. C. 190; East St. Louis Cotton Oil Co. v. St. L. & S. F. R. R. Co., 20 I. C. C. 37, 41; Sinclair & Co. v. C. M. & St. P. Ry. Co., 21 I. C. C. 490, 507, 508; Boileau v. P. & L. E. R. R. Co., 22 I. C. C. 640, 654; In Re Advances on Coal to Lake Ports, 22 I. C. C. 604, 613; In Re Investigation of Rates on Meats, 22 I. C. C. 160, 163; Elk Cement and Lime Co. v. B. & O. R. R. Co., 22 I. C. C. 84, 88; Carstens Packing Co. v. O. & W.

R. R. Co., 22 I. C. C. 77, 81; Sioux City Term. El. Co. v. C. M. & St. P. Ry. Co., 23 I. C. C. 98,107; Blodgett Milling Co. v. C. M. & St. P. Ry. Co., 23 I. C. C. 448, 451; Red River Oil Co. v. T. & P. Ry. Co., 23 I. C. C. 438, 442; Bituminous Coal Operators v. P. R. R. Co., 23 I. C. C. 385, 391; Chamber of Commerce of Ashburn v. G. S. & F. Ry. Co., 23 I. C. C. 140, 145; Massee & Felton Lumber Co. v. S. Ry. Co., 23 I. C. C. 110, 111, 113; Meredith v. St. L. S. W. Ry. Co., 23 I. C. C. 31, 34.

(dd) Every locality competing in a common market is entitled to rates which are relatively reasonable and just in comparison with rates from other localities served by the same carrier. Black Mountain Coal Land Co. v. S. Ry. Co., 15 I. C. C. 286, 294.

(ee) There is no small force in the general proposition that just at this period of our commercial development, increased facilities, a more extensive equipment, and a better service are more important to the general shipping public than a reduction in freight charges. But this view necessarily cannot appeal strongly to communities that are directly competing with other communities and wish to grow and extend and enlarge their trade, but find the door to opportunity partly closed and their favorable geographic location substantially discounted by effective discriminations in their rates. And the objections and protest against such a rate structure becomes still more aggressive when it more or less effects the commerce of an entire state. The Mississippi River Case, 28 I. C. C. 47, 58.

(ff) Difference of cities in population, wealth, bank clearings, capitalization, deposits, industrial and manufacturing operations including the capitalization of plants, the value of materials used, value of products, number and compensation of employes, extent of wholesale and jobbing business, and geographical position, can carry weight only to the extent to which a definite relation between them and freight rates can be shown. Atlanta Freight Bureau v. N. C. & St. L. Ry., 29 I. C. C. 476, 480.

(gg) Shippers should not be deprived of the advantage of their location upon navigable waters. Chattanooga Packet Co. v. I. C. R. R. Co., 33 I. C. C. 384, 392.

(hh) Fact that a city is a thriving jobbing center, and in spite of rate differences does business in a territory in competition with other cities, does not deprive it of the right to have rates that are not unduly prejudicial in favor of those competing cities. Meridian Traffic Bureau v. S. Ry. Co., 60 I. C. C. 5, 11.

(ii) Railroad charges can not lawfully be based on the relative desirability of locations. Boston Wool Trade Association v. Director General, 69 I. C. C. 282, 292.

(jj) The Commission has never held that it is necessary, in order to preserve advantages of location, that rates should be based rigidly on mileage or on cost of service. A road is built and operated as a complete unit. The cost of maintenance and operation of any particular portion is charged against no specific traffic with respect to point of origin or destination but is represented in the general cost of moving all traffic. While difficulties in operating and traffic conditions are considerations of importance a certain degree of flexibility is permitted in adjusting rates if commercial and competitive conditions warrant. Klamath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 213.

(kk) An industry selecting a disadvantageous location for reasons justifiable to itself has no right to call on carriers to overcome such disadvantage at their expense. Pennsylvania R. Co. v. United States 295 Fed. 523.

§2½. Additional Service.

See Additional Services.

IMPORTANT CASES SINCE 1908

(a) In determining whether rates are unreasonable and discriminatory against one city and in favor of another, the Commission may take into consideration the fact that in shipments to the former a transfer or rehandling is involved, which is not involved in the haul of the latter. The Mississippi River Case, 28 I. C. C. 47, 59.

§3. Agreed Facts, Admissions and Agreements.

See Reparation §17.

IMPORTANT CASES SINCE 1908

(a) While a stipulation is ordinarily accepted by the Commission as conclusive, inasmuch as the Commission is charged with the enforcement of lawful rates, it cannot at all times accept the views of the parties as to what in fact is the lawful rate between given points on a specified commodity. Germain Co. v. N. O. & N. E. R. R. Co., 17 I. C. C. 22, 24.

(b) Assumption of burden of proof by complainant regarded as an admission that statute does not apply. Corp. Comm. of Okla. v. A. T. & S. F. Ry. Co., 31 I. C. C. 532, 536.

(c) The fact that a 2-cent arbitrary over the junction rate was agreed to by complainant is not determinative of the justice, reasonableness and nondiscriminatory character of the rate, Ladd & Co. v. Gould S. W. Ry. Co., 36 I. C. C. 179, 181.

(d) The proponent of a change in lawfully existing rates must be prepared to justify the change, if called in question. The Interstate Commerce Act provides for prevention as well as for cure. Undue prejudice and preference may be brought about as readily by reducing one as by increasing the other of two related rates. Sublimed lead to Trunk Line Points, 68 I. C. C. 343, 345.

(e) Unlawful discrimination against interstate commerce can not be found upon the mere assertion or admission of its existence by a carrier. Whether any undue, unreasonable, or unjust discrimination or other violation of the act exists is for the commission to decide upon the record. Klamath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 212.

ALL OTHER CITATIONS

C. 391, 396; Erickson Co. v. C. & N. W. Ry. Co., Unrep. Op. A272; Straw Rates from Stations in Missouri, 29 I. C. C. 562, 563; Alexandria Lumber Co., Ltd., v. L. R. & N. Co., Unrep. Op. A-710; Straw Rates from St. Louis to Anderson, Ind., 36 I. C. C. 30 ,33; Zimmerman v. C. R. I. & P. Ry. Co., 38 I. C. C. 118, 119; Cavers Sturtevant Co. v. C. & N. W. Ry. Co., 41 I. C. C. 378, 379; Boston Potato Receivers' Assn. v. B. & A. R. R., 42 I. C. C. 454, 456; Oklahoma Cottonseed Crushers' Asso. v. A. T. & S. F. Ry. Co., 42 I. C. C. 571, 573; Crown Willamette Paper Co. v. W. T. & T. Co., 56 I. C. C. 415; Haammann Vinegar & Pickle Co. v. Director General, as Agent, 58 I. C. C. 266; R. G. Gillespie v. C. R. I. & P. Ry., 77 I. C. C. 96.

§4. Averages.

IMPORTANT CASES SINCE 1908

(a) Other conditions being equal, the

rate per ton-mile from ice traffic ought not to equal the average from all sources. Mountain Ice. Co. v. D. L. & W. R. R. Co., 15 I. C. C. 305, 320.

(b) Averages are often helpful in determining the proper relationship of rates or the proper basis for their construction, but dissimilarity of conditions may affect the force of these factors. Victor Mfg. Co. v. S. Ry. Co., 21 I. C. C. 222, 229.

(c) In considering rate comparisons great caution should be used in drawing inferences from averages based upon a limited number of selected points. National Baggage Com. v. A. T. & S. F. Ry. Co., 32 I. C. C. 152, 154.

(d) Average system earnings are said not to afford a proper measure of earnings on a particular commodity between specific points. Moore & Thompson Paper Co. v. B. & M. R. R., 34 I. C. C. 323, 325.

(e) In comparing average rates on all commodities with a particular commodity the relative volume of low grade traffic must always be allowed for. Watson Co. v. Director General, as Agent, 61 I. C. C. 719, 723.

(f) If the Commission were to accept the theory that rates on all low grade commodities should be reduced solely if and because they produced a higher revenue than the average of all freight, such a reduction would result in a lowering of the average, which, in turn, would require a further reduction in the rates on the low grade commodities. National Paving Brick Mfrs. Asso. v. A. & V. Ry., 68 I. C. C. 213, 231.

(g) It is impracticable to use the revenue on all freight as an exact yardstick for measuring the rates on a particular commodity, even though it be low grade traffic. National Association of Sand & Gravel Producers v. P. R. R. Co., 74 I. C. C. 615, 617.

(h) The fact that the rates upon a certain commodity yield earnings higher than the average upon all traffic can not be accepted as persuasive of the unreasonableness of such rates. If it were so accepted, the ultimate result would be to bring all rates to a common level. Boher & Hosfeld v. B. & M. R. R., 88 I. C. C. 449, 451.

ALL OTHER CITATIONS

Public Utilities Commission of Idaho v. O. S. L. R. R. Co., 33 I. C. C. 103, 104; National Asso. of Ice Cream Mfrs. v. Adam's Express Co., 33 I. C. C. 411, 412; Rock Spring Distilling Co. v. L. H. & St. L. Ry. Co., 36 I. C. C. 35, 41; Kentucky Distilleries & Warehouse Co. v. L. & N. R. R. Co., 36 I. C. C. 293, 301; Oklahoma Traffic Assn. v. A. & S. Ry. Co., 36 I. C. C. 279, 282; California Citrus League v. Director General, 58 I. C. C. 373, 391; City of New Albany v. L. & N. Ry., 64 I. C. C. 468, 473; Division of Joint Rates and Fares of M. & N. A. R. R. Co., 68 I. C. C. 47, 52, 53, 57; National Paving Brick Mfrs. Asso. v. A. & V. Ry., 68 I. C. C. 213, 230; Lake Charles Rice Milling Co. v. L. W. R. R. Co., 69 I. C. C. 509, 510.

§5. Basing-Point System.

See Basing Points and Lines.

IMPORTANT CASES SINCE 1908

(a) Where a rate adjustment is built and maintained upon the basing-point system it should be applied alike to all places where dissimilarity of circumstances or controlling competition does not exist. Columbia Grocery Co. v. L. & N. R. R. Co., 18 I. C. C. 502, 505.

(b) A rapid increase of rates as the point of production is moved from base points presents an anomaly in rate making which calls for explanation. Florida Fruit & Vegetable Shippers' Protective Ass'n. v. A. C. L. R. R. Co., 22 I. C. C. 11, 17.

(c) The fact that no traffic moves on a basing rate does not disprove that it is the essential groundwork on which other rates are built. Wisconsin Steel Co. v. P. & L. E. R. R. Co., 27 I. C. C. 152, 157.

(d) A point directly intermediate to the base point, upon which the lowest combination makes a rate no higher than such combination, must be maintained, and it is not necessary in such cases to haul the shipment to the base point and back again to destination. Tusten Seed & Produce Co. v. V. S. & P. Ry. Co., Unrep. Op. A442.

ALL OTHER CITATIONS

Lehigh Portland Cement Co. v. B. & O. S. W. R. R., 35 I. C. C. 14, 17.

§5½. Back Haul.

See Back Haul.

IMPORTANT CASES SINCE 1908

(a) The practice of making rates to points in back-haul territory by taking the rates to coast terminals and adding thereto the local rate from the terminal to destination, cannot be claimed to rest upon any just principle of rate making. It is merely an expedient for arriving at a rate. Commodity Rates to Pacific Coast Terminals, 32 I. C. C. 611, 631.

(b) The back-haul charge may be looked upon in some respects as similar to a proportional rate applicable to the movement of traffic between two points when coming from or destined to a more distant point. A proportional rate is ordinarily less than the local rate in the recognition of the fact that the traffic has already paid or will subsequently pay a further transportation charge. Commodity Rates to Pacific Coast Terminals, 32 I. C. C. 611, 632.

(c) Out-of-line and back hauls allowed in some cases to meet competition of direct lines. Globe Grain & Milling Co. v. A. T. & S. F. Ry. Co., 36 I. C. C. 662, 663.

(d) The movement of flat cotton should be restricted to a minimum and wasteful back hauls to transit points should not be encouraged, these considerations may not be ignored in some instances and enforced in others if undue prejudice would result. Memphis Freight Bureau v. M. P. R. R. Co., 80 I. C. C. 88, 97.

ALL OTHER CITATIONS

Sanguinetti v. I. C. R. R. Co. 22 I. C. C. 185, 186; Lumber Rates, Oregon and Washington to Eastern points, 29 I. C. C. 609, 619; Miller & Co. v. C. St. P. M. & O. Ry. Co., Unrep. Op. A462; Rea-Patterson Milling Co. v. M. K. & T. Ry. Co., Unrep. Op. A-653; Corporation Commission of Oklahoma v. W. F. & N. W. Ry. Co., Unrep. Op. A-828; Wilson Produce Co. v. N. W. Ry. Co., Unrep. Op. A-905; Marshall Car Wheel and Foundry Co. v. T. & P. Ry. Co., Unrep. Op. A-929; City of Memphis v. C. R. I. & P. Ry. Co., 39 I. C. C. 256, 272; Red Cedar Shingle Mfrs. Asso. v. C. B. & Q. R. R. Co., 41 I. C. C. 422; Young v. P. C. C. & St. L. Ry. Co., 42 I. C. C. 183, 184; Valley City Mil. Co. v. G. R. & R. Ry., 43 I. C. C. 75; Sunderland Bros. Co. v. C. B. & Q. R. R., 45 I. C. C. 209, 210; Randolph Fruit Co. v. S. P. Co., 49 I. C. C. 707; Cardwell v. C. R. I. & P. Ry., 51 I. C. C. 390; Transit Privileges on Grain and Grain Products, 77 I. C. C. 1.

§6. Bona-Fide Investment.

See Advanced Rates §6.

IMPORTANT CASES SINCE 1908

(a) Were it possible to determine the exact amount of money which has been put into the railroad properties in Official Classification territory, the amount of return which has been paid to the present time, the degree of prudence with which the property has been constructed and operated, investment would furnish a very satisfactory basis in arriving at an equitable return. Advance in Rates —Eastern Case, 20 I. C. C. 243, 258.

(b) The nearest approximation to the fair standard of rate regulation is that of bona-fide investment—the sacrifice made by the owners of the property—considering as part of the investment any shortage of return that there may be in the early years of the enterprise. Upon this, taking a life history of the road through a number of years, its promoters are entitled to a reasonable return. This, however, is limited for a return should not be given upon wastefulness, mismanagement, or poor judgment, and always there is present the restriction that no more than a reasonable rate shall be charged. Advances in Rates—Western Case, 20 I. C. C. 307, 347.

(c) In determining the charge to be made on account of capital, where there is a normal increase in traffic discernible beneath the annual fluctuations, with a growth in investment necessitated by expanding traffic, it is not fair to take the investment at the end of a five-year period as representative of the period as a whole. Lum. v. G. N. Ry., 23 I. C. C. 541, 556.

(d) When the original investment has been returned several times and property greatly improved out of the earnings can it be held that the element of risk should be considered for the future? Lum. v. G. N. Ry. Co., 33 I. C. C. 541, 556.

(e) Present-day rates should not be expected to earn a return on property costs inflated by inclusion of items not actually representing expenditures for road and equipment. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 268.

(f) Property investment accounts as now standing on books of carriers can not be accepted as reliable. Rates for

Transportation of Anthracite Coal, 35 I. C. C. 220, 269.

(g) If experience demonstrates that increased investment fails, over a term of years, to yield an increased return, the inference is either that it was ill judged and not calculated to serve the public, or that the price of the service has not been sufficient to allow an adequate return. 1915 Western Rate Advance Case, 35 I. C. C. 497, 520, 521.

(h) Subject, as book cost of property is, to limitations, the basis of book cost, in default of the completion of an official valuation, may be employed, as it has been in the past, as a usable basis for a study of the course and tendency of the returns. 1915 Western Rate Advance Case, 35 I. C. C. 497, 523.

(i) Railway company not only has a recognized right to earn a fair return on the value of its property, but the interest of the public demands that carriers shall receive revenues which will enable them to keep their equipment in good repair and maintain efficient service. St. Louis Mo.-Illinois Passenger Fares, 41 I. C. C. 584, 591.

(j) Money thrown away, dishonestly or with wanton recklessness, or foolishly lost in nonrailroad enterprises, is not money put to public use upon which the rate payers are bound in law and in conscience to make a return. Proposed Increases in New England, 49 I. C. C. 421, 433.

(k) Theory that expenses afford fair measure of investment would call for reapportionment of total investment every time there was a variation in expense ratios of different services; and if by improved methods a reduction could be brought about in expenses of one service, other things remaining the same, effect would be to shift larger burden of investment to other services, irrespective of whether there was an actual change therein or not. Obviously such method of apportioning investment is not safe. Express Rates, 1922, 83 I. C. C. 606, 634.

ALL OTHER CITATIONS

Five Per Cent Case, 32 I. C. C. 325, 328; Commodity Rates to Pacific Coast Terminals, 32 I. C. C. 611, 621; Lum v. G. N. Ry. Co., 33 I. C. C. 541, 549, 550, 551, 552, 553, 554, 555; Goldfield Cases, 34 I. C. C. 360, 373; Pulp & Paper Mfrs. Asso. v. C. M. & St. P. Ry. Co., 34 I. C. C. 500, 510; Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 267, 283; New York-Jersey City Ferry Rates 37 I. C. C. 103, 111; Class Rates from Chestnut Ridge Ry. Stations, 41 I. C. C. 61, 65; Allowances to Kanawha, Glen Jean & Eastern, 41 I. C. C. 53, 59; Wabash Pittsburgh Terminal Investigation, 48 I. C. C. 96, 144; Proposed Increases in New England, 49 I. C. C. 421, 434, 436; Camp Bowie, Tex., Rates, 49 I. C. C. 528, 529; City of East Liverpool, Ohio, v. S. E. L. & B. V. T. Ry. 51 I. C. C. 563, 568; Lowry Lumber Co. v. Director General, as Agent, 58 I. C. C. 113, 116.

§6½. Bridge Mileage.

IMPORTANT CASES SINCE 1908

(a) The argument that a bridge a mile long ought to be regarded as simply a mile of the carriers track and ought not to be the foundation of any separate or higher charge is not the generally accepted view. By reason of the great cost of such structures a bridge has been regarded more or less generally as adding a constructive mileage to the carrier's line, for which an additional charge may be exacted. Moreover, bridges are ordinarily built and operated by separate companies, although not infrequently the bridge companies are owned by the carrier or carriers that use the bridge. As a rule, the accounts of the bridge company are kept separately, and the rights of the owning carrier or carriers to use the bridge and the compensation therefor, are established and controlled by formal contract. The compensation is ordinarily fixed in the form of a definite toll per passenger, and sometimes a more or less definite charge is assessed on freight. The carriers usually lay the burden upon the traveling and shipping public by adding the tolls to their regular fares and rates, and these additional charges have been recognized as valid by the Commission. Railroad Commissioners of Iowa v. I. C. R. R. Co., 20 I. C. C. 181, 188.

(b) Bridge investments involve special risks, and owners of bridges may properly be entitled to higher returns than can be expected from less precarious investments. Bridge tolls across the Mississippi River between Memphis and Arkansas held not unreasonable. City of Memphis v. C. R. I & P. Ry. Co., 39 I. C. C. 256, 273, 274.

(c) The Commission has frequently recognized the cost of bridges across

such rivers as the Ohio and the Mississippi in connection with the movement of both freight and passenger traffic. Cases cited where such costs were given consideration. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 129.

(d) Charges for a bridge service may be determined upon a basis somewhat different from that employed in the construction of charges at a crossing where the transfer is effected by barges or other floating equipment. In the former case the investment is relatively large and the fixed charges thereon usually constitute the chief item of expense, whereas in the latter case, the investment is usually small and the principal expenses incurred are those in operating the facility. Memphis Southwestern Investigation, 55 I. C. C. 515, 552.

(e) If the cost of constructing and maintaining a bridge is 100 times greater than that of a mile of track, it does not follow that 100 consecutive miles should be allowed for the movement over the bridge in computing distance, upon which to base rates for transportation. Constructive Mileage over Poughkeepsie Bridge, 66 I. C. C. 230, 233.

§7. Capitalization.

See Express Companies §24; Financial Operation; Interstate Commerce Commission §7; Reasonableness of Rates §5.

CASES 1887-1908

(a) The capitalization of a railroad, to have consideration in cases involving the readjustment of rates, should be accompanied by a history of the capital account, the value of the stock and various securities, and the actual cost and value of the property itself. To make the capital account of railroads the measure of legitimate earnings would place, as a rule, the corporation which has been honestly managed from the outset under enormous disadvantages. Grain Shippers' Asso. of Northwest Iowa v. I. C. R Co., 8 I. C. C. 158, 182.

(b) The development of the Southern Railway into a great system, through consolidation and improvement of worthless properties, is a legitimate enterprise which has benefited the whole territory affected thereby; and while those who conceived and executed it have no right to exact a return upon an extravagant capitalization, whatever has honestly and in good faith gone into the enterprise should be protected. But the people living in such territory are also entitled to protection, and the Southern Railway, by virtue of the fact that it has obtained possession of and now controls the avenues of communication by rail between the city of Danville and the outside world, has no right to deprive that community of the competitive advantages which the enterprise of its citizens in one way or another has secured, and upon the strength of which business conditions have grown up; it must recognize the geographical position and the commercial importance of the city of Danville. Danville v. Southern R. Co., 8 I. C. C. 409.

IMPORTANT CASES SINCE 1908

(c) The fact that a carrier has issued watered stock cannot be urged on a question of reasonableness of rates to deny the right of present holders of said stock to receive reasonable dividends thereon. City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 410.

(d) The fact that a carrier's stock originally sold at less than par cannot be urged on a question of reasonableness of rates to deny the present holders thereof fair dividends therefrom. City of Spokane v. N. P. Ry. Co., 15 I. C. C. 376, 411.

(e) The market value of stock should be considered in fixing rates, but such rates cannot be allowed as will guarantee the prices at which the stock was bought. In Re Advances in Rates—Eastern Case, 20 I. C. C. 243, 260.

(f) It is almost axiomatic that the investment in an American railroad is not represented by its capitalization. The Commission cannot accept capitalization as representing either investment or value. Advances in Rates—Western Case, 20 I. C. C. 307, 320.

(g) There is no relation between capital and value and there is no relation between stocks representing value and bonds representing value. In Re Advances in Rates—Western Case, 20 I. C. C. 307, 335.

(h) Increasing percentage of bonds to total capital obligations indicate a growing unwillingness to accept prospect of dividends as a sufficient incentive to assume risks of railroad proprietorship. 1915 Western Rate Advance Case, 35 I. C. C. 497, 540.

ALL OTHER CITATIONS

In Re Express Rates, 24 I. C. C. 380, 421; 1915 Western Rate Advance Case, 35 I. C. C. 497, 540.

§8. Car Mile or Train Mile Revenue.

See Reasonableness of Rates §6.

IMPORTANT CASES SINCE 1908

(a) The most satisfactory comparison to ascertain whether relative injustice is being done one section against another is through the earnings per car. Ozark Fruit Growers' Ass'n. v. St. L. & S. F. R. R. Co., 16 I. C. C. 106, 114.

(b) There are, of course, greater car earnings under a lower rate with a higher minimum than under a higher rate with a lower minimum. In Re Transportation of Wool, Hides, and Pelts, 23 I. C. C. 151, 167.

(c) Where the carload minimums on two commodities differ, the revenues per car-mile afford a fairer basis of comparison than the ton-mile revenues. Rice from Texas and Louisiana, 40 I. C. C. 285, 289.

(d) Car-foot mileage is the number of square feet in the cars multiplied by the mileage which each car made. Milk and Cream Rates to Philadelphia, Pa., 45 I. C. C. 371, 382.

(e) But in order to determine correctly the earnings per car-mile of a particular carrier it is necessary to use the actual haul and loading, including all carload movements. Live Poultry & D. S. Assn. v. A. T. & S. F. Ry., 49 I. C. C. 228, 233.

(f) The Commission in proper cases has recognized the value of comparisons of car-mile revenues, particularly when the rates under comparison apply on commodities whose transportation characteristics are such as to make them fairly comparable. State of Maryland v. B. C. & A. Ry., 49 I. C. C. 681, 685.

(g) While ton-mile and car-mile earnings generally decrease as distance increases, the fact that these earnings from the farther distant point are greater than from the nearer point does not of itself establish the unreasonableness of the rate from the farther distant point. Beaumont Chamber of Commerce v. Director General, 55 I. C. C. 428, 429.

(h) And it has frequently commented upon the value of the car-mile and ton-mile tests, and such comparisons have been found of much value in many cases but they must be considered in the light of all the circumstances and conditions and are of controlling force only when those circumstances and conditions are substantially similar. Phelps Dodge Corp. v. Director General, 57 I. C. C. 714, 717.

(i) Import rate on crude rubber from Pacific coast ports to Omaha, Nebr., and Barberton and Akron, Ohio, found not unreasonable as compared with import and domestic rates on various commodities and with lower rate subsequently established. Taking into consideration differences in transportation conditions, and particularly fact that car-mile earnings on commodities loading as heavily as crude rubber are necessarily high as compared with like earnings on commodities which load less heavily, comparisons presented do not show unreasonableness of rates assailed. Sprague Tire & Rubber Co. v. Director General, as Agent, 80 I. C. C. 285.

§8½. Categorical Answers.

IMPORTANT CASES SINCE 1908

(a) It is not sufficient for a carrier when called upon to justify a rate, the reasonableness of which is questioned, to assert that its rates generally are fair and just and that no change may properly be made in any particular rate because it would disturb the integrity of the system as a whole and produce inconsistencies. This proposition is too general and theoretical for acceptance by us in the application of the requirements of the law to a practical situation. The Commission has authority under the law to make an order only concerning the rates involved in a proceeding before it. It is not practicable in such a proceeding to investigate and pass upon the reasonableness of the entire system of rates maintained by a carrier. In dealing with a particular rate, it is of course the purpose of the Commission to consider such other rates as afford a basis for comparison, but where a given rate is found to be unreasonable the Commission will not hesitate to order such rate reduced, although the reduction might disarrange the relative adjustment existing between this and other rates. Reynolds v. Southern Express Co., 13 I. C. C. 536, 540.

(b) Something more than a generalization that the cost of transportation is less one way than another is needed to justify a difference of 50 per cent in the rates. Portland Traffic Ass'n. v. O. W. R. R. & N. Co., 56 I. C. C. 410, 413.

§9. Change in Conditions or Service.

See Advanced Rates §7; Reasonableness of Rates §7; Through Routes and Joint Rates §20.

CASES 1887-1908

(a) As rates on iron articles were formerly reduced on account of commercial conditions, the advances in those rates may have been proper, owing to subsequent changes in such conditions. In the Matter of Proposed Advances in Freight Rates, 9 I. C. C. 382.

IMPORTANT CASES SINCE 1908

(b) Arbitrary and inflexible in the extreme would be the working of any law or rule of rate making which gave no consideration to the possibility of changing circumstances and conditions. The disposition of every case must depend upon its own particular facts and circumstances. A rate which is reasonable to-day may, tomorrow, by reason of changing circumstances and conditions, become unjust and unreasonable. Topeka Traffic Asso. v. A. & V. Ry. Co., 27 I. C. C. 428, 433.

(c) An unusual number of changes or fluctutations in a scale of commodity rates seems to suggest the propriety of establishing and maintaining the rates in question on a class basis, in order that class principles and relationships may render them more stable. Western Lake and Rail Knit Goods Commodity Rates, 32 I. C. C. 54, 55.

(d) Unquestionably it is true that carriers often encounter and should be expected to encounter the same ups and downs of financial fortune as affect industry at large. But there is force in the consideration that public service industries are under some disabilities from which private industries are exempt. The former may not discontinue operation even though net earnings decline or vanish; nor may they meet rising costs with as free a hand as other industries which advance their prices without the possibility of governmental restraint. Transportation, moreover, unlike many branches of manufacture or commerce, is a quasi public function, indispensable to industry generally. So long as the service is intrusted to corporate ad-

ministration and the funds supplied by private investors, revenues sufficient to afford a return which will adequately remunerate the investment and secure the facilities required by the community have a justification which does not equally attach to every branch of private undertaking. 1915 Western Rate Advance Case, 35 I. C. C. 497, 520.

(e) Therefore a charge, reasonable in inception many years ago, may become unreasonably low in consequence of the construction of more adequate facilities, or a change in the character of the service rendered. Space rental charges on Cotton, 66 I. C. C. 121, 125.

(f) A developing industrial region is bound to find certain long-established rate adjustments eventually outgrown and unsuitable, and permanent rigidity in rate structures is not to be anticipated. Atlas Portland Cement Co. v. C., B. & Q. R. R. Co. 81 I. C. C. 1, 10.

C. 325, 330; Public Utilities Commission of Idaho v. O. S. L. R. R. Co., 33 I. C. C. 103, 108; Phelps Dodge Corp. v. Director General, 57 I. C. C. 714, 718.

§10. Combinations to Fix Rates.

See Advanced Rates §9, §16; Anti-Trust Laws; Monopolies; Reasableness of Rates §8½.

CASES 1887-1908

(a) Whether railroad companies combine or act separately in making rates and charges is not so important; the essential requirement is that however made they shall be reasonable of themselves, and so fairly adjusted as to be reasonable in their relations to each other and in their results. New Orleans Cotton Exchange v. Cincinnati, N. & O. T. P. R. Co., 2 I. C. R. 289.

(b) Contracts betwen rival and competing railroad companies, which prevent unhealthy competition but do not raise rates of transportation above the standard of fair compensation or violate any duty that is owing to the public from non-competing roads, are not void as against public policy. Manchester & Lawrence R. Co. v. Concord R. Co., 3 I. C. R. 319.

(ba) An agreement by rival lines of railroad to prevent competition is not relieved from illegality by the fact that any company, party to the agreement, has the right of withdrawal, or that it cannot be punished for a failure to obey the regulations, or that it has not been shown that the companies have made charges in excess of the limits allowed by law. Gulf C. & S. F. R. Co., v. State (Tex.) 2 I. C. R. 335.

(c) Where two companies or railroad systems stipulated for a division of traffic and agreed that when one party carried traffic belonging to the other, but one-half of the charges should be retained for the transportation service. HELD, That in the light of this arrangement in connection with the other facts of the case some reduction was warranted. Newland v. Northern Pacific R. Co., 4 I. C. R. 474.

(d) The division of territory between the eastern and western lines provided for in the Southern Railway & Steamship Association Agreement is without warrant in law and appears to be made for the benefit of the carriers without regard to the interests of shippers in the territory so divided, to whom it is in effect a denial of the privilege of shipping their goods or produce to market by the line or route they may prefer. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., et al., 6 I. C. C. 197.

(e) Where rates are established by concert of action and previous understanding between the carriers, it is manifest whether or not thereby a binding agreement to maintain such rates, that the element of competition is eliminated. Concert of action is wholly inconsistent with competition and, during the time the rates fixed by concert of action are maintained, the effect, so far as competition is concerned, is the same as if there was a binding agreement to maintain such rates. Tift v. Southern R. Co., 10 I. C. C. 548, 580.

(f) A rate which is advanced as the result of an agreement among carriers, even if such agreement be with color of violation of the Anti-trust Act, will not on that ground alone be declared unreasonable; evidence of such violation is pertinent and must be considered, but the existence of such an unlawful agreement, even when proved, is not conclusive of the unreasonableness of the rates so advanced. Enterprise Mfg. Co. et

al. v. Georgia R. R. Co., et al, 12 I. C. C. 452.

IMPORTANT CASES SINCE 1908

(g) While the action of carriers in fixing rates by agreement leads the Commission to scrutinize more carefully such rates, with a view to ascertaining whether or not such action has resulted in the maintenance of unreasonable transportation charges, and evidence thereof is admissible for that purpose, that fact alone is not conclusive of the unreasonableness of said rates. Railroad Commission of Kentucky v. L. & N. R. R. Co., 13 I. C. C. 300, 309.

(h) While evidence of an unlawful combination of carriers in fixing rates is admissible as a part of the history of the rate of which complaint is made and may often throw light upon the question of its reasonableness, the unlawful combination, standing by itself without proof also of the unreasonableness of the rate, is not a sufficient ground for an order to reduce the rate. Board of Bristol, Tenn., v. V. & S. W. Ry. Co., 15 I. C. C. 453, 454.

(i) The fact that a rate becomes effective by the concerted action of competing carriers, even though such action be illegal, does not in itself prove that it was unreasonable, and does not relieve the complainants of the necessity of showing that it was unreasonable. New Pittsburgh Coal Co. v. H. V. Ry., 26 I. C. C. 121, 122.

(j) The allegation that respondents have restricted competition by agreements for a territorial division of routes and traffic would constitiute violations of laws prohibiting combinations and conspiracies in restraint of trade which are not within the province of this Commission to administer or enforce; record is barren of facts tending to sustain the allegation. The Alaska Investigation, 44 I. C. C. 680, 702.

(k) The fact that rates were raised as a result of concerted action among carriers does not eliminate the presence of competition in the final fixing of the adjustment. Bituminous Coal to C. F. A. Territory, 46 I. C. C. 66, 83.

(l) A railroad rate is not necessarily illegal because it is the result of a conspiracy in restraint of trade, in violation of the Anti-Trust Act (Comp. St. 8820-8823, 8827-8830), as the legality of rates is determined by the Interstate Commerce Act. Keogh v. Chicago & N. W. Ry. Co. (1922), 43 Sup. Ct. 47.

Maritime Exchange v. P. R. R. Co., 21 I. C. C. 81, 84; Lumber Rates, Oregon and Washington to Eastern Points, 29 I. C. C. 609, 618; State v. Arkansas Lumber Co. (Mo. 1914), 169 S. W. 145, 171; Financial relations, etc., L. & N. R. R. Co., 33 I. C. C. 168, 180, 230; Lake Line Applications Under Panama Canal Act, 33 I. C. C. 699, 706, 707, 715; Excelsior from St. Paul, Minn., 36 I. C. C. 349, 362; Ownership of Little Kanawha R. R. Co., 36 I. C. C. 560, 594.

§11. Comparison of Classifications.

See Comparative Rates.

IMPORTANT CASES SINCE 1908

(a) A comparison of the ratings in the different classifications is not a guide to the relative transportation charges thereunder, unless the class rates under the several classifications are also considered. Milburn Wagon Co. v. L. S. & M. S. Ry. Co., 22 I. C. C. 93, 102.

§12. Comparison of Character of Commodity.

(1) In General.

See Advanced Rates §5 (3); Classification §3½, §17, §18; Comparative Rates; Reasonableness of Rates §7½.

CASES 1887-1908

(a) The fact that the rate on live hogs from Missouri River points and points in the interior of Iowa to the packing-house at Sioux City, added to the rate on packing-house products from Sioux City to Chicago, is but a trifle more than the rate on live hogs from the first point of shipment to Chicago, constitutes no ground for discriminating rates on live hogs against Chicago in favor of Sioux City. Chicago Bd. of Trade v. Chicago & A. R. Co. (Com.), 3 I. C. R. 233.

(b) Violation by one carrier of principles governing relative rates on competitive articles does not justify similar violations by its competitors. Squire v. Michigan C. R. Co. (Com.), 3 I. C. R. 515.

(c) Disadvantage to the shipper of one product can hardly be predicated upon charges for transporting another product differing essentially in character from the former and widely dissimilar in the demands which it supplies. In such

cases the rates themselves are insufficient to convict the carrier of unlawful discrimination; but the amount actually charged on one commodity may be of great importance in determining whether the charge on another commodity is reasonable or otherwise, especially when both have numerous points of resemblance in respect to the cost and hazard of transportation. Rice v. C. W. & B. R. Co., 3 I. C. C. 841, 849.

(d) Comparison of wheat rates charged by defendants from Nicholasville, Ky., with higher rates to the same points from St. Louis, Chicago or Milwaukee, much more distant points of shipment, or with a lower wheat rate in force from Louisville, Ky., to Newport News, Va., while tending to support complainant's case, not found to fairly establish the fact that the rates complained of were unreasonable or that they discriminated against Nicholasville. Board of Railroad Comrs. v. Cincinnati, N. O. & T. P. R. Co., 7 I. C. C. 380.

(e) Rates for the transportation of melons in carloads from shipping points in South Carolina to New York and other points in northern and northeastern states are not unjust and unreasonable, where they are lower than those in force between the same points on cotton and general merchandise, although greater speed and some other exceptional facilities are involved in the transportation of melons, and the rates per mile accruing to the railroads are less than the average receipts per ton mile from all freight. Board of Railroad Comrs. of South Carolina v. Florence R. Co., 8 I. C. C. 1.

IMPORTANT CASES SINCE 1908

(f) The difference in the value of two commodities, in the volume of the traffic, in the conditions under which they move, and in the risk and cost of handling them ordinarily results in a substantial difference in the rates under which they are carried, and therefore a comparison of the rates on cement with the rates on potatoes is of little value in support of an allegation that there is a discrimination in rates in favor of cement as against potatoes, the two commodities being wholly non-competitive. Anthony v. P. & R. Ry. Co., 14 I. C. C. 581.

(g) The contention that the rate on one commodity should not exceed the rate on an analogous one may have force, but in the absence of a showing of the unreasonableness of the rates on the analogous one the Commission would not be justified in requiring a reduction of the rate on the other. By merely showing that the articles are similar the order would be limited to prescribe rates on one commodity not in excess of rates on the other, which might be obeyed by increasing the lower rate. Paducah Copperage Co. v. N. C. & St. L. Ry. Co., 22 I. C. C. 226, 232.

(h) Fixing rates by comparison with an article not similar in character, use, value or mode of shipment is not proper. Barnard Co. v. C. M. & St. P. Ry Co., 26 I. C. C. 91, 92.

(i) Rates should not be fixed for a commodity by the addition of an arbitrary over the rates of another commodity having no commercial relation to the former and being wholly different in character. Barnard Co. v. C. M. & St. P. Ry. Co., 26 I. C. C. 91, 93.

(j) Where the unreasonableness of rates on manufactured commodities are in question, the rates on the raw material out of which said commodities are manufactured cannot be used as a criterion, unless it is shown that the rates on raw material are unreasonable. Rates on Sash, Doors and Blinds into Texas, 26 I. C. C. 116, 118.

(k) A test of reasonableness of rates which is often of real and controlling value is a comparison of the rates in question with rates on the same commodities from other markets. Edgar & Son v. L. & N. R. R., 26 I. C. C. 181, 184.

(l) The Commission may compare rates on a commodity from and to various points for the purpose of determining reasonableness of rates, but it may not for this purpose inquire into rates to the various points on raw material out of which the particular commodity is manufactured. Rates on Linseed Oil, 26 I. C. C. 265, 270.

(m) The fact that one commodity may be used in place of another does not necessarily render comparisons of this nature of great value. Fairmont Creamery Co. v. A. T. & S. F. Ry. Co., 28 I. C. C. 661, 662.

(n) The rates on commodities which do not move are not subject o the revision which active use is likely to make necessary, and they are therefore of little or no value as standards of comparison. Northern Pine Mfrs. Asso. v. C. & N. W. Ry. Co., 33 I. C. C. 360, 366.

(o) It does not follow from the fact that because the rate on a commodity is reduced, due to competitive conditions, that the carrier is compelled simultaneously to place similar commodities, not competitive, upon the same basis, or that a violation of the Act necessarily results from the failure so to do. Carnation Milk Products Co. v. Director General, 55 I. C. C. 665, 668.

(p) Comparisons were submitted of the rate attacked, with other rates on oil, including rates fixed or approved by the Commission in various territories and with rates on other commodities of heavy weight and movement. The value of these comparisons is impaired by want of information in regard to traffic and transportation conditions. Barnett Oil & Gas Co. v. Director General, 59 I. C. C. 689, 691.

(q) In comparing average rates on all commodities with a particular commodity the relative volume of low-grade traffic must always be allowed for. Watson Co. v. Director General, as Agent, 61 I. C. C. 719, 723.

(r) In initiation of rates, and until they are proven unduly prejudicial in an appropriate proceeding, there is nothing in the regulating statute to prevent a carrier from carrying nut coal between points on its own line on slack coal basis, or to require it to make same screen regulations as obtained at mines served by different carriers. Slack Coal from Arkansas-Oklahoma Mines, 80 I. C. C. 194, 203, 204.

(s) Transportation characteristics of canned milk and other canned goods are similar and ordinary rates should be the same. Armour & Co. v. Director General, as Agent, 80 I. C. C. 210, 211.

(t) It does not follow that because the same rate is carried on crude oil as on refined oil that the rate on crude oil is thereby unreasonable, for it may be that the rate as applied on refined oil is low. Atlantic Refining Co. v. A. B. & A. Ry., 89 I. C. C. 279, 280.

§13. Comparisons of Rates.

(1) In General.

See Infra §47; Advanced Rates §5 (3), §8½; Blanket Rates §18; Branch Lines §2; Classification IV, §17, §20; Comparative Rates; Discrimination §4; Rail-and-Water Rates; Reasonableness of Rates §7½, §28; Relative Rates; Through Routes and Joint Rates §13½, §15.

CASES 1887-1908

(a) When the reasonableness of rates is in question the charges made on long through lines cannot form a just basis for comparison with local rates for relatively short distances. Crews v. R. & D. R. R. Co., 1 I. C. R. 703.

(b) Comparisons of rates charged by railroad companies under circumstances and conditions substantially dissimilar really prove nothing, and cannot be adopted as standards in arriving at the reasonableness and justness of rates Business Men's Asso. of Minnesota v. C. & N. W. Ry., 2 I. C. C. 48, 52.

(c) Low rates to one place may not be just and fair if still lower rates are

given to another. Re Chicago St. Paul & Kansas City R. R. Co., 2 I. C. C. 137.

(d) On the question of what are just and fair rates to any particular locality, it is necessary to see what rates are given to other localities. They can not be considered by themselves. Re Chicago St. Paul & Kansas City R. R. Co., 2 I. C. C. 137, 149.

(e) The Commission desires to say plainly that when making a decision upon a question purely of fact in respect to traffic in one section of the country whereby it endeavors to do justice it does not understand that it is necessarily laying down a principle which must be applied in other sections of the country where the peculiarities of the traffic may be so altogether different as to require a different ruling in order to accomplish the like just result. Re Relative Tank and Barrel Rates on Oil, 2 I. C. C. 245, 247.

(f) Where the rate of freight charges over one line on similar freight carried from neighboring territory to the same market is considerably greater than over other lines for distances as long or longer, such greater rate is held to be excessive and should be reduced. James v. East Tennessee V. & G. R. Co., (Com.) 2 I. C. R. 609.

(g) A comparison of rates based upon the doctrine that the rates per ton per mile for each of the different services so performed should be the same is not applicable to cases of competition. New Orleans Cotton Exch. v. Illinois C. R. Co., (Com.) 2 I. C. R. 777.

(h) Comparison with rates in other localities where dissimilar conditions and modifying circumstances are found, is not sufficient to establish the unreasonableness of the charges attacked. Where no discrimination is alleged as between points of production tributary to the same market, or on account of disproportionate rates on different kinds of traffic similar in character and volume, it must affirmatively appear that these charges attacked are unreasonable and ought to be reduced. Lincoln Creamery v. U. P. R. Co., 3 I. C. C. 794, 796.

(i) On complaint of a relatively unreasonable rate on lumber from Eau Claire to various points on the Missouri river as compared with rates to the same points from La Crosse, Winona, and various other lumber shipping points: HELD, That the case must mainly be determined by comparing the rate in question with the rates from neighboring towns, similar in size, situation and volume of competing traffic, and at approximately the same distance from common markets; that the rate complained of subjects Eau Claire to undue prejudice and disadvantage, and is unlawful; and that such rate should not exceed the rate fom La Crosse and Winona by more than two cents per hundred pounds when, as at the time the complaint was filed, the rate from those points is not over 11 cents per hundred, nor by more than two and one half cents per hundred pounds above the present rate of 16 cents per hundred from La Crosse and Winona. Eau Claire Board of Trade v. Chicago, M. & St. P. R. Co., 4 I. C. R. 65.

(j) Rates maintained and which may be reasonable under the conditions existing in one section or part of the country afford no safe criterion by which to measure reasonable charges in other localities where the expense of operating a road and other conditions affecting transportation are widely different. C. O. Morrell v. Union Pacific Ry. Co., et al, 6 I. C. C. 121.

(k) A showing of substantial similarity in transportation conditions is necessary to make the rates of carriers in sections of the country other than that served by the defendant road proper standards of comparison in a case of alleged unjust and unreasonable charges. Evans v. U. P. R. Co., 6 I. C. C. 520, 543.

(l) It is competent to compare rates and distances on different roads in dealing with an alleged unreasonable rate, and these are to be considered in connection with the many other factors that enter into the adjustment of rates, but it does not necessarily follow that a rate is unreasonable because on the same or other road a particular kind of traffic is hauled a greater distance from a different point of origin at the same or a less rate. Cannon v. M. & O. R. R., 11 I. C. C. 537, 542.

(la) It may often happen that a single rate out of an entire system of rates may, when examined by itself, appear to be unreasonable, even though, when considered as a part of the whole system, it is justifiable. To reduce this single rate would perhaps disarrange the entire system of rates in effect, and in a case of this sort the Commission does not feel

that it should interfere until strong reasons for such interference are presented. Hastings Malting Co. v. Chicago M. & St. P. R. Co. 11 I. C. C. 675.

(m) Rates elsewhere not controlling Dallas Freight Bureau v. M. K. & T. Ry. Co., 12 I. C. C. 427.

IMPORTANT CASES SINCE 1908

(n) The unreasonableness of a rate cannot be established by comparing it with the rate to a point situated at the farther edge of territory taking a blanket rate, when the purpose of the comparison is to show the rates charged with respect to distances involved. Bash Fertilizer Co. v. Wabash R. R. Co., 18 I. C. C. 522, 523.

(o) Traffic demanding special service in point of train speed cannot justly be compared with traffic which is not given such consideration. Waco Freight Bureau v. H. & T. C. R. R. Co., 19 I. C. C. 22, 26.

(p) Where comparative statements of mileage and per ton mile earnings are submitted by complainants as evidence of alleged discrimination in favor of competitive points the exhibits are a more potent argument if the defendants were the only ones serving the competitive points. Anadarko Cotton Oil Co. v. A. T. & S. F. R. R. Co., 20 I. C. C. 43, 45.

(q) When it appears that a carrier gives to one point substantially lower rates for substantially the same service than it accords to a competing point, those comparisons are forceful, and in the absence of modifying conditions might well be considered conclusive. Memphis Freight Bureau v. St. L. I. M. Ry. Co., 22 I. C. C. 548, 555.

(r) And comparisons of different kinds of rates are not proper in determining controversies under section 4 of the Act. Baltimore Chamber of Commerce v. B. & O. R. R. Co., 22 I. C. C. 596, 601.

(s) A competitive rate cannot be said to be voluntary, and ought not to be used as a standard of comparison. Southwestern Shippers' Traffic Assn. v. A. T. & S. F. Ry. Co., 24 I. C. C. 570, 587.

(t) The low coal figures carefully worked out by the Commission in the Lake Coal Case, 22 I. C. C. 604, resulted from conditions that tend to economy in operation, but they were not intended as a general basis for conclusions in all cases involving coal rates, and can be relied on as a rational guide in other cases only when substantially similar conditions exist. Taylor v. N. & W. Ry., 25 I. C. C. 613, 616.

(u) Where rates are taken from lawfully filed tariffs and references to such tariffs are given, such rates may properly be referred to at the hearing and conclusions based upon them, despite the fact that they have not been served upon the carriers. People's Fuel & Supply Co. v. G. T. W. Ry. Co., 27 I. C. C. 24, 29.

(v) The foregoing principles may be summed up as follows: Comparisons of rates, revenue per ton-mile, per car mile, per train mile, etc., are frequently illuminatory and helpful. The fact that rates upon certain commodities yield revenue per ton-mile higher than the average upon all traffic, cannot be accepted as conclusive of the unreasonableness of such rates. If it were so accepted, the result would be the continual reduction of rates that yield higher than the average revenue, until all rates were on a common level. Consideration must be given to the value of the service. If some commodities, and the industries that use them, can well stand rates that yield a liberal profit to the carrier, it can afford to transport at low rates other commodities that could move under low rates, and so the commercial welfare of the country is promoted, as it must be, by the widest possible general diffusion and exchange of the products of the mine, the forest, the farm, the mill, the furnace and the factory. Coke Producers' Assn. of Connelsville v. B. & O. R. R. Co., 27 I. C. C. 125, 132.

(w) On the general principle that the shorter route governs the rate, in making comparisons with other rates, the per ton-mile revenue based on such shorter route should be used. Pittsburgh Steel Co. v. L. S. & M. S. Ry. Co., 27 I. C. C. 173, 175.

(x) Rates may be compared, though no evidence of the various circumstances and conditions of transportation are submitted. Rates have been frequently justified or condemned upon records containing little else than mere rate and distance comparisons; under the condition, however, of a known general similarity of conditions, as, for example, where the movements compared are of the same commodity in the same territory. Wickwire Steel Co. v. N. Y. C. & H. R. R. R. Co., 30 I. C. C. 415, 424.

(y) Comparisons of expense and per-

formance have long been made by carriers in cases before the Commission, but have nearly always rested on transient data. Those of the future should be based on permanent analyses and compilations. In re Separation of Operating Expenses, 30 I. C. C. 676, 680.

(z) A comparison of rates from one city to a second with those from a third city to the latter does not necessarily denote undue prejudice if the withdrawal of the carrier's concurrence in the rates from such third city would not affect the movement, rates, or practices respecting elevation, which are under attack. Elevation Allowances at St. Louis and E. St. Louis, 30 I. C. C. 696, 699.

(aa) Canadian rates can not be used as a fair measure of the reasonableness of rates in Montana. R. R. Comrs. of Montana v. B. A. & P. Ry. Co., 31 I. C. C. 641, 650.

(bb) Transportation conditions of less value than a comparison of rates in same general territory. Underwood Veneer Co. v. A. A. R. R. Co., 32 I. C. C. 265, 269.

(cc) Rates not fixed by the Commission cannot be properly used as a basis of comparison with rates fixed by the Commission after long and exhaustive investigations. Class and Commodity Rates to Salt Lake City, Utah, 32 I. C. C. 551, 557.

(dd) Where the only discrimination alleged is based upon a comparison of the rates complained of with rates to competitive points from the same points of origin, the Commission cannot consider whether or not these rates are discriminatory as compared with rates from other points of origin. Lindsay & Co. v. N. P. Ry., 33 I. C. C. 150, 153.

(ee) Bare rate comparisons not supplemented by evidence as to the volume of the movements or other comparable conditions, are unconvincing. Lumber Rates from Points in Arkansas, 34 I. C. C., 102, 104.

(ff) The relation of the movement of a commodity to a certain point to the movement to intermediate points is obvious and invites rather than repels such comparisons as are afforded by the differences in average hauls. Lumber Rates from Points in Arkansas, 34 I. C. C. 102, 105.

(gg) When rate comparisons are offered in evidence in substantiation of a claim of unreasonableness, they should be accompanied by such testimony as is possible showing the transportation circumstances and conditions incident thereto. Lehigh Portland Cement Co. v. B. & O. S. W. R. R. Co., 35 I. C. C. 14, 20.

(hh) When rate comparisons, drawn from a different territory, are offered in evidence, it becomes important to know traffic and transportation conditions prevailing in that territory if they are to be of value in determining the reasonableness of rates in issue. Eastern Live Stock Case, 36 I. C. C. 675, 682.

(ii) The relatively high density of the particular traffic in the territory from which the comparisons are drawn would fairly indicate the propriety of rates on that traffic in that territory which are relatively low as compared with rates applicable to other commodities transported in the same territory. Likewise a relatively low density of the particular traffic in the territory here involved would indicate the propriety of relatively high rates on that traffic. Eastern Live Stock Case, 36 I. C. C. 675, 683.

(jj) Where items of terminal expenses show wide variations in maintenance costs applicable to the live stock traffic they should be explained and also comparison should be made with costs incurred in special facilities furnished for transportation of other commodities. Eastern Live Stock Case, 36 I. C. C. 675, 691.

(kk) Where there is no showing whatever either as to the movement of traffic under certain rates, or as to similarity of traffic or transportation conditions, such rates are of no value for purposes of comparison. 1915 Western Rate Advance Case, 37 I. C. C. 114, 146.

(ll) And a rate comparison is subject to criticism where the relative transportation conditions other than distance are not shown. Tennessee Copper Co. v. S. Ry. Co., 41 I. C. C. 336, 346.

(mm) A depressed rate at a recognized gateway will not serve as a fair index of rates justly applicable at Des Moines. Greater Des Moines Committee v. C., St. P., M. & O. Ry. Co., 42 I. C. C. 65, 71.

(nn) Comparisons between the rates to points 12 miles beyond river crossings and the rates to a certain point situated beyond a river are inapposite where the latter point is but 2 miles beyond the riv-

er and its companion city is 10 miles on this side the river, and where the latter is treated as a river crossing. They should be compared with opposite cities at crossings. Henderson Com. Club. v. I. C. C. R. R. Co., 42 I. C. C. 196, 198.

(oo) A showing that the commodity rate on a particular article is a less proportion of the corresponding class rate than that on certain other articles is no more justification for an increase in the commodity rate on that particular article than a showing that the commodity rate on another article is a greater proportion of the corresponding class rate is a justification for reducing the commodity rate on that article. When a commodity rate is established it is presumed to be the result of special circumstances and conditions surrounding the movement of the particular article between particular points—circumstances and conditions that do not inhere in or apply to the movement of the same articles or other articles between all points. The contention that a commodity rate should bear a fixed, different, or any relation whatever to the corresponding class rate overlooks the fact that the article on which the commodity rate applies has been removed from the classification and from its association with or relation to other articles, so far as the movement between certain points is concerned. Western Trunk Line Rate Increases, 43 I. C. C. 481, 489.

(pp) It is not fair to measure the rates between two points by the rates between points in a remote portion of the country. From the multitude of rates in this country, such tables may easily be prepared and they are not ordinarily of controlling influence. Board of Com., Lexington, Ky. v. N. O. & T. P. Ry., 44 I. C. C. 407, 414.

(qq) Published rates between specific points, fully representative of the situations in the respective territories, rather than the scales upon which the published rates are based, will generally afford a fair basis for comparison. C. F. A. Class Scale Case, 45 I. C. C. 254, 257.

(rr) But testimony as to comparative transportation conditions must of necescity be somewhat general, and to require a witness to have an intimate familiarity with the physical conditions existing on each of two roads before he can be permitted to testify that transportation conditions on the two roads are similar would ordinarily exclude as witnesses all persons who had not been actively employed in the operation of both roads. Old Vincennes Distillery Co. v. B. & O. S. W. R. R., 45 I. C. C. 447, 450.

(ss) Rates between two localities are not comparable with rates between two different localities merely because the traffic density of one destination locality is substantially the same as that of the other. The relative traffic density of the two localities of origin and of the intermediate territories must also be considered. Commercial Club of Mitchell, So. Dak. v. A. & W. Ry., 46 I. C. C. 1, 9.

(tt) State boundary lines sometimes may fairly define regions of different traffic density when the rates to all points in such regions are in issue, but rates to particular points in one region can not fairly be compared with rates to competing points in the same region or in other regions on the basis of the tonnage to and from such regions as a whole. The actual tonnage handled to and from the particular points is a fairer criterion. Commercial Club of Mitchell, So. Dak. v. A. & W. Ry., 46 I. C. C. 1, 10.

(uu) When there is no showing of the volume of movement of other commodities and as to whether they ever move in trainloads, comparison of live stock rates with the rates on such commodities are of little value. Dimmitt-Caudle-Smith L. S. C. Co. v. C. B. & Q. R. R., 47 I. C. C. 287, 304.

(vv) Exhibits showing instances of lower ton-mile and car-mile earnings for similar or shorter distances are not controlling, especially where rates are made on the group principle. West Virginia Rail Co. v. P. C. C. & St. L. Ry., 48 I. C. C. 675, 677.

(ww) Where the transportation conditions under rates cited are very dissimilar from those affecting the rate under attack, the comparisons are of no probative value: Moreno-Burkham Construction Co. v. I. C. R. R., 51 I. C. C. 138, 139.

(xx) The mere citation of rates for comparable distances without a showing of the condition under which such rates were established, or the volume of movement thereunder or that the transportation circumstances and conditions are substantially similar, are not very helpful. State of New York Commis-

sion of Highway v. Director General, 55 I. C. C. 619, 623.

(yy) But mere citation of rates for comparable distances without a showing of the conditions under which such rates were established, volume of movement thereunder or similarity of transportation circumstances and conditions, are not very helpful. New York Commission of Highways v. Director General, 55 I. C. C. 619, 623.

(zz) When the rate compared is clearly shown to be less than that which the carrier could reasonably be required to publish, the Commission can not use that subnormal rate as a measure of the reasonableness of the rates on commodities, although they possess similar transportation characteristics. Carnation Milk Products Co. v. Director General, 55 I. C. C. 665, 668.

(3a) Jobbers' rates made up of combinations of inbound and outbound rates are of little probative value where only the inbound or the outbound rates are under attack. Chamber of Commerce of Johnson City, Tenn. v. S. Ry. Co., 64 I. C. C. 709, 723.

(3b) Bunker coal as a practical matter is so closely associated with cargo coal and, by reason of this association, is so impressed with the character of the latter that distinction in rates between the two is impracticable. Rates on Bunker Coal, 73 I. C. C. 62, 76.

(3c) It is elementary both that refined rates are higher than crude rates and that water transportation is cheaper than rail transportation. Crude Oil Rates from Louisiana Points, 74 I. C. C. 623, 629.

(3d) Vast differences in transportation conditions can not be disregarded in comparing rates from two competitive fields. Western Coal Rates, 80 I. C. C. 383, 419.

(3da) Equation of 3 miles of water haul to 1 mile by rail adopted as measure of rail-and-water rates. Reduced Rates from New York Piers, 81 I. C. C. 312, 323, 324.

(3db) A mere showing that main line and branch line points are on a rate parity as to certain commodities does not justify the Commission in finding that a different adjustment on grain is unreasonable, in the absence of a showing that transportation conditions are the same. Phoenix Chamber of Commerce v. A. E. R. R. 88 I. C. C. 250, 253.

(3dc) Rate comparisons consisted solely of lower rates from other points with the differences in distances and ton mile earnings. Such comparisons are of little probative force in the absence of evidence showing similarity of transportation conditions. Universal Paper Bag Co. v. Me. Central R. R., 88 I. C. C. 593, 595.

(3dd) The mere stating of rates for the same or greater distances lower than the rate attacked without a showing of conditions under which the rates were established, the volume of movement thereunder, or that the transportation circumstances and conditions are substantially similar, are not very helpful. Atlantic Refining Co. v. A. B. & A. Ry., 89 I. C. C. 279, 280.

(3e) While some elements of value are fixed, the market price of property and work is affected by so many and such varying factors as to make it impossible to lay down a rule by which to determine what any article or service is worth. But one of the most common measures by which to value the property or service of A is to compare it with the amount charged for the same thing by B, C, and D. But this method, if made the sole basis for ascertaining values may often lead to improper results. For B, C, and D may charge too much, or they may have been forced to charge too little. The same is true of determining by comparison, the reasonableness of freight charges. Until some standard is adopted they may prove nothing—even where the two hauls are over the same mileage. For the rate attacked may tend to show that the others are too low—while they in turn might be relied on to prove that the first is too high. Both may be unreasonably high, or too low, because compelled by conditions over which the carrier had no control. Water competition, rail competition, and competition of markets, enter so largely into the establishment of rates that mere distance is not necessarily a determining factor; indeed, the statute itself recognizes that there may be circumstances under which it is lawful to charge less for a long haul than for a short haul over the same road. But while all this be true, it is, nevertheless, a fact that a comparison of rates between two points on the same road, or with the charges on other roads, may furnish evidence of probative value. L. & N. R. R. v. U. S. 35 Sup. Ct. 696, 698; 238 U. S. 1, 59 L. ed.

(3f) Giving the widest possible effect to the fact that mere comparison between rates does not necessarily tend to establish the reasonableness of either, it is still true that, when one of many rates is found to be higher than all others, there may arise a presumption that the single rate is high. And when to that is added the fact that some of the comparative and lower rates had been prescribed by the Commission, there is at least a prima facie standard, which, after allowing for dissimilarity in conditions, might be used along with all the other evidence in order to test the reasonableness of an attacked rate. No one of those facts was conclusive, for the character of the country through which the two roads had been built might differ. One might run through a level, thickly populated territory,—the other might have steep grades,, long tunnels and a roadway expensive to maintain. The capital invested, the traffic hauled, the cost of operation and the earnings might differ but nevertheless what was shown to be a reasonable rate on one, might, after allowing for the dissimilarity in conditions, earnings, and cost, be a factor in determining the reasonableness of the rate on the other. L. & N. R. Co. v. U. S. 35 Sup. Ct. 696, 700; 238 U. S. 1, 59 L. ed.

C. 493; Afterthought Copper Co. v. Director General, 89 I. C. C. 346, 347.

§13. (1½) Commodity and Class Rates.

See Class Rates; Commodity Rates

CASES 1887-1908

(a) The fact which is made to appear in these cases, that rates on traffic of the numbered classes from Chicago and Cincinnati to Southern territory are made higher than they otherwise would be, for the purpose of securing to the lines from northeastern cities the transportation of that traffic from the territory set apart to them under the Southern Railway & Steamship Association Agreement, itself raises a prima facie presumption of the unreasonableness of those rates. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 592.

IMPORTANT CASES SINCE 1908

(b) Commodity rates are ordinarily lower than class rates, and class rates therefore afford a reasonable test for measuring the general level of commodity rates. The Five Per Cent Case, 31 I. C. C. 351, 401.

ALL OTHER CITATIONS

Macon Merc. Co. v. M. & O. R. R. Co., Unrep. Op. A-693; 1915 Western Rate Advance Case, 35 I. C. C. 497, 573, 614; Rock Spring Distilling Co. v. L. H. & St. L. Ry. Co., 36 I. C. C. 35, 40; Utah-Idaho Millers & Grain Dealers Assn. v.

R. R. Co., 42 I. C. C. 648, 651; Western Trunk Line Rate Increases, 43 I. C. C. 481, 489; Western Pine Mfrs. Asso. v. C. I. & W. R. R., 46 I. C. C. 650, 653; Western Trunk Line Potatoes, 50 I. C. Ry. Co., 73 I. C. C. 625; Wilckes, Martin & Wilckes Co. v. Director General, as Agent, 74 I. C. C. 13; Jones & Laughlin Steel Co. v. P. C., C. & St. L. R. R. Co., 74 I. C. C. 687; Lexington Granite Co. v. Director General, as Agent, 74 I. C. C. 487.

§13 (2) Divisions and Joint Rates.

See Divisions §7; Through Routes and Joint Rates §14.

IMPORTANT CASES SINCE 1908

(a) Ordinarily, in considering the reasonableness of a through rate the divisions received by different lines are not considered, but where the question is upon the inherent reasonableness of the charge and where a considerable portion of the whole service is in a territory not affected by competitive conditions, the Commission may properly inquire what division each line receives and whether these divisions can properly be reduced. Florida Fruit & Vegetable Shippers' Protective Ass'n. v. A. C. L. R. R. Co., 14 I. C. C. 476, 487.

(b) And the mere fact that one road is willing to accept a given division is not sufficient reason for establishing a given rate. Bott Bros. Mfg. Co. v. C. B. & Q. R. R. Co., 19 I. C. C. 136, 137.

(c) But ordinarily it affords little basis upon which to determine the reasonableness of the joint rates. Stiritz v. N. O. M. & C. R. R. Co., 22 I. C. C. 578, 581.

(d) The division of a joint rate is a matter for agreement among the participating carriers, and is not subject to review by the Commission upon complaint by a shipper. It may be considered as evidence bearing upon the reasonableness of a rate, however. Reno Grocery Co. v. S. P. Co., 23 I. C. C. 400, 401.

ALL OTHER CITATIONS

New Albany Furniture Co. v. M. J. & K. C. R. R. Co., 13 I. C. C. 594, 599; Brunham, Hanna, Munger Co. v. C. R. I. & P. Ry. Co., 14 I. C. C. 299, 310; Board of Mayor & Aldermen v. V. & S. W. Ry. Co., 15 I. C. C. 453, 458; Bulte Milling Co. v. C. & A. R. R. Co., 15 I. C. C. 351, 362; Manahan v. N. P. Ry. Co., 17 I. C. C. 95, 97; Copper Queen Consolidated Mining Co. v. B. & O. R. R. Co., 18 I. C. C. 154, 157; Jennison Co. v. G. N. Ry. Co., 18 I. C. C. 113, 121, 124; Railroad Commission of Nevada v. S. P. Co., 19 I. C. C. 238, 252; In Re Advance of Rates on Live Stock, 21 I. C. C. 119, 122; Lindsay Bros. v. L. S. & M. S. Ry. Co., 22 I. C. C. 516, 517; West Virginia Rail Co. v. B. & O. R. R. Co., 26 I. C. C. 622, 625; Business Men's League of Albert Lea v. B. & O. R. R. Co., 24 I. C. C. 125, 128.

§13. (3) Divisions and Local Rates.

See Divisions §7; Local Rates; Through Routes and Joint Rates.

CASES 1887-1908

(a) Comparison of the local freight rate from a terminal to an intermediate point on a carrier's line, with the share which it receives of a joint through rate established with a connecting carrier for hauling freight received from the latter between such points is not a proper method of determining whether or not the local rate is within the provisions of section 3 of the Interstate Commerce Act which prohibit undue and unreasonable preference or advantages. Tozer v. United States of America, 4 I. C. R. 245.

IMPORTANT CASES SINCE 1908

(b) The division of a joint rate which a carrier accepts is not a fair measure of its local rate. Jennison Co. v. G. N. Ry. Co., 18 I. C. C. 113, 119.

(c) However local rates are of value in determining proper divisions of a joint rate over the same route. Laona & Northern R. R. Co. v. M. St. P. & S. Ste. M. Ry., 52 I. C. C. 7, 8.

(d) A line participating in a joint rate does not prove that it is entitled to a division equal to its local rate by showing that the service which it performs in connection with the joint haul is no less expensive than its local service. U. S. War Department v. A. & S. Ry., 77 I. C. C. 317, 356.

ALL OTHER CITATIONS

Southern Illinois Millers' Ass'n. v. L. & N. R. R. Co., 23 I. C. C. 672, 674; Acme Cement Plaster Co. v. L. S. & M.

S. Ry. Co., 17 I. C. C. 30, 34; Manahan v. N. P. Ry. Co., 17 I. C. C. 95, 97; Board of Trade of Winston-Salem v. N. & W. Ry. Co., 16 I. C. C. 12, 16; In Re Through Passenger Routes, 16 I. C. C. 300, 310; Moise Bros. Co. v. C. R. I. & P. Ry. Co., 16 I. C. C. 550, 554; Williston Mill Co. v. G. N. Ry., 45 I. C. C. 137, 138.

§13. (4) Import and Domestic Rates.

CASES 1887-1908

(a) A charge of $3.70 per hundred pounds upon domestic traffic from New Orleans to San Francisco, when only 80 cents per hundred between the two points is charged under substantial equality of conditions upon similar goods coming to the port of New Orleans from Liverpool, is not justified by the fact that there is competition with water routes in carrying between Liverpool and San Francisco, since the gross inequality shows that the carrier is either injuring itself by carrying without profit, or is receiving an unwarranted return from the domestic traffic for the service rendered. Interstate Commerce Commission v. Texas & P. R. Co. (C. C. App. 2d C.) 4 I. C. R. 408.

IMPORTANT CASES SINCE 1908

(b) Comparisons are of little value when the rate on one article is compared with articles of a much lower grade and the rates on which latter articles are generally import rates made under the stress of acute competition. In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 161.

ALL OTHER CITATIONS

Furnace Run Saw Mill & Lumber Co. v. B. & M. R. R., 20 I. C. C. 586; Philadelphia Veneer & Lumber Co. v. C. R. R. of N. J., 25 I. C. C. 653, 654, 655.

§13. (5) Proportional and Local Rates.

See Divisions; Local Rates; Proportional Rates IV; Through Routes and Joint Rates; Supra §13 (3).

CASES 1887-1908

(a) In determining rate questions, a comparison of proportional and local rates based upon the doctrine that the rate per ton per mile for each of the different services so performed should be the same is not applicable. New Orleans Cotton Exchange v. Illinois Central R. Co., 2 I. C. R. 777.

IMPORTANT CASES SINCE 1908

(aa) The reasonableness of a through rate cannot be determined by a comparison with a local intrastate rate, plus an independent interstate rate. Marble Falls Insulator Pin Co. v. H. & T. C. R. R. Co., 15 I. C. C. 167.

(b) While local and proportional rates are not ordinarily comparable, comparisons of such rates may be considered in connection with other evidence in determining the reasonableness of a particular rate. Lindsay Bros. v. L. S. & M. S. Ry. Co., 22 I. C. C. 516, 517.

(c) In determining fourth section violations rates of the same character should be compared with one another, and proportional rates should not be compared with local rates. Rates on Grain and Grain Products to Texarkana, Ark., 29 I. C. C. 35, 36.

(d) And earnings derived in part from local traffic on which the ton-mile average is always high, hardly affords a fair comparison with reshipping rates. Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 593.

(e) Proportional rates do not form a proper basis for measuring the reasonableness of local rates. Monroe Chamber of Commerce v. Director General, 57 I. C. C. 227, 228.

ALL OTHER CITATIONS

In Re Advance of Rates on Live Stock, 21 I. C. C. 119, 122; Baltimore Chamber of Commerce v. B. & O. R. R. Co., 22 I. C. C. 596, 602; Southern Lumber & Mfg. Co. v. Tennessee Ry., 47 I. C. C. 87, 89; Royal Milling Co. v. G. N. Ry., 47 I. C. C. 263, 269, 270; Alabama Packing Co. v. A. G. S. R. R., 48 I. C. C. 596, 598; Monroe Chamber of Commerce v. Director General, 57 I. C. C. 227, 228; Traffic Bureau of Aberdeen v. Director General, 69 I. C. C. 427, 432.

§13. (6) State and Interstate Rates.

See Advanced Rates §5, (7¼); Discrimination §8 (6); Equalization of Rates §5; Routing and Misrouting §4½; State Rates and Regulation.

CASES 1887-1908

(a) Rates fixed by state statute or Commission, while properly entitled to respectful consideration, will not be accepted where shown to be unjust either to a carrier or to a shipper, as a basis for fixing an interstate rate. Hope Cotton

Oil Co. v. T. & P. Ry. Co., 12 I. C. C. 265.

(b) State rates fixed by a statute or Commission, entitled to respectful consideration, but not to be accepted as a basis for fixing an interstate rate, where shown unjust either to a carrier or a shipper. Hope Cotton Oil Co. v. T. & P. Ry. Co., 12 I. C. C. 265.

(c) While a rate fixed by a state statute or a state Commission is naturally and properly entitled to respectful consideration, it has no greater sanctity, as applied to interstate traffic, than a rate established by a railroad company; and this Commission would not hesitate upon proper evidence that a rate so established would be unjust either to a carrier or to a shipper, to refuse to accept it as a basis for fixing an interstate rate. Hope Cotton Oil Co. v. T. & P. Ry., 12 I. C. C. 266, 269.

IMPORTANT CASES SINCE 1908

(d) Therefore it may be stated that state rates afford standards of comparison of greater or less value, according as they appear reasonable, especially so when asquiesced in by the carriers; but when a state rate is under protest and being contested, and appears unreasonably low, it is not valuable as a comparison. Willman & Co. v. St. L. I. M. & S. Ry. Co., 22 I. C. C. 405.

(e) The rates established by state laws or state authorities on intrastate transportation of persons and property are facts which the Commission will consider, and that it respects the authority establishing such rates, constitutes no valid reason relieving it from performing the federal constitution and laws. If any rate for transportation wholly within a state may be made the measure of the rates when transportation moves from one state through or into another, the interstate rate so resulting would not be regulation of interstate commerce by the authority prescribed by the constitution, but by the state. If the function of the Commission be to compute the sum of intrastate rates and prescribe the result as a measure of the interstate rates, actual and direct regulation of interstate commerce by the states would result. Corporation Com. Of Oklahoma v. A. T. & S. F. Ry., 31 I. C. C. 532, 540.

(f) Therefore intrastate rates are not controlling in gauging the reasonableness of interstate rates, but in connection with other facts and other rates, they are not without significance as a basis for comparison. Coulbourn v. N. Y. P. & N. R. R., 47 I. C. C. 54, 55.

(g) As the average haul interstate greatly exceeds the average haul intrastate, the assignment of expenses on state and interstate freight traffic upon the basis of the number of tons hauled 1 mile is without justification. R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 325.

(h) Fact that a lower rate was applicable on intrastate shipments over lines not under Federal control for corresponding distances does not establish unreasonableness of rates over lines under Federal control. Empire Refineries (Inc.) v. Director General, as Agent, 74 I. C. C. 691, 692.

(i) Intrastate rates are not controlling in gauging the reasonableness of interstate rates, but, in connection with other facts, they are not without significance as a basis for comparison. East Coast Potato Distributors v. N. Y. P. & N. R. R., 77 I. C. C. 607.

(j) Intrastate rates on grain, grain products, and hay within State of Arkansas found not unduly prejudicial to persons or localities in interstate commerce. Evidence does not show that there is any actual competition with commodities moving on lower intrastate rates, and competition encountered by Oklahoma shippers found not to come from shippers within Arkansas but from shippers in Kansas and Missouri. Oklahoma Corp. Comm. v. A. R. R., 80 I. C. C. 607, 617, 618.

C. 480, 488, 489; Coal from Wyoming Mines, 68 I. C. C. 254; Rosenberg Bros. & Co. v. Director General, as Agent, 69 I. C. C. 103, 104; Portland Traffic & Transportation Asso. v. Director General, 69 I. C. C. 165.

§13. (6½) Switching and Other Rates.

See Switch Tracks and Switching.

IMPORTANT CASES SINCE 1908

(a) While the Commission is not bound to accept state-made rates applicable to intrastate traffic as a fair measure or interstate rates, yet the fact that certain switching rates are fixed by a state commission after full hearing, and sustained by the state courts, is entitled to weight in determining the reasonableness of the same rates as applied to interstate traffic. Baltimore Switching Charges, 32 I. C. C. 376, 379.

(b) A contention that the Commission should confine itself to a comparison of a rate from a point within a switching district to a point outside such district with the industrial and interchange switching rates in effect within the district and the through rates accorded complainant's competitors, and that comparisons with rates for rural hauls of equal distance are improper, not sustained, as competitive and other conditions have served to bring about very low switching

charges at industrial centers. Forsythe Leather Co. v. Director General, as Agent, 64 I. C. C. 17, 19.

(c) It has been held that the contention that the Commission should confine itself to a comparison of a rate from a point within a switching district to a point outside such district, with the industrial and interchange switching rates in effect within the district and the through rates accorded complainant's competitors, and that comparisons with rates for rural hauls of equal distance are improper will not be sustained, as competitive and other conditions have served to bring about very low switching charges at industrial centers. Forsythe Leather Co. v. Director General, as Agent, 64 I. C. C. 17, 19.

§14. Competition.

(1) In General.

See Advanced Rates §5 (7); Competition; Discrimination §8 (3).

CASES 1887-1908

(a) Elaborate tariffs of rates, the result of competition, made by one of several great railway systems, all competing for the business of a large extent of territory, are examined and considered in connection with those of its competitors, and with a view not to break down the legitimate competition thus existing, whereby rates are cheapened to the public generally and these railways are correspondingly benefited in performing the work for which they were chartered and constructed. Business Men's Asso. v. C. St. P. M. & O. R. Co., 2 I. C. R. 41.

(b) If a carrier is in good faith acting under a compulsion of circumstances and conditions beyond his control, and, to avoid large loss, adopts exceptional rates on a portion of his line, not unreasonable in themselves, and forced upon him by some action of an independent state railroad, which is not subject to the Act to Regulate Commerce, and which is operating a slightly shorter and competing line with his own,—these are circumstances and conditions which justify him in adopting such exceptional rates thus forced upon him on this portion of his line. Business Men's Asso. v. Chicago St. P. M. & O. R. Co., (Com.) 2 I. C. R. 41.

(c) When a carrier, acting in good faith, has adopted an exceptional rate, not unreasonable in itself, on a portion of its line, because that rate has been forced upon it by an independent state railroad company in direct competition with it and not subject to the Act, the reasonableness and justness of rates on other portions of the carriers line, extending to a far interior region of the country where no such conditions exist, cannot be measured, alone, by the standard thus furnished, but must be governed by considerations which fairly and justly apply to them. Business Men's Asso. of Minnesota v. C. St. P. M. & O. Ry., 2 I. C. C. 42, 46.

(d) Rates cannot be arbitrarily charged at the mere discretion of a carrier. They are to be equitably adjusted with regard to the public interests as well as the carrier's. Reduced rates at points where competitive influences are controlling must not fall below some revenue from the traffic in excess of cost, and higher rates at other points, required for the necessary revenue of a carrier, must be reasonable in themselves, and also relatively reasonable in comparison with the competitive rates. Lehmann Higginson & Co. v. Southern Pacific Co. 3 I. C. R. 80.

(e) The transportation of traffic under circumstances and conditions that force a low rate for its carriage or an abandonment of the business, but which affords some revenue above the cost of its movement, and works no material injustice to other patrons of a carrier, is to be deemed legitimate competition. When, however, its carriage is at a loss, and imposes a burden on like traffic at other points on other traffic, it is to be deemed destructive and illegitimate competition. Lehmann, Higginson & Co. v. Southern Pacific Co., 3 I. C. R. 80.

(f) When a carrier voluntarily enters a field of competition where, by reason of a disadvantageous route, or the rigor of the competitive conditions, remunerative rates can not be charged, and its service to a portion of its patrons is unprofitable, it accepts the legal obligation that its service shall be impartial to all who sustain similar relations to the traffic, and for whom the service itself is not substantially dissimilar. Manufacturers & Jobbers Union of Mankato, Minn., v. M. & St. L. R. Co., 3 I. C. C. 115, 117.

(g) The principle of relative justice applied is that when a carrier, by reason of competitive conditions, or for other reasons, serves other localities at very low rates, the concessions made

must not subject other localities or other patrons dependent on the same carrier to undue and unreasonable prejudice or disadvantage, but there must be an equitable adjustment of rates so that there is no unjust discrimination between competitors in like pursuits. Manufacturers & Jobbers Union v. M. & St. L. R. Co., 3 I. C. C. 115, 117.

(h) If the carrier claims to act under a compulsion of circumstances and conditions of his own creation or connivance in the making of an exceptional rate, then these will not avail him. If the carrier claims to act under a compulsion of circumstances and conditions which he could obviate by reasonable, fair and just exertion on his part, in the making of an exceptional rate, then they will not avail him. Board of Trade of Chicago v. C. & A. R. R. Co., 3 I. C. C. 233, 244.

(i) When great disparity exists between charges which are lower to competitive than to intermediate points much less remote, the inference is irresistible that the lower rate must be unremunerative upon any theory, or else the larger rate gives an unwarranted return for the service rendered. Chattanooga Bd. of Trade v. East Tennessee, V. & G. R. Co., (Com.) 4 I. C. R. 213.

(j) Competition with carriers not subject to the statute is based upon natural causes and plain conditions, but the legitimate force of competition with carriers subject to the Act depends upon compliance with the law by each of the competitors and the special circumstances and primarily indefinite conditions in each particular case. Trammel et al, Georgia Railroad Com. v. Clyde S. S. Co. 4 Inters. Com. Rep. 120, 5, I. C. C. Rep. 324, cited and affirmed. Gerke Brewing Co. v. Louisville & N. R. Co., 4 I. C. R. 267.

(k) The competition of the railway lines is not stifled, but is fully recognized intelligently and honestly controlled and regulated by the traffic association in its schedule of rates. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(l) Competition, or a division of business as the result of building a second road where previously one existed, should justify lower rather than higher charges. Morrell v. U. P. R. Co., 4 I. C. C. 469, 473.

(m) Competition or a division of business as a result of building a second road where previously but one existed should justify lower rather than higher charges. Evans v. U. P. R. Co., 6 I. C. C. 520, 547.

(n) Investigation of freight rates charged by carriers to southern points during a rate war in June and July, 1894 (report of which was duly made and published—Eighth Ann. Rep. Int. Com. Com., 20-24), discontinued on supplemental report and opinion stating the restoration on August 1, 1894, of rates in force prior to June of that year, and citing decisions of Commission awarding reparation to injured merchants and dealers at Lynchburg, Va., (6 I. C. C. Rep., 632). In the Matter of Tariffs and Classifications of Pa. R. Co., v. 7 I. C. C. 177.

(o) The Act does not aim to fetter competition, nor interfere with the natural flow of trade and commerce. One cardinal object of that act was to secure perfect freedom of competition among the carriers themselves. It is only when that competition becomes tyrannical, so to speak, when in the competitive struggle localities, commodities, individuals are in danger of being crushed that the law steps in. New York Produce Exchange v. B. & O. R. Co., 7 I. C. C. 612, 682.

(p) Competition cannot be excluded in fixing rates when necessary.—Although the bare naked fact of competition in an open field may not be available to justify discrimination of rates on the ground of dissimilar conditions, it is not to be excluded as a forceful element when it results in annihilation of the business of a carrier on its line because of a physical or mechanical disadvantage which it may overcome by the use of an appliance which it has long used for that purpose, the use of which is complained of as unlawful discrimination where such use is not a mere colorable device to evade the act. Detroit Grand Haven & Milwaukee Ry. Co. v. Interstate Commerce Commission, 7 I. C. C. App. LXXIV.

(q) That rates to competitive points are remunerative does not show higher rates for noncompetitive shorter distances are unreasonable.—That rates to a longer-distance competitive point are reasonably remunerative does not conclusively show that higher rates to noncompetitive shorter-distance points are unreasonably high. I. C. C. v. Western & Atlantic R. R. Co., 8 I. C. C. App. LXXVII.

(r) The mere fact of competition, no natter what its character or extent, does not necessarily relieve carriers from the restraints of the 3d and 4th sections of the Act to Regulate Commerce. Phillips, Bailey & Co. v. Louisville & N. R. Co., 8 I. C. C. 93.

(s) If a carrier can profitably make a low rate for the purpose of obtaining traffic in existence which would otherwise pass over a competing line, then it may profitably, under some circumstances, make a low rate for the purpose of bringing into existence traffic which would not pass over any line. Grain Shippers' Asso. v. Illinois C. R. Co., 8 I. C. C. 158.

(tu) The nature, extent and effect of competition must be shown where it is sought to justify rates on that ground. Grain Shippers' Asso. v. Illinois C. R. Co., 8 I. C. C. 158.

(v) It is not enough for defendant carriers to say, in a case involving the relation of rates, that competition justifies or requires the thing which is done; something must be known of the nature and extent and effect of that competition. Grain Shippers' Asso. v. Illinois Central R. Co., 8 I. C. C. 158.

(w) To allow one carrier to meet the rates of its competitors until it is found to have done something more than meet such rates does not constitute a workable basis, for the causes which lead to rate fluctuations are so intangible, often resting upon mere suspicion, that any attempt to determine in an individual case what those causes were would ordinarily be futile, and to enforce such a rule would stifle that competition which the Act to Regulate Commerce was intended to secure. George Tileston Milling Co. v. Northern P. R. Co., 8 I. C. C. 346.

(x) While the location of Palatka on the St. Johns River, and the fact that there is more competition by rail at Palatka than at Hampton, may justify rates to Palatka somewhat lower than to Hampton, the Hampton rates should not be higher than the Palatka rates by locals from Palatka to Hampton; but rates to the latter point may properly be made higher than the rates to the former by the differential now existing between the Palatka and Jacksonville rates. Board of Trade of Hampton v. Nashville, C. & St. L. R. Co., 8 I. C. C. 503.

(y) Full compensatory rates cannot be required to competitive points.—Since no more than a full compensatory rate for the carriage of freight should be applied and enforced under the most favorable circumstances and conditions, such rate cannot be applied to traffic that is subject to severe competitive conditions. I. C. C. v. Western & Atlantic R. R. Co., 8 I. C. C. App. LXXVII.

(z) Neither the absence nor presence of competition by carriers alone, nor the extent of its operation measured solely by their financial interests can be relied on to adjust rates reasonable and just to all. Mayor and Council of Tifton, Ga. v. L. & N. R. R., 9 I. C. C. 160, 178.

(aa) If the competitive rates are something more than the additional cost of the movement of the traffic it is to the interest of the carrier and to the interest of the public that the carrier shall be allowed to compete for the traffic. The profit, however small, to the extent that it inures, increases the revenues of the carrier and has a tendency to reduce local rates and to improve the local service. There may be a wide difference between a rate or amount of compensation that would give full remuneration for the service in carrying competitive traffic, and that remuneration therefor which the competition will allow the carrier to receive. Johnson v. C. St. P. M. & O. R. Co., 9 I. C. C. 221, 239.

(bb) The transportation of traffic under circumstances and conditions that force a low rate for its carriage, or abandonment of its business, but which affords some revenue above the cost of its movement, and works no material injustice to other patrons of the carrier, is to be deemed legitimate competition. When, however, its carriage is at a low, rate, and imposes a burden on like traffic at other points, and on through traffic, it is to be deemed destructive and illegitimate competition. Johnson v. C. St. P. M. & O. R. Co., 9 I. C. C. 221, 240.

(cc) Defendant carries coal to Baltimore destined finally to "points outside the Capes" (largely to New England seaboard points), and shipments of the same coal may also be made to Norfolk, an Atlantic seaport. The rate to Baltimore on coal reshipped to "outside the Capes" points is forced by the competition of lines from other mines, and under such rate defendant secures a

large annual tonnage via its line to the port of Baltimore. The rate to Baltimore on coal for Norfolk is the local rate to Baltimore. If the shipments to Norfolk and points outside the Capes be regarded as through shipments, on what are in essence through rates, the competition stated might justify a higher rate to Baltimore when the final destination is Norfolk than when it is a point outside the Capes; but if this coal is all purely local to Baltimore, there is much doubt whether, as a matter of law, defendant can charge for the haul to Baltimore more in one case than in the other. City Gas Company v. Baltimore & O. R. Co., 11 I. C. C. 371.

(dd) No competition in movement of government troops. Re Party Rate Tickets, 12 I. C. C. 95.

(ee) Competition at Kansas City which does not exist at Wichita. Johnston-Larimer Dry Goods Co. v. A. T. & S. F. Ry. Co., 12 I. C. C. 188.

(ff) Competition may make a new basing point. Southern Grocery Co. v. Ga. Northern Ry. Co., 12 I. C. C. 229.

(gg) Threat of compress company to divert its cotton traffic to another railroad, not competition that relieves from the operation of the statute. Muskogee Commercial Club v. M. K. & T. R. Co., 12 I. C. C. 312.

(hh) Grain rates to Galveston not standard for other rates. Farmers', Merchants' & Shippers' Club v. A. T. & S. F. Ry. Co., 12 I. C. C. 351.

(ii) Competition is to be considered, Quimby v. Clyde S. S. Co., 12 I. C. C. 392.

(jj) Three great competitors for Asiatic Traffic Suez route and Transcontinental Lines from eastern and from southern mills. Enterprise Manufacturing Co. v. Ga. R. R. Co., 12 I. C. C. 451.

(kk) Competition makes low rate. Morgan v. M. K. & T. Ry. Co., 12 I. C. C. 525.

IMPORTANT CASES SINCE 1908

(ll) A less-distant junction point served by an additional carrier seems entitled to a lower rate. Gamble-Robinson Commission Co. v. St. L. & S. F. R. R. Co., 19 I. C. C. 114, 115.

(mm) Competition is an important element in determining reasonableness of rate. Corporation Commission of N. C. v. N. & W. Ry. Co., 19 I. C. C. 303, 309.

(nn) If carriers attempt to rely upon competition as a justification for a discriminatory adjustment of rates they must show not only the fact but the reason for it. If there is no reason outside the mere whim of their traffic managers then the roads must bear the burden of the poor company in which they find themselves at competitive points. Suffern Grain Co. v. I. C. R. R. Co., 22 I. C. C. 178, 181.

(oo) And where a railroad relies on competition to justify a rate it must show that such competition is justified by circumstances other than the mere whim of a traffic manager. Suffern Grain Co. v. I. C. R. R. Co., 22 I. C. C. 178, 181.

(pp) Competition of controlling force cannot be ignored by the Commission in determining whether an advantage in rate at the competitive point is undue or is one not chargeable to the carriers defendant because involuntarily made. Sioux City Terminal Elevator Co. v. C. M. & St. P. Ry. Co., 23 I. C. C. 98, 107.

(qq) While a carrier may voluntarily accept rates lower than it can be required to accept and whether or not a carrier will meet competitive conditions at a particular point rests primarily with it. But this principle does not relieve the carrier from the obligation to remove unjust discrimination created by meeting competitive conditions at one point and refusing to meet them at a neighboring point. Chamber of Commerce, Ashburn, Ga., v. G. S. & F. Ry. Co., 23 I. C. C. 140, 149.

(rr) Where carriers, through discriminatory rates, produce competitive conditions at one point they cannot set up such conditions as a reason for maintaining discriminatory rates at a neighboring point. Chamber of Commerce, Ashburn, Ga., v. G. S. & F. Ry. Co., 23 I. C. C. 140, 150.

(ss) The public interest may demand that a carrier shall not avail itself of competitive conditions to produce discrimination. Chamber of Commerce, Ashburn, Ga., v. G. S. & F. Ry. Co., 23 I. C. C. 140, 150.

(tt) When competitive conditions are sufficiently potent to compel lower rates to one locality than are maintained by the same carriers to another locality similarly situated such competition may be accepted in justification of a resulting preference to the favored locality, which,

but for such competition, might be condemned as undue or unreasonable. But the mere fact of competition, regardless of its character, will not relieve carriers from the limitations of section 3 Chamber of Commerce of Newport News v. S. Ry. Co., 23 I. C. C. 345, 353.

(uu) Competition is to be considered in determining the proper classification of an article. Western Classification Case, 25 I. C. C. 442, 473.

(vv) Competition is not to be considered in determining a question of discrimination, under section 2. In re Advances on Manganese Ore, 25 I. C. C. 663, 668.

(ww) Rails of a common carrier form a public highway, over which the commerce of any community should be able freely to move on reasonable rates, regardless of consequences of its competition upon any other community. Indianapolis Freight Bureau v. C. C. C. & W. R. Ry. Co., 26 I. C. C. 53, 59.

(xx) The extent to which a carrier shall lower its rate to meet anticipated competition is a matter primarily for its decision, and should it later raise the rate, the sole question for the determination of the Commission is whether that increased rate is just and reasonable for the service performed, and not whether the carrier should be compelled to keep its rates on a probable unremunerative basis, upon which it voluntarily put itself to meet special conditions. Scrap-iron Rates between Duluth, Chicago, etc., 28 I. C. C. 467, 470.

(yy) Competition cannot be said to have compelled an unreasonably low rate when such rate is not lower than that charged for like or greater distances in other parts of the country, where transportation conditions are similar or more difficult. Maier & Co. v. S. P. Co., 29 I. C. C. 103, 104, 105.

(zz) Where two railroads are joined by branch lines, each cannot justify violations at the junction points on the ground of competition by the others. Fourth Section Violations in the Southeast, 30 I. C. C. 153, 196.

(3a) To a certain extent carriers are justified in placing competitive markets upon an equal basis. Minneapolis Civic & Commerce Asso. v. C. M. & St. P. Ry. Co., 30 I. C. C. 663, 672.

(3b) Competitive conditions are exceptions which necessitate use of commodity rates. Rates on Coffee, 32 I. C. C. 90, 91.

(3c) Where lines of railroad are closely interlaced, the territory of a given line is more restricted than where lines are not so close together; and it follows that in such case traffic cannot be considered competitive as between two carriers where its place of origin is closer to one line than to another by even a relatively small distance, or by a distance that would not be considered where the lines of railroad are further apart. Iowa & S. W. R. R. Co. v. C. B. & Q. R. R. Co., 32 I. C. C. 172, 173.

(3d) While carriers may take competition into consideration and make rates to meet it, the Commission has never held that it could compel them to do so. The question of policy or expediency in fixing a rate that is lower than a maximum reasonable rate under the law is left to the judgment and discretion of the carrier. N. Y. Produce Exchange v. N. Y. C. & H. R. R. R. Co., 32 I. C. C. 212, 215.

(3e) Where certain producers have entered and gained control of a particular market, although it appears that their output is carried at substantially higher transportation costs than their competitors, the natural inferences are that the rates themselves are not the primary cause of the difficulties encountered by the unsuccessful competitors and that their market has been lost by reason of conditions unconnected with those rates. Northern Pine Mfrs. Asso. v. C. & N. W. Ry., 33 I. C. C. 360, 363.

(3f) Jobbers are shippers. As such they are entitled, under the Act to rates which are just, reasonable, and not unjustly discriminatory. But the Act does not guarantee to any shipper, or to any city, an indefeasible lien upon any given territory. Rates are not proved unjust, unreasonable, or unjustly discriminatory by a mere showing that under the existing rate structure the shipper cannot successfully compete as a jobber in a certain territory. Lindsay & Co. v. Northern Exp. Co., 33 I. C. C. 394, 396.

(3g) Where the same carrier serves two districts, which, by their location, the character of their output and distance from markets where their product must be disposed of are under substantially similar circumstances and conditions, the serving carriers can not lawfully prefer one to the other in any other manner whatsoever. Proportional

Rates to Ohio River Crossings, 43 I. C. C. 458, 465.

(3h) While a carrier in recognition of competition may establish different rates between localities and kinds of traffic, it does not follow that the rates so established may be justified by any and all competition, regardless of character or extent. Drayage Absorption, 43 I. C. C. 472, 475.

(3i) Competition alone is not the only factor to be considered in the fixing of groups and rates. To take into consideration commercial and competitive conditions only would be to disregard distance and transportation conditions and to revert to the discarded equalization of cost theory; and to carry this theory to its logical conclusion would compel the consideration of the cost to the industry of manufacturing its products, which, of course, is clearly beyond the Commission's powers under the law. The Grouping of Monessen and Donora, 48 I. C. C. 650, 653.

(3j) Competition has often been the agency through which the public received reasonable rates. The Southeastern Sugar Cases, 48 I. C. C. 739, 742.

(3k) It is necessary to examine and compare the circumstances and conditions surrounding transportation to competing points wherever situated, provided the same carriers perform, or participate in, the transportation service and to determine if possible whether or not these differences are properly measured by the difference in rates. Traffic Bureau of Knoxville, Tenn., v. B. & O. R. R., 49 I. C. C. 205, 217.

(3l) The Commission has no hesitation in conceding that carriers may properly make rates to meet competitive conditions, so long as such rates are reasonably compensatory and so long as they do not give rise to undue prejudice or preference. Grain Rates from Minnesota and Wisconsin, 68 I. C. C. 665, 672.

(3m) If a carrier elects to discontinue a competitive rate, whether because competition no longer exists or because it does not care longer to compete, the commission would concern itself only with whether or not the resulting increased rates are just, reasonable, and proper. Tobacco from Ohio River Crossings, 73 I. C. C. 384, 387.

(3n) It is well settled that in fixing rates carriers may give consideration to competitive conditions as well as distance so long as no undue prejudice or undue preference results, and that the Commission may properly consider such conditions when the validity of a specific rate or general adjustment is in issue. Coal from Southwest to Omaha, 73 I. C. C. 536, 539.

(3o) Contention that independent steamship lines can not survive in competition with a steamship line "subsidized" by an industry. HELD, Whether or not an industry should be permitted to operate a steamship line is a question of public policy to be determined by the lawmaking body. Application of United States Steel Products Co., 77 I. C. C. 687, 688.

(3p) Destructive competition may afford a temporary benefit to the shippers particularly interested, but this does not compensate for its far reaching and serious adverse effect upon the interests of the carriers and of the shipping public as a whole. Import and Domestic Rates on Vegetable Oils, 78 I. C. C. 421, 427.

(3q) Vast differences in transportation conditions can not be disregarded in comparing rates from two competitive fields. Western Coal Rates, 80 I. C. C. 383, 419.

(3r) The Commission has no hesitation in conceding that carriers may properly make rates to meet competitive conditions, so long as such rates are reasonably compensatory and so long as they do not give rise to undue prejudice or preference. Vinegar Rates from Pacific Coast, 81 I. C. C. 666, 669.

(3ra) The Commission has recognized in many instances that there may be a marked difference in the measure of rates voluntarily established by one carrier to meet competition, and rates prescribed by the Commission as reasonable over the lines of other carriers for similiar distances. United Verde Extension Mining Co. v. A. T. & S. F. Ry., 89 I. C. C. 95, 100.

(3s) Competition is a fact which both the carrier and the shipper have a right to have estimated in the decision whether terminal charges and differences in them are reasonable. Whether competition is a fact of such practical importance in every instance as to justify terminal charges based on that alone is, of course, a question for the Interstate Commerce Commission. Interstate

Commerce Commission v. Alabama, etc., R. R. Co., 168 U. S. 144, 166, 18 Sup. Ct. 45, 42 L. ed, 414; Louisville & N. R. R. Co. v. United States, 238, U. S. 1, 35 Sup. Ct. 696, 59 L. ed 1177; Seaboard Air Line Ry. Co. v. United States, 249 Fed. 368, 374.

(3t) Where the rates applied are influenced by actual and forceful competition they are not always fair standards by which to determine the reasonableness of other charges. Seavey, Trustee v. G. H. Ry. Co., Unrep. Op. A-210.

(3u) Since transportation on a railroad switch to industries in a city located on other roads is carriage to a different destination, it follows that competition may be taken into consideration in fixing the charges. Seaboard Air Line Ry. Co. v. United States, 249 Fed. 368, 374.

C. 110, 114; Southeastern Express Co. v. Amer. Ry. Exp. Co., 78 I. C. C. 126, 139, 140; Eric Corp. v. I. & G. N. Ry. Co., 83 I. C. C. 325, 327.

§14. (1½) Cross Country Competition.

See Cross Country Competition.

IMPORTANT CASES SINCE 1908

(a) There is no obligation upon the carrier to recognize cross country competition if it does not choose to do so. Chicago-Duluth Grain Rates, 27 I. C. C. 216, 221.

(b) Where a carrier has voluntarily recognized cross-country competition, upon a subsequent increase being made, it becomes the duty of the Commission to determine whether such increased rates are reasonable for the service rendered. Lumber Rates from Local Points to Chattanooga, 29 I. C. C. 646, 648.

(c) A carrier operating two parallel lines of road serving the same territory, one a main line and the other a branch line, is justified in maintaining rates not shown to be unreasonable per se on the branch line while maintaining materially lower rates on the main line for like distances to meet the cross-country competition of an independent parallel line. Nebraska Ry. Comm. v. C. B. & Q. R. R., 36 I. C. C. 219, 221.

ALL OTHER CITATIONS

Omaha Grain Exchange v. N. P. Ry. Co., 30 I. C. C. 572, 578; R. R. Comrs. of Montana v. B. A. & P. Ry. Co., 31 I. C. C. 641, 648; Eastern Fruit Growers' Asso. v. B. & O. R. R. Co., 33 I. C. C. 343, 344; Bekkedal v. C. St. P. M. & O. Ry., 37 I. C. C. 611; Traffic Bureau of Knoxville, Tenn. v. C. N. O. & T. P. Ry. Co., 37 I. C. C. 687, 690; Dewey Bros. Co. v. P. C. C. & St. L. Ry., 46 I. C. C. 388, 393; R. R. Com'rs. of North Dakota v. N. P. Ry. Co., 53 I. C. C. 437, 438, 440.

§14. (2) Potential Competition.

See Potential Competition; Water Competition.

IMPORTANT CASES SINCE 1908

(a) Potential competition is considered in fixing rates. Audley Hill & Co. v. S. Ry. Co., 20 I. C. C. 225, 226.

(b) Without a ship upon it the ocean has the power to restrain the upward tendency of rail rates. Railroad Commission of Nevada v. S. P. Co., 21 I. C. C. 329, 352.

(c) It is not the amount of the movement by water, but the ever-present possibility of that movement, that is significant. City of Spokane v. N. P. Ry. Co., 21 I. C. C. 400, 418.

(d) Potential competition serves always to insure better service and fairer treatment by other lines, and occasionally it has an influence upon rates. New England Investigation, 27 I. C. C. 561, 617.

(e) The extent to which a carrier shall lower its rates to meet anticipated competition is a matter primarily for its decision, and, should it later raise the rate, the sole question for determination is whether that increased rate is just and reasonable for the service performed. Scrap-Iron Rates Between Duluth and Chicago, 28 I. C. C. 467, 470.

(f) The fact that water competition leads to a low rate on one commodity does not require carriers to make similar reductions on other commodities subject to actual or potential water competition, irrespective of whether or not such commodities are competitive with each other. Traffic Ass'n. of St. Louis Coffee Importers v. I. C. R. R. Co., 28 I. C. C. 484, 488.

(g) It is not true that if water competition leads to a low rate on one commodity the carriers are required by law to make similar reduction on other commodities subject to actual or potential water competition, whether or not such commodities are competitive with each other. Traffic Asso. of St. Louis Coffee Importers v. I. C. R. R. Co., 28 I. C. C. 484, 488.

(h) Where it is threatened and not actual competition which induces a carrier to reduce the rates from a competitive point, no consideration may properly be given that circumstance. California Pine B. & L. Co. v. S. P. Co., 47 I. C. C. 372, 375.

C. 258, 259; Rates on Sugar, 31 I. C. C. 495, 506; Eastern Fruit Growers Asso. v. B. & O. R. R. Co., 33 I. C. C. 343, 347; G. T. W. Ry. Co. Operation of Car Ferry Co., 34 I. C. C. 54, 56; Memphis Freight Bureau v. St.

L. I. M. & S. Ry. Co., 39 I. C. C. 224, 242; Thompson, Ritchie & Co. v. V. S. & P. Ry. Co., 39 I. C. C. 287, 292; Nashville Tie Co. v. L. & N. R. R. Co., 40 I. C. C. 377, 378; Drewes Sugar Co. v. S. P. Co., 44 I. C. C. 533, 536; Rates from New Orleans and Galveston, 44 I. C. C. 727, 732; Transcontinental Rates, 46 I. C. C. 236, 246; Western Trunk Lines Iron and Steel, 47 I. C. C. 109, 111; Helena Traffic Bureau v. M. P. Ry., 48 I. C. C. 307, 310, 311; Pelican Lumber Co. v. V. S. P. R. R., 50 I. C. C. 540, 541; Chamber of Commerce, Houston, Tex. v. M. L. & T. R. R. & S. S. Co., 51 I. C. C. 653, 657; Murfreesboro Board of Trade v. L. & N. R. R., 55 I. C. C. 648, 655.

§14. (2½) Pipe Line Competition.

IMPORTANT CASES SINCE 1908

(a) The parcel-post law has deprived some short lines of a large part of their l. c. l. traffic. Railway-Mail Pay, 56 I. C. C. 1, 72.

(b) The commission may not require rail carriers to maintain rates merely in order that those who use them may better compete with others who are in a position to utilize the less costly service of pipe lines. Proportional Rates on Petroleum and its Products, 74 I. C. C. 349. 351.

§14. (3) Railroad Competition.

See Railroad Competition; Discrimination §8 (3) (4); Equalization of Rates §4 (2); Long and Short Hauls §9; Reasonableness of Rates §8 (2).

CASES 1887-1908

(a) A long line met at a given point by a short line, and compelled to accept a scarcely remunerative rate, may, when that point is passed, increase its charges, with some consideration of the absolute distance by its own line from the originating point, in a ratio more rapid than if it had been able to grade its own rates continuously throughout its line. Lincoln Board of Trade v. Burlington & M. R. Co. (Com.) 2 I. C. R. 95.

(b) The fact that a low rate from St. Louis is forced upon the Missouri Pacific by competition at Omaha cannot be taken advantage of to compel a corresponding reduction upon its Lincoln branch. Lincoln Board of Trade v. Missouri P. R. Co. (Com.) 2 I. C. R. 98.

(c) No necessity or compulsion is created by a war of rates which justifies disobedience of the statute. Re Passenger Tariffs and Rate Wars v. 2 I. C. R. 341.

(d) One transportation line cannot be said to meet competition of another transportation line for the carrying trade of any particular locality, unless the latter line could and would perform the service alone if the former did not undertake it. Chattanooga Bd. of Trade v. East Tennessee, V & G. R. Co. (Com.) 4 I. C. C. 213.

(e) Competition with carriers not subject to the statute is based upon natural causes and plain conditions, but the legitimate force of competition with carriers subject to the act depends upon compliance with the law by each of the competitors and the special circumstances and primarily indefinite conditions in each particular case. Gerke Brewing Company v. L. & N. R. Co., 4 I. C. C. 267, 273.

(f) The active competition of rail carriers for the transportation of freight for which water carriers compete, thereby giving them the benefit of a participation in it and lowering the rates for the benefit of the producer and consumer, and furnishing many outlets to markets, is one of the results contemplated by the act and which it was intended to promote. New Orleans Cotton Exchange v. I. C. R. R. 2 I. C. C. 777, 789.

(g) One transportation line can not be said to meet the competition of another transportation line for the carriage of traffic from any particular locality, unless the latter line could and would perform the service alone if the former did not undertake it. Fewell v. R. & R. R. Co., 7 I. C. C. 354, 373.

(h) The circumstances and conditions governing the transportation of fertilizer from Charleston to Valdosta and other stations are rendered substantially dissimilar from those applying in the transportation to shorter distance localities by railway competition at Valdosta and such other stations which controls and affects the rate. Savannah Bureau of F. & T. v. Charleston & S. R. Co., 7 I. C. C. 458.

(i) Railway competition justifies defendant in making a lower rate to a more distant point. Railway competition may excuse the giving of a preference

to a particular locality or a particular commodity, provided the interests of the public are not unduly sacrificed to those of the carrier. New York Produce Exchange v. B. & O. R. Co., 7 I. C. C. 612, 660.

(j) The transportation of grain eastward from Kansas City and from Sioux City and other points in the territory adjacent to Sioux City is subject to competition between the carriers; but while reduced rates have resulted from the competition at Kansas City the competition in northwest Iowa has been more effectively restrained by an agreement formerly in effect, and, since such agreement was canceled, by continuance of rates without substantial reduction. The rate on corn to Chicago from most points in western Iowa is 17 cents per 100 pounds. Examination of the rates and rate changes for a period of years indicates that a rate of 15 cents on corn from Kansas City to Chicago should be applied at all Missouri River points, but the evidence is not sufficient to enable a definite conclusion. It does appear, however, that the rates on grain from Sioux City and other points in a limited section of northwest Iowa are too high. Grain Shippers' Asso. v. Illinois Central Co., 8 I. C. C. 158.

IMPORTANT CASES SINCE 1908

(k) Rate wars were unreasonable and their results cannot be used as measure of reasonableness. Morgan Grain Co. v. A. C. L. R. R. Co., 19 I. C. C. 460, 463.

(l) The shortest line should generally fix the rate. Commercial Club of Superior v. G. N. Ry. Co., 24 I. C. C. 96, 101.

(m) The Commission has recognized the natural right of a carrier to establish low rates to meet competition over other routes. Indianapolis Freight Bureau v. C. C. C. & St. L. Ry. Co., 26 I. C. C. 53, 58.

(n) Railroad competition will justify a difference in rates. Coke Producers' Asso. of Connellsville v. B. & O. R. R. Co., 27 I. C. C. 125.

(o) While there may be competition in service there can be none of much value in rates between steam railroads of similar character. New England Investigation, 27 I. C. C. 560, 608.

(p) Rather than meet rates of short line, carriers may desire to abandon business unless leave is obtained to disregard the fourth section. Iowa Grain Rates, 28 I. C. C. 354, 355.

(q) Competition of carriers serving other markets of supply does constitute a justification in some instances for making lower rates to more distant than to intermediate points. Fourth Section Violations in the Southeast, 30 I. C. C. 153, 279.

(r) The fundamental reason for granting relief to any line at a given point is the meeting at that point of the competition of other carriers, against which competition the petitioner is at a disadvantage. Fourth Section Violations in the Southeast, 30 I. C. C. 153, 304.

B., A. & P. Ry. Co., 78 I. C. C. 659, 663.

§14. (4) Rail-and-Water Competition.

See Equalization of Rates §4 (3); Rail-Water-Rates; Reasonableness of Rates §8 (3); Water Competition.

IMPORTANT CASES SINCE 1908

(a) Where at one point water and rail competition exists to an extent not present at another point the conditions are so dissimilar that the rates to the former are not necessarily a measure of a reasonable rate to the latter. Georgetown Railway & Light Co. v. N. & W. Ry. Co., 22 I. C. C. 144.

(b) It is customary for rates via rail-and-water routes to be somewhat lower than the all-rail rates. Tampa Board of Trade v. L. & N. R. R. Co., 30 I. C. C. 377, 381.

ALL OTHER CITATIONS

merce v. St. L., B. & M. Ry. Co., 81 I. C. C. 703, 707.

§14. (5) Water Competition. .....

See Discrimination §8 (5); Equalization of Rates §4 (4); Long and Short Hauls §10; Potential Competition; Reasonableness of Rates §8 (4); Water Competition.

CASES 1887-1908

(a) Exceptional conditions exist in respect to railroad transportation in proximity to the waterways of the Great Lakes, Michigan and Superior, and to rival competing railway lines operating between the ports on these lakes, as to the method of grouping stations, under the combined effect of the competition of these waterways and of the Act to Regulate Commerce, §4. Business Mens Assn. v. Chicago, St. P. M. & O. R. Co., 2 I. C. R. 41; Business Mens Asso. v. Chicago & N. W. R. Co. (Com.) 2 I. C. R. 48.

(b) A long line met at a given point by water competition, may grade up its rates from that point more rapidly than it otherwise might; and a situation upon a navigable river, although not at present affording active competition with the railroad, is to be considered. Lincoln Board of Trade v. Burlington & M. R. Co. (Com.) 2 I. C. R. 95.

(c) The Commission will look at and consider every fact, circumstance and condition surrounding the traffic and of the service performed in its transportation, and if the competition of water carriers at any point is such as to be large, active, and of controlling force, the all rail lines competing for the traffic at the same point may make rates that are reasonable and just, in view of such competition, and which will enable them to participate in the carriage of the traffic, and are not obliged to go out of the business and leave it as a monopoly to water carriers. New Orleans Cotton Exchange v. I. C. R. R. 2 I. C. C. 777, 788.

(d) If the competition of water carriers at any point is such as to be large ly active, and of controlling force, all rail lines competing for the traffic at the same point may make rates that are reasonable and just in view of such competition, and which will enable them to participate in the carriage of the traffic. New Orleans Cotton Exch. v. Illinois C. R. Co. (Com.) 2 I. C. R. 777.

(e) As to the other rail-carrier defendants in this proceeding, which are certain southern and southwestern railroads, it appears in a general way that there is water competition at Memphis, Vicksburg, New Orleans, Mobile and Galveston, but upon this point the evidence is not sufficiently clear to enable the Commission to determine the extent to which this competition at each of these points is actual and whether it involves traffic important in amount; and the Commission therefore retains the case as to these defendants, and will hereafter notify the parties to the time when and the place where all such further evidence will be heard upon these points that the parties may desire to offer. Rice v. Atchison, Topeka & Santa Fe R. Co., 3 I. C. R. 263.

(f) The competition between all-water lines and the all-rail lines in the carriage of petroleum and its products from the Port of New York to San Francisco, Oakland, Sacramento, Stockton, Marysville, San Jose, and San Diego, in the State of California, is actual and involves the transportation of traffic important in amount. The competition between the part-rail and part-water lines and the part-pipe lines and the part-water lines, on the one side, from the oil fields of Pennsylvania and Ohio, via Port of New York to San Francisco, Oakland, Sacramento, Stockton, Marysville, San Jose, San Diego and Los Angeles, in California, in the carriage of petroleum and its products, on the one hand, and the competition of the all-rail lines, on the other, in the carriage of the same kinds of property from and to the same points named, is a competition that is actual and involves the transportation of traffic important in amount. HELD, on these facts and upon the authority of numerous decisions cited in this opinion, a dissimilarity of circumstances and conditions is thus shown to exist at the California points named as compared to the circumstances and conditions which exist in the carriage of this traffic by the all-rail lines at intermediate points along such all-rail lines, and that it is such a dissimilarity of circumstances and conditions as is recognized by the Act to Regulate Commerce and warrants the all-rail lines in making such just and reasonable rates as will enable them to meet the low rates and competition of the competing all-water lines and of the competing part-water and part-rail lines at said California points

above named, and that in doing so the said all-rail lines are not obliged to make their rates at intermediate points along their lines as low as the rates forced upon them by the competition at said California points above named, viz: San Francisco, Oakland, Sacramento, Stockton, Marysville, San Jose, Los Angeles and San Diego. Rice v. Atchison, Topeka & Santa Fe R. Co., 3 I. C. R. 263.

(g) Transportation by rail from eastern points to the "Pacific Coast Terminals," Portland, Tacoma, and Seattle, is affected by the competition—of controlling force and in respect to traffic important in amount—of water carriers reaching the same terminals; but such competition does not affect like transportation from said points to the city of Spokane, Washington. Merchants' Union v. Northern P. R. Co. (Com.) 4 I. C. R. 183.

(h) When water competition is alleged to justify rates in any case under the statute the carrier must affirmatively show proof which does more than create a presumption, and which clearly establishes that such competition is a controlling factor in the transportation of traffic important in amount from the points in question. James & Abbott v. C. P. R. Co., 4 I. C. C. 274, 279.

(i) The rail rate on shingles from a Canadian mill to market being fixed with special reference to the effect of a log drive down a river to the mill, and water competition for shingle traffic from the seaport below, the rate from a Maine mill higher up on the same river should be made upon the same basis. James v. Canadian P. R. Co., (Com.) 4 I. C. R. 274.

(j) Water competition to justify rates must be clearly established, to be a controlling factor in the transportation of traffic important in amount from the point in question. James v. Canadian P. R. Co., (Com.) 4 I. C. R. 274.

(k) "A common carrier cannot be required to ignore or overcome existing differences in the transportation facilities of different localities created not by its own arbitrary action, but by nature, or by enterprise beyond its control. . . . Wherever, and whenever, actual competition exists, the question the carrier has to deal with is, not so much what is a fair rate for the service, or what the traffic will bear, but what rate can be got for the service, as against the rate offered by the competitor." Case Quoted: ante. P. 323, Interstate Commerce Com. v. Atchison, T. & S. F. R. Co., Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 4 I. C. R. 332.

(l) "That competition, the life of trade, cuts an important figure in the conditions and circumstances attendant upon transportation of passengers and property, cannot be well overlooked nor denied. Nor can it be well denied that, as between the short and long haul, competition may exist to that extent, that what would otherwise be smaller circumstances, and conditions, will be dissimilar circumstances, and conditions." Case Quoted: 31 Fed. Rep. 862, Missouri Pac. R. Co. v. Texas & P. R. Co., Interstate Commerce Commission v. Cincinnati N. & T. P. R. Co., 4 I. C. R. 332.

(m) Several lines of railway compete for the business between Cincinnati and Augusta; and there is active and influential competition by Baltimore, and other eastern cities, against Cincinnati for the trade of Augusta. Interstate Commerce Commission v. Cincinnati N. O. & T. P. R. Co., 4 I. C. R. 332.

(n) A charge of $3.70 per hundred pounds upon domestic traffic from New Orleans to San Francisco when only 80 cents per hundred between the two points is charged under substantially equality of conditions upon similar goods coming to the port of New Orleans from Liverpool is not justified by the fact that there is competition with water routes in carrying between Liverpool and San Francisco, since the gross inequality shows that the carrier is either injuring itself by carrying without profit or is receiving unwarranted return from the domestic traffic for the service rendered. Interstate Commerce Commission v. Texas & Pacific Ry., 4 I. C. R. 408.

(o) The influence of water competition via the Atlantic on rail rates from northeastern cities to southern territory is not so great, as appears by the proof in these cases, as to account for or justify the difference between the mileage rates from those cities and the mileage rates from Chicago and Cincinnati to such territory under the rates complained of, and the fact of that influence on rates from the former cities cannot be invoked as a justification of rates from the latter, which, after due

allowance for such influence as a substantially dissimilar circumstance, still appear on comparison of the two sets of rates to be unduly preferential to the former and unjustly discriminatory against the latter. In rates from different territories to a common market, "relative equality is necessary in the degree of the similarity" of circumstances and conditions attending the transportation in the two cases. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co., 4 I. C. R. 592.

(p) Ocean competition may constitute a dissimilar condition, and circumstances and conditions which exist beyond the seaboard of the United States can be legitimately regarded for the purpose of justifying a difference in rates charged by railroads between import and domestic traffic. Texas & P. R. Co., v. Interstate Commerce Commission, 5 I. C. R. 405.

(pa) When the rates to Montgomery were higher a few years ago than now, actual, active water-line competition by the Alabama river came in; the rates were reduced to the level of the lowest practical water rates; and the volume of carriage by the river is now comparatively small. But the controlling power of that water line remains in full force, and must ever remain in force as long as the river remains navigable to its present capacity. Interstate Commerce Commission v. Alabama M. R. Co., 5 I. C. R. 685.

(q) Water competition is altogether inadequate to account for the general relatively low rating of lumber, grain, and other staple or heavy goods to or between inland points, and that of a long list of commodities, including iron and steel, to San Francisco from Chicago and so-called Mississippi river and Missouri river points. Whatever may be the merits of the carriers' competition as a defense of lower rates for longer than shorter hauls, the former involving greater service and expense on the part of the carrier, better cause apparently exists for lower rates where, under higher ones, the traffic is subjected to such disadvantage or prejudice that it will not move at all. Colorado Fuel & Iron Co. v. Southern Pacific Co., 6 I. C. C. 488.

(r) The shipment of iron and steel from foreign countries to San Francisco at low rates by water affects the iron and steel industry at Pueblo as well as at eastern points in respect to participation in supplying that market. Colorado Fuel & Iron Co. v. Southern Pacific Co., 6 I. C. C. 488.

(s) Charging the same rate from Savannah and Charleston over all-rail lines to points in Florida, in competition with ocean and rail competition from Savannah and Charleston, is not unlawful. Savannah Bureau of F. & T. v. Charleston & S. R. Co., 7 I. C. C. 458.

(t) Competition with water route authorizes differences in rates.—Dissimilar circumstances exist authorizing a less rate to a terminal point reached by several routes of railroads of part rail and water and all-water routes than to a nearer point at which there is no competition. Proceeding to enforce order of the Interstate Commerce Commission. Behlmer v. Louisville & Nashville Ry. Co., et al, 7 I. C. C. App. XII.

(u) The competition of carriers by water from San Francisco to Gulf of Mexico and Atlantic seaports, and the competition of refineries on the Eastern seaboard with refineries on the Pacific Coast, operate, in connection with transportation rates in effect from the East and South to Omaha, to render the circumstances and conditions governing the carriage of sugar by defendants from San Francisco to Omaha, Neb., substantially dissimilar in comparison with those applying on the transportation for the shorter distance over the same line from San Francisco to Kearney, Neb., and to justify a rate of 65 cents per 100 lbs. to Kearney, while a rate of 50 cents per 100 lbs. is in force to Omaha; but such circumstances and conditions do not justify the present rate of 77 cents per 100 lbs. as compared with the rate of 50 cents in force to Omaha. Gustin v. Burlington & M. R. R. Co., 8 I. C. C. 481.

(v) The Santa Fe and Southern Pacific Systems reach Los Angeles, Cal., a point to which rates from the east are affected by water competition. Phoenix, Ariz., is not upon either of these through lines, but is connected therewith by two lateral lines, one on the north connecting with the Santa Fe at Ash Fork and one on the south connecting with the Southern Pacific at Maricopa. On complaint that freight rates between New York, Chicago, St. Louis and other eastern points and Phoenix are unjust and unreasonable in themselves and relatively as compared with rates on

like traffic between New York and such other eastern points and Los Angeles, HELD, (1) That when water competition permits the establishment of classifications and rates below the rates to non-competitive points, such lower rates, while possessing value as standards of comparison, are not always conclusive in fixing rates to shorter distance points not affected by such competition, and there is no evidence in this case upon the reasonableness of the rates to and from Phoenix except comparison with Pacific Coast rates. (2) That the evidence in this case is insufficient to constitute the basis of a decision requiring defendant carriers to modify their long-standing system of rate-making, which also applies over other transcontinental lines throughout a great belt of territory and affects numerous localities and interests which have not been heard in this proceeding, and this being so the relief sought by complainant is for the present denied, but the case is retained for further consideration pending the investigation and disposition of other cases involving the same general question. Shippers' Union of Phoenix v. Atchison, T. & S. F. R. Co., 9 I. C. C. 250.

(w) When water competition permits the establishment of classifications and rates below the rates to noncompetitive points, such lower rates, while posessing value as standards of comparison, are not always conclusive in fixing rates to shorter distance points not affected by such competition. Shippers' Union of Phoenix v. Atchison, Topeka & S. F. R. Co., 9 I. C. C. 250.

(xy) With water competition compelling low all-rail freight rates from New York to San Francisco and other Pacific Coast terminals, a showing that the distance is less, and that graded rates were formerly in force, is not sufficient to warrant an order requiring lower rates from St. Louis, Chicago and other interior points than from New York, on traffic carried by rail to Pacific Coast destinations. Business Men's League of St. Louis v. Atchison, T. & S. F. R. Co., 9 I. C. C. 318.

(z) Transcontinental rates from eastern points to San Francisco are made in competition with water rates, and are in no sense the measure of the value of the services; but that situation does not justify the carriage of goods to San Francisco at a loss, thereby placing additional burdens on other traffic. Kindel v. Boston & A. R. Co., 11 I. C. C. 495.

IMPORTANT CASES SINCE 1908

(aa) A water port is entitled to whatever advantage it can obtain through transportation by water, but its location does not entitle it to lower rates by rail, and although such preference may lawfully be accorded by a carrier in the protection of its own interests, it should not be required, except in cases where manifest wrong would otherwise result. Darling & Co. v. B. & O. R. R. Co., 15 I. C. C. 79, 87.

(bb) Carriers may, for the purpose of meeting water competition, make rates lower than would otherwise be justifiable, even to the extent of charging a less rate to the more distant point. The carrier may determine for itself whether it will or will not meet such water competition. While, however, the carrier may in the first instance settle its policy in this respect, it must act under certain limitations. It cannot be permitted to compete at one point and decline to compete at another, where all conditions are the same; nor should it, ordinarily, be allowed to compete one day and decline to compete the next. The public has the right to require equal and uniform treatment within the bounds of reason. Cases might therefore arise where the Commission would require the continuance of a rate established to meet such competition. Darling & Co. v. B. & O. R. R. Co., 15 I. C. C. 79, 87.

(cc) A rule that whenever all-rail carriers establish rates to a given point they must take notice of the independent water rates from that point and of the territory that can be reached thereunder and must make such adjustment as will prevent the use of the water rates from that point to another point, resulting in discrimination against that other point by reason of its all-rail rate adjustment, has no support in law, in public policy or in sound transportation principles. Bainbridge Board of Trade v. L. H. & St. L. Ry. Co., 15 I. C. C. 586, 590.

(dd) There may be water competition at each of two points, and yet a difference in rates to those points may be justified. Bainbridge Board of Trade v. L. H. & St. L. Ry. Co., 15 I. C. C. 586, 594.

(ee) While water competition may be availed of by a carrier as its justification

and excuse for rates that are lower than would otherwise be lawful, the existence of such competition is not in itself a ground upon which a shipper may demand a lower rate. Lindsay Brothers v. B. & O. S. W. R. R. Co., 16 I. C. C. 6, 8.

(ff) That carriers may meet water competition at whatever point and to whatever extent they see fit cannot be admitted. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 168.

(gg) There has been little difficulty experienced from time to time by the rail carriers in raising rates to the Pacific coast; the only live water competitor on the Pacific to-day is a line which bases it rates on the rail tariffs, and the rates of both the rail and the water lines change simultaneously. Ways can be found, and have been found, by which the presence of the ocean as a controlling or even greatly meddlesome factor in the fixing of railroad rates can be nullified. There is no doubt but that rail rates have been influenced at times to all the Pacific ports by water carriers, and of course there is a possibility that at any time this water competition may become seriously aggressive and potent. The United States is not a maritime nation at present andher great coast line on the Pacific side is served in great part by such water carriers as the railroads permit to live. Railroad Commission of Nevada v. S. P. Co., 19 I. C. C. 238, 250.

(hh) A rate forced by water competition cannot be used as a standard of reasonableness. In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 163.

(ii) Ocean competition, as well as circumstances and conditions beyond the seaboard, are to be considered in determining whether differences in rates as between foreign and domestic traffic are unreasonable or unduly discriminatory. Chamber of Commerce of Newport News v. S. Ry. Co., 23 I. C. C. 345, 355.

(jj) While water competition may be availed of by a carrier as a justification for rates that are lower than would otherwise be lawful, the existence of such competition is not in itself ground upon which shippers may demand a lower rate. Cohen & Co. v. Mallory S. S. Co., 23 I. C. C. 374, 376.

(kk) Water competition will only be recognized when it is actually present or reasonably apprehended, and then only in proportion to its degree. Transcontinental Commodity Rates, West Bound, 26 I. C. C. 456, 461.

(ll) It is not the duty of a carrier to meet possible water competition and the circumstances of such competition does not prevent it from advancing a non-compensatory rate made under the influence of such competition to a remunerative basis. Scrap-iron Rates Between Duluth, Chicago, etc., 28 I. C. C. 467, 470.

(mm) The fact that because of the likelihood of water competition a carrier makes a rate which may not be compensatory, does not of itself render unreasonable and unjust an increase to a remunerative basis. Scrap-iron Rates Between Duluth and Chicago, 28 I. C. C. 467, 470.

(nn) The policy of carriers is that they regard meeting water competition as the equivalent of annihilating the river traffic. Texarkana Freight Bureau v. St. L. I. M. & S. Ry. Co., 28 I. C. C. 569, 573.

(oo) Rail rates must be kept so low that river boats cannot live on them. Texarkana Freight Bureau v. St. L. I. M. & S. Ry. Co., 28 I. C. C. 569, 574.

(pp) While carriers may properly meet water competition, the maintenance of a lower rate to one point than to other points which are intermediate cannot be justified on the ground that it is necessary to suppress water competition. Texarkana Freight Bureau v. St. L. I. M. & S. Ry. Co., 28 I. C. C. 569, 583.

(qq) Rate originally made to meet water competition hardly a reasonable charge for service performed. Lumber Rates from Lake Charles and West Lake, La., 31 I. C. C. 258, 260.

(rr) Where there is nothing to prevent vessels from moving between the points of origin and destination, there is no elimination of water competition. Lumber Rates from Lake Charles and West Lake, La., 31 I. C. C. 258, 259.

(ss) Where it is shown that a certain scale of rates is water-competitive, and that points to which it is asked that the same rates be applied are not so situated as to be entitled to the advantages of water-compelled rates, complainant's request cannot be granted, unless special

reasons are advanced therefor. Chamber of Commerce, Houston, Tex., v. I. & G. N. Ry., 32 I. C. C. 247, 251.

(tt) And the amendment of 1910 applies only to rates therafter reduced to meet water competition. Transcontinental Commodity Rates, 32 I. C. C. 449, 453.

(uu) Therefore carriers cannot be compelled to meet water competition. New York Produce Exchange v. N. Y. C. & H. R. R. Co., 32 I. C. C. 212, 216.

(vv) Water competition can not be said to exist at intermediate stations not situated on river. St. Matthews Produce Exchange v. L. & N. R. R. Co., 32 I. C. C. 233, 235.

(ww) Necessarily, coincident with the lowering of rates via waterways, there is a rivalry in service which is equally a strong weapon of competition. Lake Line Applications Under Panama Canal Act, 33 I. C. C. 699, 712.

(xx) When rates to coast cities are lower than to intermediate points because of controlling water competition, every inland point should take rates higher than to port cities. Commodity Rates to Pacific Coast Terminals, 34 I. C. C. 13, 17.

(yy) Where two points are connected by both rail and water routes in a proceeding in which the rate on a commodity not affected by water competition is attacked, a comparison with rates on a commodity affected by water competition is not helpful. Furniture Mfrs', Asso. v. A. A. R. R., 34 I. C. C. 262, 265.

(zz) The principle observed in meeting rail competition with respect to factors making up aggregate of intermediate rates should apply to water competition by a rail line. Spartanburg Chamber of Commerce v. S. Ry. Co., 34 I. C. C. 484, 494.

(3a) Movement of coal by water limits to some extent the rates that can be charged by the rail lines from interior mines. Rates on Bituminous Coal, 36 I. C. C. 401, 407.

(3b) The Commission has uniformly held that it is for the carrier to determine whether or not it will meet water competition. If it elects to discontinue this practice at any point and increase its rates, the Commission is concerned only in the question of whether or not the increased rates are just, reasonable, and proper. Coal to Rhode Island Points, 37 I. C. C. 650, 651.

(3c) To concede that possibility of competition depends on volition of water carrier would defeat the evident purpose of the amendment to restore and maintain competition in instances where rail carriers had secured control of potentially competitive water line. Peninsular & Occidental S. S. Co., 37 I. C. C. 432, 436.

(3d) Competition means something more than an occasional movement via a rail line which parallels a water line. where the rail line operates at a serious disadvantage in that it does not and can not offer rates and service on anything like equal terms with water lines. Whether or not there would be a normal, active competition between rail line and water line if operating independently is the best practical test of competition. S. P. Co. Ownership of Oil Steamers, 37 I. C. C. 525, 536.

(3e) The Act contemplates encouragement of such competition by divorcing water line from rail carrier when it is found that water carrier is being used to stifle competition, or is not being operated in best interests of the public. S. P. Co. Ownership of Oil Steamers, 37 I. C. C. 525, 536.

(3f) One of the primary purposes of the Act was to preserve and promote and not to destroy competition between carriers; and this clause of section 4 was intended to act as a restraint against rail carriers reducing their rates between competitive points to such a level as to render water service between such points unremunerative. Reopening Fourth Section Applications, 40 I. C. C. 35, 40.

(3g) Keen competition exists in the southeast not only between various rail-and-water and all-rail routes from northern ports and interior eastern points but also between rail lines from the east and those from the west; and the measure of the present differentials apparently was fixed largely by competition. Steamer Lines Norfolk to Baltimore and Other Points, 41 I. C. C. 285. 294.

(3h) In the natural and orderly course of procedure, several months may elapse between the time when the water competition manifests itself and the time when the rail carriers can make effective such rail rates as are necessary to meet

this competition. Transcontinental Rates 46 I. C. C. 236, 244.

(3i) A water service which for one cause or another has been established may have been effective at some period in the past in reducing rail rates to a level lower than they otherwise would have been, but there may not be at present any likelihood of the restoration of that service although some of the facilities for the service are still in existence. Transcontinental Rates, 46 I. C. C. 236, 246.

(3j) Rail carriers, under ordinary circumstances, can not maintain a level of rates between the Atlantic and Pacific coasts, between the north Atlantic ports and ports on the south Atlantic or Gulf coast or between points on the Pacific coast that will be successful in securing any considerable amount of traffic in competition with the water carriers without fourth section relief. Transcontinental Rates. 46 I. C. C. 236, 268.

(3k) The enormous amount of shipping that nas been destroyed and the great demand for ships on account of the internment of some and the use of many others for purposes connected with the prosecution of the war have created an actual present world shortage of ocean-going steamships. Transcontinental Rates, 46 I. C. C. 236, 267.

(3l) The degree of competition as to water-borne traffic lies in the rates of the water carriers rather than in the continuity of the water service or the volume of water-borne tonnage. Nor can it be denied that points having direct single-line routes to and from river crossings, gateways, and ports and the service of a larger number of carriers having diverse connecting routes, possess the advantage of competitive forces which are lacking or are found in less degree at a point which has no direct single-line routes to or from the ports and is served by fewer rail lines. Tuscaloosa Board of Trade v. A. G. S. R. R., 47 I. C. C. 483, 501.

(3m) A rate originally established to meet water competition, was advanced under fourth section permission of the Commission. Complainant contended the last paragraph of section 4 of the Act to Regulate Commerce was violated in that the rates were increased without a specific hearing before the Commission and because no showing was made that the increase was published for reasons other than the elimination of water competition. The permission given by the Commission to the carriers to increase by 10c per 100 pounds on carload freight, the rates to the coast terminal points was based upon the showing made in 40 I. C. C. 35. It can not therefore fairly be said that these rates were published without a hearing. There is no requirement in the clause of the fourth section quoted that the hearing therein required shall follow rather than precede the filing of the tariff. Moreover, the permission given by the Commission to increase these rates was not more, in effect, than a modification of its previous orders under the fourth section in the series of cases cited, a procedure which is specifically provided for by the Act, with or without a further hearing. The Commission was still acting in this general proceeding when it declined in its best judgment upon the whole situation, to suspend these increased rates. Again, the fourth section itself specifically gives the Commission authority to prescribe from time to time the extent to which relief from the provisions of that section may be granted. Furthermore, the clause of the fourth section quoted is inapplicable to the situation here presented, where, after hearing, the Commission authorized a reduced rate at water competitive points and subsequently, conditions having changed, after due hearing authorized a higher rate. It should also be borne in mind that there is here no final elimination of water competition such as the Act contemplates. There is merely a diminution and suspension of that influence, due primarily to the war. Possibly under the stimulus of business initiative and the necessities of commerce, it will reappear to an even greater extent than heretofore when conditions again become normal. Marshall Wells Hardware Co. v. S. P. & S., 53 I. C. C. 684, 685.

(3n) There is now sufficient transportation by water and ample indication that it will further develop and increase, to warrant the belief that with in a comparatively short time it will reach a point where it will be felt in a serious loss of tonnage by the rail lines unless they have available appropriate measures to meet the situation. Intermediate Rate Association v. Director General, 61 I. C. C. 226, 244.

(3o) Water competition should affect like rates similarly to all points in the same general territory. Douglas Cham-

ber of Commerce v. A. T. & S. F. Ry. Co., 64 I. C. C. 405, 410.

(3p) Equality of opportunity may be defined as such an adjustment of rates as would cause a business man, under ordinary circumstances, to reach the conclusion after considering service and rates that he would ordinarily be as willing to send traffic by water as by rail, or vice versa. Transcontinental Cases of 1922, 74 I. C. C. 48, 56.

(3q) It is not necessary to have the same rate by water as by rail to afford the two sets of carriers equality of opportunity from any given point of shipment. The slower service, the necessity for making arrangements for transshipment at the ports, the irregularity of ship movements, special requirements as to marking, and other considerations operate to the disadvantage of the water lines. Transcontinental Cases of 1922, 74 I. C. C. 48, 60.

(3r) The fact that there is a water route from a given point to a certain destination, affording a low and reasonable rate, does not justify the Commission in permitting the rail carriers to charge a high and unreasonable rate on traffic between these points. S. P. Co. v. I. C. C., 219 U. S. 433, 451, 21 Sup. Ct. 288, 55 L. ed. 283.

C. 236, 243, 253, 274; Direct Navigation Co., 46 I. C. C. 378, 379; Louisiana Cotton 46 I. C. C. 451, 454; Buffalo Grain Cases, 46 I. C. C. 570, 573; New Orleans Cotton Exchange v. L. & N. R. R., 46 I. C. C. 712, 736; Michigan Percentage Cases, 47 I. C. C. 409, 443, 444; National Utilization Corporation v. B. & A. R. R., 47 I. C. C. 467; Helena Traffic Bureau v. M. P. Ry., 48 I. C. C. 307, 309, 310, 311; Traffic Bureau of Knoxville, Tenn. v. B. & O. R R. 49 I. C. C. 205, 223, 224; Mayfield & Graves County Commercial Club v. I. C. R. R., 49 I. C. C. 521; Natchez Chamber of Commerce v. Y. & M. V. R. R., 49 I. C. C. 700, 706; Richmond Oil

Co., Inc. v. A. C. L. R. R., 50 I. C. C. 213, 216; Steamer Lines on Long Island Sound, 50 I. C. C. 634, 644; Aetna Explosive Co. v. S. A. L. Ry., 51 I. C. C. 674, 676; Earle Cooperage Co. v. St. L., I. M. & S. Ry. Co., 53 I. C. C. 295, 301; Williar v. S. P. Co., 53 I. C. C. 338; Memphis Southwestern Investigation, 55 I. C. C. 515, 529, 562, 564, 565; Chamber of Commerce of Montgomery v. Director General, 57 I. C. C. 610, 619; Helena Traffic Bureau v. S. L. I. M. & S., 57 I. C. C. 11-18; Application of United States Steel Products Co., 57 I. C. C. 513, 516; Natchez Chamber of Commerce v. L. & A., 58 I. C. C. 610, 616; Crown Willamette Paper Co. v. Director General, as Agent, 78 I. C. C. 273; Anson, Gilkey & Hurd Co. v. S. P. Co., 78 I. C. C. 495, 511; Inland Crystal Salt Co. v. B., A. & P. Ry. Co. 78 I. C. C. 659, 663; Elem Coal Co. v. L. V. R. R. Co., 80 I. C. C. 647.

§14. (6) Wagon and Motor Truck Competition.

See Wagon Competition.

CASES 1887-1908

(a) Neither joint traffic nor an arrangement by the carriers with a wagon transportation company extending through lines to points not reached by railroads constitute substantially dissimilar circumstances and conditions, nor make them joint carriers with such transportation company, so as to justify less charges to such points reached by wagons than upon the same goods from the point of origin to the point where wagon transportation commences. Cary v. Eureka Springs R. Co., 7 I. C. C. 286.

IMPORTANT CASES SINCE 1908

(b) And the Commission has recognized motor truck competition by permitting carriers to reduce rates on gasoline and fuel oil lower than those prescribed in the Shreveport case, in order to meet such competition and keep traffic to the rails. Railroad Commissioners of La. v. A. H. T. Ry. Co., 64 I. C. C. 197.

(c) The Panama Canal amendment to section 5 of the interstate commerce act is a part of a public statute and passed in the public interest. It has been found that the ownership and operation of boat lines by rail lines had retarded and stifled competition on routes by water in the interest of the rail lines, and it was to prevent this evil and permit the development of water-borne commerce in the interest of the public that the amendment was passed. S. P. Co. Ownership of Atlantic S. S. Lines, 77 I. C. C. 124, 128.

(d) Competition now exists between steamship lines operating through the Panama Canal and the railroads generally. Application of United States Steel Products Co., 77 I. C. C. 685, 686.

Comley Lumber Co. v. C. & S. Ry. Co., Unrep. Op. 1829; Merchants Exchange of St. Louis v. C. & A. R. R. Co., 36 I. C. C. 268, 269; Corp. Comm. of Oklahoma v. A. T. & S. F. Ry. Co., 38 I. C. C. 33, 35; Capital City Oil Co. v. Y. & M. V. R. R. R. Co., 39 I. C. C. 141, 145; Southwestern Class Case, 48 I. C. C. 379, 385.

§14a. Consolidation of Carriers.

See Consolidation of Carriers.

CASES 1887-1908

(a) The acquisition and consolidation by a rail carrier under one system of management of different competing lines of road serving the same territory in the carriage of competitive traffic to the same markets, cannot create a right on the part of the carrier to take advantage of the consolidation of interests to deprive the public of the benefits of fair competition nor afford warrant for oppressive discrimination with a view to its own interests, such as equalizing profits from its several divisions, by making rates and charges for one division that give profitable markets to a portion of its patrons, and higher rates and charges for another division that are destructive to the pursuits of other patrons who are competitors in the same business; but its duty to the public requires that its service must be alike to all who are situated alike. Rice Robinson & Witherop v. W. N. Y. & P. R. R. Co., 3 I. C. C. 162, 166.

§15. Contract Relying on Rate.

IMPORTANT CASES SINCE 1908

(a) A contract based on a lower rate existing before an advance is no ground alone for condemning such advance. Barnum Iron Works v. C. C. C. & St. L. Ry. Co., 18 I. C. C. 94; American Creosote Works v. I. C. R. R. Co., 18 I. C. C. 212.

(b) The Commission is not concerned with conditions of purchase and sale agreed upon between parties except as they may have shifted from one to the other a part or all of transportation charges. Hygienic Ice Co. v. C. & N. W. Ry. Co., 37 I. C. C. 384, 388.

ALL OTHER CITATIONS

Chattanooga Sewer Pipe & Fire Brick Co. v. A. G. S. R. R. Co., Unrep. Op A-450; Stonega Coke & Coal Co. v. L. & N. R. R. Co., 39 I. C. C. 523, 549; Chattanooga Implement & Mfg. Co. v. L. & N. R. R. Co., 40 I. C. C. 146, 149; California Pine Box & Lumber Co. v. S. P. Ry., 47 I. C. C. 372, 377.

§15½. Cost Computations.

See Infra §17; Cost Accounting; Weights and Weighing II.

CASES 1887-1908

(a) The fact that the cost of carriage of all coal upon an entire railroad system, from all points of shipment to all destinations, is a certain per cent of the gross receipts from all coal, is no reason for concluding that upon a particular line or part of the system the cost of carriage bears the same ratio to the coal receipts of that particular line or part. Interstate Commerce Commission v. Lehigh v. R. Co., 5 I. C. R. 643.

(b) Where on shipments of strawberries and vegetables from Charleston, destined for New York, delivery is made by the roads at the terminus of the rail line in Jersey City, in computing the total cost of transportation to New York, the expense of carriage over from Jersey City is to be added to the rate charged to that point. Truck Farmers' Assn. v. Northeastern R. R. Co., et al. 6 I. C. C. 295.

(c) In computing the total cost of transportation to New York on shipments of strawberries and vegetables from Charleston, where complaint is made that the carrier's rates are exorbitant, the expense of carriage from the terminus of railway line in Jersey City, by which route the shipment was made, is to be added to the rate charged to that point. Phelps v. Texas & P. R. Co., 6 I. C. C. 36.

IMPORTANT CASES SINCE 1908

(d) Freight paying less than 3 mills per ton-mile is looked upon by carriers as perhaps paying less than the actual out-of-pocket cost. Fourth Section Violations in the Southeast, 30 I. C. C. 153, 176.

(e) What weight to give to the cost factor depends upon the particular case. In re Separation of Operating Expenses, 30 I. C. C. 676, 678.

(f) Length of haul and volume of traffic are among the determining factors in arriving at cost. In re Separation of Operating Expenses, 30 I. C. C. 676, 681.

(g) The problem of estimating the cost of transporting specific commodities is at best in a developmental stage. 1915 Western Rate Advance Case, 35 I. C. C. 497, 561.

(h) One of the principal criticisms directed to cost computations is that it is impossible to allocate or separate accurately expenses which are chargeable to freight service and passenger service, respectively. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 350.

(i) It should not be necessary to tear a rate apart in order to determine what proportion of it was intended as compensation for each distinct service performed. Ordinarily the costs of the separate services may be ascertained with reasonable accuracy and if separate charges commensurate therewith are established the task of keeping each charge at the standard of reasonableness will become greatly simplified. Under such a practice the shippers, the carriers, and the Commission could avoid an analysis of the whole rate and many different services in order to determine whether too much or too little was being charged for certain service. Iron Ore Rate Cases, 41 I. C. C. 181, 203.

(j) The equalization of cost theory of rate making is unsound and impracticable. To fix a rate on one commodity that is less than reasonable and a rate on another commodity that is more than reasonable, when such commodities are transported by different carriers, would be a manifest discrimination as between the carriers. Each carrier is entitled to charge a reasonable rate on each commodity transported; and the Commission can not sanction any method of rate making that results in subordinating these basic principles to the equalization of manufacturing costs through the adjustment of freight rates on raw material. Iron Ore Rate Cases 41 I. C. C. 181, 214.

(k) The cost per engine hour suggested by the Commission as a basis for determining what will be a reasonable charge for the service performed by carriers on private industry tracks, such charges to be fixed, in proposed schedules of the carriers at a stated amount per ton or per car for each furnace so serv-

Iron Ore Rate Cases, 41 I. C. C. 1[illegible] 221.

(l) The Commission has usually found the engine hour a safer guide than cars handled for making a separation of costs of switch service. Aluminum Company v. Massena Terminal R. R. Co., 69 I. C. C. 119, 123.

(m) Cost studies are at best only estimated, the accuracy of which could be tested only in practice, with the possibility of harmful results. Limestone from Illinois Points, 89 I. C. C. 11, 14.

ALL OTHER CITATIONS

Coal Rates from Virginia Mines, 30 I. C. C. 635, 646, 649; Rates on Bananas from Gulf Ports, 30 I. C. C. 510, 518; Proposed Bond Issue by N. Y. C. & H. R. R. R. Co., 30 I. C. C. 147, 151; In re Separation of Operating Expenses, 30 I. C. C. 676, 679, 680; Rates on Asphaltum, Barley, Beans and Canned Goods, 33 I. C. C. 480, 485; Lum. v. G. N. Ry. Co., 33 I. C. C. 181, 189; The Fifteen Per Cent Case, 45 I. C. C. 303, 321; Milk and Cream Rates to Philadelphia, Pa., 45 I. C. C. 371, 382; C. F. A. Territory Milk and Cream Rates, 46 I. C. C. 601, 613; Western Pine Manufacturers Association v. C. I. & W. R. R. Co., 46 I. C. C. 650, 654; Western Cement Rates, 48 I. C. C. 201, 251; City of East Liverpool, Ohio, v. S. E. L. & B. V. T. Co., 51 I. C. C. 563, 567; Increased Rates, 1920, 58 I. C. C. 220, 223; Illinois Northern Ry., 61 I. C. C. 629, 633; Construction and Repair of Ry. Equipment, N. Y. C. R. R. Co., 66 I. C. C. 732, 747; Aluminum Company v. Massena Terminal R. R. Co., 69 I. C. C. 119, 123.

§16. Cost of Production.

See Infra §17; Classification §17 (4).

IMPORTANT CASES SINCE 1908

(a) The fact that the cost of producing wool has increased while its market price has fallen is no reason why less than a reasonable freight rate should be established for its transportation. In Re Transportation of Wool, Hides and Pelts, 23 I. C. C. 151, 156.

(b) The mere fact that complainants, because of outstanding contracts, were required to purchase their supply of pig iron at particular points can not be held to put a carrier under the obligation of moving the pig iron at less than a reasonable rate. Chattanooga Implement & Mfg. Co. v. L. & N. R. R. Co., 40 I. C. C. 146, 149.

(c) Commercial advantages and disadvantages arising from variations in costs of production are not factors that can have any great consideration by the Commission in reaching conclusions as to the propriety of rate structures. Standard Oil Co. v. Director General, as Agent, 66 I. C. C. 37, 40.

(d) Every item of cost which does not diminish with decreased production, i. e., which is properly a fixed charge, will increase the total amount of damage resulting from enforced curtailment of production through prejudicial distribution of cars; whereas every item of cost which does diminish with decreased production, i. e., which is properly a variable charge, will reduce the total amount of damage. Avella Coal Co. v. P. & W. V. Ry. Co., 77 I. C. C. 736.

ALL OTHER CITATIONS

Reconsignment and Storage of Lumber and Shingles, 27 I. C. C. 451, 454; Pardee Works v. C. R. R. Co. of N. J., 29 I. C. C. 500, 502, 503; Grain Rates in C. F. A. Territory, 28 I. C. C. 549, 559; The Illinois Coal Cases, 32 I. C. C. 659, 672, 673; Nix & Co. v. S. Ry. Co., 35 I. C. C. 145, 147; Coal and Oil Investigation, 31 I. C. C. 193, 195; Lumber Rates, Southern Ry. Points to Eastern Points, 31 I. C. C. 244, 250, 252; Eastern Fruit Growers Asso. v. B. & O. R. R. Co., 33 I. C. C. 343, 345; Northern Pine Mfrs. Asso. v. C. & N. W. Ry. Co. 33 I. C. C. 360, 362; San Toy Coal Co. v. A. C. & Y. Ry. Co., 34 I. C. C. 93, 95; Live Stock Rates from Colorado Points to Omaha, 35 I. C. C. 682, 687; Southern Rice Growers' Asso. v. T. & N. O. R. R. Co., 43 I. C. C. 90, 93; Eastern Shore of Virginia Produce Exchange v. A. & St. L. R. R., 50 I. C. C. 436, 444.

§17. Cost of Operation.

See Infra §18; Advanced Rates §7 (2), §10, §11; Reasonableness of Rates §9; Transportation §14.

CASES 1887-1908

(a) Difference in cost of service may justify reasonable difference in rates, Rice v. Louisville & Nashville R. R. Co., 1 I. C. R. 725.

(b) Extraordinary or unnecessary costs of operation or management of the traffic of a carrier cannot be permitted to excuse unreasonable or unjust rates, discriminations, preferences or prejudices. Milk Producers' Protective Asso. v. Delaware, L. & W. R. Co., 7 I. C. C. 92.

IMPORTANT CASES SINCE 1908

(c) Everything else remaining the same, an increase in cost of operation would justify an advance in rates. Other things remaining the same, increase in traffic requires a decrease in rates. It may, therefore, happen that the increase of traffic will more than offset the increase in operating expense. Cattle Raisers' Ass'n of Texas v. M. K. & T. Ry. Co., 13 I. C. C. 418, 430.

(d) There is no standard by which either the cost of the service or the reasonableness of creamery rates can be fixed with any certainty. Beatrice Creamery Co. v. I. C. R. R. Co., 15 I. C. C. 109, 132.

(e) The Commission does not recognize the right of a carrier to single out a piece of expensive road and make the local traffic thereon bear an undue portion of the expense of its maintenance or of its construction. A road is built and operated as a whole and local rates are not to be made with respect to the difficulties of each particular portion charging the cost of a bridge to the traffic of one section or the cost of a tunnel to traffic between its two mouths. Upon the S. P. Co. millions of dollars have been expended in building the Lucine cut off just west of Ogden, a monumental bit of construction which traverses the Great Salt Lake. If rates from one side of the lake to the other were based upon the cost of this cut-off they would be unconscionable. If the position of the defendant were followed by the carriers generally (which it is not, nor even by itself) it would result in rates that would vary from mile to mile as the cost of road per mile varies. Traffic Bureau of Merchants Exchange v. S. P. Co., 19 I. C. C. 259, 261.

(f) The operating officials of the Central Pacific Railroad testified that the road was now doing the maximum business which could be done economically. In other words that an increase in business would add to the expense per unit of operation. Not being in a position to urge that a reduction in rates was unjustifiable because of the lightness of its traffic, the defendant here contends that the Commission would not be justified in reducing the rate because business would increase and the expense of performing the service would increase. The contention seems to be that the Commission must not reduce the rate when the traffic is light, and when the traffic is heavy it must not reduce the rate because it will increase the cost of operation. Traffic Bureau of Merchants Exchange v. S. P. Co., 19 I. C. C. 259, 263.

(g) In determining reasonable rates to be charged by the carrier, the fact that the cost of operation has increased and will increase in proportion to gross operating revenue is not important, because even though the percentage of net to gross is less, still the total net may be more, and the percentage of net to value may also be more. The question to be determined is whether the net return upon the value of the property devoted to the public service is sufficient. In Re Advances in Rates—Eastern Case, 20 I. C. C. 243, 275.

(h) In combating a general advance in rates in Official Classification territory the shippers contended that by the use of "scientific management" $300,000,000 annually could be saved by the proper application of these methods to the business of railroading in the United States. The witness who testified to this stated that such methods were not in actual operation in over 1-10th of 1 per cent of all the manufacturing establishments in this country. HELD, the system is everywhere in an experimental stage and the Commission cannot find that the defendants could make good any part of the actual advances in wages by the introduction of scientific management. In Re Advances in Rates—Eastern Case, 20 I. C. C. 243, 279.

(i) Certain portion of a system of railroad cannot be segregated from the whole and the expenses and earnings charged and credited to such portions on a mileage pro rata basis. In Re Investigation of Advances in Rates on Grain, 21 I. C. C. 22, 25.

(j) It is unfair to take from the carrier whatever of profit it may secure by reason of improvement in its plant

and adoption of the most modern methods. If our railroad systems are to remain in private hands, stimulus must be given to the initiative and imagination of railroad operators. The community may not take with justice whatever comes by the labor or time saving devices adopted by those who serve the public, nor may the carriers absorb the profits of the shipper resulting from similar efforts. In Re Advances on Coal to Lake Ports, 22 I. C. C. 604, 625.

(k) If additional business can be taken on by the carriers at rates which will contribute at least a little in addition to the actual out-of-pocket expense, the carrier will be advantaged to that extent and all its patrons will be benefited to the extent to which such traffic contributes to the net revenue. Without the amount of net contributed by this clas of traffic, assuming a certain amount of revenue to be necessary, such revenue must be contributed entirely by the remaining traffic, and the exclusion of this competitive traffic would increase the burden upon the other traffic to a corresponding extent. Boileau v. P. & L. E. R. R. Co., 24 I. C. C. 129, 132.

(l) Analysis of operating expenses of railroads have been, and can be, made with substantial accuarcy, and whatever defects may still inhere in such processes do not negative the guiding value of the statistical results arrived at. Pittsburgh Vein Operators of Ohio v. Penn. Co., 24 I. C. C. 280, 285.

(m) The Commission fully realizes the limitations of calculations based on the cost of operation with respect to a particular commodity, but also appreciates their intrinsic value. Pittsburgh Vein Operators of Ohio v. Penn. Company, 24 I. C. C. 280, 285.

(n) The principle of cost of operation in determining the reasonableness of rates is vital, even though its application is still subject to much improvement in certain details. Pittsburgh Vein Operators of Ohio, v. Penn. Co., 24 I. C. C. 280, 285.

(o) That trains are broken at a given point seems to be of probative value in determing the reasonableness of a rate. Johnson & Son v. C. & O. Ry. Co., 24 I. C. C. 698, 701.

(p) Cost is an important element in determining reasonableness of freight rates, but it is not controlling. L. & N. R. R. Coal & Coke Rates, 26 I. C. C. 20, 27, 29.

(q) If the carrier does not see proper to make improvements that will reduce the cost of operation, it cannot claim that it may raise rates because cost approaches or overtakes revenue. Louisville & Nashville Railroad Coal & Coke Rates, 26 I. C. C. 20, 26.

(r) A one line haul is highly desirable from the carrier's point of view. Rates from Walsenburg Coal Field, 26 I. C. C. 85, 88.

(s) Statements of increased cost of transportation can have little weight when presented in the abstract with no attempt to consider corresponding reductions resulting from greater efficiency. Hormel & Co. v. C. M. & St. P. Ry. Co., 26 I. C. C. 112, 114.

(t) And the cost of construction is an element to be considered in determining the reasonableness of a rate. Union Tanning Co. v. S. Ry. Co., 26 I. C. C. 159, 164.

(u) An increase in capacity tends to increase gross revenue per car or per train and to decrease operating cost per unit of freight. Memphis Freight Bureau v. L. & N. R. R. Co., 26 I. C. C. 402, 405.

(v) The general progress throughout the country in the higher tractive power of engines, larger cars and trains, elimination of curves and grades and other economies which tend to greater efficiency have been peculiarly reflected in the transportation of coke. Coke Producers Asso. of Connellsville v. B. & O. R. R. Co., 27 I. C. C. 125, 147.

(w) Maintenance of way and structure and train-mile expenses may be considered in passing upon the reasonableness of a rate. Standard Mirror Co. v. P. R. R. Co., 27 I. C. C. 200, 208.

(x) Cost of betterments charged to operating expenses no justification for increase in rates. New York Butter and Cheese Rates, 28 I. C. C. 330, 331.

(y) Increased tractive power of locomotives is significant as tending to reduce the operating cost per unit of freight transported. Traffic Bureau of Nashville v. L. & N. R. R. Co., 28 I. C. C. 533, 535.

(z) Allowances to and free services for proprietary industries have materially increased operating expenses of carriers. Industrial Railways Case, 29 I. C. C. 212, 217.

(aa) Weather interference is an ele-

ment to be considered in determining cost of handling traffic. Youngstown Sheet & Tube Co. v. P. & L. E. R. R. Co., 29 I. C. C. 428, 435.

(bb) It is not proof of extravagance that a carrier, operating through a mountainous and sparsely settled country, and having a roadbed upon which there are short curves and steep grades, has a higher operating expense than another carrier in the same general territory having no such transportation difficulties. Railroad Com. of Arkansas v. M. & N. A. R. R. Co., 30 I. C. C. 488, 491.

(cc) A portion of the increase in maintenance charges is due to safety-appliance acts, boiler inspection laws, state legislation requiring the elimination of grade crossings and other enactments. These laws, to no small extent, enforce measures of precaution which the carriers ought to take and which they would voluntarily have taken in many particulars in pursuance of sound railway policy and practice. It is nevertheless true, that in many cases they have had the effect of hastening improvements in equipment and roadway that would have come later, and of burdening the maintenance expenses of the years in which the improvements were made. Wise policy requires that a railway property should be kept up to the level of its highest reasonable efficiency at all times; and the postponement of needed repairs, either in road or equipment because of a temporary falling off in revenues cannot be justified or be regarded as true economy. The Five Per Cent Case, 31 I. C. C. 351, 381.

(dd) Fuel, next to wages, is the largest item in operating expense of railroads. Five Per Cent Case, 31 I. C. C. 351, 412.

(ee) Railroad properties should be kept in a high state of efficiency and freight rates should be sufficiently remunerative to permit it. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 283.

(ff) Operating ratio can be used as an index of the relative prosperity of carriers only after due allowance is made for other factors which might qualify the showing which the operation indicates on its face. 1915 Western Rate Advance Case, 35 I. C. C. 497, 505.

(gg) The operating ratio for any year as that term is technically employed in the Commission's statistics, is the ratio of that year's operating expenses to operating revenues. From the standpoint of the railway corporation it may be not unappropriate to assimilate taxes and rentals to operating expenses, as all are costs which must be paid out of gross revenue. In gauging the profitableness of the railroad industry, therefore, the inclusion of taxes and rentals along with operating expenses may more accurately mirror its situation than the use of the operating ratio in the sense above defined. At all events, no confusion of thought is involved if in comparing various operating ratios they are all based upon the same method, either excluding or including taxes and rentals in all cases. It is almost a commonplace to say that the operating ratio can be used as an index to the relative prosperity of carriers only after due allowance is made for other factors which might qualify the showing which the operating ratio indicates upon its face. The ratio shows the number of cents out of each dollar of operating revenue which is charged to operating expenses and thus indirectly the amount treated as net operating revenue. An increased operating ratio is combatible with increased net return upon investment where, without corresponding increase in the carries' investment, the gross revenues rise and still afford a larger net revenue over the contemporaneously increased expenses of operation. 1915 Western Rate Advance Case, 35 I. C. C. 497, 505.

(hh) A number of factors such as unusual expenses incurred by reason of floods or washouts or occasioned by the shrinkage of heavy traffic and to strikes or the cessation of shipments from industries of large output, such as coal mines, might indicate by the rise in the operating ratio a depression in the prosperity of the carrier, which would be as transient as the causes which may for the time being have raised the operating ratio. Another factor which may easily alter the operating ratio is a change in accounting. Should a new method of accounting make charges to operation not theretofore customary, such as allowances for depreciation, or more generous apportionments for maintenance than were formerly in vogue, the effect might be reflected in an increased operating ratio. Such an increased ratio would in reality mirror not a decline in

the carriers' prosperity, but merely an addition to the list of operating expenses. 1915 Western Rate Advance Case, 35 I. C. C. 497, 506.

(ii) Changes in the operating ratio are due to variation of expenses or in revenues. It is consequently of importance to determine the influences which have operated, respectively, upon the level of earnings and expenses. 1915 Western Rate Advance Case, 35 I. C. C. 497, 509.

(jj) Carriers in meeting increased costs with increased prices for service are subject to certain disabilities not similarly encountered by many other industries. 1915 Western Rate Advance Case, 35 I. C. C. 497, 540.

(kk) Economy of operation is promoted by heavier loading, and the whole public benefits by economies that reduce the cost of transportation. 1915 Western Rate Advance Case, 35 I. C. C. 497, 575.

(ll) Where there is not sufficient traffic to utilize the full tractive power of a locomotive, a train may move which does not require the rated engine capacity; but where the traffic is sufficient to require the full locomotive capacity the greater the number of cars in which the tonnage is distributed, and consequently the greater the tare weight, the less the revenue freight that an engine can draw. 1915 Western Rate Alvance Case, 35 I. C. C. 497, 582.

(mm) Neither competition nor unreasonable demands of the public must be made the excuse for waste and extravagance. Western Passenger Fares, 37 I. C. C. 1, 34.

(nn) The meeting of bond maturities can not be considered an item of operating expense. Marion & Eastern R. R. Co. v. C. & E. I. R. R. Co., 68 I. C. C. 17, 19.

(oo) Operating ratios are of value as showing trends in comparisons between carriers, but their use to show an alleged out of pocket cost can not be sustained. Joint Rates and Fares of M. & N. A. R. R., 68 I. C. C. 47, 56.

(pp) The use of operating ratios derived from all traffic for adjustment of a part of the traffic without consideration of that part of the business to which the adjustment is not to be applied leads to erroneous conclusions. Divisions of Joint Rates and Fares of M. & N. A. R. R., 68 I. C. C. 47, 57.

(qq) Low density of tonnage together with difficult operating conditions have resulted in high operating costs for the Tennessee Central R. R. Murfreesboro Board of Trade v. L. & N. R. R. Co., 73 I. C. C. 228, 230.

(rr) A road is operated as a whole, and an inquiry as to whether it is economically and efficiently operated must of necessity be directed to the manner of its operation as a complete unit. Nevada Public Service Commission v. S. P. Co., 73 I. C. C. 240, 246.

(ss) The expense incident to the maintenance of through service may not be justified by the amount of traffic secured. Hamilton v. American Express Co., Unrep. Op. 355.

(tt) Light local freight trains, making numerous stops and doing local switching, burn relatively more fuel than a heavy through ore train, though their light tonnage causes less wear and tear on tracks. Adriatic Mining Co. v. C. & N. W. Ry. Co., 78 I. C. C., 611, 627.

C. 240, 246.

§18. Cost of Service.

See Advanced Rates §7 (2); Reasonableness of Rates §9, §19.

CASES 1887-1908

(a) While cost is an element to be taken into account in the fixing of rates, and one of the very highest importance, it cannot, for reasons well understood, be made the sole basis, but it must in any case be used with caution and reserve, as it is quite impossible to apportion with accuracy the cost of service among the items of traffic. Re Southern Ry. & Steamship Company, 1 I. C. C. 278, 282.

(b) Cost of service is always an im-

portant element in the fixing of rates. In proportion to amount and to the distance it is transported the cost of local traffic to the carrier is considerably the greater. This fact fairly establishes in favor of the carrier an equity entitling it to make for the more onerous service a greater proportionate charge. Re Southern Ry. & Steamship Asso., 1 I. C. C. 278, 282.

(c) The element of cost of service which may at one period have been recognized as controlling in fixing rates has long ceased to be regarded as the sole or the most important factor for that purpose. The value of the service with respect to the articles carried, the volume of business, and the conditions and force of competition are justly considered to have controlling weight in determining the charges for transportation. Boston Chamber of Commerce v. L. S. & M. S. R. R., 1 I. C. C. 754, 760.

(d) In making rates the cost of service is an element, but not the only one or the most important. The value of the service is generally regarded as the most important factor in fixing rates. Imperial Coal Co. v. P. & L. E. R. Co., 2 I. C. C. 436, 442.

(e) The cost of railway transportation is made up of the expense of the two terminals, and the intermediate haul and the terminal expenses are the same whether the haul be long or short. A few miles, or even a considerable number of miles, of additional haul may in some instances of long distance transportation be practically of very little importance, and the ratio of tonnage cost per mile diminishes with distance. McMorran v. G. T. R. R. Co., 2 I. C. C. 604, 607.

(f) The difference in cost of transportation of various classes of freight is so variable that the average on all affords little assistance in ascertaining what is reasonable for carrying the very low grades which are moved so much below the average cost. James & Abbott v. V. & Ga. R. R., 2 I. C. C. 609, 614.

(fa) Cost of service is an important element in fixing transportation charges and entitled to fair consideration, but is not alone controlling. Thurber v. New York C. & H. R. R. Co. (Com.) 2 I. C. R. 742.

(g) Cost of service is an important element in fixing transportation charges and entitled to fair consideration, but is not alone controlling nor so applied in practice by carriers, and the value of the service to the property carried is an essenital factor to be recognized in connection with other considerations. The public interests are not to be subordinated to those of carriers, and require proper regard for the value of the service in the apportionment of all charges upon traffic. Thurber v. N. Y. C. R., 2 I. C. C. 742, 753.

(h) The commission has never understood that mileage or cost of service alone, regardless of other conditions, should be the controlling factors in determining the lawfulness of rates. Lehmann Higginson & Co. v. S. P. Co., 3 I. C. C. 80, 87.

(ha) The transportation of traffic under circumstances and conditions that force a low rate for its carriage or an abandonment of the business, but which affords some revenue above the cost of its movement, and works no material injustice to other patrons of a carrier, is to be deemed legitimate competition. When, however, its carriage is at a loss and imposes a burden on other traffic and on like traffic at other points, it is to be deemed destructive and illegitimate competition. Lehmann, Higginson & Co. v. S. P. Co., 3 I. C. C. 80, 91.

(i) Charges for transportation service should have reasonable relation to the cost of production and to the value of the service to the producer and shipper, but should not be so low on any as to impose a burden on other traffic. Rates and charges on Food Products 3 I. C. R. 93.

(j) The generally recognized principle that cost of carriage is in inverse ratio to distance, and that therefore the charge per ton per mile should diminish with distance is not a rule required by the statute, and is subject to qualifications and exceptions. Manufacturers & J. Union v. Minneapolis & St. L. R. Co. (Com.) 3 I. C. R. 115.

(k) According to the evidence, the cost of service is far less expensive to the carrier in doing the through business than in doing separately, each for itself, the combined local business of the two railroad companies. It does not appear that the through rate to Boston is unreasonably low; nor does it appear upon the evidence in this

proceeding that the local rates of these two railroad companies are unjust and unreasonable. King & Co. v. N. Y. N. H. & H. R. Co., 3 I. C. R. 273.

(l) Rates should bear a fair and reasonable relation to the antecedent cost of the traffic as delivered to the carrier and to the commercial value of the traffic but it is incumbent upon parties invoking this rule to make satisfactory and reliable proof as to such antecedent cost and commercial value. Loud v. South Carolina R. Co., 4 I. C. C. 205, 211.

(m) Higher rates are not shown to be unreasonable by the fact that lower rates are more than cost of service. Section 1 provides that all charges for the transportation of property, etc., shall be reasonable and just. There is no evidence to justify a finding that the rates charged to the shorter-distance points in this case are unjust and unreasonable in and of themselves. The mere fact that the lower rates which are charged to a long-distance competitive point pay something above the cost of the service of carriage does not show that the shorter-distance rates are unreasonable. The rates to the shorter-distance points in this case are made up of a highly competitive rate from point of shipment to Chattanooga, added to a local rate to destination fixed by the Georgia Railroad Commission. The rates in question, when separately considered, are not unreasonable or unjust. On the contrary, the testimony is that each is reasonable of itself. Citing: Interstate Commerce Commission v. Alabama Midland R. Co. 41 U. S. App. 453, 74 Fed. Rep. 723, 5 Inters. Com. Rep. 685. Interstate Commerce Commission v. Western & Atlantic R. R. Co., 8 I. C. C. App. XIII.

(n) Where the difference in cost or character of service are substantial, either in the work performed by the carrier or in its utility and value to the person served, a fair relation of rates meets the carriers obligation. Carr v. N. P. Ry., 9 I. C. C. 1, 11.

(o) In determining the rates to be charged for transportation, cost of service is one of the principal elements to be considered, but it is not and should not be considered as a controlling element. Glade Coal Co. v. B. & O. R. Co., 10 I. C. C. 226, 250.

(p) In the adjustment of rates as between places on its lines, a carrier cannot rightfully ignore the relative cost of the respective services; but there are other matters equal in importance to that of the cost of service, and often more controlling, which must also be considered; and this includes competition of carriers and competition of markets. S. J. & S. Cannon v. Mobile & O. R. Co., 11 I. C. C. 537.

(q) Cost of service affected by milling in transit. Shiel & Co. v. Ill. Central R. R. Co., 12 I. C. C. 210.

IMPORTANT CASES SINCE 1908

(r) To divide a railroad system into its constituent elements and to require that each shall show a surplus commensurate with that yielded by the business of the system as a whole in justification of a particular rate on one commodity, is not the proper basis upon which to measure the justness of such rate. Board of Trade of Winston-Salem v. N. & W. Ry. Co., 16 I. C. C. 12, 17.

(s) Rates are not fixed solely with reference to a weaker competing line; but the cost of handling traffic over a short and easy line must largely influence the rate. Commercial Club of Salt Lake City v. A.T. & S. F. Ry. Co., 19 I. C. C. 218, 222.

(t) It is more expensive to handle less-than-carload freight. Commercial Club of Omaha v. B. & O. R. R. Co., 19 I. C. C. 397, 401.

(ta) Carriers may not haul a particular class of traffic or traffic for a particular community at less than the cost of the service and recoup themselves from the charges levied against other traffic. Investigation and Suspension Docket 48, 22 I. C. C. 328, 335.

(u) It is not beyond the range of possibility to approximate the cost of carrying freight as distinguished from passengers over a certain division or even the carrying of a certain kind of freight when this constitutes a large portion of a carrier's traffic over such division. Certainly, for purposes of comparison, such cost figures could be ascertained upon any road by the settling of a few questions by this commission, or between the carriers themselves. In Re Ad-

vances on Coal to Lake Ports, 22 I. C. C. 604,615.

(v) A definite and uniform allotment of funds from the charge imposed for the movement of each character of traffic to provide for interest, dividends and surplus is not proper or justifiable, for the plain reason that it entirely abrogates all classification. In Re Advances on Coal to Lake Ports 22 I. C. C. 604, 625.

(w) The rate made by the carrier must be just and reasonable for the service which it gives and should have relation to the cost of that service and the character of the commodity transported. In Re Advances on Coal to Lake Ports, 22 I. C. C. 604, 625.

(x) What weight is to be given to costs is to be determined in each case. It is generally an important element. Boileau v. P. & L. E. R. R. Co., 22 I. C. C. 640, 652.

(y) Cost of service is ascertainable with much more precision and capable of more tangible expression than the value of the service. Nevertheless both cost and value must be considered as well as all other elements entering into a rate. Boileau v. P. & L. E. R. R. Co., 22 I. C. C. 640, 652.

(z) There must finally be an intimate relation between the actual cost of transportation and the rate paid by the public. The cost of carriage is decreased in proportion as the car loading can be increased. In Re Transportation of Wool, Hides and Pelts, 23 I C. C. 151, 166.

(aa) A road should not carry traffic to one point at less than the cost of service, and thus unduly burden other traffic. Chamber of Commerce of New York v. N. Y. C. & H. R. R. R. Co., 24 I. C. C. 55, 75.

(bb) Cost of service is material factor, but not only factor to be considered. Boston Chamber of Commerce v. A. T. & S. F. Ry. Co., 28 I. C. C. 230, 232.

(cc) Increased tractive power of locomotives is significant as tending to reduce the operating cost per unit of freight transported. Traffic Bureau of Nashville v. L. & N. R. R. Co., 28 I. C. C. 533, 536.

(dd) Each branch of service should contribute its proper share. The Five Per Cent Case, 31 I. C. C. 351, 392.

(ee) Operating costs in transporting anthracite coal lower than for most other commodities. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 261.

(ff) Extraordinary expenses attributable to transportation of certain commodities must be considered from standpoint of cost of service and not by adjustments of average revenue. Rates for Transpotation of Anthracite Coal, 35 I. C. C. 220, 262.

(gg) Costs do not determine rates, yet most rates have within them as a constituent the element of cost. Cost is generally an important element in arriving at a judgment with respect to a rate. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 263.

(hh) Cost is generally an important element in arriving at a judgment with respect to a rate. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 263.

(ii) Cost of service per ton mile properly decreases as length of haul increases. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 264.

(jj) Each small shipment requires making out of waybill, an expense bill, and all of the other clerical work required by the ordinary l. c. l. shipment. Regulations as to Storage of Dairy Products, 35 I. C. C. 469,473.

(kk) The time has arrived when carriers can not afford to treat with indifference the cost of services which they perform. Commercial Exchange of Philadelphia v. N. Y. C. & H. R. R. R. Co., 38 I. C. C. 551, 557.

(ll) It should not be necessary to tear a rate apart in order to determine what proportion of it was intended as compensation of each distinct service performed. Ordinarily the costs of the separate services may be ascertained with reasonable accuracy and if separate charges commensurate therewith are established the task of keeping each charge at the standard of reasonableness will become greatly simplified. Under such a practice the shippers, the carriers, and the Commission could avoid an analysis of the whole rate and many different services in order to determine whether too much or too little was being charged for a certain service. Iron Ore Rate Cases, 41 I. C. C. 181, 203.

(mm) It is manifest that if the Commission proceeds to deal with each commodity separately considered on the basis of cost of service alone, ignoring con-

siderations of reciprocity in respect to the whole traffic governed by the lower tariff and the principles underlying it, the result must inevitably be its ultimate disintegration or overthrow. Advances on coal within Chicago switching District. 41 I. C. C. 302, 308.

(nn) The commission has never held, nor does the Act warrant it in holding, that cost of service alone should govern its judgment upon rates, to the exclusion of other important considerations. It is, as has been frequently held, only one of the elements in rate making that must ordinarily be considered. Southeastern Lumber, 42 I. C. C. 548, 555.

(oo) The practice of disregarding the cost of a specific service in constructing rates for long hauls while including it in the rates for shorter distances, may well be accepted as one of the established principles of rate making. N. Y. Harbor Case, 47 I. C. C. 643, 701.

(pp) The practice of disregarding the cost of a specific service in constructing rates for long hauls, while including it in the rates for shorter distances, is such a common one that it may well be accepted as one of the established principles of rate making in this country. It is by no means unusual, for carriers to absorb switching charges when the freight revenue is sufficient to warrant it, and the absorption tariffs usually state the minimum revenue per car which the carrier prescribes in such cases. Transit is frequently accorded without any charge in addition to the through rate when the revenue is sufficient to justify it. An extra charge for a two-mile haul is frequently made when the distances are short, but for longer distances the rate is often the same for a two-line haul as for one over the line of a single carrier. The reason for this general practice is, of course, that when the hauls are long the cost of the specific terminal or switching service is spread over such great distances that the cost of that service per mile is negligible or, in other words, that the cost of that service is so small when compared with the revenue which the carrier derives from the long haul that it can be absorbed without encroaching unduly upon the carrier's earnings. The New York Harbor Case, 47 I. C. C. 643, 701.

(qq) Taking a broad view of the general practice of all of the carriers in this respect, and of its repeated approval by the Commission, it is clearly impossible to conclude that terminal costs must be recognized in the construction of rates for long hauls solely because they are reflected in the rates for shorter hauls. The New York Harbor Case, 47 I. C. C. 643, 702.

(rr) Finding that station costs of $1.77 per ton for handling l. c. l. traffic includes but one handling of the freight, and not for both receiving and delivering such traffic as contended, sustained upon rehearing. R. R. Comm. of La. v. A. H. T. Ry., 48 I. C. C. 312, 320.

(ss) It is impractical and doubtful accuracy to attempt any refinement of the cost beyond the carload unit. A proper distinction could not be made between the class traffic on the one hand and commodity traffic on the other. There are many kinds of commodities as well as many classes. Just because certain traffic moves on a commodity rate does not mean that it is necessarily a lower grade traffic than traffic moving on class rates. Some commodity rates may be and are much higher than some class rates. To attempt such a refinement would necessitate a consideration of the contents of the cars. Distinction would probably have to be made between different commodities and different classes. This is impracticable. Class Rates from C. R. Ry. Stations, 50 I. C. C. 155.

(tt) The cost of transportation, which includes not only the charges paid to the carriers but also the loss and depreciation incident to the transportation, is part of the cost of production and marketing. To decrease this cost benefits the producer and the consumer and tends to increase the total consumption. Kansas Car Lot Egg Shippers Asso. v. B. & O., 53 I. C. C. 59, 63.

(uu) It is recognized that the exact ascertainment of cost of the particular service here in question, is impossible, but it does not follow that the evidence adduced, should for that reason, be rejected. Advance on Coal Within Chicago Switching District, 53 I. C. C. 442, 452.

(vv) Inquiry as to the cost of the service received, especially where rates are increased ostensibly to meet those costs is entitled to serious consideration. Solvay Process Co. v. D. L. & W. R. R., 55 I. C. C. 280, 284, 286.

(ww) A complainant's inquiry of a car-

rier as to the cost of service he receives, especially where rates are increased, ostensibly to meet those costs, is entitled to serious consideration. Solvay Process Co. v. D. L. & W. R. R., 55 I. C. C. 280, 286.

(xx) Morever, while it is conceded that the Commission may not set a maximum scale which fails to cover attested costs, it would not appear unreasonable, in the absence of explicit and comprehensive information, to prescribe a scale approximately equal to indicated costs where the carriers themselves propose a scale differing only by a negligible amount from that prescribed by the Commission and where by universal admission a scale covering not only all costs but the average overhead charges calculated thereon would drive much of the traffic from the carriers lines to other avenues of transportation. Memphis Southwestern Investigation, 55 I. C. C. 515, 531.

(yy) Something more than a generalization that the cost of transportation is less one way than the other is needed to justify a difference of 50 per cent of the rates. Portland Traffic & Transit Assn. v. O. W. R. R. & N., 56 I. C. C. 410, 413.

(zz) Freight rates are based only in part upon cost of service, which usually is known in a vague way. Many other factors are taken into consideration and the rate or rating finally determined by the exercise of judgment. Perishable Freight Investigation, 56 I. C. C. 449, 465, 466.

(3a) Railroad rates making is not an exact science. Freight rates are based only in part upon cost of service, which usually is known only in a vague way. Many other factors are taken into consideration and the rate or rating finally determined by the exercise of judgment. Perishable Freight Service, 56 I. C. C. 449, 466.

(3b) It is impracticable to fit the charges nicely to the cost of service on each particular route, and variations above and below are to be expected. Perishable Freight Investigation, 56 I. C. C. 449, 522.

(3c) Carriers are fairly entitled to a moderate margin over cost as an allowance for the factors of hazard and profit. Perishable Freight Investigation, 56 I. C. C. 449, 522.

(3d) Added cost of operation over mountainous routes, as well as distance, is a factor to be taken into consideration in passing upon the rate structure here in issue. This added cost found to largely offset distance advantage and is not counterbalanced by added density of traffic. Inland Empire Shippers League v. Director General, 59 I. C. C. 321, 337, 338.

(3e) Cost of service includes not only expense of operation but taxes and the proper capital charges incident to the continued functioning of the property. The Commission recognizes this when it makes allowance for density of traffic in the determination of reasonable rates. The share of overhead costs fairly attributable to interchange traffic may likewise be greater, relatively, where this density is low. New England Divisions, 66 I. C. C. 196, 199.

(3f) Evidence introduced to show that certain carriers are neither efficiently nor economically operated, within the meaning of section 15a of the act, has little bearing upon the measure of rates on individual commodities. A road is operated as a whole, and an inquiry as to whether it is economically and efficiently operated must of necessity be directed to the manner of its operation as a complete unit. Nevada Public Service Commission v. S. P. Co., 73 I. C. C. 240 246.

(3g) Complainant submitted a cost study for purpose of showing unreasonableness but no figures were presented to show investment, operation, and maintenance expense or revenue of a necessary part of the transportation facilities furnished by carrier in moving the traffic. HELD, cost study with such eliminations has but little value. Minnesota Steel Co. v. Director General, as Agent, 73 I. C. C. 571, 574, 575.

(3h) It has been held by the courts that a rate may not lawfully be fixed by a regulatory tribunal which is based alone on the out-of-pocket costs ascribable to that particular traffic, but to be lawful the rate must be sufficient to cover a ratable proportion of the average cost of freight traffic generally, including a return on the property devoted to public service. To hold otherwise would compel the performance of a certain specified kind of service at less than average cost. The extension of this principle to other classes of traffic, if pursued far enough, would bankrupt the

road. Transcontinental Cases of 1922, 74 I. C. C. 48, 69.

(3i) The requirements of section 15a may not be defeated or jeopardized by the action of particular rail carriers seeking to augment their own net earnings, irrespective of the effect of rate changes adverse to the carriers in the country generally, or of a large territorial group. Transcontinenal Cases of 1922, 74 I. C. C. 48, 71.

(3j) It clearly would defeat the intent of Congress to foster transportation by rail and water in full vigor if the rail carriers were permitted, at practically little or no profit to themselves, to operate so as to deprive water carriers of traffic which the water carriers would naturally handle. It must be borne in mind that where the out-of-pocket theory is used as a rate basis, there is inevitably thrown upon the rest of the traffic the task of providing the bulk of the net return contemplated in section 15a. Too wide an extension of the out-of-pocket theory would transpose the entire burden of producing dividends and interest and meeting other fixed charges upon only a part of the traffic carried. Transcontinental Cases of 1922, 74 I. C. C. 48, 71.

(3k) Cost is only one of the elements to be considered in arriving at a reasonable charge for switching. Switching and Absorption at Minneapolis, 74 I. C. C. 116, 119.

(3l) Cost is only one of the elements to be considered in arriving at a reasonable charge. Charges at other points where the transportation conditions are substantially similar may serve as a guide. Switching and Absorption at Minneapolis, 74 I. C. C. 119.

(3m) To the extent that additional tonnage can be handled without the use of additional motive power, the movement expense per car will be measurably curtailed. Crude Oil from Louisiana Points, 74 I. C. C. 623, 626.

(3n) The cost of service alone is not the controlling element or factor in rate making. All the conditions as well as the environment of the traffic must be considered. Adriatic Mining Co. v. C. & N. W. Ry., 78 I. C. C. 611, 632.

§19. Credit.

See Advanced Rates §7 (3); Credit Account.

IMPORTANT CASES SINCE 1908

(a) It was urged as a reason for permitting an advance in freight rates in Official Classification territory that the increase was necessary to maintain the credit of American railroads. It appeared that in 1895 the average rate paid by all the railroads of the country was 4.69 per cent. In 1909 this figure had been reduced to 3.9 per cent and the saving computed upon the indebtedness of

1909, represented by this decrease in the rate of interest, would have amounted to $77,000,000. HELD, the credit of American railroads has gained rather than lost in ten years, and if the credit of American railways is still sound either at home or in foreign money markets it is not because of, but in spite of, the declarations of railroad operators. In Re Advances in Rates—Eastern Case, 20 I. C. C. 243, 251, 252.

(b) Credit of railroads has suffered from causes independent of rates. Five Per Cent Case, 31 I. C. C. 351, 419.

(c) Commission can not accept as final or determinative the recital of failures of particular carriers at particular junctures to borrow except at abnormal or prohibitive rates of interest. 1915 Western Rate Advance Case, 35 I. C. C. 497, 530.

ALL OTHER CITATIONS

Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 267; 1915 Western Rate Advance Case, 35 I. C. C. 497, 532, 533, 534, 540.

§19½. Custom.

See Blanket Rates §5.

§19¾. Customs Duty.

IMPORTANT CASES SINCE 1908

(a) Custom duty on common brick to Canada prevents entering that market unless Canadian output falls short. Rates on Common Brick to Canada, 26 I. C. C. 129, 131.

§20. Distance of haul.

See Supra §18 (9); Blanket Rates §9; Bridges and Tolls; Differentials; Distance Rates; Evidence §58; Reasonableness of Rates §10 §36; Through Routes and Joint Rates §6; Ton-Mile Revenue.

CASES 1887-1908

(a) The fact that the rates of a railroad company are not established on a mileage basis does not necessarily make out their illegality or injustice. La Crosse M. & J. Union v. Chicago, M. & St. P. R. Co. (Com.) 2 I. C. R. 9, 11.

(b) The principle that the ratio of freight rates decreases with the increase of distance is true when the rates are based upon distance and cost alone, and are not affected by other modifying conditions; the extent of traffic carried, and the character of the country traversed are to be considered. Lincoln Board of Trade v. Burlington & M. R. Co. (Com.), 2 I. C. R. 95.

(c) Where, taking the shortest route from Chicago to Lincoln and from Chicago to Omaha as the basis, the disparity in rates corresponds quite closely with the difference in distance, in attempting to apply the principle acknowledged in making freight rates, that with the increase of distance the ratio of the rates shall decrease, it must be qualified by the considerations: (a). That the Omaha rate is not based alone upon the mileage of the defendant road to that city, but as several lines from Chicago concentrate at Omaha, the mileage of the shortest route is the one which practically governs in the determination of the rate. (b). The different routes traversed by the various lines competing for traffic from Chicago to Omaha, with their various points of intersection, cannot be overlooked. (c.) It is also to be considered that the rates from Omaha and from Lincoln to interior Nebraska points are so arranged that the rates from Chicago are practically the same whether the freight is handled by jobbers at Omaha or at Lincoln. (d) Neither can the ratio of rates charged through the sparsely settled regions of the distant west decrease in proportion to distance without depriving the carriers of necessary revenue, and although this condition may not exist about Lincoln, yet, as the road is almost wholly confined to supplying the necessities of a farming population and the distribution of farm products, the possibilities of such tariff reduction as is made upon roads fed by mineral resources cannot be expected. (e) So, also, the application of the principle that with the increase of distance the ratio of the rate shall decrease, is affected by the fact that the rate for the shorter distance is of itself, alone, often too low to be treated as a fair criterion for points beyond, so that a long line, met at a given point by a short line, and compelled to accept a scarcely remunerative rate, when the point is passed may fairly increase its charges with some consideration of the absolute distance by its own line from the originating point in a ratio more rapid than if it had been able to grade its own rates continuously throughout its line. (f) Water competition and other controlling causes produce a like effect, and a situation upon a navigable river is to be considered, although it does not at present afford active competition with the railroad. Lincoln Board of Trade v. Burlington & Mo. River R. Co., 2 I. C. R. 95.

(d) Where a road makes the same charge to one point that it does to another only one third or two thirds the distance on the same line presumptively its charges to the last-mentioned point are unjust and illegal. Re Chicago, St. Paul & Kansas City R. Co., 2 I. C. R. 137.

(da) That under like conditions freight can be carried proportionally lower for long than short distances is as nearly settled as anything relating to railroad charges can be. Equal mileage rates would often prevent legitimate competition and give a monoply in transportation to the best and shortest road. New Orleans Cotton Exchange v. C. N. O. & T. P. R. R. 2 I. C. C. 289, 292.

(e) A departure from the rule of equal mileage rates as applied to the several branches of a road is not conclusive that such rates are unlawful; but the burden is on the company making such departure to show its rates to be reasonable when disputed. Northwestern Iowa Grain & Stock Shippers' Asso. v. Chicago & N. W. R. Co., 2 I. C. R. 431.

(f) Besides terminal expenses and other aggregate charges not depending upon the distance freight is moved, there are other conditions which justify a lower proportionate charge for longer distances. Coxe v. Lehigh Valley R. Co. (Com.), 3 I. C. R. 460.

(g) At the hearing of this case upon its merits, the Commission prescribed the freight rate upon peaches in carload lots, from New Jersey and the Delaware Peninsula, to Boston, Massachusetts. One of the defendants filed a motion for rehearing, based upon the claim that some of the other defendants construed the decision of the Commission as justifying them in insisting that the freight charge prescribed should be divided among the carriers on a mileage basis merely: HELD, That the former decision of the Commission could not be fairly construed as justifying the claim that the single freight charge between the interstate points should be divided on a mileage basis merely; that many of the considerations which induced the fixing of an increased rate for the special service were peculiar to the Pennsylvania Railroad Company and in which the other carriers east of the Harlem River did not participate; that, under the pleadings and evidence in this case, the Commission could only prescribe a single rate for the service as an entirety, to be reasonably and fairly divided among the several carriers by themselves; that the motion for a rehearing be overruled. Boston Fruit & Produce Exchange v. N. Y. & N. E. R. Co., 3 I. C. R. 604.

(h) The doctrine that transportation charges should be proportioned to the distance between different points, where those distances are greatly dissimilar, has never been advocated by the railroads or recommended by the Commission. While distance is an ever present element in the problem of rates and not infrequently a controlling consideration, the general practice of rate making is opposed to the principle of exact proportion, and there is no opportunity for its application in all conditions. Where all the distances brought into comparison are considerable and the differences between them relatively small, there should be substantial similarity in the respective rates unless other modifying circumstances justify disparity. Eau Claire Board of Trade v. C. M. & St. P. R. Co., 4 I. C. C. 65, 76.

(i) Where all the distances brought into comparison are considerable, and the differences between them relatively small, there should be substantial similarity in the respective rates, unless other modifying circumstances justify disparity. Eau Claire Bd. of Trade v. Chicago M. & St. P. R. Co. (Com.), 4 I. C. R. 65.

(j) Transportation charges need not be proportioned to the distances between different points, where those distances are greatly dissimilar. Eau Claire Bd. of Trade v. Chicago M. & St. P. R. Co. (Com.), 4 I. C. R. 65.

(k) The doctrine that transportation charges should be proportioned to the distances between different points, where those distances are greatly dissimilar, has never been advocated by the railroads or recommended by the Commission. While distance is an ever-present element in the problem of rates and not unfrequently a controlling consideration, the general practice of rate making is opposed to the principle of exact proportion, and there is no opportunity for its application under present conditions. Where all the distances brought into comparison are considerable and the differences between them relatively small, there should be substantial similarity in the respective rates unless other modifying circumstances justify disparity. Eau Claire Board of Trade v. Chicago M. & St. P. R. Co., 4 I. C. R. 65.

(l) Rates on wheat from points in North Dakota to Minneapolis should be adjusted upon the basis of distance over nearest practicable routes. Minneapolis Chamber of Commerce v. Great Northern R. Co. (Com.), 4 I. C. R. 230.

(m) As a general rule it is probably true that rates should not be proportioned strictly to mileage, the more distant point should usually have a greater actual rate, but a less proportionate or ton mile rate than the nearer point. This is due largely to the fact that the terminal expenses which do not vary with distance constitute a considerable part of the entire charge in either case and operate to reduce ton mile rates on the longer haul. Chamber of Commerce of Minneapolis v. G. N. R. Co., 4 I. C. C. 230, 239.

(n) A departure from the rule of equal mileage rates as applied to the several branches of a road or system of roads is not conclusive of the unlawfulness of rates, but the company making such departure should have satisfactory reasons for such variance of rates and must show them to be reasonable when disputed. Freight Bureau v. C. N. O. & T. P. R. Co., 4 I. C. C. 592, 611.

(o) Distance or mileage is by no means the only, or in many cases the most important, factor in rate making, but, other things being equal, it is a circumstance of great, if not controlling weight. Freight Bureau v. C. N. O. & T. P. R. Co., 4 I. C. C. 592, 611.

(p) Mileage, while a circumstance to be considered with all the other facts and conditions, is by no means controlling, or the most important. Interstate Commerce Commission v. L. & N. R. Co., 5 I. C. R., 656.

(q) In cases involving a difference in the rates between two points of shipment the mileage is a circumstance to be considered with all other facts and conditions, but is not controlling or the most important. Interstate Commerce Commission v. Louisville & N. R. Co. (C. C. M. D. Tenn.), 5 I. C. R. 656.

(r) The influence of water competition via the Atlantic on rail rates from northeastern cities to southern territory is not so great, as appears by the proof in these cases, as to account for or justify the difference between the mileage rates from those cities and the mileage rates from Chicago and Cincinnati to such territory under the rates complained of, and the fact of that influence on rates from the former cities cannot be invoked as a justification of rates from the latter, which, after due allowance for such influence as a substantially dissimilar circumstance, still appears on comparison of the two sets of rates to be unduly preferential to the former and unjustly discriminative against the latter. In rates from different territories to a common market, "relative equality is necessary in the degree of the similarity" of circumstances and conditions attending the transportation in the two cases. Freight Bureau v. Cincinnati, N. O. & T. P. R. Co. et al, 6 I. C. C. 197.

(s) Carriers have no right to disregard distance and natural advantages for the purpose of bringing about commercial equality. Commercial Club v. Chicago, R. I. & P. R. Co., 6 I. C. C. 647.

(t) Distance is an important element in the determination of rates, and in the absence of other influences it is a controlling factor. When carriers claim justification for higher rates from a competing locality on the ground of greater distance, and the complainant, representing such locality, fails to show circumstances which operate to eliminate distance from consideration or to counteract its influence, such higher rates, if made in accordance with the principle of distance, will not be held unreasonable. Freight Bureau of Cincinnati v. Cincinnati, N. O. & T. P. R. Co., 7 I. C. C. 180.

(u) Distance, in the absence of other influences, controls in the determination of rates; and the higher rates on the ground of greater distance from a competing locality will not be held unreasonable unless there are circumstances operating to eliminate distance from consideration or counteract its influence. Freight Bureau of Cincinnati v. Cincinnati, N. O. & T. P. R. Co., 7 I. C. C. 180.

(v) That the rates for longer hauls are comparatively lower, though absolutely higher, than the charges for shorter hauls over the same lines, does not necessarily show that the charges for the shorter hauls are unreasonable, though such fact tends to establish unreasonableness, and may under some circumstances be sufficient for that purpose. Kentucky R. R. Comrs. v. Cincinnati, N. O. & T. P. R. Co., 7 I. C. C. 380.

(w) Distance is always an element in determining the reasonableness of a

rate. It is sometimes a controlling element. In the making of rates under actual conditions, however, it is often largely, and sometimes, within certain limits, entirely, disregarded. Board of Railroad Commissioners of Kentucky v. C. N. O. & T. P. R. R. Co., 7 I. C. C. 380, 383.

(x) Distance is an important element in the making of rates, and it has been held that a carrier would not be compelled to disregard distance in order to place two localities upon commercial equality. Savannah Bureau of Freight & Transportation v. C. & S. R. Co., 7 I. C. C. 458, 474.

(y) Distances by shortest available routes are the proper distances on which to base comparison of differentials in grain rates from the same points of shipment to two different markets, situated as are Milwaukee and Minneapolis with reference to various sources of grain supply. Chamber of Commerce v. Chicago, M. & St. P. R. Co., 7 I. C. C. 481.

(z) Carriers frequently disregard distance in making their rates, and they may lawfully do so under some circumstances; but distance should be regarded whenever possible, and no previous decision is authority for a ruling that a carrier may be compelled to disregard it for the purpose of placing two communities upon a commercial equality. New York Produce Exchange v. B. & O. R. Co., 7 I. C. C. 612, 667.

(aa) Distance is recognized as an element in determining the amount of a rate upon the assumption that it corresponds in a degree with the cost of service. It does not, however, necessarily follow that the greater cost of service necessarily goes with the greater distance. New York Produce Exchange v. B. & O. R. Co., 7 I. C. C. 612, 668.

(bb) Distance is undoubtedly a factor, and perhaps ought to be a much more important factor, in the determination of rates, but in the present case, where the distances from the grain fields of Kansas to Kansas City, St. Louis and Galveston vary from 100 to 1000 miles, any attempt to adjust the rates on grain to those cities upon the sole basis of the rate per ton per mile would be impracticable. Board of R. Comrs. v. Atchinson, T. & S. F. R. Co., 8 I. C. C. 304.

(cc) With many mines nearer, the nominal rate on coal from one 1,200 miles distant of no practical importance. Harrell v. M. K. & T. Ry. Co., 12 I. C. C. 27.

(dd) Distance not conclusive. Enterprise Manufacturing Co. v. Ga. R. R. Co., 12 I. C. C. 130.

(ee) Nautical miles, in division of rates two for one by rail, above Hatteras, three for one below. Warren Manufacturing Co. v. Southern Ry. Co., 12 I. C. C. 381.

IMPORTANT CASES SINCE 1908

(ff) Unquestionably mileage is a factor in the determination of the reasonableness of rates, but how important, or what effect it should have in judging the fairness of a challenged rate is a question which must be answered in the light of all the facts surrounding the exaction of the rate. The Commission will not compel the establishment of rates solely according to mileage; the public benefits, the greater volume of business of carriers warranting lower rates to all, the force of competition and many other potent considerations may far outweigh a claim of right founded only on geographic location. Fort Dodge Commercial Club v. I. C. R. R. Co., 16 I. C. C. 572, 581.

(gg) In passing upon the reasonableness of a blanket rate, the rate to the nearest point must be offset against that to the most distant point. Commercial Club of Salt Lake City v. A. T. & S. F. Ry. Co., 19 I. C. C. 218, 226.

(hh) It is well settled that distance is always a factor to be taken into consideration in determining either the reasonableness of a rate by itself or in considering its relation to rates to other points, but it is equally well settled that distance alone is not controlling. Competition is an important element and there are various other considerations, all of which must be taken into account in determining the fact whether a particular rate or a system of rates is or is not reasonable. Shippers and receivers of freight are entitled as a matter of law to rates that are reasonable and that do not operate to unduly discriminate against them. Corporation Commission of North Carolina v. N. & W. Ry. Co., 19 I. C. C. 303, 309.

(ii) The fact that a commodity does not ordinarily move to any great distance from the mill is entitled to proper weight. Florida Cotton Oil Co. v. C. of G. Ry. Co., 19 I. C. C. 336, 339.

(jj) Equal rates should be applied for equal distances under similar operating conditions, and the fact that the tonnage out of one point may be somewhat heavier than out of another does not justify a difference in the rates where the other conditions are similar. Sioux City Commercial Club v. C. & N. W. Ry., 22 I. C. C. 110, 114.

(kk) It is not enough to show that in miles the distance is less from a producing center via one gateway to a consuming center in order to equalize the rate between the same points via another gateway. It must be shown that the cost of transportation is less, or rather that the combination of rates is less as estimated by the general level of rates in the territory through which the transportation is conducted. In Re Investigation of Unreasonable Rates on Meats, 23 I. C. C. 656, 669.

(ll) Where grouping is reasonably done the shorter distances to the markets may be determined by the average distances from the points reached by two or more systems within a given group. Superior Commercial Club v. G. N. Ry. Co., 25 I. C. C. 342, 345.

(mm) An unreasonable rate by the direct line cannot be allowed for the purpose of permitting the circuitous line to engage in the business at a reasonable profit. Grain Rates in C. F. A. Territory, 28 I. C. C. 549, 558.

(nn) And the through charge should bear a proper relation to distance. St. Matthews Produce Exchange v. L. & N. R. R. Co., 32 I. C. C. 233, 236.

(oo) But ordinarily distance alone cannot determine the measure of rates, and glaring inconsistencies cannot be explained on the ground of varying transportation conditions. Commercial Club of Joplin v. M. P. Ry., 32 I. C. C. 226, 232.

(pp) Relatively equal rail distances from ports should have due weight in making of rates to Columbia and Augusta. Columbia Chamber of Commerce v. S. Ry. Co., 32 I. C. C. 504, 505.

(qq) Other things being equal, the longer the distance the less the revenue per ton mile. Northbound Rates on Hardwood, 32 I. C. C. 521, 529.

(rrss) Distance, grade and curvature are important elements in cost of service, especially on mountain lines. Class and Commodity Rates to Salt Lake City, Utah, 32 I. C. C. 551, 555.

(tt) It is a fundamental principle in rate making that differences in distance as between producing points or markets gradually lose their effect as the distance to destination increases. Grain Rates from Milwaukee, 33 I. C. C. 417, 424.

(uu) The average distance all commodities are hauled on the line of one carrier is not representative of the actual distance specific commodities included in that average are hauled because of the interline transportation of many commodities, and the total distance hauled is a very important factor in rate making. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 260.

(vv) Distance while important, is not necessarily controlling, especially when there is under consideration a comprehensive fabric and relationship of rates to points in various sections of the country. Michigan Paper Mills Traffic Asso. v. A. & V. Ry., 38 I. C. C. 517, 520.

(ww) In comparing group rates with other rates the average distance from the various points in the group to points of destination in question must be considered, and not the distances from the points on borders of the group. Brush Creek Mining & Mfg. Co. v. L. & N. R. R. Co., 39 I. C. C. 449, 453.

(xx) The element of distance is an important matter to be considered in determining the reasonableness of rates in their relation to other rates with which they are compared, but distance alone is not controlling. Corp. Comm. of Virginia v. C. & O. Ry. Co., 40 I. C. C. 24, 29.

(yy) The familiar rule that differences in rates between points of origin should decrease as the distances to the destinations increase is generally subject to two conditions: (1) that the difference in distances from competing points of origin to the shorter distant destinations is substantially the same as that to the farther distant destinations, and (2) that the general circumstances and conditions surrounding the transportation are substantially the same to the farther distant as to the shorter distant points. Lake Superior Paper Co. v. M. St. P. & S. Ste. M. Ry. Co., 42 I. C. C. 109, 112.

(zz) The principle generally is that as distance increases the earnings per car mile should decrease, but it does not invariably govern. The location of points in different territories where different conditions, prevail occasionally warrants

departure from the rule that per ton mile and per car mile earnings should decrease with distance. Hormel & Co. v. C. G. W. R. R. Co., 43 I. C. C. 23, 25.

(3a) The Commission is unable to subscribe to the doctrine that carriers may observe and disregard constructive mileage at their pleasure. If such mileage is reflected in their rates applicable over a route necessitating the use of a bridge, it may not then be disregarded in ascertaining the mileage of that route. Paducah Board of Trade v. I. C. R. R., 43 I. C. C. 537, 540.

(3b) Rates may properly be higher relatively for shorter than for longer hauls. Fruits from Florida, 43 I. C. C. 595, 596.

(3c) Contention made that differences in rates as between points of origin should normally decrease as distances to points of destinations increase. In applying that rule it is necessary that the difference in distances from competing points of origin should be substantially the same to the nearer as to the farther destinations, and that the general circumstances and conditions surrounding the transportation should be substantially the same in both cases. Lake Superior Paper Co. v. Director General, 61 I. C. C. 709, 716.

(3d) While it appears that the rates complained of are higher, distance considered, than those generally prevailing from nearby points to the destinations in question or to points in that vicinity, over the same or other routes, the question whether the rates were unreasonable or unduly prejudicial can not be determined from that standpoint alone. National Fireproofing Co. v. Director General, 62 I. C. C. 49, 55.

(3e) It may be cheaper to perform a given service for equal distances to points located on a trunk line or on its branches, than to points on an independent line. Pioneer Lumber Co. v. Director General, 64 I. C. C. 485, 489.

(3f) When distances of over 500 miles are involved, the fact that the service is by two lines is largely negligible. Kansas Rock Salt Co. v. A. T. & S. F. Ry., 69 I. C. C. 745, 749.

(3g) The Commission has never held that it is necessary in order to preserve advantages of location, that rates should be based rigidly on mileage or on cost of service. A road is built and operated as a complete unit. The cost of maintenance and operation of any particular portion is charged against no specific traffic with respect to point of origin or destination but is represented in the general cost of moving all traffic. While difficulties in operating and traffic conditions are considerations of importance, a certain degree of flexibility is permitted in adjusting rates if commercial and competitive conditions warrant. Klamath County Chamber of Commerce v. S. P. Co., 74 I. C. C. 207, 213.

(3h) Rates to sections served by several lines of railroad should not necessarily be based upon the short-line distance, or established with regard to either the weakest or strongest line, but should be determined with reference to all reasonably directed lines. South Dakota Ry. Commrs. v. A. & W. Ry. Co., 74 I. C. C. 295, 306.

(3i) Ordinarily for long hauls the rates should be the same to destinations of substantially the same distances. Democrat Printing Co. v. Director General, 74 I. C. C. 595, 597.

(3j) In distributing commodities in competitive territory, the point that can avail itself of a long carload haul and a short less than carload haul is ordinarily entitled to a lower total transportation charge than the point using a short carload haul and a long less than carload haul. Certain-Teed Products Corp. v. A. T. & S. F. Ry., 77 I. C. C. 444, 445.

(3k) Recognized fact that grain rates from Missouri River have not been made with any strict regard to distance. Atchison Board of Trade v. A., T. & S. F. Ry. Co. 80 I. C. C. 350, 360.

(3l) It is a common principle of rate making, although not always followed, that differentials should diminish with increasing distance and vanish when mileage on which differential is based becomes inconsiderable in proportion to total mileage to destination. Western Coal Rates, 80 I. C. C. 383, 413.

(3m) Element that must be considered in judging reasonableness of a differential adjustment as between two competitive fields is relative distance to common markets. Western Coal Rates, 80 I. C. C., 383, 419.

(3n) Vast differences in transportation conditions can not be disregarded in comparing rates from two competitive fields. Western Coal Rates, 80 I. C. C. 383, 419.

C. C. 697, 698; Vulcanite Portland Cement Co. v. P. R. R. Co., 74 I. C. C. 697, 698; Petroleum to Memphis and Ohio River Points, 77 I. C. C. 73, 75; Ft. Worth Cotton Mills v. A., T. & S. F. Ry. Co., 80 I. C. C. 18, 25; Atchison Board of Trade v. A., T. & S. F. Ry. Co., 80 I. C. C. 350, 360; Reduced Rates from New York Piers, 81 I. C. C. 312, 324; Cramp & Sons Co. v. Director General, as Agent, 83 I. C. C. 55, 57; Cairo Board of Trade v. A. G. S. R. R., Co. 83 I. C. C. 761, 764.

§21. Dividends.

IMPORTANT CASES SINCE 1908

(a) Dividends are of little importance apart from an understanding of the value of the investment. Railroad Commission of Tex. v. A. T. & S. F. Ry. Co., 20 I. C. C. 463, 483.

(b) Whether a carrier earns dividends or not sheds little light on the question as to whether the rate on a particular article is reasonable. For, if the carrier's total income enables it to declare a dividend, that does not justify an order requiring it to haul one class of goods for nothing, or for less than a reasonable rate. I. C. C. v. U. P. R. R., 222 U. S. 541, 549, 32 Sup. Ct. 108, 56 L. ed. 308.

§21½ Emergency Rates.

See Emergency Rates; Experimental Rates.

IMPORTANT CASES SINCE 1908

(a) Where the Commission is considering a novel service only recently introduced, whose efficiency and permanence are in some degree problematical, the question of fixing a reasonable rate is attended with no little uncertainty, and immediate establishment of an appropriate and reasonable charge for the new service is possibly requiring more of carriers than in fairness could be exacted. Arlington Heights Fruit Exchange v. S. P. Co., 39 I. C. C. 88, 93.

ALL OTHER CITATIONS

Schreiber Hay & Grain Co. v. C. B. & Q. R. R., Unrep. Op. A-946; Lake Cargo Coal Rates, 46 I. C. C. 59, 192.

§22 Equipment Furnished.

See Infra §48½; Cars and Car Supply; Classification §12⅞; Equipment; Minimum; Reasonableness of Rates §13; Refrigeration §4¼;

CASES 1887-1908

(a) It is one of the plain duties of the carrier to properly equip its road with all such cars as experience has shown to be necessary for the right movement of freight along its line, and in like manner to have depots and arrangements for the proper and necessary receipt and delivery of freight at stations along its line. A carrier is not warranted under the statute in setting up its own omission in these respects to justify an exceptional rate which unjustly discriminates against one locality in favor of all others and against one kind of traffic in favor of another. Board of Trade of Chicago v. C. & A. R. Co. 3 I. C. C. 233, 244.

(aa) When an article of traffic does not move on account of burdensome rates, and the carrier is hauling a considerable number of empty cars in the direction such article would naturally move if accorded a lower rate, the carrier may be justified in carrying at a rate sufficient to induce the movement of

such trafic, provided no extra or additional charge is in consequence put upon other articles carried; but the fact that freight will furnish return loads for empty cars is not a reason for the reduction of rates on such freight when it does not appear that the rates are unreasonable. F. Schumacher Milling Co. v. C. R. I. & P. R. Co., 4 I. C. C. 373, 378.

(b) While the hauling of flat cars empty to the mills, and the practice of shippers to load cars below their capacity, are conditions which, to the extent they exist, are properly taken into account by carriers in fixing rates, it must be assumed that they were considered by defendants in making and maintaining the rates so long in force prior to the advance complained of. Tift v. Southern R. Co., 10 I. C. C. 548.

IMPORTANT CASES SINCE 1908

(c) While the Commission frequently considers in determining reasonableness of rates the character of equipment necessary for the transportation of various commodities, it cannot go into the matter of subordinate grades of equipment used in transportation. Bash Fertilizer Co. v. Wabash R. R. Co., 18 I. C. C. 522, 524.

(d) An advance in rates is not justified because of acquiring new equipment where the former equipment was sufficient. City of Spokane v. N. P. Ry. Co., 19 I. C. C. 162, 171.

(e) Equipment is an element to be considered in determining the reasonableness of a rate. Casey Hedges Mfg. Co. v. C. of G. Ry. Co., 26 I. C. C. 63, 64.

(f) The return movement of empty cars used in the anthracite traffic is an element of expense that should be given consideration. But in considering comparisons of revenue, while giving due weight to extraordinary operating cost attributable to the anthracite traffic, we also have in mind that the heavy tonnage hauled in trains which transport coal offsets to a large extent the expense of returning the empty coal cars. It is therefore, apparent that these various elements of extraordinary expense attributable to the transportation of certain commodities must be considered from the standpoint of cost of service and not by adjustments of average revenue. Rates for Transportation of Anthracite Coal, 35 I. C. C. 220, 260.

(g) And the present chaotic congested conditions of carriers' terminals, tracks, and facilities make it imperative that corrective measures should be carefully studied and established and rigidly enforced; efforts to attain that end have in full measure Commission's hearty co-operation. Export Grain Storage Charges, 42 I. C. C. 530, 542.

(h) Maintenance of equipment is one of the large items of expense in the operating costs of common carriers and maintenance of equipment expenses had increased to a more marked extent than other operating expense items. Lehigh Portland Cement Co. v. Director General, 58 I. C. C. 429, 434.

(i) A lower rate is justified on shipments moving in equipment furnished by shippers than would be reasonable for shipments moving in carriers' equipment. Missouri Portland Cement Co. v. Director General, as Agent, 64 I. C. C. 243, 246.

(j) Shipments which move in equipment furnished by shipper are entitled to lower rates than would be reasonable for shipments in carriers' equipment. St. Louis Chamber of Commerce v. Director General, as Agent 74 I. C. C. 308, 321.

(k) Particularly on long hauls full utilization of carriers' equipment is an important factor in keeping cost of transportation at a minimum. Sugar Cases of 1922, 81 I. C. C. 448, 461, 462.

Equipment: A. C. L. R. R. Co., 66 I. C. C. 727; Construction and Repair of Ry. Equipment: N. Y. C. R. Co., 66 I. C. C. 732; Gypsum Plaster and Stucco to North Pacific Coast, 83 I. C. C. 753, 759.

§22a. Equalization of Cost Theory.

ALL CITATIONS

Trunk-Line and Ex-Lake Iron Ore Rates, 69 I. C. C. 589, 602.

§22¼ Erroneous Rates.

See Advanced Rates §5 (6); Erroneous Rate.

CASES 1887-1908

(a) That a shipper is allowed a rate better than he was entitled to, by mistake of the station agent, does not entitle him to such rate upon later shipments. Rea v. Mobile & O. R. Co., 7 I. C. C. 43.

IMPORTANT CASES SINCE 1908

(b). But a carrier should not be penalized for a purely technical omission or error made in an effort to bring its tariff into conformity with the Commission's regulations. Highland Park Mfg. Co. v. S. Ry. Co., 26 I. C. C. 67, 69.

(c) An "erroneous' rate repeatedly published, and upon which considerable traffic has moved for upward of two years, does not stand upon the basis of an ordinary "error.' In re Export Rates on Flaxseed Products from Minneapolis, 27 I. C .C. 246, 247.

(d) The claim of error or sentiment as an excuse for increasing a long existing rate adjustment has been urged in many cases before the Commission. In a situation where the adjustment which it is sought to change was voluntarily established by the carriers and has been in force for many years, the allegation of error is not persuasive. Proportional Rates to Ohio River Crossings, 43 I. C. C. 458, 464.

ALL OTHER CITATIONS

Okerson v. Penn. R. R. Co., 18 I. C. C. 127; American Trust & Saving Bank v. C. M. & St. P. Ry. Co., 20 I. C. C. 104; Wausau Advancement Asso. v. C. & N. W. Ry., 28 I. C. C. 459, 460; Bartlett Co. v. C. P. & St. L. Ry. Co., Unrep. Op. A-203; Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 591; Rates on Fresh Fruits and Vegetables to Seattle, Wash., and Other Points, Unrep. Op. A-912; Hermann Vinegar & Pickle Co. v. C. R. I. & P. Ry., 38 I. C. C. 737; Darby & Brown v. B. & O. R. R Co., 42 I. C. C. 544, 546; Nebraska Bridge Supply & Lumber Co. v. N. C. & St. L. Ry., 35 I. C. C. 86, 89; Riverside Portland Cement Co. v. A., T. & S. F. Ry., 45 I. C. C. 139; Inman, Akers & Inman v. S. Ry., 45 I. C. C. 564; Morris & Co. v. M. K. & T. Ry., 49 I. C. C. 101; Illinois Brick Co. v. Director General, 57 I. C. C. 320; Substitution for Increases in Rates, 61 I. C. C. 518, 522; Atlantic Refining Co. v. Director General, as Agent,

80 I. C. C. 298; Staley Mfg. Co. v. C. P. Ry. Co., 80 I. C. C. 512; Oils to Nebraska and South Dakota, 83 I. C. C. 29; La Fayette Box Board Co. v. Director General, as Agent, 83 I. C. C. 307; Utah-Idaho Sugar Co. v. Director General, as Agent, 83 I. C. C. 566.

§22½ Expert Evidence.

See Supra §40; Undercharges §4.

IMPORTANT CASES SINCE 1908

(a) Testimony as to the effect an increase in rate will have on the business of shippers involved is always revelant, but should be established by direct evidence as distinguished from opinion testimony. Stonega Coke & Coal Co., v. L. & N. R. R. Co., 39 I. C. C. 523, 549.

(b) But the mere statement of an opinion that a certain increase in rates will put shippers out of business is not conclusive, since this fact can be established by direct proof of actual conditions, and in many other ways. Stonega Coke & Coal Co. v. L. & N. R. R. Co., 39 I. C. C. 523, 549.

(c) Unreliability of mere opinion, evidence is well understood by all who have had experience with it. An opinion is personal to the man who gives it. It depends upon his education, his mental habit, his present mental state, and is influenced by his environment and often controlled by objective point which he desires to reach. The same man may hold different opinions upon same subject at different times. Texas Midland 75 I. C. C. 136.

ALL OTHER CITATIONS

Wichita Falls & W. Ry. Co. of Tex. v. Asher (Tex., 1915), 171 S. W. 1114, 1117; Reshipping Rates on Grain from Omaha, 32 I. C. C. 590, 591.

§23 Failure to Serve Prejudiced Locality.

See Discrimination §7.

IMPORTANT CASES SINCE 1908

(a) The fact that the rails of certain carriers do not actually extend to a shipping center which is discriminated against cannot relieve such carriers from responsibility for the effect of rates, which create such discrimination, which they control and in which they participate. Chamber of Commerce of Newport News v. S. Ry. Co., 23 I. C. C. 345, 353.

(b) It is well settled that unless circumstances and conditions affecting transportation to any two points are substantially similar the fact that one has lower rates than the other does not of itself constitute undue preference Tulsa Traffic Asso. v. A. T. & S. F. Ry. Co., 40 I. C. C. 9, 11, 12.

§24 Fixed Charges.

IMPORTANT CASES SINCE 1908

(a) The fixed charges of a railroad sometimes represent the entire value of the property. Instances could easily be cited where a railroad ought not to earn in excess of its fixed charges. Mountain Ice Co. v. D. L. & W. R. R. Co., 15 I. C. C. 305, 319.

§25 Governmental Regulation and Operation.

See Control and Regulations; State Rates and Regulation; War Legislation.

IMPORTANT CASES SINCE 1908

(a) Government regulation, in some respect, has largely increased carriers' revenues. Shoemaker v. C. & P. Tel. Co., 20 I. C. C. 614, 618.

(b) It has become increasingly clear, since the outbreak of the European War, that unification in the operation of the railroads during the period of conflict is indispensible to their fullest utilization for the national defense and welfare. Unification of Railroad Operation, 47 I. C. C. 757.

(c) If unification of the railroads is to be effected by the carriers it should be effected in a lawful way, with financial assistance from the Government treasury. Unification of R. R. Operation, 47 I. C. C. 757, 760.

(d) The lawfulness of rates can not be determined by a construction of General Order 28 of the Director General. Silica Sand Producers Asso. v. C. B. & Q. R. R. 73 I. C. C. 588, 589.

(e) Though the president took over the transportation systems as entities, and under various general orders of the director general each system filed its own tariffs, made an inventory of its material and supplies, and had a separate bank account and in the order promulgating the wage award of the Railroad Wage Commission each system was individually named, it does not follow that the carriers were not being operated, as required by the Federal control act, under a unified and coordinated national control and not in competition. American Hominy Co. v. Director General, as Agent, 74 I. C. C. 206.

(f) Rates can not be condemned upon the mere showing that carriers failed to comply with instructions of the director general. Atlas Portland Cement Co. v. Director General, as Agent, 74 I. C. C. 653.

ALL OTHER CITATIONS

In Re Advances in Rates, Eastern Case, 20 I. C. C. 243, 285; In Re Advances in Rates, Western Case, 20 I. C. C. 307, 321, 353; Morgan Grain Co. v. A. C. L. R. R. Co., 19 I. C. C. 460, 472; Farmers Elevator Co. v. C. M. & St. P. Ry 47 I C. C. 475, 476.

§25¼ Harbor or Water Facilities.

IMPORTANT CASES SINCE 1908

(a) Harbor facilities at Duluth, Minn., shown to be superior to those at Chicago, Ill. Rates on Grain and Grain Products, 56 I. C. C. 133, 140.

§25½ Hearsay Evidence.

IMPORTANT CASES SINCE 1908

(a) The Commission, however, will not refuse to consider the accuracy of inspected track scales of a carrier, on mere hearsay evidence that a certain shipment weighed less on private scales. Miller & Co. v. C. T. W. Ry. Co., Unrep. Op. A-417.

§25¾ History of Rates.

See Infra §29; Past Rates.

IMPORTANT CASES SINCE 1908

(a) Though only an element to be considered, and in no way conclusive, the history of rates involved in a proceeding sometimes has a material bearing upon the question of what rates should properly apply. This is particularly true if the former rates are shown to have been voluntarily maintained. Green v. A. & V. Ry. Co., 43 I. C. C. 662, 674.

§26 Import Duty.

See Advanced Rates §18 (6).

IMPORTANT CASES SINCE 1908

(a) When establishing rates and privileges to the United States from Cuba in comparison with those from Florida the carriers have no right to count the import duty as a part of the transportation charge. Florida Fruit & Vegetable Ass'n v. A. C. L. R. R. Co., 17 I. C. C. 552, 561.

§26½. Interest on capital.

IMPORTANT CASES SINCE 1908

(a) The rise in the rate of interest results from influences that also produce a rise in the general level of prices. The same necessity that requires the carriers to pay a higher rate of interest on capital borrowed compels them to pay also higher prices for certain articles. This double disability rests, it is true, upon other industrial enterprises, although, as previously indicated, the ordinary concern may advance the prices upon its own output, and thus in a way offset the disability of rising costs with less delay and hindrance than can a public service industry. 1915 Western Rate Advance Case, 35 I. C. C. 497, 532.

(b) The interest on bonds alone is only indirectly a criterion of the adequacy of operating returns, inasmuch as the bonds may remain but slightly affected in price so long as the net income of the carrier easily covers the bond interest. The situation is not unlike that of a mortgage on realty where the value of the mortgage may remain wholly unaffected by a progressive shrinkage in the value of the property mortgaged, so long as there exists a clear margin, even though a decreasing margin, in the value of the equity over and above the mortgage indebtedness. The rise in the rate of interest on capital borrowed results from influences that also produce a rise in general level of prices, 1915 Western Rate Advance Case, 35 I. C. C. 497, 532, 533.

§26¾. Intention.

IMPORTANT CASES SINCE 1908

(a) The matter of intention may be of importance under some circumstances, but it can not be controlling; and if such discrimination as the Act condemns is not shown an order based upon a finding of wrongful intention would find no warrant in law. Traffic Bureau, Sioux City Commercial Club v. Am. Exp. Co., 39 I. C. C. 703, 721.

§27. Investment relying on rate.

See Supra §6: Advanced Rates §13; Evidence §6; Reasonableness of Rates §14.
